PART E - SPECIFICATIONS

GENERAL

E1. GENERAL

E1.1 These Specifications shall apply to the Work.

E2. GOODS

E2.1 The Contractor shall supply personal anti trauma padding in accordance with the requirements hereinafter specified.

- (a) The must be able to be worn on top Level II dress;
- (b) The PATP must accommodate officers' body armour;
- (c) The officer must be able to don the equipment in a minimal amount of time. Ideally, time to suit up should be 2 minutes or less, unassisted:
 - (i) The CMU initially deploys in Level II gear (flame resistant tactical pants and shirt, ball cap and base internal body padding). This deployment would be in a non-riot situation. Officers must be able to move up to Level III gear (PATP) as the situation dictates. There may be very little advance notice of major change in the crowd dynamic, and it is essential that PATP be able to be put on by individual officers, without assistance in minimal time. Speed of use is of the essence.
- (d) The suit should not be overly complex in design (i.e. there should be minimal risk that the PATP will be put on incorrectly in stress laden situations);
- (e) To ensure the ability to quickly don the equipment the PATP must be configured as a suit. That is, the padding cannot consist of individual body padding pieces;
- (f) The PATP must provide officers with protection from the type of blunt trauma likely to be encountered in a riot situation: body blows from pickets or baseball bats, rocks, bricks etc;
- (g) The PATP must be flame retardant (Nomex or some similar material as covering);
- (h) The suit should offer moderate protection from caustic and corrosive chemicals;
- (i) The PATP must be extremely durable and able to withstand the rigors of a riot engagement with suffering damage that compromise officer safety;
- (j) The PATP must be flexible enough and of limited bulkiness in design so as not to impair an officer's movement while performing strenuous activities such as affecting an arrest, self defence or weapon and shield tactics;
- (k) The suit must not be excessively heavy or bulky so as allow smaller officers to carry the equipment from staging areas to incident scenes;
- (l) The design must accommodate a wide range in body shapes and sizes;
- (m) The suit should allow officers to rest in a reasonably comfortable state during periods of inactivity with minimal readjustment for reengagement;
- (n) The design must accommodate a duty belt and side arm;
- (o) The design must allow for easy cleaning;
- (p) The design must allow for local repair and maintenance;
- (q) The suit must incorporate a 'man-down' carry strap;
- (r) The design must not encompass excessive grab points;
- (s) The design must not produce excessive overheating of the officer in field conditions;

- (t) The suit must accommodate officers wearing a variety of gear (gas vests, medic vests, tact belts, etc).

E3. DELIVERY

- E3.1 Goods shall be delivered by August 31, 2005, f.o.b. destination, freight prepaid.
- E3.2 Goods shall be delivered between 8:00 a.m. and 4:30 p.m. on Business Days.
- E3.3 The Contractor shall off-load goods as directed at the delivery location.
