PART E - SPECIFICATIONS

GENERAL

E1. APPLICABLE SPECIFICATIONS AND DRAWINGS

E1.1 These Specifications shall apply to the Work.

E1.2 The following are applicable to the Work:

Drawing No.	Drawing Name/Title
C100	TREE CLEARING LIMITS

GENERAL REQUIREMENTS

E2. LOCATION AND SCHEDULE OF WORK

E2.1 The Contractor shall promptly report any delay or change to an agreed commencement and completion date to the Contract Administrator.

E2.2 The Contractor shall not begin Work under this Contract prior to a pre-construction meeting being scheduled and held between representatives of the Contractor and the Contract Administrator.

E3. LAYOUT

E3.1 The Contract Administrator shall provide layout of all property lines and boundaries of area to be cleared.

E4. SITE DEVELOPMENT AND RESTORATION

E4.1 The Contractor shall be responsible for establishing and maintaining access to and within the Site as required to undertake the Work.

E4.1.1 Construction of a temporary haul road/approach as required by the Contractor shall be the responsibility of the Contractor.

- (a) Site access and a temporary haul road shall be located as shown on Drawing C100.
- (b) The construction of a temporary approach shall not restrict flow within the existing ditch along Sturgeon Access. The Contractor shall submit a plan of how he will gain access to the Site to the Contract Administrator a minimum 5 working days prior commencement. Acceptable construction methods of the approach include:
 - (i) Approach constructed of clean stone 150 mm diameter or larger to permit water to flow through the granular material.
 - (ii) Two 450 mm culverts installed with inverts matching existing ditch bottom. Maximum 300 mm of fill/granular material may be placed on top of the culverts to ensure that if the ditch is filled with water, the temporary approach will be over-topped before water backs up onto the existing road shoulder.
- (c) In either case, the temporary approach must be gravel surfaced to prevent tracking of mud and debris onto the roadway.

E4.1.2 The Contractor shall restore the portion of haul road outside of the tree clearing limits (i.e. public right of way and any affected private property) to its original or better condition subsequent to the completion of the Work.

- (a) Existing ditches, roadways and gravel shoulders shall be restored to original or better condition, including removal of the temporary approach.

E4.1.3 Provision of all temporary traffic control measures as specified in CW 1130 shall be incidental to Site Development and Restoration.

E5. TREE REMOVAL

- E5.1 The Contractor shall remove trees in accordance with the requirements hereinafter specified.
- E5.1.1 The Contractor shall remove all trees within the extents shown on Drawing C100. The total area of forested land to be cleared is estimated to be approximately 0.46± hectares. The Contractor is expected to provide a Lump Sum fee for tree removal. However, no additional fees will be paid for tree removal if there are minor deviations from this estimated area.
- E5.1.2 The Contractor shall remove trees in a manner satisfactory to the Contract Administrator or designate and agrees that the Work may be inspected by City personnel.
- E5.1.3 Removal of trees (except Elm trees) shall be complete to a maximum height of 150 mm from ground level regardless of existing ground cover (e.g. snow, other plant material, etc.) or other conditions except where prior approval is given by the Contract Administrator or designate.
- (a) All trees (except Elm trees) and other vegetation cut down within the Site may be chipped and left within the Site.
 - (b) Note that all Elm tree material that remains within the Site must be treated as per the City of Winnipeg Urban Forestry Branch requirements and The Province of Manitoba Forest Health Protection Act and Regulations. Specifically, Elm trees are to be cut down to minimum 10 cm below ground level, the stump debarked and the wood chipped to have thickness of wood adhering to the bark in any dimension of not more than 5 cm.
- E5.1.4 Any trees outside of the clearing area which are damaged during construction activities shall be examined by a bonded tree care professional and pruned as required. Damaged trees which are not viable shall be replaced by the Contractor at their own cost.
- E5.1.5 The Contractor shall repair any damage resulting from the Work including, but not limited to, damage to turf, other trees, ditches, fences, etc. and shall report all damage immediately to the owner and the Contract Administrator or designate.
- E5.1.6 The Contractor shall comply with all Federal and Provincial laws and regulations and all City of Winnipeg by-laws. This shall include, but not be limited to, all aspects of the Manitoba Workplace Health and Safety Act and laws/by-laws affecting streets, safety, hours of work, noise, street blockage, correct use of signage and line clearance regulations of Manitoba Hydro, Manitoba Telephone System and Shaw.
- E5.1.7 Disposal of Trees
- (a) All Elm trees and cuttings from the Site must be delivered directly to the Brady Landfill.
 - (b) All trees except Elm trees may be:
 - (i) chipped and left on site;
 - (ii) disposed of at the Brady Landfill; or
 - (iii) disposed of at an offsite location chosen by the Contractor.
 - (c) If the Brady Landfill is used by the Contractor for disposing of trees under this Contract, the Contractor will be responsible to pay the tipping fee at the Brady Road Resource Management Facility (Wood Chip Processing and Storage Area).
 - (d) Brady Road Resource Management Facility (Wood Chip Processing and Storage) is open every day except for Remembrance Day, December 25, and January 1. Use of this facility is limited to the regular hours as established and changes on a seasonal basis. The hours of operation for the facility is available on the City of Winnipeg's Website (www.winnipeg.ca).
