TELEPHONE NO. (204) 986-4246

**THIS ADDENDUM SHALL BE INCORPORATED
INTO THE BID OPPORTUNITY AND SHALL
FORM A PART OF THE CONTRACT
DOCUMENTS**

Template Version: A20070419

Please note the following and attached changes, corrections, additions, deletions, information and/or instructions in connection with the Bid Opportunity, and be governed accordingly. Failure to acknowledge receipt of this Addendum in Paragraph 10 of Form A: Bid may render your Bid non-responsive.

PART D – SUPPLEMENTAL CONDITIONS

- Add: D2.2(d) Connection to the spigots of the 2,134 pipes cast into the Water Treatment Plant structure, which were supplied to the Contractor by Lafarge and are cast with the spigot facing out.
- Revise: D14.1 to read: Each individual proposed to perform Work under the Contract, where the Work involves access into an existing facility, shall be required to obtain a Criminal Record Search Certificate from the police service having jurisdiction at his place of residence.
- Revise: D16.1 to read: The Contractor shall achieve critical stages of the Work in accordance with the following requirements:
(a) June 13, 2008 – Completion of 2134 WTP Overflow within the DBPS compound area, from the existing 1500 overflow to Manhole 4.
- Revise: D24.1 to read: The Work shall commence on Site on March 17, 2008 with the construction of the work within the DBPS compound, from the existing 1500 overflow to Manhole 4.
- Add: D24.2 The construction of the overflow from Manhole 4 to the Water Treatment Plant shall not commence prior to May 26, 2008.
- Add: D24.3 The construction of the overflow east of the electrical ductbank shall not commence prior to June 9, 2008.

PART E – SPECIFICATIONS

- Add: E14 TEMPORARY CROSSINGS
- Add: E14.1 The Contractor may construct additional temporary ramps over the electrical ductbank. The design for the temporary ramps shall be submitted to the Contract Administrator for review prior to construction and shall bear the seal of a professional engineer registered to practice in the Province of Manitoba
- Add: E14.2 The temporary ramp shall be designed and constructed in such a manner so as to prevent any additional loads (live or dead loads) being transmitted to the ductbank during construction or operation. All temporary ramp materials shall be removed at the completion of construction.
