#### Note:

- Permits for new single-family and two-family dwellings, detached secondary suites and additions, the number of inspections included in a project would be 7 (3 for building, 2 for plumbing, and 2 for electrical if applicable to the construction project). Since most of the required inspection points can be combined to include more than one permit, the inspections can be ‘transferred’ between permits on these projects. However, for many interior renovation projects or accessory structure (external to the house) projects which might include more than one permit (e.g. a garage with a building and electrical permit), the inspections would not be transferable because each electrical or plumbing contractor will typically call for inspections independently.
- There are two inspections in total per flood proofing permit package.
