Please note the following and attached changes, corrections, additions, deletions, information and/or instructions in connection with the Bid Opportunity, and be governed accordingly. Failure to acknowledge receipt of this Addendum in Paragraph 8 of Form A: Bid may render your Bid non-responsive.

PART E – SPECIFICATIONS

ADD the following to **E4 DESCRIPTION OF WORK**:

- ADD** E4.36 New siding and flashing are to be installed on the South arena wall adjoining area B1. Tyvek is to be first installed over the entire wall and this in turn followed by 18 ga. z-bars securely fastened to the underlying wood framing. Do not attach to the wall sheeting. The z-bars are to be deep enough to ensure that the siding can run directly up to the underside of the overhang bypassing the built out area on the upper portion of the wall. Install the specified siding in a vertical manner. Install with new bottom drip flashing and other applicable flashing. The existing upper shingle roof overhang is to be completely clad in pre-finished sheet metal. A new drip flashing is to be fit under the shingles on this same edge. Siding is to be kept approximately 8" to 12" up off the roof.
- ADD:** E4.37 The two East chimneys on area C1 are to be extended to a minimum of 24" above the top of the new chimney curbs.
- ADD:** E4.38 Install new C-Port rubber sleepers under the thru wall duct stands on area B1.
