E7.7(a) In a draft agreement regarding this project between the Province and the City, the Province is proposing that the City obtain all Environmental Attributes earned by or otherwise accruing to the City in connection with this project in order that they can be transferred to the Province.

- (i) "Environmental Attributes" means all benefits or entitlements associated with decreased environmental impacts, including decreased greenhouse gases, now or in the future, direct or indirect, arising as a result of, relating to, or in connection with the Project including the measures undertaken by Winnipeg and all contractors, consultants, service providers and any other party it engages on the Project, and the right to quantify and register such benefits and entitlements with competent authorities.
