January 9, 2018

Re: Request for access to information under Part 2 of The Freedom of Information and Protection of Privacy Act: Application Number 17 11 946

On November 8, 2017, the City of Winnipeg received your request for access to the following:

All emails, documents, minutes, notes, text messages to and from Office of Public Engagement – regarding Wilkes Avenue Alignment to William R. Clement Parkway Extension and the holding of meetings with Charleswood residents.

On November 28, 2017, you were issued a fee estimate for the 8 hours in addition to the 2 free hours allotted by the Act for search and preparation of responses. On December 21, 2017, you revised your request to the following, for which you were issued a reduced estimate of costs:

All emails, documents, minutes, notes, text messages to and from Office of Public Engagement – regarding Wilkes Avenue Alignment to William R. Clement Parkway Extension and the holding of meetings with Charleswood residents, excluding any materials for public presentation, or any correspondence with residents or businesses.

On December 29, 2017, we received your payment for the fees associated with your narrowed request. Our search returned 463 pages of records, to which access will be granted in part, with severing, under the following exceptions to disclosure in the Act:

Disclosure harmful to a third party's privacy

17(1) The head of a public body shall refuse to disclose personal information to an applicant if the disclosure would be an unreasonable invasion of a third party's privacy.

Disclosures deemed to be an unreasonable invasion of privacy

17(2) A disclosure of personal information about a third party is deemed to be an unreasonable invasion of the third party's privacy if

(e) the personal information relates to the third party's employment, occupational or educational history;

Determining unreasonable invasion of privacy

17(3) In determining under subsection (1) whether a disclosure of personal information not described in subsection (2) would unreasonably invade a third party's privacy, the head of a public body shall consider all the relevant circumstances including, but not limited to, whether

(i) the disclosure would be inconsistent with the purpose for which the personal information was obtained.
Disclosure harmful to security of property

26 The head of a public body may refuse to disclose information to an applicant if disclosure could reasonably be expected to harm or threaten the security of any property or system, including a building, a vehicle, an electronic information system or a communications system.

Subsection 17(1) is a general mandatory exception protects the personal information of third parties (third parties are considered to be neither yourself as the applicant or city employees). This general clause is used in conjunction with clause 17(2)(e), where necessary to protect personal employment history; and 17(3)(i), which is applied to information which is provided on the understanding that the information will be used for a specific purpose and, by implication, it would be inappropriate for this information to be disclosed for another unrelated purpose. In this instance, the personal information was collected/used for the purposes of corresponding with the general public.

Subsection 26 is a discretionary exception to disclosure which protects information which would harm a public body’s security of property or system. It was applied to information which could be expected to harm the City’s information technology systems.

As required by section 7(2) of the Act, we have severed information that is excepted from disclosure and have provided you with as much information as possible.

As you requested a copy of these records, and as they can reasonably be reproduced, in accordance with section 14(1)(a) of the Act a copy of the records will be provided on payment of the required copy fees. In accordance with section 5(1) of the Access and Privacy Regulations, there are 463 pages at 20 cents per page which totals $92.60. Payment can be made by cheque or money order, payable to the City of Winnipeg. Personal cheques will require a 21 day business hold from the date received. Applicants have up to 30 days to pay the copy fee, after which the application will be considered to be abandoned. If you wish to make arrangements to view the records, please contact me by phone at 204-986-8738.

Section 59(1) of the Act provides that you may make a complaint about this decision to the Manitoba Ombudsman. You have 60 days from the receipt of this letter to make a complaint on the prescribed form to the Manitoba Ombudsman (mail: 750-500 Portage Avenue, Winnipeg, MB, R3C 3X1; telephone: 204-982-9130 or 1-800-665-0531).

Sincerely,

Konrad Krahn
Corporate Access and Privacy Officer
Summary of Public Engagement Phase One for the William R. Clement Parkway Extension Functional & Preliminary Design Study

Prepared for:
The City of Winnipeg

Prepared by:

WSP | MMM Group

5514150-000.130
1.0 PUBLIC INFORMATION DISPLAY SESSION

The first public engagement event for the Winnipeg R. Clement Parkway Extension Study was a Public Interactive Display Session (PIDS) Event held on March 19, 2015 from 4:30 to 7:30 pm in the Chapel of the Canadian Mennonite University (500 Shaftesbury Boulevard). The event was advertised in the Winnipeg Sun, Winnipeg Free Press, The Sou’wester, and through the City of Winnipeg’s social media outlets (Appendix A). In addition, a newsletter advertising the open house was emailed to stakeholders and mailed as unaddressed mail to area residents (Appendix A). Information about the event was also posted on the project’s webpage. A number of participants found out about the event through word-of-mouth and through a copy of the newsletter recipient posted at the dog park.

Approximately 300 people signed in at the event. Presentation storyboards (Appendix A) outlined the purpose of the study, the project study area, the project’s scope, phases, and timeline, as well as other pertinent information including maps and visuals.

Attendees were given the opportunity to provide feedback in various forms after reviewing the information. Participants were provided with sticky-notes and were encouraged to provide their comments and feedback directly on the storyboards. Participants were also provided with comment forms to be filled out and the end of the event. 153 paper comment forms were collected.

An online survey was also created via Survey Monkey, with a link provided to attendees and posted on the project webpage. The online survey included all materials presented at the PIDS event, included a series of questions, and allowed participants to provide comments/feedback on each storyboard. 23 individuals completed the online survey.

3.0 MAJOR THEMES

Overall, participants were divided in their support of the Parkway extension. Many see it as necessary to accommodate the current commuter traffic that occurs along Wilkes Avenue, Grant Avenue, and Elmhurst Road. Moreover, many see it as necessary to accommodate the future traffic resulting from the Ridgewood South development. Many participants were against the project altogether, voicing concerns about potential disturbances to existing residential development, natural habitats, greenspace, and the safety of nearby residents. Some want the City to focus on fixing current infrastructure rather than building new.

A number of participants also remained neutral about the project, understanding that a Parkway extension and infrastructure improvements are necessary as development occurs and the City grows, but voiced concerns about how the extension is constructed so as to minimize disturbances to the existing assets of the area.

A number of key themes were revealed by the public during the PIDS event, and through the online survey, these themes included:

Maintenance of the Dog Park
Many participants were very concerned about the loss of the dog park. This dog park is seen as a huge asset to the community, and although many commenters understand its temporary nature, they see it as adding much value to the community, not only for its dogs, but also for its residents. Many participants suggested that if the dog park is removed due to the parkway extension it should be replaced in a nearby location. Some suggestions included an off-leash area to be constructed somewhere in Assiniboine Forest, or in an area within the existing Parkway (north of Grant Avenue).
Loss of Greenspace & Disturbance of Harte Trail, Flora and Fauna

Much concern surrounded the future of Harte Trail. Harte Trail is also seen as a major community asset; community members use it for walking and cycling, and appreciate its natural flora and fauna. Many participants were very concerned with the potential loss of the trail and the potential disturbance of its natural habitat. Also, many participants were concerned about the general loss of greenspace due to the potential Parkway extension. A number of participants noted that they had moved to Charleswood for the quiet country living the area offers, which may be diminished as a result of the extension, particularly for residents whose properties may back onto the future extension.

To mitigate disturbance of the Harte Trail, a number of participants suggested that a grade separation be constructed at the Harte Trail as part of the extended Parkway. Alternatively, it was suggested that a pedestrian overpass be built as part of the Harte Trail, which could also serve as a wildlife crossing land-bridge.

Design/Location of the Parkway’s Extension

Some participants commented that the Parkway’s extension should include various grade separations. Many suggested that an overpass or underpass be built to accommodate the CN Rail line and Wilkes Avenue. A number of comments raised concerns about drainage if an underpass was to be built.

In regards to project phasing, a number of participants commented that they would prefer if Phase I of the extension be constructed all the way to Wilkes Avenue, so that traffic is diverted off of Elmhurst Road.

In regards to aesthetic, one participant would like the extension to be designed and built to the high-quality of the current Parkway (north of Grant Avenue). A number of participants mentioned that Active Transportation components should be implemented in the design of the Parkway’s extension. A few participants suggested that a tunnel be built from Grant Avenue to Wilkes Avenue to accommodate the Parkway extension.

Improvement of Wilkes Avenue

A number of participants noted that Wilkes Avenue should be twinned from Sterling Lyon Parkway to the Perimeter. Many believe that these improvements should be made before the Parkway’s extension is built. A few participants also mentioned that the intersection at Wilkes Avenue and Elmhurst Road should either be improved with lights or a traffic circle, or completely closed altogether.
Safety
A number of participants commented on safety concerns related to the high-speed traffic on the Parkway extension, particularly due to its close proximity to housing and schools. Concerns and questions were also raised about whether the extension will be a trucking route, and if transport trucks will be carrying dangerous goods.

Sound Attenuation & Lighting
Certain participants outlined concerns regarding resulting noise of the Parkway extension, and that the extension should be built with sufficient sound mitigation components. A suggestion to mitigate noise, and promote safety, was to decrease the speed on the Parkway extension to 60 km/hr. Concerns about noise were also outlined in regards to the construction of a future overpass. Many residents do not want the quiet nature of Charleswood to be affected by the Parkway extension.

Some participants also mentioned their concern with light pollution affecting areas adjacent to the proposed extension. Mitigation measures were also suggested to be implemented for the bright lighting required along the Parkway.
Are you at the meeting right now? There is an issue with recording?

I'm here now. All quiet and presentation on the go.

K good, thanks for following up

We should probably draft some policy/standard for these types of things

Yeah that would be great

Of course the one time I'm late

I think the three options would be: Three options to present to audience... as you noted 1. No recording & private meeting. 2. Yes. 3. Yes but only in presentation portion. Q & A section no recording as folks are asking questions.
section no recording as folks are asking questions.

And you know... not sure anyone else from CorpComm would know what to do

So good idea to have something in writing

I've asked WSP spokespeople to move to the front when people are asking questions

They are scattered around the room

Things are heating up

Yeah at the meeting Dave Jopling was designated as the person to step up if things got heated

Why couldn't he handle the recording thing?
Sorry I missed your call. I'm on the moment.

Oh I'm sorry

I told Luis that when he emailed.

I said Wsp said they would handle it if something came up

I told them that wsp had designated dave to handle this

Ok
Oh I'm sorry

I told Luis that when he emailed.

I said Wsp said they would handle it if something came up.

I told them that wsp had designated dave to handle this.

Ok

You'd better call me re WRCP

Not good
1.0 PROJECT OVERVIEW

- Last time project team went to the public was early 2016 (at this time, presented 3 options for the east-west alignment of Sterling Lyon/Wilkes).
- The project team was going to go back to the public last fall but the project was put on hold due to other City priorities.
- The Environmental Act application has been submitted to the Province, as this is a public process, the report was posted on the Province’s website, which includes the final
recommended design of the alignment. The Province did not notify WSP/the City in advance that this was going to be posted.
— The City requested that the Environmental Act application be put on hold and the Province agreed.
— The most contentious component of the study is the extension and alignment of SLP.
— Three options were evaluated for the extension of SLP.
— The recommended alignment for extension of SLP tries to minimize the number of homes taken.
— Eight full property takings are required.

### 2.0 LANDOWNER MEETINGS

#### 2.1 Format of Meetings
— DJ will commence the meetings with team introductions.
— SS will facilitate brief PPT presentation, should take approximately 10-15 minutes.
— The PPT presentation will be followed by a ‘general’ question period, which will be then followed by discussions around the table maps.
— Two large maps will be printed for discussion, landowners will be encouraged to mark-up the maps with post-its to add their comments about their property. At this point, landowners will have the opportunity to discuss their property with members of the project team.

#### 2.2 Presentation, review of draft PPT
— Slide 4: Technical Requirements to be removed from PPT.
— GC will provide content to be included on a slide regarding real estate/property acquisition.
— BS will make these changes and send PPT to the project team Thursday afternoon.

#### 2.3 Review of FAQs and Comment Sheet
— Additional questions and answers will be added to FAQs: Why was this study put on hold? What are the study’s next steps? What is the construction timing of the project? What will the City do if this project negatively impacts the value of my property? What is the City’s process for acquiring affected property?
— The FAQs sheet should be used to help members of the project team answer questions about the study.
— BS will send out the FAQs and Comment Sheet to the project team Thursday afternoon.

#### 2.4 Meeting Attendance
— WSP: David Jopling, Richard Tebinka, Kenn Rosin (except October 4), Brittany Shewchuk/Ryan Segal
— Public Works: Scott Suderman
— OPE: Morgan Vespa, Brett Andronak/Neil Bailey
— CC: Michelle Finley
— Real Estate: Joedi Pruden/Gord Chappell, Marlene Harderer/Barry Lucyk
— Planning: Devin Clark

#### 2.5 Landowner Meeting RSVPs
— As of Monday, October 2 at 3:00 p.m.:
  — October 2 = 14
  — October 3 = 8
  — October 4 = 17
  — October 5 = 20

#### 2.6 Open House Date
— Current date of OH has been set for December 6, 2017.
— BS will see if Charleswood United Church is available for an earlier OH, potentially on the following dates: November 28, 29, 30.
— Update: the venue is available for the above 3 dates, BS has emailed SS to confirm which date works best for the area Councillor. Once date is confirmed, BS will book venue.
— The OH materials will be posted on the study’s webpage more than two weeks prior to the OH. These materials have already been finalized and approved by the City (Public Works, CC, OPE). Minor changes will need to be made to the OH boards, i.e.: dates/timeline. WSP will make these changes ASAP, and send to the City for review and to post on the project webpage.

2.7 Strategy to deal with irate participants
— DJ will speak with the landowners who become irate/upset at the meetings.

3.0 ACQUISITIONS

3.1 Partial, Full Takings & Injurious Issues
— There are 8 full property takings and 78 partial takings.
— City Real Estate will be able to answer questions regarding property acquisitions and injurious issues.

4.0 OTHER
— WSP to ensure that Varsity View Community Club is invited to a stakeholder meeting. When this meeting is set up (should be early October), make sure to invite RZ and JE from Parks & Urban Design. WSP (RT & KM to confirm meeting).

These minutes are considered to be accurate recording of all items discussed. Written notice of discrepancies, errors or omission must be given within seven (7) days, otherwise the minutes will be accepted as written.

NEXT MEETING
An invitation will be issued if an additional meeting is required.
Not sure if Scott had bcc’d you on this one.

Subject: RE: road plans

Hello

Thank-you for providing the comment sheet and this email.

The process the City typically follows for transportation planning projects is to contact possibly impacted land owners directly for a private meeting to explain the recommended design and discuss the next steps. We request the meetings at a point in the project where sufficient engineering work has been performed so that the spatial requirements are more defined. We held this private meeting so that we can have the direct conversation with the landowners, prior to the designs being made available to the public through the Public Information Session and posting the information on the project website. Following the Public Information Session the Public Service will be preparing a public administrative report to seek City Council’s approval on the road alignment.

We will send you an email for an invitation to the upcoming Public Information Session. We will ensure we have a separate meeting room reserved so you can meet directly with myself and other City staff to discuss the below questions in more detail.

Sorry I’m not going to be able to make it.
Can you look this over....I feel like I’ve missed something or maybe I haven’t thought about this project for so long that I’m a bit out of the loop.

I’m not sure if the property owner meetings will be held one-on-one?
Hi Scott,

I was forwarded the email below as I am the CorpComm person attached to the WRCP study project (we divide the infrastructure projects up).

And I chatted with Morgan yesterday about next steps from a comms perspective and how to respond to the citizen who is looking for an update. Regardless of what Doug and Lester decide, we will need to take the following steps once we have their input and direction:

- Website updates
- Mailer with update
- Email to those on the project email list
- Possible news release with updates

I also think the stakeholder group that has properties that have been identified as needing to be acquired, needs some special attention. Likely one-on-one meetings to help manage their concerns.

I also think we need (probably Lester and Morgan) to check in with the Councillor following the meeting between Lester and Doug. Overall, we should probably book a meeting with OPE, myself, the project team etc. to chat about the direction we get from Lester and Doug.

I think a fair response to the citizen would be something along the lines of:

- Thank you for your email and I apologize for the delay in providing a project update to you and your community. The project team is currently preparing an update and we expect that we will be communicating with stakeholders in the coming weeks. The update will be shared on Winnipeg.ca and also be sent via email to those stakeholders who have shared their contact information with us. We appreciate your patience and once again, I do apologize for the delay.

Call me if you have any questions,

Michelle Finley
Communications Officer
Office of the Chief Administrative Officer

M: 204-470-1188
away or possibly fall. This is outside my control.

Lester met with the CAO or is going to shortly to discuss this project.

I am wondering how we should update the website and how do I respond to the resident. Please assist or let's discuss.

Thank-you,

Scott Suderman, C.E.T., P.Eng.

Hello!
Just wondering what's happening with the R. Clement Parkway extension west of fort white center. Is there meeting scheduled in the near future etc. Please let me know because it's impossible to find anything on the website and residents affected are getting anxious!

Thank you!

Good morning,

The following additional items have been added, as highlighted below.

Kind regards,
Kate

Good afternoon,

The following is the draft Agenda for the October 31, 2017 meeting of the Standing Policy Committee on Infrastructure Renewal and Public Works.

Please confirm that we can proceed to publish the agenda at 8:30 a.m. on Friday, October 27, 2017.

**DELEGATIONS:**
1. Lydia Dyck  (See Report 9)

**REPORTS**
1. Capital Integration Project – Southwest Transitway (Stage 2) and Pembina Highway Underpass – [EPC June 29, 2016](#) (verbal report)
2. Expansion of Transit Vehicle Overhaul and Maintenance Facilities Capital Project – Council December 14, 2016 (recommendation #9 verbal report)
3. University of Manitoba Station (Dafoe Terminal) – RIS 12572
4. Amendments to the Winnipeg Parking By-law – RIS 12578
5. Innovation On-Street Parking Solutions for the Exchange District – RIS 12537
6. Waverley Street at CN Mainline (Rivers) Grade Separation – IRPW October 4, 2016 (verbal report)
7. Review of Snow Clearing and Ice Control Policy – RIS 12591
8. Cost Sharing Option for Residents Living on Gravel Roads – Council Sept 27, 2017
10. Traffic Calming Measures – Portage Avenue – Oct. 10 City Centre
11. Traffic Study – Aldgate Road and Paddington Road – RIS 12551
12. Traffic Study – Keslar Road at Bairdmore Boulevard – RIS 12552
13. Traffic Study – Speed Limit on Waverley Street, from Bishop Grandin Boulevard to Sandusky Drive – Oct. 2, Riel
14. Crosswalk Study – Regent Avenue West at Chrislind Street – Oct. 17 EKT
15. Pandora Avenue Road Renewal – Oct. 17 EKT
16. Rationale for Implementing Reduced Speed School Zones – RIS 12582
17. Wilkes Avenue Alignment to William R. Clement Parkway Extension

Kind regards,

Kate McMillan
Senior Committee Clerk

Subject: RE: W R Clement Parkway extension.

M,

Understood, but I just wanted to weigh in and share my concern with respect to balancing the risk of early notification against the Department not yet receiving formal instruction from the political side.

I think I would rather see affected owners contacted after we have brought the results of the functional report in front of the IRPW committee.

At the very least I think we should have an informal information session with committee members and affected councilors.

Lester

I’m happy to meet on this, but I asked Shima if she had been involving the OPE and she indicated that Michelle Findley and Morgan Vesper have been actively reviewing materials.

Regards,

Michelle
Brad/Michelle,

I would like to set up a meeting to discuss the developing a process to engage with owners that may be affected in upcoming projects.

I understand that Shima, the project manager would like to begin the engagement process. I believe we need to have a messaging strategy that has been politically vetted before we proceed.

While engaging early is a good idea, it can also cause anxiety to owners. As this project is still very much in the functional stage and has not yet seen the "light of day" politically, meeting with owners is not recommended.

As always we need to work with the office of public engagement when developing the strategy.

Subject: RE: William R Clement Parkway Preliminary Design Study and Public Engagement

Hi Lester/Brad

I am not sure who’s looking after the study while Shima is on leave, however I am thinking that it would not be possible to initiate any sustained meetings with affected property owners other than VVCC at this time. Maybe once resources are less stretched in the fall, we could resume to a more sustained process. As Doug alluded below, we also need to make sure we include Donna Beaton and Ken McKim as part of the discussion because of the variety of questions that have been brought forward to the table (many are not related to the WRCP study, but the CAO wants those questions to be addressed as best possible when we meet with VVCC). Devin Clark and James Platt should be part of the discussion as well.

Thank you and maybe this is something that Brad, Lester and I need to discuss before we consider arranging a meeting with VVCC.

Hi Gentlemen,

Earlier this afternoon, Luis and I joined a couple of the PP&D Planners (Devin Clark and James Platt) in a meeting with Councillor Morantz in a discussion about the Varsity View Redevelopment Plans in Marj Edey Park.

The Varsity View Community Centre (VVCC) has a keen interest in this project and the extension of Ridgewood Corridor as well, as they relate to VVCC redevelopment plans. Given this and that the public has yet to see the concept plans, I authorize you to proceed with your public engagement plan for this project. I understand that meetings with the impacted property owners will be done in advance of the third and final Public Open House and I recommend that the Board members of the Varsity View Community Centre be amongst the first that you meet with.

Although your meeting will be focused on the Parkway, the VVCC has a number of other plans (see e-mail attached) which they will likely raise and which will need input from other departments such as Planning, Parks and Community Services, you should invite reps from those departments as well.

Doug

Hello Scott,

The Chair of IRPW has been receiving feedback/concerns on William R Clement Parkway. One item is in the attached e-mail which I think could be resolved by having the citizens attend the next Property Owner and/or Public Open House where we can further identify the concerns of the citizen group.

Subsequent to that is an additional e-mail below where the Province has informed citizens that the Project is on Hold. I am not sure if we want the Province speaking as such but possibly you could elaborate on how they are communicating to our Citizens.

See the following;

Subject: RE: William Clement parkway extension.

Thank you for your comments Karl. The City has put this project on hold for a short time, however, your comments will be considered once the environmental assessment process resumes.

Elise Dagdick
Hi

I would like to register my support for the proposed parkway extension. Having attended all the public meetings and read all the supplied documents I think the plans submitted address many of the concerns that have been raised. The extension is overdue with many of the side streets being overrun with traffic heading to the seasons of tuxedo area and people trying to avoid going to kenaston. Gravel side walk which is unusable in the winter or when it rains so people are always walking on the road. It is constantly falling apart from the excess of traffic. Which is the same for a lot of the side streets surrounding us.

Hence this extension is well overdue.

Thanks

Jim Berezowsky
A/ Director
Public Works
Hi all,

If the landowners cannot make it to any of the four meetings we will provide them the option of attending the upcoming WRCP open house to discuss their impacted lands one-on-one with WSP and City staff. This is something that we did for the Chief Peguis Trail Extension Study and it worked quite well.

When we book the venue for the upcoming Open House, we will make sure to also book a separate room, so that landowners are able discuss their property in a private setting.

Although we have not finalized a location for the upcoming Open House, as landowners RSVP, I will notify them of this option, and contact them once we have determined the date/venue.

Thanks,

Subject: RE: WRCP invitees

My recommendation would be to provide an alternative mechanism to provide feedback and input if someone cannot attend any of the meetings. There may be detailed questions that require a subject matter expert for those who cannot attend – if those questions could be addressed over the phone, that may be a suitable alternative.

To: Finley, Michelle; Suderman, Scott
Cc: Jopling, David; Tebinka, Richard
Subject: RE: WRCP invitees

Hi all – please find answers below:
How were the meeting invites segmented into groups? The meeting ‘groups’ were divided up based on geography. At our meeting on September 28th, we will bring a map indicating the properties that were located in each grouping.

For example:

- **Group 1** (October 2) includes addresses along Haney Street and an affected property on Grant Avenue and Hilton Street;
- **Group 2** (October 3) includes addresses along Wilkes – west of Fairmont Road, Wyper Road, Community Row, and one property on Charleswood Road;
- **Group 3** (October 5) includes addresses on Loudon Road, Liberty Street, and Wilkes – west of Elmhurst Road; and
- **Group 4** (October 4) includes addresses on McCreary Road, McConnell Road, and Wilkes – east of Elmhurst Road.

What happens if someone cannot make the meeting? I am taking the RSVPs (we have had one so far). If someone cannot make the proposed date, I will offer them the option to attend an alternative meeting date. If they can’t make any of the dates, we would like input from the City on how to deal with this.
17(1)(3)(l) Personal information of a 3rd party

Hi Shima:

If we are planning to do landowner meetings the week of November 28 still, the registered mail has to go out on Thursday. In order to achieve this, administratively we will need a day to prepare the mailing, so we need to know by this afternoon in order to finalize venues and prepare the mail out.

Thanks,

Hi Morgan,

FYI. I have asked Brad Neirinck to attend the Impacted property meetings with the property owners as well.

We need to have a briefing meeting with the Councilor before these meetings (Meetings are not set yet). Michelle Finely mentioned that your department will arrange that meeting, but I and MMM PM need to be there to do the briefing for him, we did same thing for the past two open houses as well.

Please let me know if you set this meeting with him or you want me to set it up directly, as I did it for the past two OHs for this project?

Thanks,

Hi Shima:

Did you have comments on the draft ads, open house invite and landowner letter? I would like to get everything ready to go ASAP and we should have communications and OPE review them as well.

Also, we would want to send the landowner letters by registered mail and use City of Winnipeg envelopes. Who can provide those to me? We will need about 100 of them.

Thanks,

Dave J.

Okay, my apologies. Michelle did not fill me in on that point and she is away this week.
I sent the materials to Felicia for review so she should be looking at them today.

Yes, on that meeting, I mentioned that we need to distribute the boards to council (normal practice) and Michelle mentioned that your office will do that.

That was the whole reason, I asked everyone to provide their comments back to me by Nov. 7th, so we get those boards to council, etc. by Wednesday/Thursday

Thanks

Hi Shima,

Did you discuss distributing board with Michelle on the call last Tuesday? Did Michelle agree to do this? Do you want them distributed to all of Council?

I don’t think boards can be distributed until Felicia has seen them and we have not received the second draft yet.

Thanks,
Morgan

Hi Morgan,

I got your voicemail, I will wait to hear their decision on this project.

Would you still go ahead with distribution of the Open House Boards, etc. to Council for tomorrow, because that needs to done ASAP.

Thank you,
Shima

Due to project prioritization, the original timeline for this study has been extended.
Hi Jim –

Are you able to tell me how many properties are affected by Option 1 (Wilkes) vs Option 2B (the new 4th option)

Media are asking and I committed to getting something to them because I’m certain this is public information.

Thanks.

Hi Scott. We have reviewed the timeline below and feel it is workable, assuming the City has already set up the end of June stakeholder meeting with Varsity View. We will wait to receive confirmation from the City before proceeding. Please let me know if you require anything else.

Thank you.

Sent: Monday, June 26, 2017 9:23 AM
To: 'Tebinka, Richard'
Subject: 732-2014 WRCP Project Timeline
Importance: High

Hello Richard,

The City would like to proposed the following timeline to complete the WRCP Preliminary Design:

- End of June Stakeholder meeting with Varsity View. Meeting will be set up and ran by the City, we will provide WSP with minutes.
- Update project website by first week in July. This will require an updated project timeline graphic by WSP for the website.
- City provision of comments on the draft Preliminary Design Report by end of August 2017.
- Remaining stakeholder meeting by WSP Group in October 2017.
- Final Open House early December 2017
- Submission of Final Engineering Report end of January.

Please advise if this schedule is workable by WSP Group. If so, we will solidify this internally and request a revised detailed project schedule from WSP and then proceed.

Regards,

Hi Ken,

The City had put the last WRCP open house on hold. We haven’t gone back to the public in a very long time and I am unsure when we will go back, but this I would assume it would be months away or possibly fall. This is outside my control.

Lester met with the CAO or is going to shortly to discuss this project.

I am wondering how we should update the website and how do I respond to the resident. Please assist or let’s discuss.

Thank-you,

Richard,

I think Shima’s suggested wording change for the o/h boards still covers the intent of the recommendations in the EAP and would be fine to use. The EAP may need some minor tweaks before we submit to Sustainable Development and I would like to clarify the need for digital signs in both spring and fall with Geoff Gartshore. I believe that based on the data that has been collected for deer in that area of Winnipeg, Geoff felt that spring and fall signage was warranted. In speaking to MPI previously they were very keen to have appropriate mitigation measures incorporated to reduce vehicle-deer collisions in that area but whether they would ultimately be willing to offset the costs for that I don’t know. Again, this is a mitigation measure recommended based on our
knowledge now.

Hope this helps,
Danette

P.S. there is also the change to the Board below with Shima’s comment from earlier this afternoon.

Danette – does this mean the EAP would have to change or do you think that Shima’s suggested wording change for the o/h seems to still cover the spirit of the EAP recommendations?

In regards to Bullet #1, it can change it to something along the lines of “Addition of WCP and SLP into the City and MPI joint mobile digital sign wildlife awareness campaign”

Subject: RE: 5514150 WRCP Env'tal Board - CHANGES REQUIRED

Following an internal meeting yesterday we felt that the Environmental Board would benefit from some minor re-wording. We thought we would send the mock up for comments before changing the board. Please see the attached and confirm if you agree with the changes. Thanks.

Hi,

I know you sent the boards for WRCP into the City for review, but after the team meeting on Tues. Richard pointed out a couple of items which I feel are required to be changed on the env’tal board (see attached) If you have any questions, please let me know.

Thanks,

Please note, the Winnipeg Environmental Management Department is now located in our Buffalo Place Office. My change in address and office phone number is provided below. My cell number remains the same.

Yes we should include that question about the study....

And I’ll tweak that wording to make it more clear on individual vs group.

To: Finley, Michelle  
Subject: RE: Draft revised commstrat

Looks good to me! Thanks for sending.  
I would want to know “Why is this study taking so long?” if I were interested in the project. Is there any precedent for including that in a comm strat or a webpage?

From my understanding of the property owner meetings, some of those will be one-on-one (full acquisition or acquisition of structure required) and others will be a group setting (partial acquisition required).

Subject: Draft revised commstrat

Can you look this over....I feel like I’ve missed something or maybe I haven’t thought about this project for so long that I’m a bit out of the loop.

I’m not sure if the property owner meetings will be held one-on-one?
Not me yet

Subject: FIPPA Requests

Hi Felicia,

We recently received the following requests for access to information under Part 2 of The Freedom of Information and Protection of Privacy Act (FIPPA):

**17 11 922:** All emails sent or received by Morgan Vespa during the period of Jan. 1, 2017 to October 31, 2017 containing the words or phrases:  a. Sterling Lyon b. William Clement c. parkway d. Wilkes

**17 11 923:** All emails sent or received by Michelle Finley during the period of Jan. 1, 2017 to October 31, 2017 containing the words or phrases:  a. Sterling Lyon b. William Clement c. parkway d. Wilkes

**17 11 924:** All emails sent or received by Felicia Wiltshire during the period of Jan. 1, 2017 to October 31, 2017 containing the words or phrases:  a. Sterling Lyon b. William Clement c. parkway d. Wilkes

Please conduct a search of your area for the above records. If your search is expected to take less than 2 hours per request to complete, please forward any responsive records to me along with any questions or concerns you may have about disclosure of the information. If your search is expected to take more than 2 hours per request to complete, please contact me for assistance with preparing an estimate of time.

As we are working on a fairly tight legislated timeframe for responding, please provide your responses by Friday November 17, 2017.
Let me now if you have any questions about any of the above.

Thanks,

Hi Shima,

Here are my comments on the 21 sheet Preliminary Design set. Some of these comments are fairly detailed and I’m not sure that they would be critical to the public:

- **Sheet 1** – This sheet indicates full span overhead sign structures on all but the south leg of the intersection. Based on current practice we would be looking for cantilever overhead sign structures supporting guide signs with Route information, street names and lane arrows over the dual left turn lanes on these three approaches. Full span structures are likely not required. Key to the cantilever approach is ensuring that the median at the cantilever location is sufficiently wide to accommodate the base of the sign structure plus the crash protection. On WRCP the crash protection is likely a quadguard style installation and on Grant it is likely to be a safety shape median. I’m not sure a 0.9 m median on Grant will be wide enough for what is required.

- **Sheet 1** – How long is the southbound right turn deceleration lane? The air photo makes this look like a new lane but I’m not sure that it is.

- **Sheet 1** – The left turn lane design westbound is not great from a safety perspective as the westbound left turn lane at Haney Street also serves as the left turn lane at WRCP. How is a driver to know if the vehicle ahead of them is going to turn at Haney or at WRCP?

- **Sheet 6** – According to the Precinct Plan, in the long term, the Harte Trail will be located on the north side of Ridgewood Avenue west of WRCP and Oakdale Drive will not connect to Ridgewood Avenue. In this context, should the Harte Trail crossing of Ridgewood occur on the west side of Oakdale Drive and what is the expectation as to how this crossing will be controlled in the near term? At Ridgewood Avenue and Haney Street the long term plan is a roundabout. Should that be installed with an appropriate trail crossing as part of the WRCP so it does not need to be redone or retrofitted at some future date (which is always a challenge with a roundabout)?

- **Sheet 9** – Why does the multi-use path end at Community Row. Should it not be planned to continue to the north and/or to the west?

- **Sheet 12** – Only a cantilever sign structure, not a full span, would be required for the eastbound dual left turn at SLP and WRCP.

- **Sheet 13** – Should the northbound and southbound approaches at Loudoun Road and SLP be expandable from one lane to two lanes in the future in expectation of eventual higher land use density?

- **Sheet 16** – The design of the eastbound left turn lane taper appears to encourage through
drivers to drift into the left turn lane.

- Sheet 18 – Would it be better to plan for the multi-use path on SLP to shift from north to south and vice-versa at McCreary Road (which is guaranteed to be signalized) rather than at the development access to the east?
- Sheet 21 – Should Shaftesbury Boulevard north of SLP be designed to be expandable to four lanes (up to Grant Avenue)?

Stephen

Subject: William Clement Parkway - Open House Board Reviews
Importance: High

Good Morning all,

The William Clement Parkway Open House Materials & Preliminary Plans are saved on Temp. folder for your review. Due to the restricted schedule and to meet our deadlines for this project, it is very crucial that you have your comments back to me by no later than Monday, Nov. 7th before Noon. These boards then gets distributed to council, etc. the following day, therefore it is very important that I have your comments back by Monday morning, so if there are any changes then MMM has the afternoon to work on them and make the changes.

The schedule is very tight and the plan is to meet with impacted property owners starting 3rd week of November, (probably the first be on Nov. 24th or Nov. 28th)
The office of communication is aware of this tight schedule and they are reviewing the boards during this week as well.

Due to the size restrictions, I’ve saved “WRCP Public Engagement Materials” as well as “the Preliminary Plans” in Share folder, (the link below). Please let me known if you can get these files ASAP.

W:\Temp\William Clement Parkway - Open House #2

If you have any question, please let me know.
Also, if I am missing someone for this review, please feel free to forward these materials to them, but cc me on that email and let them know about the deadline for the comments.
Thank you,
Shima

Hi there,

Let’s take a pause for a bit on this specific property owner. I have briefed Felicia and she needs to read the emails.

I will touch base tomorrow or Thursday.

Please add Morgan to all engagement emails about this project 😊

Hello,

Another email, different person. It is not possible for me to say one correct thing. They are looking for written statements to be used for legal reasoning, I would prefer to stop responding. This citizen is in conversation with the other citizen whom is trying to intimidate me, don’t want to
respond to phone calls either as they are likely recording me, I regret not asking if they are.

We need some strategy to nip this situation. They are also contacting the Councillors office. These people are from the Thursday meeting.

Regards,

Scott Suderman, C.E.T., P.Eng.

Thank-you for providing the comment sheet and this email.

The process the City typically follows for transportation planning projects is to contact possibly impacted land owners directly for a private meeting to explain the recommended design and discuss the next steps. We request the meetings at a point in the project where sufficient engineering work has been performed so that the spatial requirements are more defined. We held this private meeting so that we can have the direct conversation with the landowners, prior to the designs being made available to the public through the Public Information Session and posting the information on the project website. Following the Public Information Session the Public Service will be preparing a public administrative report to seek City Council’s approval on the road alignment.

We will send you an email for an invitation to the upcoming Public Information Session. We will ensure we have a separate meeting room reserved so you can meet directly with myself and other City staff to discuss the below questions in more detail.

Hello,

I am getting daily phone calls and email from this citizen. He is On the phone call he is manipulating my words. I do not trust him or feel comfortable discussing this project with him. I advised him we will not be giving raw data out, as it can be interpreted differently.

He threatened to take the project down the same path as Marion.

I advised him we will have the necessary information presented through the upcoming information session, as we wanted to ensure everyone has the correct information in a cohesive form at the same time.

For the first time in my life I am at a loss with how to deal with this citizen, who in my opinion is a bully and is implied threatening.

Any advice would be appreciated. I would tell him to not contact me further or FIPPA in the information, but he would just tell the other citizens what I am doing and change the message.

Hi Scott,
Hi Morgan,

Brad N. told me I have to provide a briefing note for Lester to present to CAO and that's what I am working on right now.

Thanks for the updates.

Kind Regards,

Shima

Subject: Update on WRCP

Hello Shima,

I am new to the City of Winnipeg as the Manager of Public Engagement and we have not had the chance to meet yet. I look forward to working together.

I was going through a master list of projects that was developed before I arrived at the City. One of the projects is identified as the William R. Clement Parkway Extension and you are listed as the project manager. Could you provide an update on this project? The webpage timeline identifies fall 2016 for the second open house. I know there were some resident concerns with this project so if we could set up a time to meet I would appreciate some context and background.

In addition, if you have any other projects with a public engagement component I would appreciate it if you could bring me up to speed on those as well.

Thank you,

Morgan

Hi
Felicia
It
appears
that
the
individual
wants
to
keep
recording
the
event.
Scott
will
not
start
the
meeting
until
he
stops
recording
as
per
your
suggestion
and
that
he
can
take
notes
and
info
will
he
sent
to
him
about
the
findings
of
the
meeting.
However
it
seems
that
the
individual
is
reluctant
to
stop
recording
the
meeting.
If
necessary,
can
we
cancel
the
meeting?
I
don’t
want
this
to
escalate
so
probably
the
best
option
is
to
cancel
it
and
I would suggest you ask this person to keep on recording. Would you concur with that or would you have other suggestions? Let me know.

Thanks,
Luis

Hi Felicia:

We don’t want to delay for the following reasons:

- We have already been delayed by more than half a year partially, I understand, due to waiting for approvals on previous open house materials.
- The delays have resulted in request for additional consulting fees. Further delays will result in further cost increases.
- There may be sentiment/mistrust with the public that if we keep delaying presenting the final solution that we are hiding something.
- I understand we have already had two open houses where this this finalized recommended solution information has been presented as alternatives. This isn’t completely new information; just closure on previous information. We have received rumors/inquiries from the public that alternate solutions may be employed.
- The targeted property owners meetings would occur in November well ahead of Christmas.
- We need to finish existing studies in a timely fashion as we have other significant studies coming on line in the new year including Eastern Corridor/Louise Bridge Study, Chief Peguis Trail, Marion re-work, Arlington Overpass, and St. James Bridges/Kenaston Widening.
- The consultant on this project will be awarded significant planning work from the City and delay will impact their resources to deliver other projects.

Even with a January Open House the project will realistically not be finished until next spring because we will need to report to Council on the recommended alignment.

Councillor Morantz has been kept in the loop throughout the project by our Project Manager. We propose we meet with him and get his buy-in on our proposed timing for the targeted meetings in November and Open House in January. If he disagrees with us we can postpone but we believe he will be on board to complete the project ASAP.

Brad Neirinck, P. Eng.
Manager of Engineering
Engineering, Public Works
City of Winnipeg

Phone: 204-986-7950
Mobile: 204-794-4311
Email: BNeirinck@winnipeg.ca
Hi Brad –

Can you explain what we are delaying by delaying the open house until February, and notifications until January?

As I understand this project is years away from completion, and I want to ensure we’re not putting a rush on things just for the sake of rushing. No one has been able to explain what the January 30th deadline is to me, other than that there is a January 30th deadline so this is why the rush to do stakeholder and public consultations. What is the significance of the January 30th deadline?

Hi Felicia:

I’m just getting looped in myself today on this project. Our project manager on this study is Shima Rezazadeh.
A final open house for the Study is being planned for January 10th or 12th, 2017. The open house materials are going forward for approval from Corporate Communications/Mayor’s office this week. The open house would show alignments that would affect some property owners. This is an information session on the final technical design that has already taken into account past consultation.

The project has already been delayed from a spring/summer completion. I understand that you are thinking the open house should be delayed further into February. However we see the delays that have occurred to date as a concern.

We would like to get concurrence to move forward with our proposed schedule.

The proposed meetings, ahead of the open house, would be to meet with impacted property owners a few weeks ahead of it so they have advance notice as well as know what it means. We wouldn’t want to surprise the impacted property owner at a public open house which is the reason for the targeted meetings. We used this method successfully ahead of the last Arlington Overpass open house.

Lester has advised me that prior to notification being sent to impacted property owner ahead of the meeting that we meet or brief with the local area Councillor Morantz.

We would be setting up separate meetings to meet with approximately 30 property owners at each meeting. We would like to set these meetings up for late November so they are sufficiently ahead of Christmas.

The key messages at the impacted property owners meetings would be:

- Identify that this is a planning study only and that the project has not been approved by Council to move forward to construction.

- The plans are preliminary in nature and show the preferred road alignment based on technical requirements and past consultation.

- If the project moves forward in the future, each property owner will be contacted at that time. Real Estate would be able to answer questions about future appraisals and acquisition. The general message is we would not acquire property until there is an approved construction project.
Hi all –

I’m looping in Morgan Vespa from the Office of Public Engagement. I know she has raised concerns about the timing of the letters, but my understanding is that those concerns have been disregarded.

I agree with Lester in that we need to look at balancing the timing of this project. I’d hate to see us get folks upset about potential expropriation when I’m not certain that any direction has come from Council. I don’t want to see this turn negative publicly before we’ve had a chance to discuss with any elected officials.

I’m also extremely concerned about the timing due to the time of year as well. Sending letters to folks suggesting that the City may eventually construct a road through your home, in the days leading up to Christmas, will definitely not go well.

Can someone give me a better understanding of the overall plan for this project and the timelines for the project – so I can understand why there is a rush to get letters regarding potential expropriation into the hands of homeowners in the next 4 weeks?

Thanks,
~Felicia

M,

Understood, but I just wanted to weigh in and share my concern with respect to balancing the risk of early notification against the Department not yet receiving formal instruction from the political side.

I think I would rather see affected owners contacted after we have brought the results of the functional report in front of the IRPW committee.

At the very least I think we should have an informal information session with committee members and affected councillors.

Lester

Public Works – A/Project Management Engineer
Brad/Michelle,

I would like to set up a meeting to discuss the developing a process to engage with owners that may be affected in upcoming projects.

I understand that Shima, the project manager would like to begin the engagement process. I believe we need to have a messaging strategy that has been politically vetted before we proceed.

While engaging early is a good idea, it can also cause anxiety to owners. As this project is still very much in the functional stage and has not yet seen the "light of day" politically, meeting with owners is not recommended.

As always we need to work with the office of public engagement when developing the strategy.

Sent from my iPhone
Hi Morgan,

I don't know how did that happened, but I will remove it for sure.

Regarding councillor meeting, I can have that arranged.

Regarding the tight schedule, I don't think there is much we can do. Due to past delays, and hiccups during last council reviews, this project got delayed for more than 7-8 months & the original plan was to have it done earlier in 2016, then got postponed to end of December 2016 & Due to all those delays, Now this project has to get done by Jan.31,2017.

That's the reason we need to have these board materials to council for their reviews maximum by Thursday, so they can get back to us in 2weeks (Michelle mentioned that she can put a rush request and have it back to us within 2weeks period), the plan is to have the 4 property meetings in the last week of November and the first week of December and done.

Hope this gives you better understanding of why we are working towards a very tight schedule.

Thank you,

Kind Regards
Shima

Hi Shima,

Not sure how this happened but your last several emails were sent to my personal email. Could you please delete that email and send future communications to my City email address – mvvespa@winnipeg.ca

I agree, the Councillors need to be briefed before engagement occurs. I have not organized a meeting with Councillor before but if Michelle would like to schedule the meeting, she can make that call. Otherwise, I am okay with you organizing the meeting if Michelle and I are also invited.

On a more general note, as Michelle mentioned when you spoke on the phone last week, there are some concerns with the timing and tight timeline for this portion of the engagement. Was there any follow up regarding Michelle’s concerns that she had
noted when you spoke last week?

Thanks,

Morgan

Hi Morgan,

FYI. I have asked Brad Neirinck to attend the Impacted property meetings with the property owners as well.

We need to have a briefing meeting with the Councilor before these meetings (Meetings are not set yet), Michelle Finely mentioned that your department will arrange that meeting, but I and MMM PM need to be there to do the briefing for him, we did same thing for the past two open houses as well.

Please let me know if you set this meeting with him or you want me to set it up directly, as I did it for the past two OHs for this project?

Thanks,

Shima

Good Morning all,

The William Clement Parkway Open House Materials & Preliminary Plans are saved on Temp. folder for your review. Due to the restricted schedule and to meet our deadlines for this project, **it is very crucial that you have your comments back to me by no later than Monday, Nov. 7\textsuperscript{th} before Noon**. These boards then gets distributed to council, etc. the following day, therefore it is very important that I have your comments back by Monday morning, so if there are any changes then MMM has the afternoon to work on them and make the changes.

The schedule is very tight and the plan is to meet with impacted property owners starting 3\textsuperscript{rd} week of November, (probably the first be on Nov. 24\textsuperscript{th} or Nov. 28\textsuperscript{th})

The office of communication is aware of this tight schedule and they are reviewing the boards during this week as
well.

Due to the size restrictions, I've saved "WRCP Public Engagement Materials" as well as "the Preliminary Plans" in Share folder, (the link below). Please let me known if you can get these files ASAP.

W:\Temp\William Clement Parkway - Open House #2

If you have any question, please let me know.
Also, if I am missing someone for this review, please feel free to forward these materials to them, but cc me on that email and let them know about the deadline for the comments.

Thank you,

Shima

Thank-you for the comment sheet and the detailed letter. At the meeting I committed to the opportunity for us to meet a later date to have a more in-depth and detailed conversation to discuss your comments and concerns, and we remain committed to that. Please note that the design is not planned for a Council submission in November, but rather early 2018. We were intending to have a public event near the end of November.

As your comments are very thorough I do ask that you allow us a few weeks at the most to ensure we have sufficient time to examine your provided information in detail. I will reach out to you shortly to set up a meeting.

Hi Morgan:

Any update on the WRCP landowner meetings? It is getting rather tight to try to do them before X-mas. Has there been any decisions yet? We also need to update the website with our future plans and dates.

Thanks,

Dave J.

Hey Morgan:

We had hoped we would have direction to send the Landowner letters by registered letters by last Thursday due to ensuring they have two weeks’ notice of the meeting. This has deadline has passed and will result in pushing the meetings a week later in December which is getting into x-mas concert season and other evening events...

Hi Dave,

Thanks for following up. I am still waiting to hear back regarding a decision. I will continue to press and relay these tight timelines.

Can you prepare a web update draft?

Thanks,

Morgan

Hi David,

I sent comments on the boards to Shima.

I passed my concerns along and am waiting to hear back regarding the timeline for the engagement. I know there is some internal discussion about this but Shima may have more concrete answers.

Thanks,

Morgan

Hey Morgan, we received the comments you had on the advertising materials etc. but did you have comments on the boards themselves?

Also, any direction on the status and program for the next steps? i.e. the landowner meetings?

There are four landowner meetings coming up for the William R Clement project. Michelle Finley and I will each be attending one. Can any of you attend meetings from 6pm-8pm on any of the following dates:
Mon Oct 2
Wed Oct 4
Th Oct 5
I will attend on Oct 3rd. Michelle is flexible, so if our team can cover 2 of 3 of these that would be great and I will let her know which one is left.

Thank you,

Morgan
Hi all – please find answers below:

17(1)(3)(i) Personal information of a 3rd party

- How were the meeting invites segmented into groups? The meeting ‘groups’ were divided up based on geography. At our meeting on September 28th, we will bring a map indicating the properties that were located in each grouping.

For example:

- **Group 1** (October 2) includes addresses along Haney Street and an affected property on Grant Avenue and Hilton Street;
- **Group 2** (October 3) includes addresses along Wilkes – west of Fairmont Road, Wyper Road, Community Row, and one property on Charleswood Road;
- **Group 3** (October 5) includes addresses on Loudon Road, Liberty Street, and Wilkes – west of Elmhurst Road; and
- **Group 4** (October 4) includes addresses on McCreary Road, McConnell Road, and Wilkes – east of Elmhurst Road.

- What happens if someone cannot make the meeting? I am taking the RSVPs (we have had one so far). If someone cannot make the proposed date, I will offer them the option to attend an alternative meeting date. If they can’t make any of the dates, we would like input from the City on how to deal with this.
Hi: can you please assist with these responses.

Hi all,

If the landowners cannot make it to any of the four meetings we will provide them the option of attending the upcoming WRCP open house to discuss their impacted lands one-on-one with WSP and City staff. This is something that we did for the Chief Peguis Trail Extension Study and it worked quite well.

When we book the venue for the upcoming Open House, we will make sure to also book a separate room, so that landowners are able discuss their property in a private setting.

Although we have not finalized a location for the upcoming Open House, as landowners RSVP, I will notify them of this option, and contact them once we have determined the date/venue.

Thanks,

My recommendation would be to provide an alternative mechanism to provide feedback and input if someone cannot attend any of the meetings. There may be detailed questions that require a subject matter expert for those who cannot attend – if those questions could be addressed over the phone, that may be a suitable alternative.

**Cc:** Tebinka, Richard; Segal, Ryan; Lucyk, Barry (BLucyk@winnipeg.ca); Rosin, Kenneth; Maroti, Vilko; Lacoste, Jaime

**Subject:** WRCP Landowner List - CONFIDENTIAL

**Importance:** High

Hey Folks:

Please find attached the landowner list we have with the “higher risk” parcels identified – those parcels that have houses on them, those where the new road runs very close to existing residences, and those that take entire vacant land (less risky) – all highlighted accordingly.
We can certainly try to attain our timeline as proposed if we could set up a time to meet with the Councillor and also try to set up individual meets with the home owners and others that pose a higher risk to the project.

There are 7 full takings with dwellings
5 properties with dwellings that will have the greatest impact as a result of the new roadway (injurious affection)
4 properties full taking undeveloped (low risk) – I do not recommend an individual meeting (group meeting)

17(1)(3)(l) Personal information of a 3rd party

Hope this helps assess the situation better.

I just had a meeting come up on Tuesday the 1st from 3-4, so on Tuesday afternoon I am now free from 12 to 1:30 or after 4pm.

Sorry for my lack of flexibility. I would prefer to be there but understand that this is pressing so Michelle can fill me in afterwards if necessary.

-----Original Appointment-----

From: Suderman, Scott

Sent: Wednesday, September 20, 2017 11:19 AM

To: Suderman, Scott; Tebinka, Richard (Richard.Tebinka@wsp.com); Pruden, Joedi; Chappell, Gordon; Clark, Devin; zz-bsheuchwu; Finley, Michelle; Vespa, Morgan

Subject: WRCP Pre-Meeting - Landowners Meeting

When: Thursday, September 28, 2017 9:00 AM-11:00 AM (UTC-06:00) Central Time (US & Canada).

Where: WSP Group

Importance: High

Hello Richard,

We need to meet in advance of the landowner meetings. At this meeting we would like the following:

1. Large prints of the design
   a. Provide a verbal overview to rationalize the design

2. Large prints of the property requirements
   a. Easy to read and understand
   b. Discuss partial and fulls
   c. Identify where there maybe injurious issues

3. Discuss landowner meeting format and logistics
   a. Including sensitives to be ready to deal with
Understanding you are not available, please ensure appropriate technical staff can attend to provide rationale including for lakes. Please book a room at your office.

Regards,

Scott

Hi Shima:

We should update the web site with the new timeline and I recommend we also should add in the public
engagement report we have for the first PIDs session on to the web site.

If the attached looks good to you, we will send it over to Nancy Dean for posting. Thanks,

Dave J.

Hi Morgan,

My changes are enclosed.

On the timeline – suggest combining the two boxes as shown enclosed, it reduces highlighting the delay.

On the web content – we cannot state changes as the reason for the delay people will ask what those changes are, and in fact there are none. We should just stay silent on this issue. If we are asked by the media I will need help with a proper response.

Thanks,

Scott Suderman, C.E.T., P.Eng.
Transportation Facilities Planning Engineer
Public Works
P: 204-986-6963
M: 204-782-7189

Hi Scott,

Please find updated WRCP project web content (to reformat existing web content into tabbed project webpage template) and updated timeline attached for your review.
Once we receive your comments, the changes will go for final review and I will initiate the changes to the webpage which go live after CAO and Councillor are updated.
Michelle is currently working on adding FAQs to this web update as there are currently no FAQs on the webpage. She will send those for review at a later date.

Thank you,

Morgan

Morgan Vespa
Manager of Public Engagement
Hello Morgan: you help with the website would be much appreciated.

Hello Felicia: can you confirm if you will be bringing the proposed schedule to the CAO and Clr Morantz for their consensus prior to us updating the website. If that is possible it would be appreciated.

Thank-you,

Scott Suderman, C.E.T., P.Eng.
Transportation Facilities Planning Engineer
Public Works
P: 204-986-6963
M: 204-782-7189

Thank you for the update.
Would you like Michelle and I to work on drafting a web update at this time or would your team like to tackle that?

Morgan

Morgan Vespa
Manager of Public Engagement

Hello Morgan,

Yes we have, please find enclosed. We are going to run this schedule by the CAO and Clr Morantz as discussed, but can you clarify who would do this?

We have a meeting already scheduled with Varsity View, but it is for July 7th.
Regards,

Scott Suderman, C.E.T., P.Eng.

Hi Scott,

I see you posed the same question to Felicia. If you do not receive a response via email, I will ask her in person when I see her next.
I will draft some web content with Michelle and get that to you as well.

Thanks for following up,

Morgan

Hi Morgan, yes I would like your help with the website. Can you advise who will be bringing our proposed schedule to the attention of the CAO and Clr Morantz to get their consensus prior to making it public. As we discussed this is an important step to ensure we don’t have any further delays in the project. I was under the impression it would be Felicia but can you confirm?

Thank-you

These are the ones from the comm strat (which has not been updated since January) ...I’m going to have to spend some time on these. I’m sorry but I won’t have them back today. Can we load what we have for now to the web?

1. **What are some of the key components of this project?/Tell me about this project.**
   The William R. Clement Parkway (WRCP) Extension is an important component of the City of Winnipeg’s future transportation system, providing a north-south link in west Winnipeg. The City’s Transportation Master Plan, which guides transportation planning in Winnipeg, includes the WRCP Extension as a major transportation facility, intended to accommodate future travel demand in the area.

   The WRCP Extension will include an underpass or overpass of the CN mainline, a bridge for the Harte Trail, an environmental assessment, and integration of recreational opportunities such as parks and pathways. The study will not only look at improving the north-south movement of people, goods and services but will also look at improvement to Wilkes Avenue.

2. **What can people expect to see at the project open houses?**
   The public will have an opportunity to view presentation boards outlining proposed alignment options and project details, speak with project team members, and provide feedback.

3. **Why are we spending money on new roads instead of fixing our existing crumbling infrastructure?**
   The William R. Clement Parkway extension will support economic development, create recreational opportunities and will take us one step closer to the completion of the Strategic Inner Ring Road to reduce traffic on neighborhood streets.

   This transportation corridor is about supporting local and regional economic growth for the City; the grade separation of the WRCP Extension at the CN Rail Line at Wilkes Ave along with many other improvements will provide more efficient movement of goods and services in the City.

   This corridor will also relieve traffic significantly off of existing streets, including residential streets, to reduce the deterioration of those streets and make them more attractive for walking and cycling.
Also we need to proactively plan for future facilities.

**This study is partially funded by the Charleswood Transportation Levy which was developed to support the improvement and development of transportation facilities for that area.**

4. **What is the budget for this project? Or Where is funding going to come from for this project?**
   
   This project does not have a construction budget yet. Council only approved the funding to conduct an engineering study.

5. **How will this new facility impact existing properties?**
   
   The proposed options may impact properties in the area but the details of these impacts have not been finalized. Possible land impacts are shown to give some context to compare options. Once the design is further refined there will be finite detail about property impacts and the City will be in touch with the affected property owners directly.

   The City understands the importance of the Charleswood Dog Park, and will look at options for a different dog park location. Some potential locations will be presented at the open house.

6. **Will the road be going through an existing Dog Park?**
   
   Yes, the proposed alignments would impact the Dog Park. The City understands the importance of the Charleswood Dog Park, and will look at options for a different dog park location. Some potential locations will be presented at the open house.

7. **Why build a road through a park?**
   
   The Dog Park area was always intended to be a temporary use of that property, as the City purchased that property many years ago with the intention of using it for a transportation corridor. Understanding the importance of the Dog Park, we are looking at different dog park locations.

8. **Why are we going to build a road through the heavily treed area, what are we going to do to protect environmentally sensitive areas?**
   
   The project team includes a team of environmental and biology professionals who are performing an Environmental Assessment that includes the identification of environmentally sensitive areas. We are looking at mitigation, avoidance and relocations where possible.

9. **Are there traffic signals planned for this new roadway at all the intersections?**
   
   A key component of the study is to look at current and future traffic to adequately address traffic needs. We are presenting a number of options at the open house for intersections along the extension including an underpass, overpass and signalized intersection.

10. **Why are we building a road to nowhere, won’t this support urban sprawl?**
    
    This transportation corridor is about supporting local and regional economic growth for the City as it will connect to Wilkes Avenue or Sterling Lyon with a future extension of the
corridor to McGillivray Blvd and Bishop Grandin Boulevard to provide more efficient movement of goods and services.

This corridor will also relieve traffic significantly off of existing streets, including residential streets, to reduce the deterioration of those streets.

11. **What are the next steps?**
   Once the project is complete, it will be presented to Council for their approval of the roadway alignment and understanding of the costs associated to aid the City in seeking funding opportunities.

Hello Scott,

Have you made contact with WSP to confirm a revised project timeline for the remainder of the work for WRCP?

Thank you,

Morgan

Hi Morgan, yes I would like your help with the website. Can you advise who will be bringing our proposed schedule to the attention of the CAO and Clr Morantz to get their consensus prior to making it public. As we discussed this is an important step to ensure we don’t have any further delays in the project. I was under the impression it would be Felicia but can you confirm?

Thank-you

Hello Morgan,

Yes we have, please find enclosed. We are going to run this schedule by the CAO and Clr Morantz as discussed, but can you clarify who would do this?

We have a meeting already scheduled with Varsity View, but it is for July 7th.

Hello Scott,

Please find attached - updated web content with FAQs added.

In the Update section, Michelle suggested the following phrasing to provide a reason for the delay in the study:

Update July 2017 – **Due to project prioritization, the original timeline for this study was extended.**
The project team is currently updating stakeholders and residents with the revised project timeline. Landowner meetings and an open house will be held in the Fall of 2017 to discuss the draft preliminary design.

Michelle added FAQs through an updated comm strat and had one question regarding meetings with property owners:

**Q. When will the public have an opportunity to review the completed Preliminary Design Study and preferred alignment information?**

The City is planning an open house for fall 2017. The preferred alignment will be available to view at this event as well as online prior to the event. The open house will also provide an opportunity for the public to provide feedback to the project team. The Preliminary Design Study report will be finalized following this open house and the study will be completed in winter 2018.

There are a small number of privately owned properties that will need to be acquired as part of the preferred alignment. The City will be in touch with the affected property owners directly and will
meet one-on-one with them in the fall 2017. These meetings will occur ahead of a public open house and the preferred alignment will be reviewed at the meetings with property owners. [FM1]

Please review the FAQs and let me know if you are okay with the Update revision. Once you have reviewed, I will get in touch with Nancy to get the webpage updated and in the tabbed format.

Thanks,

Morgan

Hi Morgan,

My changes are enclosed.

On the timeline – suggest combining the two boxes as shown enclosed, it reduces highlighting the delay.

On the web content – we cannot state changes as the reason for the delay people will ask what those changes are, and in fact there are none. We should just stay silent on this issue. If we are asked by the media I will need help with a proper response.

Thanks,

Do I have this correct?
Hello,

I have one small comment attached.

The timeline doesn’t correspond with what is written in the web text: “Landowner meetings and a public open house will be held in the Fall and Winter of 2017”, where the timeline shows them happening in the Fall.

Good Morning everyone,

Just the reminder that today noon is the deadline to get all your comments back on the WRCP Boards to MMM.

If I don't receive your comments back by noon today, I will assume that all is good and these boards will get distributed to the Council and rest for their reviews by Tomorrow.

Thank you,

Kind Regards,

Shima

Subject: William Clement Parkway - Open House Board Reviews
Importance: High

Good Morning all,

The William Clement Parkway Open House Materials & Preliminary Plans are saved on Temp. folder for your review. Due to the restricted schedule and to meet our deadlines for this project, it is very crucial that you have your comments back to me by no later than Monday, Nov. 7th before Noon. These boards then gets distributed to council, etc. the following day, therefore it is very important that I have your comments back by Monday morning, so if there are any changes then MMM has the afternoon to work on them and make the changes.

The schedule is very tight and the plan is to meet with impacted property owners starting 3rd week of November, (probably the first be on Nov. 24th or Nov. 28th).
The office of communication is aware of this tight schedule and they are reviewing the boards during this week as well.

Due to the size restrictions, I've saved "WRCP Public Engagement Materials" as well as "the Preliminary Plans" in Share folder, (the link below). Please let me known if you can get these files ASAP.

W:\Temp\William Clement Parkway - Open House #2

If you have any question, please let me know.
Also, if I am missing someone for this review, please feel free to forward these materials to them, but cc me on that email and let them know about the deadline for the comments.

Thank you,
Shima

Hello,

I have a meeting at 2:00… So I need to leave by 1:30. If you think we only need 30mins, then we can keep this time but if you think it might run longer, please change it to the morning.

Thanks,

Shima
Hi Morgan,

Hope you are doing well.

Would you please give me some updates on the status of the WRCP Board reviews? Thanks,

Shima

Re: William R. Clement Parkway Extension Project- FILE 5912.00

17(1)(3)(i) Personal information of a 3rd party
17(1)(3)(i) Personal information of a 3rd party
Hello Richard,

Please proceed with completing the WRCP project. We would like to use the following timeline for completion, as previously discuss with Kerra:

- We had a Stakeholder meeting with Varsity View last week. I will send the minutes and action items in a separate email. I advised we will get back to them in October.
- We will aim to have the project website updated early next week.
- City provision of comments on the draft Preliminary Design Report will be by end of August 2017.
- Remaining stakeholder and landowner meeting by WSP Group in October 2017.
- Final Open House early December 2017
- Submission of Final Engineering Report end of January.
- Early 2018 Admin report to SPC IRPW.

Please provide an updated project Gantt chart with all necessary tasks and advise me directly if there are any issues. Thank-you for your patience with this project.

Regards,

Hi Ken,

I ran into Lester in the hallway last week and asked about the status of his meeting with Doug about WRCP study project. He noted that the meeting had not yet taken place.

I may be worthwhile to follow-up with Doug’s office to book a meeting. I believe a few citizens have contacted PW asking for updates but there is little the project manager can update them on until more direction has come from Lester via Doug.

Gimme a call if none or only some of the above is making sense.

Michelle Finley
Communications Officer
Office of the Chief Administrative Officer
P: 204-986-2039
M: 204-470-1188
Hey Morgan, we received the comments you had on the advertising materials etc. but did you have comments on the boards themselves?

Also, any direction on the status and program for the next steps? i.e. the landowner meetings?

William R. Clement Parkway and Sterling Lyon Parkway Extensions – Proposed Project Design and Property Impacts

Dear Property Owner,

The William R. Clement Parkway and associated Sterling Lyon Parkway extensions are important components of the City of Winnipeg's Transportation Master Plan. The City of Winnipeg is undertaking a study to develop a recommended design of the proposed roadways and intersections. More information can be found at winnipeg.ca/WRCP-extension.

The City of Winnipeg would like the opportunity to meet with you because part or all of your property may be required for the William R. Clement Parkway and Sterling Lyon Parkway extensions. It is important to note that as this time, no funding has been allocated for the construction of this project, nor has a construction timeline been set.

We would like to meet with all landowners whose properties may be impacted by the new roadways at a special meeting to describe the project, the land acquisition process in more detail, and answer any questions you may have.

Meeting Details:

- **Date:** Monday, October 2, 2017
- **Location:** Charleswood Library, 6-4910 Roblin Boulevard, Winnipeg
- **Time:** 6:00 p.m. – 8:00 p.m.
- **RSVP:** Brittany at 204-943-3178 or brittany.shewchuk@wsp.com

If you have any further questions, please do not hesitate to contact me directly.

Yours sincerely,

Scott Suderman, P.Eng.
Transportation Facilities Planning Engineer, Public Works Department
ssuderman@winnipeg.ca 204-986-6963

cc. City of Winnipeg, Real Estate Division
Hey Folks:

Please find attached the landowner list we have with the “higher risk” parcels identified – those parcels that have houses on them, those where the new road runs very close to existing residences, and those that take entire vacant land (less risky) – all highlighted accordingly.

We can certainly try to attain our timeline as proposed if we could set up a time to meet with the Councillor and also try to set up individual meets with the home owners and others that pose a higher risk to the project.

There are 7 full takings with dwellings
5 properties with dwellings that will have the greatest impact as a result of the new roadway (injurious affection)
4 properties full taking undeveloped (low risk) – I do not recommend an individual meeting (group meeting)

Hope this helps assesses the situation better.

Dave J.

Hi Shima:

If we are planning to do landowner meetings the week of November 28 still, the registered mail has to go out on Thursday. In order to achieve this, administratively we will need a day to prepare the mailing, so we need to know by this afternoon in order to finalize venues and prepare the mail out.

Thanks,

Dave J.

Hey did we not have a meeting booked for this afternoon?
Hi Shima:

We should update the web site with the new timeline and I recommend we also should add in the public engagement report we have for the first PIDs session on to the web site.

If the attached looks good to you, we will send it over to Nancy Dean for posting. Thanks,

Dave J.

Hi Morgan:

Any update on the WRCP landowner meetings? It is getting rather tight to try to do them before X-mas. Has there been any decisions yet? We also need to update the website with our future plans and dates.

Thanks,

Dave J.

Summary of Public Engagement Phase One for the
William R. Clement Parkway Extension
Functional & Preliminary Design Study

Prepared for:
The City of Winnipeg

Prepared by:

WSP | MMM GROUP

5514150-000.130
1.0 PUBLIC INFORMATION DISPLAY SESSION

The first public engagement event for the Winnipeg R. Clement Parkway Extension Study was a Public Interactive Display Session (PIDS) Event held on March 19, 2015 from 4:30 to 7:30 pm in the Chapel of the Canadian Mennonite University (500 Shaftesbury Boulevard). The event was advertised in the Winnipeg Sun, Winnipeg Free Press, The Sou’wester, and through the City of Winnipeg’s social media outlets (Appendix A). In addition, a newsletter advertising the open house was emailed to stakeholders and mailed as unaddressed mail to area residents (Appendix A). Information about the event was also posted on the project’s webpage. A number of participants found out about the event through word-of-mouth and through a copy of the newsletter recipient posted at the dog park.

Approximately 300 people signed in at the event. Presentation storyboards (Appendix A) outlined the purpose of the study, the project study area, the project’s scope, phases, and timeline, as well as other pertinent information including maps and visuals.

Attendees were given the opportunity to provide feedback in various forms after reviewing the information. Participants were provided with sticky-notes and were encouraged to provide their comments and feedback directly on the storyboards. Participants were also provided with comment forms to be filled out and the end of the event. 153 paper comment forms were collected.

An online survey was also created via Survey Monkey, with a link provided to attendees and posted on the project webpage. The online survey included all materials presented at the PIDS event, included a series of questions, and allowed participants to provide comments/feedback on each storyboard. 23 individuals completed the online survey.

2.0 FEEDBACK SUMMARY

Paper Comment Forms

3.0 MAJOR THEMES

Overall, participants were divided in their support of the Parkway extension. Many see it as necessary to accommodate the current commuter traffic that occurs along Wilkes Avenue, Grant Avenue, and Elmhurst Road. Moreover, many see it as necessary to accommodate the future traffic resulting from the Ridgewood South development. Many participants were against the project altogether, voicing concerns about potential disturbances to existing residential development, natural habitats, greenspace, and the safety of nearby residents. Some want the City to focus on fixing current infrastructure rather than building new.

A number of participants also remained neutral about the project, understanding that a Parkway extension and infrastructure improvements are necessary as development occurs and the City grows, but voiced concerns about how the extension is constructed so as to minimize disturbances to the existing assets of the area.

A number of key themes were revealed by the public during the PIDS event, and through the online survey, these themes included:

Maintenance of the Dog Park
Many participants were very concerned about the loss of the dog park. This dog park is seen as a huge asset to the community, and although many commenters understand its temporary nature, they see it as adding much value to the community, not only for its dogs, but also for its residents. Many participants suggested that if the dog park is removed due to the parkway extension it should be replaced in a nearby location. Some suggestions included an off-leash area to be constructed somewhere in Assiniboine Forest, or in an area within the existing Parkway (north of Grant Avenue).
Loss of Greenspace & Disturbance of Harte Trail, Flora and Fauna
Much concern surrounded the future of Harte Trail. Harte Trail is also seen as a major community asset; community members use it for walking and cycling, and appreciate its natural flora and fauna. Many participants were very concerned with the potential loss of the trail and the potential disturbance of its natural habitat. Also, many participants were concerned about the general loss of greenspace due to the potential Parkway extension. A number of participants noted that they had moved to Charleswood for the quiet country living the area offers, which may be diminished as a result of the extension, particularly for residents whose properties may back onto the future extension.

To mitigate disturbance of the Harte Trail, a number of participants suggested that a grade separation be constructed at the Harte Trail as part of the extended Parkway. Alternatively, it was suggested that a pedestrian overpass be built as part of the Harte Trail, which could also serve as a wildlife crossing land-bridge.

Design/Location of the Parkway’s Extension
Some participants commented that the Parkway’s extension should include various grade separations. Many suggested that an overpass or underpass be built to accommodate the CN Rail line and Wilkes Avenue. A number of comments raised concerns about drainage if an underpass was to be built.

In regards to project phasing, a number of participants commented that they would prefer if Phase I of the extension be constructed all the way to Wilkes Avenue, so that traffic is diverted off of Elmhurst Road.

In regards to aesthetic, one participant would like the extension to be designed and built to the high-quality of the current Parkway (north of Grant Avenue). A number of participants mentioned that Active Transportation components should be implemented in the design of the Parkway’s extension. A few participants suggested that a tunnel be built from Grant Avenue to Wilkes Avenue to accommodate the Parkway extension.

Improvement of Wilkes Avenue
A number of participants noted that Wilkes Avenue should be twinned from Sterling Lyon Parkway to the Perimeter. Many believe that these improvements should be made before the Parkway’s extension is built. A few participants also mentioned that the intersection at Wilkes Avenue and Elmhurst Road should either be improved with lights or a traffic circle, or completely closed altogether.
Safety
A number of participants commented on safety concerns related to the high-speed traffic on the Parkway extension, particularly due to its close proximity to housing and schools. Concerns and questions were also raised about whether the extension will be a trucking route, and if transport trucks will be carrying dangerous goods.

Sound Attenuation & Lighting
Certain participants outlined concerns regarding resulting noise of the Parkway extension, and that the extension should be built with sufficient sound mitigation components. A suggestion to mitigate noise, and promote safety, was to decrease the speed on the Parkway extension to 60 km/hr. Concerns about noise were also outlined in regards to the construction of a future overpass. Many residents do not want the quiet nature of Charleswood to be affected by the Parkway extension.

Some participants also mentioned their concern with light pollution affecting areas adjacent to the proposed extension. Mitigation measures were also suggested to be implemented for the bright lighting required along the Parkway.

Project Name* [common header on project page]
William R. Clement Parkway and Sterling Lyon Parkway Extensions

Functional & Preliminary Design Study

Project Introduction –

Update July 2017 – Due to unexpected changes during preliminary design, the timeline for this project was altered. The project team is currently updating stakeholders and residents with the revised project timeline. Landowner meetings and an open house will be held in the Fall and Winter of 2017 to discuss the draft preliminary design.

The William R. Clement Parkway (WRCP) and Sterling Lyon Parkway (SLP) Extensions are important components of the City of Winnipeg’s future transportation system, providing north-south and east-west links in west Winnipeg. The City’s Transportation Master Plan, which guides transportation planning in Winnipeg, includes the WRCP Extension as a major transportation facility, to accommodate future travel demand in the area. In March 2015, a public information display session introduced the public to the WRCP Extension study. Feedback from this event was considered in the development of alignment options for the study.

The City of Winnipeg has commenced a study to guide the implementation of the WRCP and SLP extensions, which consists of two phases:

Phase I - Short-term

- The recommended road network includes the extension of WRCP from Grant Avenue to a signalized intersection with the extension of SLP.

Phase II* - Long-term

- Future extension of WRCP from SLP to McGillivray Blvd.

*(as per Transportation Master Plan)

Engage*

Landowner meetings and a public open house will be held in the Fall and Winter of 2017. Invitations will be sent to residents in addition to notification through advertisements and social media.

Thank you to those who have participated in the project so far through open houses and online surveys.

**Timeline** [attach updated timeline]

**Background**
The City's Transportation Master Plan approved by City Council in November 2011 includes the WRCP Extension as a major transportation facility. The WRCP Extension is identified in the Transportation Master Plan as an important component of the City's strategic road network to accommodate the travel demand associated with future residential, commercial, and industrial growth in west Winnipeg.

The City's Transportation Master Plan identifies the extension of the WRCP between Grant Avenue and Wilkes Avenue as a medium-term project. However, on April 25, 2012, Council approved an amendment to the Transportation Master Plan resulting in this portion of the WRCP Extension becoming a short-term project. The future extension of the WRCP between a signalized intersection with the extension of SLP and McGillivray Boulevard is defined as a long-term project.

**Study Scope:**
- Conduct functional and preliminary design studies for the WRCP and SLP extensions.
- Develop alignment options for an east-west connection south of the CN Mainline.
- Develop grade separation options at the CN Mainline.
- Develop alternatives for the Harte Trail crossing.
- Identify potential dog park location(s).
- Obtain Environmental Act Licensing for Phase 1.
- Conceptual Environmental Assessment Study for Phase 2.

Functional & Preliminary Design Study

Project Introduction—

Update July 2017—Due to unexpected changes during preliminary design, the timeline for this project was altered. Due to project prioritization, the original timeline for this study was extended. The project team is currently updating stakeholders and residents with the revised project timeline. Landowner meetings and an open house will be held in the Fall and Winter of 2017 to discuss the draft preliminary design.

The William R. Clement Parkway (WRCP) and Sterling Lyon Parkway (SLP) Extensions are important components of the City of Winnipeg's future transportation system, providing north-south and east-west links in west Winnipeg. The City's Transportation Master Plan, which guides transportation planning in Winnipeg, includes the WRCP Extension as a major transportation facility, to accommodate future travel demand in the area. In March 2015, a public information display session introduced the public to the WRCP Extension study. Feedback from this event was considered in the development of alignment options for the study.

The City of Winnipeg has commenced a study to guide the implementation of the WRCP and SLP extensions, which consists of two phases:

Phase I—Short term
- The recommended road network includes the extension of WRCP from Grant Avenue to a proposed intersection with the extension of LIP.

Phase II—Long term
- Future extension of WRCP from SLP to McGillivray Blvd.

*as per Transportation Master Plan

Engage*

Landowner meetings and a public open house will be held in the Fall and Winter of 2017. Invitations will be sent to residents in addition to notification through advertisements and social media.

Thank you to those who have participated in the project so far through open houses and online surveys.

For more information, please contact Dave Jopling, Manager Planning and Design, MMM Group Limited

**Timeline*** [attach updated timeline]

**Background***
The City's Transportation Master Plan approved by City Council in November 2011 includes the WRCP Extension as a major transportation facility. The WRCP Extension is identified in the Transportation Master Plan as an important component of the City's strategic road network to accommodate the travel demand associated with future residential, commercial, and industrial growth in west Winnipeg.

The City's Transportation Master Plan identifies the extension of the WRCP between Grant Avenue and Wilkes Avenue as a medium-term project. However, on April 25, 2012, Council approved an amendment to the Transportation Master Plan resulting in this portion of the WRCP Extension becoming a short-term project. The future extension of the WRCP between a signalized intersection with the extension of SLP and McGillivray Boulevard is defined as a long-term project.

The City of Winnipeg has commenced a study to guide the implementation of the WRCP and SLP extensions, which consists of two phases:

**Phase I - Short-term**
- The recommended road network includes the extension of WRCP from Grant Avenue to a signalized intersection with the extension of SLP.

**Phase II* - Long-term**
- Future extension of WRCP from SLP to McGillivray Blvd.
*(as per Transportation Master Plan)

Study Scope:
- Conduct functional and preliminary design studies for the WRCP and SLP extensions.
- Develop alignment options for an east-west connection south of the CN Mainline.
- Develop grade separation options at the CN Mainline.
- Develop alternatives for the Harte Trail crossing.
- Identify potential dog park location(s).
- Obtain Environmental Act Licensing for Phase 1.
- Conceptual Environmental Assessment Study for Phase 2.

Functional & Preliminary Design Study

**Project Introduction**

Update July 2017 — Due to unexpected changes during preliminary design, the timeline for this project was altered. Due to project prioritization, the original timeline for this study was extended. The project team is currently updating stakeholders and residents with the revised project timeline. Landowner meetings and an open house will be held in the Fall and Winter of 2017 to discuss the draft preliminary design.

The William R. Clement Parkway (WRCP) and Sterling Lyon Parkway (SLP) Extensions are important components of the City of Winnipeg’s City’s future transportation system, providing north-south and east-west links in west Winnipeg. The City’s Transportation Master Plan, which guides transportation planning in Winnipeg, includes the WRCP Extension as a major transportation facility, to accommodate future travel demand in the area. In March 2015, a public information display session introduced the public to the WRCP Extension study. Feedback from this event was considered in the development of alignment options for the study. In January 2016, an open house was held to share phase 1 design options and feedback from that event is being considered in the recommendation of the preliminary design.

The City of Winnipeg has commenced a study to guide the implementation of the WRCP and SLP extensions, which consists of two phases:

**Phase I: Short-term**
- The recommended road network includes the extension of WRCP from Grant Avenue to a signalized intersection with the extension of SLP.

**Phase II: Long-term**
- Future extension of WRCP from SLP to McGillivary Blvd
  [as per Transportation Master Plan]

**Engage**

Landowner meetings and a public open house will be held in the Fall and Winter of 2017. Invitations will be sent to residents in addition to notification through advertisements and social media.

Thank you to those who have participated in the project so far through the information session, open house, etc., and online surveys.

Comment [SS1]: This is not accurate. The delays were caused by the City and not changes.

Comment [FM2]: We should likely add that the dates for the other two open houses: July 2015 and January 2016.

Comment [VM3]: Added

Comment [TS4]: The common header is pretty text heavy. As this duplicates the timeline suggest deleting this.

Timeline

Background
The City's Transportation Master Plan approved by City Council in November 2011 includes the WRCP Extension as a major transportation facility. The WRCP Extension is identified in the Transportation Master Plan as an important component of the City's strategic road network to accommodate the travel demand associated with future residential, commercial, and industrial growth in west Winnipeg.

The City's Transportation Master Plan identifies the extension of the WRCP between Grant Avenue and Wilkes Avenue as a medium-term project. However, on April 25, 2012, Council approved an amendment to the Transportation Master Plan resulting in this portion of the WRCP Extension becoming a short-term project. The future extension of the WRCP between a signalized intersection with the extension of SLP and McGillivray Boulevard is defined as a long-term project.

In December of 2013, the 2014 Capital Budget was approved by Council to include the Functional Design Study of WRCP Extension. In December of 2014, the Capital budget was amended to include funding from the Charleswood Transportation Levy to expand the scope of work to include studying twinning and realignment options for Wilkes Avenue.

The City of Winnipeg has commenced a study to guide the implementation of the WRCP and SLP extensions, which consists of two phases:

Phase I - Short-term
• The recommended road network includes the extension of WRCP from Grant Avenue to a signalized intersection with the extension of SLP.

Phase II* - Long-term
• Future extension of WRCP from SLP to McGillivray Blvd.

*as per Transportation Master Plan

Study Scope:

• Conduct functional and preliminary design studies for the WRCP and SLP extensions.
• Develop alignment options for an east-west connection south of the CN Mainline.
• Develop grade separation options at the CN Mainline.
• Develop alternatives for the Harte Trail crossing.
• Identify potential dog park location(s).
Obtain Environmental Act Licensing for Phase 1-
Conceptual Environmental Assessment Study for Phase 2.

FAQs
Anticipated list of Questions and Answers for project – will be added at a later date once Comm Strat is updated.

Q. What are some of the key components of the WRCP Study? Tell me about this project.
The William R. Clement Parkway (WRCP) Extension is an important component of the City of Winnipeg's future transportation system, providing a north-south link in west Winnipeg. The City's Transportation Master Plan, which guides transportation planning in Winnipeg, includes the WRCP Extension as a major transportation facility, intended to accommodate future travel demand in the area.

The WRCP Extension will include an underpass or overpass of the CN mainline, a bridge for the Harte Trail, an environmental assessment, and integration of recreational opportunities such as parks and pathways. The study will not only look at improving the north-south movement of people, goods and services but will also look at improvement to Wilkes Avenue.

Q. Why are we spending money on new roads instead of fixing our existing infrastructure?
The City needs to proactively plan for future growth. The William R. Clement Parkway extension will support economic development, create recreational opportunities and will take us one step closer to the completion of the Strategic Inner Ring Road to reduce traffic on neighborhood streets.

This transportation corridor is intended to support local and regional economic growth for the City; the grade separation of the WRCP Extension at the CN Rail Line at Wilkes Ave., along with many other improvements, will provide more efficient movement of goods and services in the City.

This study is partially funded by the Charleswood Transportation Levy which was developed to support the improvement and development of transportation facilities for that area.
Q. What is the budget for this project? Where is funding going to come from for this project?
This project does not have a construction budget yet. Council has only approved the funding to conduct an engineering study.

Q. How will this new facility impact existing properties?
There are a small number of privately owned properties that will need to be acquired should the William R. Clement Parkway (WRCP) Extension and Re-alignment of Wilkes Avenue construction project receive Council approval in the future.

The City will be in touch with the affected property owners directly and will meet one-on-one with them in the fall of 2017 ahead of a public open house.

Q. Will the dog park be shut down?
The Dog Park area was always intended to be a temporary use of that property, as the City purchased that property many years ago with the intention of using it for a transportation corridor. The City understands the importance of the Charleswood Dog Park to area residents, and has identified a number of alternate locations within the area.

Q. Why are we going to build a road through the heavily treed area, what are we going to do to protect environmentally sensitive areas?
The project team includes a team of environmental and biology professionals who are performing an Environmental Assessment that includes the identification of environmentally sensitive areas. We will take measures to mitigate negative impacts where possible.

Q. Are there traffic signals planned for this new roadway at all the intersections?
A key component of the study is to look at current and future traffic to adequately address traffic needs and to ensure public safety. We have considered a number of options for intersections along the extension including an underpass, overpass and signalized intersection.

Q. When will the public have an opportunity to review the completed Preliminary Design Study and preferred alignment information?
The City is planning an open house for fall 2017. The preferred alignment will be available to view at this event as well as online prior to the event. The open house will also provide an opportunity for the public to provide feedback to the project team. The Preliminary Design Study report will be finalized following this open house and the study will be completed in winter 2018.

There are a small number of privately owned properties that will need to be acquired as part of the preferred alignment. The City will be in touch with the affected property owners directly and will meet one-on-one with them in the fall 2017. These meetings will occur ahead of a public open house and the preferred alignment will be reviewed at the meetings with property owners.

Q. What are the next steps?
Once the study is complete, it will be presented to Council for their approval of the suggested alignment and understanding of the costs associated to aid the City in seeking funding opportunities.

Good morning,

The following additional items have been added, as highlighted below.

Kind regards,
Kate

Good afternoon,

The following is the draft Agenda for the October 31, 2017 meeting of the Standing Policy Committee on Infrastructure Renewal and Public Works.

Please confirm that we can proceed to publish the agenda at 8:30 a.m. on Friday, October 27, 2017.

DELEGATIONS:
1. Lydia Dyck (See Report 9)

REPORTS
1. Capital Integration Project – Southwest Transitway (Stage 2) and Pembina Highway Underpass – EPC June 29, 2016 (verbal report)
2. Expansion of Transit Vehicle Overhaul and Maintenance Facilities Capital Project – Council December 14, 2016 (recommendation #9 verbal report)
3. University of Manitoba Station (Dafoe Terminal) – RIS 12572
4. Amendments to the Winnipeg Parking By-law – RIS 12578
5. Innovation On-Street Parking Solutions for the Exchange District – RIS 12537
6. Waverley Street at CN Mainline (Rivers) Grade Separation – IRPW October 4, 2016 (verbal report)
7. Review of Snow Clearing and Ice Control Policy – RIS 12591
8. Cost Sharing Option for Residents Living on Gravel Roads – Council Sept 27, 2017
10. Traffic Calming Measures – Portage Avenue – Oct 10 City Centre
11. Traffic Study – Aldgate Road and Paddington Road – RIS 12551
12. Traffic Study – Keslar Road at Bairdmore Boulevard – RIS 12552
13. Traffic Study – Speed Limit on Waverley Street, from Bishop Grandin Boulevard to Sandusky Drive – Oct 2 Riel
14. Crosswalk Study – Regent Avenue West at Chrislind Street – Oct 17 EKT
15. Pandora Avenue Road Renewal – Oct 17 EKT
16. Rationale for Implementing Reduced Speed School Zones – RIS 12582
17. Wilkes Avenue Alignment to William R. Clement Parkway Extension

Following up and a reminder to speak to Lester about this project and the completion deadline of January 30th.

We just received access to the materials.

Once again, Michelle and I have concerns about this timeline.

Thanks,

Morgan

Morgan Vespa
P: 204-986-7134
C: 204-391-5096

Good Morning all,

The William Clement Parkway Open House Materials & Preliminary Plans are saved on Temp. folder for your review. Due to the restricted schedule and to meet our deadlines for this project, it is very crucial that you have your comments back to me by no later than Monday, Nov. 7th before Noon. These boards then get distributed to council, etc. the following day, therefore it is very important that I have your comments back by Monday morning, so if there are any changes then MMM has the afternoon to work on them and make the changes.

The schedule is very tight and the plan is to meet with impacted property owners starting 3rd week of November, (probably the first be on Nov. 24th or Nov. 28th)

The office of communication is aware of this tight schedule and they are reviewing the boards during this week as well.

Due to the size restrictions, I’ve saved ”WRCP Public Engagement Materials” as well as ”the Preliminary Plans” in Share folder, (the link below). Please let me known if you can get these files ASAP.

W:\Temp\William Clement Parkway - Open House #2

If you have any question, please let me know.
Also, if I am missing someone for this review, please feel free to forward these materials to them, but cc me on that email and let them know about the deadline for the comments.

Thank you,

Shima

Hello Scott,

The Chair of IRPW has been receiving feedback/concerns on William R Clement Parkway. One item is in the attached e-mail which I think could be resolved by having the citizens attend the next Property Owner and/or Public Open House where we can further identify the concerns of the citizen group.

Subsequent to that is an additional e-mail below where the Province has informed citizens that the Project is on Hold. I am not sure if we want the Province speaking as such but possibly you could elaborate on how they are communicating to our Citizens.
See the following;

Subject: William Clement parkway extension.

Hi
I would like to register my support for the proposed parkway extension.
Having attended all the public meetings and read all the supplied documents I think the plans submitted address many of the concerns that have been raised.
The extension is overdue with many of the side streets being overrun with traffic heading to the seasons of tuxedo area and people trying to avoid going to kenaston.

a gravel side walk which is unusable in the winter or when it rains so people are always walking on the road.
It is constantly falling apart from the excess of traffic . Which is the same for a lot of the side streets surrounding us.

Hence this extension is well overdue.
Thanks
Jim Berezowsky

Hi Felicia,

This is more of an FYI because the first landowner meeting for WRCP is tonight. Attached comment sheet and presentation will be provided tonight. Michelle and I made notes on the presentation and FAQ at a meeting last week. FAQs are intended to be internal only, not distributed to the public.

Please let me know if you have any comments as there should still be time to make changes today.

FYI – the team is still looking to send out the invitation for the landowner meeting by Thursday. Shima responded to me earlier today outlining the reasons why the project has to be complete by January 31st.

Morgan Vespa
P: 204-986-7134
C: 204-391-5096

Hi Shima:

If we are planning to do landowner meetings the week of November 28 still, the registered mail has to go out on Thursday. In order to achieve this, administratively we will need a day to prepare the mailing, so we need to know by this afternoon in order to finalize venues and prepare the mail out.

Thanks,

Dave J.

Hi Shima:

We should update the web site with the new timeline and I recommend we also should add in the public engagement report we have for the first PIDs session on to the web site.

If the attached looks good to you, we will send it over to Nancy Dean for posting. Thanks,

Dave J.

Hi Felicia,

I drafted the response below that I can send to Scott to address the question he asked you. Please let me know if I should send.

Scott,

I spoke with Felicia and she suggests bringing the proposed schedule to Jim Berezowsky to relay to Dave Wardrop who will discuss with the CAO. Please contact Councillor Morantz’ office directly to provide a project update and the revised schedule.

I am currently working with Michelle Finley to draft an update to web content.

Morgan

Morgan Vespa
Manager of Public Engagement

M: 204-391-5096

Hello Morgan: you help with the website would be much appreciated.

Hello Felicia: can you confirm if you will be bringing the proposed schedule to the CAO and Cllr Morantz for their consensus prior to us updating the website. If that is possible it would be appreciated.

Thank-you,

Scott Suderman, C.E.T., P.Eng.
Transportation Facilities Planning Engineer
Public Works
P: 204-986-6963
M: 204-782-7189
Thank you for the update.
Would you like Michelle and I to work on drafting a web update at this time or would your team like to tackle that?

Morgan

Morgan Vespa
Manager of Public Engagement
P: 204-986-7134
M: 204-391-5096

Hello Morgan,

Yes we have, please find enclosed. We are going to run this schedule by the CAO and Clr Morantz as discussed, but can you clarify who would do this?

We have a meeting already scheduled with Varsity View, but it is for July 7th.

I incorporated Scott’s changes into the timeline. What do you think of his edits in the attached web content and suggesting we stay silent on the delay?

I will also require FAQs from you in order to move the web content forward for final review.

Thanks,

Morgan

Morgan Vespa

Hi Morgan,

My changes are enclosed.

On the timeline – suggest combining the two boxes as shown enclosed, it reduces highlighting the delay.

On the web content – we cannot state changes as the reason for the delay people will ask what those changes are, and in fact there are none. We should just stay silent on this issue. If we are asked by the media I will need help with a proper response.

Thanks,

Hi Scott,

Please find updated WRCP project web content (to reformat existing web content into tabbed project webpage template) and updated timeline attached for your review. Once we receive your comments, the changes will go for final review and I will initiate the changes to the webpage which go live after CAO and Councillor are updated. Michelle is currently working on adding FAQs to this web update as there are currently no FAQs on the webpage. She will send those for review at a later date.

Thank you,

Morgan

Hey Morgan:

We had hoped we would have direction to send the Landowner letters by registered letters by last Thursday due to ensuring they have two weeks’ notice of the meeting. This has deadline has passed and will result in pushing the meetings a week later in December which is getting into x-mas concert season and other evening events...

Hi Morgan,

FYI. I have asked Brad Neirinck to attend the Impacted property meetings with the property owners as well.

We need to have a briefing meeting with the Councilor before these meetings (Meetings are not set yet), Michelle Finely mentioned that your department will arrange that meeting, but I and MMM PM need to be there to do the briefing for him, we did same thing for the past two open houses as well.

Please let me know if you set this meeting with him or you want me to set it up directly, as I did it for the past two OHs for this project?

Thanks,

Shima

Subject: WRCP PE Events and Venues

Hey Dave,

Here is a revised listing of potential WRCP PE dates and venues.

Ryan
Hi David,

WRCP draft web content update attached. The current webpage requires updating to go into the tabbed project webpage format. The public has not been informed of the status of the project in over a year. Michelle is updating the comm strat and FAQs will be added to the webpage at a later date.

The proposed stakeholder meeting dates are Nov 28, Nov 30, Dec 1, Dec 5. I recommended that those landowners whose entire land or home would be acquired should get individual meetings.

Thanks for catching that. Change has been made to correspond with Scott’s change to the timeline and the draft has been moved onward for final approval.

Morgan Vespa
Manager of Public Engagement
P: 204-986-7134
M: 204-391-5096

Hello,

I have one small comment attached.

The timeline doesn’t correspond with what is written in the web text: “Landowner meetings and a public open house will be held in the Fall and Winter of 2017”, where the timeline shows them happening in the Fall.

Tiffany

Thanks, Scott.
Updated timeline attached.
Once the FAQs are drafted and reviewed, I will move the updated web content through for final review and contact Nancy to get the webpage updated.

Morgan Vespa
Manager of Public Engagement
P: 204-986-7134
M: 204-391-5096

Hi Morgan,
My changes are enclosed.

On the timeline – suggest combining the two boxes as shown enclosed, it reduces highlighting the delay.

On the web content – we cannot state changes as the reason for the delay people will ask what those changes are, and in fact there are none. We should just stay silent on this issue. If we are asked by the media I will need help with a proper response.

Thanks,

Hi Scott,

Please find updated WRCP project web content (to reformat existing web content into tabbed project webpage template) and updated timeline attached for your review.

Once we receive your comments, the changes will go for final review and I will initiate the changes to the webpage which go live after CAO and Councillor are updated.

Michelle is currently working on adding FAQs to this web update as there are currently no FAQs on the webpage. She will send those for review at a later date.

Thank you,

Morgan

Yes, I will send to Scott and team and relay that the FAQs for the web will be coming from you at a later date.

Morgan

---

These are the ones from the comm strat (which has not been updated since January) ...I’m going to have to spend some time on these. I’m sorry but I won’t have them back today. Can we load what we have for now to the web?

1. **What are some of the key components of this project?**
   The William R. Clement Parkway (WRCP) Extension is an important component of the City of Winnipeg’s future transportation system, providing a north-south link in west Winnipeg. The City’s Transportation Master Plan, which guides transportation planning in Winnipeg, includes the WRCP Extension as a major transportation facility, intended to accommodate future travel demand in the area.

   The WRCP Extension will include an underpass or overpass of the CN mainline, a bridge for the Harte Trail, an environmental assessment, and integration of recreational opportunities such as parks and pathways. The study will not only look at improving the north-south movement of people, goods and services but will also look at improvement to Wilkes Avenue.

2. **What can people expect to see at the project open houses?**
   The public will have an opportunity to view presentation boards outlining proposed alignment options and project details, speak with project team members, and provide feedback.

3. **Why are we spending money on new roads instead of fixing our existing crumbling infrastructure?**
   The William R. Clement Parkway extension will support economic development, create recreational opportunities and will take us one step closer to the completion of the Strategic Inner Ring Road to reduce traffic on neighborhood streets.

   This transportation corridor is about supporting local and regional economic growth for the City; the grade separation of the WRCP Extension at the CN Rail Line at Wilkes Ave along with many other improvements will provide more efficient movement of goods and services in the City.

   This corridor will also relieve traffic significantly off of existing streets, including residential streets, to reduce the deterioration of those streets and make them more attractive for walking and cycling.
Also we need to proactively plan for future facilities.

This study is partially funded by the Charleswood Transportation Levy which was developed to support the improvement and development of transportation facilities for that area.

4. **What is the budget for this project? Or Where is funding going to come from for this project?**
   This project does not have a construction budget yet. Council only approved the funding to conduct an engineering study.

5. **How will this new facility impact existing properties?**
   The proposed options may impact properties in the area but the details of these impacts have not been finalized. Possible land impacts are shown to give some context to compare options. Once the design is further refined there will be finite detail about property impacts and the City will be in touch with the affected property owners directly.

   The City understands the importance of the Charleswood Dog Park, and will look at options for a different dog park location. Some potential locations will be presented at the open house.

6. **Will the road be going through an existing Dog Park?**
   Yes, the proposed alignments would impact the Dog Park. The City understands the importance of the Charleswood Dog Park, and will look at options for a different dog park location. Some potential locations will be presented at the open house.

7. **Why build a road through a park?**
   The Dog Park area was always intended to be a temporary use of that property, as the City purchased that property many years ago with the intention of using it for a transportation corridor. Understanding the importance of the Dog Park, we are looking at different dog park locations.

8. **Why are we going to build a road through the heavily treed area, what are we going to do to protect environmentally sensitive areas?**
   The project team includes a team of environmental and biology professionals who are performing an Environmental Assessment that includes the identification of environmentally sensitive areas. We are looking at mitigation, avoidance and relocations where possible.

9. **Are there traffic signals planned for this new roadway at all the intersections?**
   A key component of the study is to look at current and future traffic to adequately address traffic needs. We are presenting a number of options at the open house for intersections along the extension including an underpass, overpass and signalized intersection.

10. **Why are we building a road to nowhere, won’t this support urban sprawl?**
    This transportation corridor is about supporting local and regional economic growth for the City as it will connect to Wilkes Avenue or Sterling Lyon with a future extension of the corridor to McGillivray Blvd and Bishop Grandin Boulevard to provide more efficient movement of goods and services.

    This corridor will also relieve traffic significantly off of existing streets, including residential streets, to reduce the deterioration of those streets.

11. **What are the next steps?**
    Once the project is complete, it will be presented to Council for their approval of the roadway alignment and

Subject: WRCP update

Hello Scott,

Have you made contact with WSP to confirm a revised project timeline for the remainder of the work for WRCP?

Thank you,

Morgan

I forwarded Scott’s update to Felicia as well.

Regarding the FAQs - can you please add some from the comm strat to complete the web update?

Morgan Vespa

M: 204-391-5096

Yup I’m good with all of this stuff. Is FW in the know?

I’m tagging KB/DD in this because that info on property acquiring may be useful to include online in this case….not sure of the status of that doc.

MF

Hi Michelle,

Can you please review the attached web update for WRCP webpage along with the updated timeline? I put the existing content into the tabbed webpage format and added and changed some information (highlighted).

Could you please add FAQs from the comm strat for this project to that section as there are currently no FAQs on the webpage.

Once you are done reviewing, I will pass along to Scott and others to review.

Thank you,

Morgan
Hello Morgan: you help with the website would be much appreciated.

Hello Felicia: can you confirm if you will be bringing the proposed schedule to the CAO and Clr Morantz for their consensus prior to us updating the website. If that is possible it would be appreciated.

Thank-you,

Scott Suderman, C.E.T., P.Eng.
Transportation Facilities Planning Engineer
Public Works
P: 204-986-6963
M: 204-782-7189

Thank you for the update.
Would you like Michelle and I to work on drafting a web update at this time or would your team like to tackle that?

Morgan

Hello Morgan,

Yes we have, please find enclosed. We are going to run this schedule by the CAO and Clr Morantz as discussed, but can you clarify who would do this?

We have a meeting already scheduled with Varsity View, but it is for July 7th.

Regards,

Scott Suderman, C.E.T., P.Eng.

Hello Morgan,

Just FYI, I sent a separate email this morning to my A/Director, asking him to ask Dave Wardrop to discuss the timeline and close out plan with the CAO and Clr Morantz. We are already behind schedule with the revised timeline and are getting a lot of inquiries from the public including the Clr’s office.

Hi Scott,

I see you posed the same question to Felicia. If you do not receive a response via email, I will ask her in person when I see her next.

I will draft some web content with Michelle and get that to you as well.

Thanks for following up,

Morgan
Hi Morgan, yes I would like your help with the website. Can you advise who will be bringing our proposed schedule to the attention of the CAO and Clr Morantz to get their consensus prior to making it public. As we discussed this is an important step to ensure we don’t have any further delays in the project. I was under the impression it would be Felicia but can you confirm?

Thank-you

Hello Scott,

Please find attached - updated web content with FAQs added.

In the Update section, Michelle suggested the following phrasing to provide a reason for the delay in the study:
Update July 2017 – Due to project prioritization, the original timeline for this study was extended. The project team is currently updating stakeholders and residents with the revised project timeline. Landowner meetings and an open house will be held in the Fall of 2017 to discuss the draft preliminary design.

Michelle added FAQs through an updated comm strat and had one question regarding meetings with property owners:
Q. When will the public have an opportunity to review the completed Preliminary Design Study and preferred alignment information?
The City is planning an open house for fall 2017. The preferred alignment will be available to view at this event as well as online prior to the event. The open house will also provide an opportunity for the public to provide feedback to the project team. The Preliminary Design Study report will be finalized following this open house and the study will be completed in winter 2018.
There are a small number of privately owned properties that will need to be acquired as part of the preferred alignment. The City will be in touch with the affected property owners directly and will meet one-on-one with them in the fall 2017. These meetings will occur ahead of a public open house and the preferred alignment will be reviewed at the meetings with property owners. [FM1]

Please review the FAQs and let me know if you are okay with the Update revision. Once you have reviewed, I will get in touch with Nancy to get the webpage updated and in the tabbed format.

Thanks,

Morgan

Hi Morgan,

My changes are enclosed.

On the timeline – suggest combining the two boxes as shown enclosed, it reduces highlighting the delay.

On the web content – we cannot state changes as the reason for the delay people will ask what those changes are, and in fact there are none. We should just stay silent on this issue. If we are asked by the media I will need help with a proper response.

Hello Nancy,

I hope you had a nice vacation.

Can you please update the WRCP webpage? The attached content update puts the current content into the tabbed webpage format with an updated timeline and a few additions to text.

If you have time before the end of the week, that would be great. Please let me know if you have any questions.

Morgan

Hi David,

After speaking with Michelle and Felicia, the suggested wording for the update could be:
“Due to project prioritization, the original timeline for this study was extended.”

The project manager had written that he prefers we not address the delay in the web update and answer those questions if we receive them. What are your thoughts?
Updated draft attached.

Morgan

---

Hi David,

WRCP draft web content update attached. The current webpage requires updating to go into the tabbed project webpage format. The public has not been informed of the status of the project in over a year.
Michelle is updating the comm strat and FAQs will be added to the webpage at a later date.

Morgan

Hello Shima,

Thank you for providing that information. Is there a way to change the deadline? As stated on the open house boards, there is not currently secured funding for the project so why is January 31, 2017 the final date?

Michelle had mentioned her concerns in the meeting last week and I have the same concerns. I am concerned about the lack of updates to stakeholders over the last several months followed by rushing the last part of the engagement at the end of the year. The information may be sensitive and since the design was significantly changed since stakeholders last saw them, this may need some time to meaningfully engage, collect feedback and respond to it.

Please correct any of my information as I am still getting up to speed with some of these processes and this project.

Thanks!

Morgan

Hi Morgan,

I don't know how did that happened, but I will remove it for sure.

Regarding councillor meeting, I can have that arranged.

Regarding the tight schedule, I don't think there is much we can do. Due to past delays, and hiccups during last council reviews, this project got delayed for more than 7-8 months & the original plan was to have it done earlier in 2016, then got postponed to end of December 2016. & Due to all those delays, Now this project has to get done by Jan.31,2017.

That's the reason we need to have these board materials to council for their reviews maximum by Thursday, so they can get back to us in 2weeks (Michelle mentioned that she can put a rush request and have it back to us within 2weeks period), the plan is to have the 4 property meetings in the last week of November and the first week of December and done.
Hope this gives you better understanding of why we are working towards a very tight schedule.

Thank you,

Kind Regards
Shima

Hi Shima,

Not sure how this happened but your last several emails were sent to my personal email. Could you please delete that email and send future communications to my City email address – mvespa@winnipeg.ca

I agree, the Councillors need to be briefed before engagement occurs. I have not organized a meeting with Councillor before but if Michelle would like to schedule the meeting, she can make that call. Otherwise, I am okay with you organizing the meeting if Michelle and I are also invited.

On a more general note, as Michelle mentioned when you spoke on the phone last week, there are some concerns with the timing and tight timeline for this portion of the engagement. Was there any follow up regarding Michelle’s concerns that she had noted when you spoke last week?

Thanks,

Morgan

Hi Morgan,

FYI, I have asked Brad Neirinck to attend the impacted property meetings with the property owners as well.

We need to have a briefing meeting with the Councilor before these meetings (Meetings are not set yet). Michelle Finely mentioned that your department will arrange that meeting, but I and MMM PM need to be there to do the briefing for him, we did same thing for the past two open houses as well.

Please let me know if you set this meeting with him or you want me to set it up directly, as I did it for the past two OHs for this project?

Thanks,

Shima

Good Morning all,

The William Clement Parkway Open House Materials & Preliminary Plans are saved on Temp. folder for your review. Due to the restricted schedule and to meet our deadlines for this project, it is very crucial that you have your comments back to me by no later than Monday, Nov. 7th before Noon. These boards then gets distributed to council, etc. the following day, therefore it is very important that I have your comments back by Monday morning, so if there are any changes then MMM has the afternoon to work on them and make the changes.

The schedule is very tight and the plan is to meet with impacted property owners starting 3rd week of November, (probably the first be on Nov. 24th or Nov. 28th)
The office of communication is aware of this tight schedule and they are reviewing the boards during this week as well.

Due to the size restrictions, I've saved "WRCP Public Engagement Materials” as well as "the Preliminary Plans” in Share folder, (the link below). Please let me known if you can get these files ASAP.

W:\Temp\William Clement Parkway - Open House #2

If you have any question, please let me know.
Also, if I am missing someone for this review, please feel free to forward these materials to them, but cc me on that email and let them know about the deadline for the comments.

Thank you,

Shima

Hi Shima,

Thanks for your response.
Page #7 – I agree, there are too many boards so if that can be incorporated into another that would be great.
Page #9 – I know these have value from a technical view. I should have been more clear with my comment – Is this a proposed change to WRCP? Is this the current WRCP? Please indicate so the participant knows what they are looking at.

Thanks!

Morgan

Morgan Vespa
P: 204-986-7134

Hi Morgan,

Regarding your comments:

Page #7: we had such a board in last two open houses just a cloud with just a main topic in them, I eliminated in this open house boards, because we have too many boards and that didn’t add any value to the boards, however, you have a point there that I like” How did we addressed them” and this is something we can add on to a board.

Page #9: These are the cross section of the WRCP Corridor throughout the clement North-South link to the east-west corridor. This needs to be here and have a lot of value from technical point of view.

Page #10: I like you point just a page with only alternative names on them. Like it

Page #11: Agreed

If you agree with my comments, I can send them to MMM for their modifications

Hello Scott,

The Chair of IRPW has been receiving feedback/concerns on William R Clement Parkway. One item is in the attached e-mail which I think could be resolved by having the citizens attend the next Property Owner and/or Public Open House where we can further identify the concerns of the citizen group.

Subsequent to that is an additional e-mail below where the Province has informed citizens that the Project is on Hold. I am not sure if we want the Province speaking as such but possibly you could elaborate on how they are communicating to our Citizens.
See the following;

Subject: William Clement parkway extension.

Hi
I would like to register my support for the proposed parkway extension.
Having attended all the public meetings and read all the supplied documents I think the plans submitted address many of the concerns that have been raised.
The extension is overdue with many of the side streets being overrun with traffic heading to the seasons of tuxedo area and people trying to avoid going to kenaston.

a gravel side walk which is unusable in the winter or when it rains so people are always walking on the road.

It is constantly falling apart from the excess of traffic . Which is the same for a lot of the side streets surrounding us.

Hence this extension is well overdue.

Thanks
Hi Dave,

Just an update - this decision is still with the upper levels. I know that is not helpful but for now any movement on this is on hold. I will let you know if this changes. Thank you,

Morgan

Dave J.
Hi Dave,

Thanks for following up. I am still waiting to hear back regarding a decision. I will continue to press and relay these tight timelines.

Can you prepare a web update draft?

Thanks,

Morgan

Hi Morgan:

Any update on the WRCP landowner meetings? It is getting rather tight to try to do them before X-mas. Has there been any decisions yet? We also need to update the website with our future plans and dates.

Thanks,

Dave J.

Hi David,

I sent comments on the boards to Shima.

I passed my concerns along and am waiting to hear back regarding the timeline for the engagement. I know there is some internal discussion about this but Shima may have more concrete answers.

Thanks,
Morgan

Hey Morgan, we received the comments you had on the advertising materials etc. but did you have comments on the boards themselves?

Also, any direction on the status and program for the next steps? i.e. the landowner meetings?

Dave J.

Yes, these are the ones with my comments - they are currently with the consultant to be incorporated.

Can you send me the materials for the stakeholder meeting that you've seen? Or whatever has been sent over for approval?

Felicia Wiltshire

Hello Scott,

Just checking in to see if there has been any planning or movement on the WRCP landowners meetings to be held in October. Was the format finalized? We had discussed group meetings for most landowners and private meetings for those who would have significant acquisition of their land but I wasn’t sure if that was the final decision.

Are there dates in place and a plan for distributing invitations?

September is going to go by quickly and I would like to avoid a mad rush when we get close.

Thank you,

Morgan

Hello Scott,

Have you made contact with WSP to confirm a revised project timeline for the remainder of the work for WRCP?

Thank you,

Morgan
