Neighbourhood Greenway Reduced Speed Pilot

Neighbourhood greenways are on-street routes designated to comfortably and safely move both cyclists and pedestrians and motor vehicles. Greenways typically include a range of treatments from low-impact things like signage, bike signals, and pavement markings to varying degrees of traffic calming including a best-practice speed limit of 30 km/h.

Winnipeg currently has 11 greenways, all of which operate with a speed limit of 50 km/h. This summer, five of them are getting a (trial) speed reduction makeover.

The Neighbourhood Greenway Reduced Speed Pilot will evaluate the impact reduced speeds and additional traffic calming treatments have on improving conditions for cyclists and pedestrians along the following existing neighbourhood greenways:

- Roch Street from Poplar Avenue to Leighton Avenue [[see design details](#)]
- Eugenie Street from St. Mary's Road to Youville Street [[see design details](#)]
- Warsaw Avenue from Thurso Street to Pembina Highway [[see design details](#)]
- Machray Avenue from Fife Street to Main Street [[see design details](#)]
- Powers Street from Dufferin Avenue to Partridge Avenue [[see design details](#)]

We are asking those who live on or near these greenways or travel on them to take a [brief survey](#) until May 14 to tell us what you think.
