

## ***CONTROLLING CHILDREN WITH DIAPERS WHO USE WADING POOLS***

- ☛ All fecal matter must be contained in the garment worn by the child, so as not to contaminate the wading pool. This includes disposable diapers, bathing suites, and any other type of bathing garment.
- ☛ Tight fitting rubber panties either by themselves or worn over a diaper is recommended.
- ☛ Nude children are not allowed to enter the pool.
- ☛ Parents or persons responsible for looking after the child are required to ensure the garments are properly maintained, changed when required, and do not fall into a state of deterioration.
- ☛ All children are to be supervised. Pool operators must remove any unsupervised children from a wading pool.
- ☛ Close the wading pool if fecal material is introduced into the wading pool water and implement the cleaning and disinfecting procedures for a fecal contaminated swimming pool.

## ***CLEANING AND DISINFECTING BLOOD SPILLS***

If you come in contact with human blood use the following procedures:

- ☛ Wash your hands with warm water and soap as soon as possible after contact. If blood has contacted an open sore or cut contact your doctor.
- ☛ Protect your hands with disposable latex gloves when cleaning spills.
- ☛ Wear disposable latex gloves when helping a patron with a nose bleed or bleeding cut.
- ☛ Wash anything that has been soiled with blood with soap and water first. Then, wash a second time with a disinfectant. (i.e. one part sodium hypochlorite to 9 parts water solution.) If disinfecting with a quaternarium ammonium compound, follow the manufacturer's instructions to determine the concentration.
