

CITY OF WINNIPEG

ACCEPTABLE TREE SPECIES FOR BOULEVARD PLANTING

Quality of all trees shall meet the specifications in the most recent edition of the Canadian Standards for Nursery Stock as published by the Canadian Nursery Landscape Association. All tree seed source and rootstock shall be prairie hardy and capable of surviving in hardiness Zone 3 or lower. Caliper of all trees is to be measured at 150 mm above ground as the tree stands at the nursery.

The following is a list of tree species that are acceptable for boulevard planting in Winnipeg. Species of trees, other than those listed, may be planted, however require approval in writing by the City Forester. Specifications presented in this document shall supersede those contained in the Canadian Standards for Nursery Stock.
