CITY OF WINNIPEG CONSTRUCTION NOTICE

TO: Resident/Business on Stafford Street
RE: 2019-2023 Stafford/Taylor/Corydon Pavement Renewals – Tender 2 2022-2023

Please be advised that reconstruction will begin May 9, 2022 on sections of Stafford Street. This work will take place across all lanes from Corydon Avenue to Scotland Avenue as well as southbound lanes from Scotland Avenue to Ebby Avenue.

Construction start: May 9, 2022
Estimated completion: October 14, 2022

Traffic Impacts:

- On-street parking will be removed
- Traffic will be restricted to one lane in the northbound direction, the southbound direction will be closed
- Left turns to and from Stafford Street will be restricted with the exception of key intersections including Warsaw Avenue, Garwood Avenue and Ebby Avenue
- Eastbound to northbound left turns will be allowed on Grant Avenue and Corydon Avenue at Stafford Street
- Work on Stafford Street between Pembina Highway and Corydon Avenue will be completed in multiple stages, and will require several traffic control configurations
- Closure of side streets and approaches will be required at different times during construction; however, we will make every effort to minimize impacts to traffic and pedestrians
- Closures of private approaches will be discussed with the affected business/resident prior to the closure taking place
- Pedestrian access to residences and businesses will be maintained throughout construction
- Transit service will be maintained through out construction. Existing Transit stops may be temporarily relocated or closed on a case-by-case basis, depending on construction activities in the immediate vicinity
- Southbound Transit routes on Stafford Street will be rerouted to Harrow Street

Water service during construction – On Stafford Street between Garwood Avenue and Carter Avenue:

We may have to provide you with a temporary water service from time to time, by connecting an overland hose to your outside tap or within your building. To attach this hose, we will need to enter your property. If we cannot provide a temporary water service, we will coordinate with you and work to schedule any interruption so it will be the least disruptive.

We will also have to shut off your water service for a short time on a few occasions and will try to give you 24 hours' notice. If you are a business, we will do everything we can to schedule this outside of your regular business hours.

We may have to shut off your water without notice. If this happens, we will restore your service as quickly as possible, usually within four to six hours.

[City File No. 19-C-08]

[May 2, 2022]

Even though the new water main is disinfected once it is installed, you may find that the water tastes a little different and is cloudy. This is common after water main work. The water will return to normal within a few days. You can use the water and there is no need to take special precautions.

For more information on drinking water quality, visit the City website at Winnipeg.ca/waterquality.

During watermain construction:

- Your sewer service will not be interrupted
- Your garbage and recycling collection will not be affected

Follow-up:

Anyone with accessibility concerns, special access requirements or if you have any other questions regarding this construction, please contact, Derek Wiebe, by phone at (204) 292-6415 or by email at Derek.Wiebe@Stantec.com.

We appreciate your patience during construction and look forward to a completed project in the fall of 2023.

Sincerely,

Kevin Rae, P. Eng.
