

Audit Plan 2018 Update

January 2018

AUDIT PLAN OVERVIEW

Purpose of an Audit Plan

The purpose of a formal audit plan is to provide a disciplined approach to the identification of potential audit projects. Formal planning has several benefits:

- It focuses scarce resources on priority or high-risk areas.
- It provides the basis for the involvement of clients and stakeholders in the audit planning process.
- It ensures that all business units (and associated risks) are considered for audit attention during the planning process.
- It serves as a standard against which to measure the performance of the Audit Department.

Audit Planning Process

The Audit Planning process is comprehensive and comprises several activities:

- identification and classification of auditable entities;
- evaluation of audit entities against standard criteria and risk factors;
- consultation with City Councillors and Senior Administrators;
- updating of *Service Risk Profiles*;
- creation of a *Corporate Risk Profile*;
- consideration of resources available and required by project type;
- selection of Audit Projects;
- presentation of our proposed Audit Plan to Audit Committee; and
- communication of our final Audit Plan to City Council.

The plan is based upon the risks and priorities that exist at a certain point in time. Since we operate in a dynamic environment, organizational risks and priorities constantly change and emerge.
