Insulation Resistance Test

Perform insulation resistance measurements for breakers >= 250A, or as specified.

Temperature: °C

Source: ☐ Disconnected ☐ Connected (Source Isolated)

Load: ☐ Disconnected ☐ Connected (Load Isolated)

Approval is required, prior to leaving cables connected during the test.

Test Voltage (VDC)	**Insulation Resistance (MΩ)**								
	Phase To GND (Breaker Closed)			**Phase To Phase (Breaker Closed)**			**Line to Load (Breaker Open)**

Comments:

Feeder Breakers

Visual Inspect Requirements: G=Good, A=Acceptable, P=Poor Comments are required for all items identified in Poor condition.

1. Confirm identification tag / lamacoid is installed.
2. Look for visual signs of overheating.
3. Inspect and torque connections.
4. Inspect and test any electro/mechanical interlocks.
5. Confirm disconnect operation.
6. Check door mechanical condition.
7. Exercise circuit breaker.
8. Confirm cables are supported and routed appropriately.
9. Visually assess the general condition of the installation.

Note: Complete an appropriate Breaker Inspection Form for all breakers with separate adjustable Long and Short trip settings, Ground trip settings, or > 250A frame size.

	Exercise All Circuit Breakers: ☐ Yes ☐ No		Comments:	

Insulation Resistance Test

Test Preparation:
Source:
☐ Disconnected
☐ Connected with Source Isolated

Note: Approval of City's Representative is required, prior to leaving cables connected during the test.

Equipment Temperature: °C

Temperature Correction Factor to 20°C:

Test Voltage	**Insulation Resistance (MΩ) Ground all Phases not under test!**							
	A-GND		**B-GND**		**C-GND**		**N-GND**	
	RDG	20°C	RDG	20°C	RDG	20°C	RDG	20°C

Test Summary

☐ Test Passed
☐ Test Inconclusive
Further Investigation Required.
☐ Test Failed

Test Voltages: 120-300V → 500 VDC Test Voltage 301-600V → 1000 VDC Test Voltage

Comments:

Load/Feeder Breakers

Breakers < 100A and Without Inst. Setting

List by model of breaker. Multiple breakers of varying ampacity may be listed per line.

Type	**Manufacturer**	**Model Series**	**Interrupting Rating (kA)**	**Positions/Circuits**	**Notes**
A					
B					
C					
D					
E					
F					

Load/Feeder Breakers

Breakers >= 100A or with Inst. Setting

List each breaker individually. Complete separate inspection form (F-BKR-MC-LV) for breaker if >= 250A, or has long, short, or ground fault settings.
