
Appendix E – Space Function Relationship Diagram

Space Function Relationship Diagram

- Spaces which house noise-generating activities should be prioritized for placement on the BRT-facing side of the building.
- Spaces which house hazardous materials or HM supply management activity spaces should be prioritized for location on the BRT-facing side of the building.
- Spaces whose activities most closely resemble the character of the neighboring residences to the south should be prioritized for placement on the Community-facing side of the building

Bus Rapid Transit Property
