#### **PART E – SCOPE OF SERVICES**

Revise: E1.1.6 (b) (iii) to read:

- (iii) The wet well chamber is noted to be in poor condition. Perform a condition assessment to review the structural condition of the wet well. Provide detailed design for the replacement of wet well chamber.

Revise: E1.1.6 (b) (iv) to read:

- (iv) The Metcalfe Pumping Station is located near the Red River. Provide a hydrological review of groundwater conditions and determine if groundwater monitoring is required during construction. Determine if dewatering or soil treatments/modifications such as soil freezing or grouting should be utilized.

Add E1.1.6 (b) (iv) ♦ to read:

- ♦ If the condition assessment of the wet well determines that the wet well can be rehabilitated, review potential rehabilitation options and recommend solution. A Change in Scope of Services will be issued for the addition of detailed design for the wet well rehabilitation and deletion of detailed design for the replacement of the wet well and hydrological review of groundwater conditions from the contract.
