

### Engagement Updates

#### Small Cell Technology Review Phase 1 Public Engagement Summary

The City is seeking to better understand the opportunities, issues, and value of small cell technology and the implementation of 5G service. The City is collecting feedback from residents and other stakeholders to help inform activities within the City's jurisdiction. In phase 1, we collected feedback to inform aspects of the small cell the small cell trials. We heard from residents through a randomly selected research survey, an online survey, an online poll, and through interviews.

A [public engagement summary](#) and [appendices](#) summarizing and responding to feedback are now available. The feedback collected has been reviewed by the City's internal working group and stakeholder advisory group as they continue to discuss cellular carrier's upcoming small cell trials. As the City explores our role with regards to guidance around small cell location, design, and consultation with the community, this feedback will assist in how the trials are structured and evaluated.

#### Urban Forest Strategy Phase 1 Public Engagement Summary

Phase 1 of public engagement aimed to develop a community supported, long-term urban forest vision that captures the community's perspectives on the city's identity, culture, and aspirations while identifying opportunities to preserve and protect, grow, and enhance the urban forest.

The [Phase 1 Public Engagement Summary](#) and [appendices](#) are now available.

Public input, along with findings from the review of the current state of Winnipeg's urban forest will help the project team create a draft Winnipeg Urban Forest Strategy. Phase 2 public engagement is expected to occur in the spring 2021 to gather feedback on the draft Winnipeg Urban Forest Strategy.
