

Pickup Tips

for Collection Day

Keep it Light

Each filled garbage can or bag should be light enough to carry easily with one hand to the curb or lane.

Bag the Loose Stuff

Place all loose garbage, such as sawdust, ashes and vacuum contents, in sealed bags. Loose garbage can blow out of the truck into the collectors' eyes and litter neighbourhoods. Small kitchen bags and grocery bags should be placed in larger bags or cans.

Leave Some Space

On collection day, leave some space between your recyclables and your garbage. This helps both the recycling and garbage operators identify what they should collect at your home.

Clear a Path

Clear the snow away from your garbage and recyclables - then collectors can see and get to your materials.
