Comments:

Feeder Breakers

Visual Inspect Requirements: G=Good, A=Acceptable, P=Poor Comments are required for all items identified in Poor condition.

1. Confirm identification tag / lamacoid is installed.
2. Look for visual signs of overheating.
3. Inspect and torque connections.
4. Inspect and test any electro/mechanical interlocks.
5. Confirm disconnect operation.
6. Check door mechanical condition.
7. Exercise circuit breaker.
8. Confirm cables are supported and routed appropriately.
9. Visually assess the general condition of the installation.

Note: Complete an appropriate Breaker Inspection Form for all breakers with separate adjustable Long and Short trip settings, Ground trip settings, or > 250A frame size.

General Comments:										

Motor Starters / Contactors

Overcurrent Protection Type:	B=Breaker (Thermal Magnetic), M=Motor Circuit Protector, F=Fuse
Overload Protection Type:	T=Thermal, SS=Solid State, I=Intelligent
Visual Inspect Requirements:	G=Good, A=Acceptable, P=Poor Comments are required for all items identified in Poor condition.
1.	Confirm identification tag / lamacoid is installed.
2.	Look for visual signs of overheating.
3.	Inspect and torque connections.
4.	Inspect and test any electro/mechanical interlocks.
5.	Confirm disconnect operation.
6.	Check door mechanical condition.
7.	Exercise circuit breaker.
8.	Confirm cables are supported and routed appropriately.
9.	Visually assess the general condition of the installation.
Note:	Complete a Motor Starter Inspection Form for all Motor Starters Size 4 or larger, with VFDs, or with Soft Starters.
