Elm Bark Beetle Control Program Begins

Winnipeg, MB – The City of Winnipeg’s Elm Bark Beetle Control Program will begin Sunday, September 18, 2022, weather permitting.

The program intends to reduce the spread of Dutch Elm Disease (DED) by controlling the beetles that carry the disease.

It will begin in Insect Management Areas 41 (Armstrong Point, Broadway - Assiniboine, Legislature, Portage & Main, South Portage, The Forks, West Broadway, Wolseley), 47 (Inkster - Faraday, Luxton, St. John's, St. John's Park), and 50 (Jefferson, Kildonan Park, Seven Oaks).

Weekly public service announcements will be issued on Fridays throughout the program indicating which Insect Management Areas will be treated the following week.

Treatment will be conducted using Pyrate 480 EC® (chlorpyrifos), a chemical product sprayed directly onto the lower 50 centimetres of the tree trunk. This product has been approved for use in Canada by Health Canada’s Pest Management Regulatory Agency, and will be used in accordance with federally approved label directions by licensed pesticide applicators.

Register for notification

The City offers an automated telephone and email notification system. Residents who register for this service will receive weekly phone or email notifications for elm bark beetle control activities. To register for the automated email or telephone notifications, residents can go to [City of Winnipeg – Register for Notification](#) or [contact 311](#).
