APPENDIX C – PROJECT LOCATIONS AND TECHNICAL SCOPING

Notes:

The "Additional Information" provided within the following tables relative to specific Project Packages and/or Project Locations contain specific information or issues, known to exist on Site at the time of issuance of this Request for Proposal. This information is not meant to be exhaustive and not meant to take the place of investigations and due diligence required of the Proponent.

The specific utility and agency coordination identified below notwithstanding, the successful Consultant(s) will be required to investigate and coordinate any utility requirements of the Project. All reconstructions to include long side water service insulation protection.

Construction adjacent schools will be avoided during the school year where possible, and otherwise coordinated with the respective school division.

Any project with railway crossing within or adjacent to their limits must have work coordinated with the respective rail authority.

Additional Information:

General Assume 45 Working Days to Substantial Performance for this package. Will require 2 construction Tenders. Assume 90% of the working days for the construction Tenders will run concurrently. The assumption of working days noted for this assignment are the total working days of the construction tenders including working days running concurrently. The consultant will have to have resources to run concurrent construction tenders. The assumption of 1 working day of construction tenders running concurrently is not considered 2 working days for the consulting assignment.
