Please note the following and attached changes, corrections, additions, deletions, information and/or instructions in connection with the Tender, and be governed accordingly. Failure to acknowledge receipt of this Addendum in Paragraph 10 of Form A: Bid may render your Bid non-responsive.

QUESTIONS AND ANSWERS

- Q1: The documents indicate a specification for Geosynthetics (GCL, HDPE and Geocomposite) however when I look at the documents and drawings I do not see where that would come into play. Can you please clarify if they are required and if so under what scope item?
- A1: COMCOR typically just leaves all geosynthetics in the products section, on the slim chance that other work comes up during construction that requires such a product. However Geotextile is required above the stone drainage layer at gravity drain traps that drain to waste (GDT7) (detail W1303-2). And Geosynthetic clay liner may be required when restoring the leachate cleanout #5 riser after connection to GDT6 (detail W1303-1).
- Q2: The tender documents indicate that client specific versions of the bid bond form, consent of surety form, payment bond form, and labour/material bond form are required. Would the City be willing to accept standard CCDC forms in replacement of the client specific forms?
- A2: No. The City's documents should be used by all bidders.
