FORM N(R1): PROPONENT PROPOSAL - REQUIREMENTS

Instructions for filling out Form N: Proponent Proposal - Requirements

1. Complete Form N: Proponent Proposal - Requirements
2. Follow the proposal instructions in the Proposal Instructions section below

PROPOSAL INSTRUCTIONS

1. **For each Mandatory requirement, provide a Y (Yes) or N (No), indicating whether your solution can meet the requirement.** Y indicates that the solution you are proposing will meet the requirements listed in the requirement statement. N indicates that the solution you are proposing will not meet the requirements. **The Proponents are advised that an N (No) response for a Mandatory requirement shall result in the Proposal being non responsive.**
2. **For each Non-Mandatory requirement indicate which Proponent response code that best describes your solution:**

Y – Available Out of the Box: the solution for the requirement is currently available in the existing product “out of the box”. Configuration may be required to enable the feature (requirement will be met through changes to settings of tables, switches, and rules without modification to the source code). Requirement is installed and operational at other sites and can be demonstrated to the City of Winnipeg.

C – Available via Customization: the solution for the requirement is not currently available in the existing product “out of the box”, but may be incorporated via customization of the solution components. Requirement will be met through changes to the source code which would require analysis and re-application during updates, upgrades, or when applying software patches.

F – Future Availability: the solution for the requirement is not currently available, but will be available in an upcoming planned product release. If this option is indicated, include the date/timeframe when the requirement will be available for implementation, which should be either:

- a) A planned release up to 3 calendar months after the RFP.331-2019 competition close date, where an additional Proponent response code of **3** should be provided;
- b) A planned release up to 6 calendar months after the RFP 331-2019 competition close date, where an additional Proponent response code of **6** should be provided, or
- c) A planned release up to 12 calendar months or longer after the RFP 331-2019 competition close date, where an additional Proponent response code of **12** should be provided.

3 – Third Party Supplied: the solution for the requirement is expected to be met by using a third party vendor’s existing product, either integrated or non-integrated.

N – Not Possible: the solution for the requirement will not be provided by the Proponent.

3. For each requirement in which the City has noted as “Please Describe”, and/or asked specific questions, Bidder should include additional information, referencing the specific Ref #, at the end of the section and/or as appendices. **Ref # is highly important to ensure linkage between requirement and description.**

Notes:

1. An omitted response will be assumed to be the same as a response code of “N”.
2. Any deviation from the response code will be re-coded at the discretion of the City of Winnipeg.

Shall have the option of registering multiple vehicles	System Operations and Management	M56	
Shall support Android devices	Solution Architecture	M57	
Shall support iOS devices	Solution Architecture	M58	
Shall support Windows 10 devices	Solution Architecture	M59	
The solution shall utilize monitoring tools to proactively identify potential incidents or breaches	Solution Architecture	M60	
Contractor's operations staff shall perform active monitoring of event logs to proactively remediate application flaws that impair integrity and usability; proactively address security issues	Solution Architecture	M61	
Shall meet the target of a 2 second (or better) web page response time for staff and public users, and within any offered mobile application.	Performance	M62	

Template Version:

Requirement Description	Requirement Category	RFQ Requirement Ref#	Proponent Response (Y, N)
Shall have sufficient capacity to handle an annual increase in transaction volume of 15% to 50%	Capacity	M63	
Shall have an overall system availability of 99.9%, 24x7x365	Availability	M64	
Shall have and maintain a disaster recovery plan to handle significant service outages.	Availability	M65	
Contractor shall agree the City has the right to decline a scheduled outage which impact the availability of the system and suggest alternate timing	Availability	M66	
Shall provide technical support options Monday to Saturday 8am to 8pm via toll-free phone system and email	Support and Service Level Management	M67	
All incidents shall be reported to the City in no more than 2 days from the occurrence	Support and Service Level Management	M68	
Priority Scenario Response Target P2: (highest priority for resolution): Severely affecting some key users, or impacting on many users- shall meet 1 hour response time.	Support and Service Level Management	M69	
Priority Scenario Response Target P3: No severe impact, but rectification cannot be deferred until the next scheduled release or upgrade- shall meet 1 hour response time	Support and Service Level Management	M70	
Priority Scenario Response Target P4: No severe impact to service- shall meet 24 hours response time	Support and Service Level Management	M71	
Shall provide hourly updates to the City on P2 and P3 issues, and daily updates for P4 issues until resolution.	Support and Service Level Management	M72	
Priority Scenario Resolution Target P2:(highest priority for resolution):Severely affecting some key users, or impacting on many users- 4 business hours resolution shall be met	Support and Service Level Management	M73	
Priority Scenario Resolution Target P3: No severe impact, but rectification cannot be deferred until the next scheduled release or upgrade- 8 business hours resolution shall be met	Support and Service Level Management	M74	
Priority Scenario Resolution P4: No severe impact to service- 24 business hours resolution shall be met	Support and Service Level Management	M75	
Shall provide transactional auditing and related reporting based on industry standards	Security	M76	

Template Version:

Information shall be transmitted through a secure encrypted channel.	Security	M77	
Passwords shall be stored as per industry standard.	Security	M78	
Shall not store credentials in insecure locations (i.e. cookies, headers, hidden fields, etc.)	Security	M79	
Shall provide an easy to use mechanism to allow users to change their password	Security	M80	
Shall provide a forgotten password recovery mechanism which should have a limit on the number of attempts.	Security	M81	
Shall provide common logout buttons on every page to encourage users to logout when complete	Security	M82	
Shall provide a simple administrative mechanism for reviewing the account status of users (i.e. locked out users, etc.).	Security	M83	
Customers shall be able to view all successful transactions for a given date range. This information should be exportable in CSV format and receipts should be able to be produced in PDF format.	Security	M84	
Shall provide an easy to use customer account management website where the customer can track usage, time, date, and other account information	Security	M85	
Customers shall be able to amend any of their account details as necessary. For security reasons, changes to the mobile or landline phone numbers should be through a customer service representative.	Security	M86	
Shall support role-based security	Security	M87	
Credentials shall be transmitted through a secure encrypted channel.	Security	M88	
Shall be able to provide the user of the proposed solution a log of their last login time (in case of fraudulent usage)	Security	M89	
The Contractor shall agree to examine the results of any 3rd party assessment and consider remediation options that reduce or eliminate identified vulnerabilities to make the solution more secure.	Security	M90	
Shall be a PCI certified solution that can be implemented in a PCI compliant	Compliance	M91	

Template Version:

manner based on PCI DSS version 3.2.1 and can continually be updated to maintain compliance as the PCI DSS standard evolves over time.			
The Contractor shall keep 3 years PCI compliance related documentation and activities in respect to this project and work for the City	Compliance	M92	
Proposed solution shall support compliance with Canadian Anti-Spam Legislation (CASL)	Compliance	M93	
Shall provide certification or validation of compliance with PCI DSS Standard on City request	Compliance	M94	
Shall confirm that any and all confidential information related to the City shall be sited within Canada (Canada data sovereignty), and no duplicates or portions thereof shall be sited outside of Canada.	Information Management	M95	
All information shall maintained for the full term of the contract.	Information Management	M96	
Shall have a process to destroy the confidential information upon contract termination after transmittal to the City, following the retention and disposition schedules of the City	Information Management	M97	
The City shall only provide access to Confidential Information, including "Personal Information" as defined by The Freedom of Information and Protection of Privacy Act (FIPPA), as specified in this contract. Any collection, use, disclosure, storage, or destruction of Personal Information is done so by the contractor as an information manager pursuant to s. 44.1 of The Freedom of Information and Protection of Privacy Act.	Information Management	M98	
The City shall retain custody and control over all Confidential Information collected by, transferred to, stored by, or otherwise accessed by the Contractor. Authority over all information use, disclosure, access, destruction and integrity remains with the City.	Information Management	M99	
Contractor shall only use, access, or view Confidential Information to the extent necessary to provide the services specified in this contract	Information Management	M100	

Template Version:

Requirement Description	Requirement Category	RFQ Requirement Ref#	Proponent Response (Y, N)
Contractor shall Not disclose Confidential Information to any third party, including subcontractors or agents, without Customer's prior written consent;	Information Management	M101	
Contractor shall Ensure that no person under its supervision or control makes any unauthorized copies or reproductions of, or discloses, any Confidential Information , in whole or in part, in any form or medium;	Information Management	M102	
Contractor shall Ensure that its officers, employees, and agents are aware of and comply with the requirements and obligations in this contract and any applicable legislation, including FIPPA;	Information Management	M103	
Contractor shall keep the Confidential Information strictly in confidence and take such steps as are necessary to protect the confidentiality of the confidential information and ensure that it is used, accessed and disclosed only in accordance with the terms and conditions of this contract and any applicable legislation, including FIPPA	Information Management	M104	
The Contractor shall put into place reasonable security arrangements, including administrative, technical and physical safeguards, that ensure the confidentiality and security of the Confidential Information and that guard the Confidential Information against such risks as unauthorized use, access, alteration, disclosure, and destruction (each a "Breach"). These security measures take into account the sensitivity of the Confidential Information and the medium in or through which it is stored, handled, transmitted, transferred or disclosed.	Information Management	M105	

Template Version:

Requirement Description	Requirement Category	RFQ Requirement Ref#	Proponent Response (Y, N)
The Contractor shall establish and comply with written security procedures and policies respecting the Confidential Information, which include provisions for identifying and recording breaches and attempted breaches respecting the Confidential Information; and corrective procedures to promptly address any such breaches.	Information Management	M106	
The Contractor shall confirm that any and all data related to the City be sited within Canada (Canada data sovereignty), and no duplicates or portions thereof be sited outside of Canada. Based on applicable law, certain exceptions may be granted for narrowly focused data sets	Information Management	M107	
Shall be able to purge confidential information based on best industry practices and the retention periods as laid out in the City's Records Management By-law 86.2010	Information Management	M108	
Shall be able to interface with industry leading payment machines and enforcement systems, or any service provider identified by the City.	Integration	M109	
Shall ensure that pertinent transactional data can be instantaneously transmitted to future payment machines based on industry accepted secure communication methods and protocols as approved by the City.	Integration	M110	
Shall allow the ability to create special parking privileges/ eligibilities/discounts for specific user groups		M111	

Template Version:

<p>The Contractor shall confirm that all information and materials acquired by the Proponent, or to which the Proponent may be given access, if successful under this Request for Proposal, ("Confidential Information") shall not be stored, transported, or transmitted ("Sited"), and no duplicates or portions thereof shall be sited outside of Canada, in whole or in part.</p>	<p>Systems Information</p>	<p>M112</p>	
<p>The Contractor shall confirm that that all Confidential Information shall be maintained for the full term of the Contract at minimum, unless otherwise directed by the City in writing.</p>	<p>Systems Information</p>	<p>M113</p>	

Template Version:

B. Non-Mandatory Requirements			
B1. General Requirements			
Requirement Description	Requirement Category	RFQ Requirement Ref#	Proponent Response (Y, C, F, 3, N)
Should provide registration options in other platforms/technologies (Facebook, etc.).	Customer/User Interface and Experience	NM1	
Should provide the following payment options for registered customers: IVR, smartphone application, and mobile web. The Contractor is encouraged to provide payment options through QR codes, NFC or RFID and other innovative payment formats (Pay Pal, Google Wallet, Apple Pay, etc.).
