## **APPENDIX “C”**

### **MECHANICAL SIDEWALK SWEEPING INSPECTION STANDARDS**

#### OBJECTIVE

To provide a high standard of cleanliness on those Streets that have a high public profile due to large volumes of pedestrian traffic and are highly visible to the tourist traffic.

#### QUALITY OF WORKMANSHIP

A high standard of work is essential to achieve the above-mentioned objective. Therefore, the following quality standards will be applied by way of a field inspection on a block-by-block basis.

#### QUALITY STANDARDS

1. RESIDUAL FINES: Is the amount of dust or fine material left behind. These are to be kept to a minimum.
2. TAILINGS: Occasionally, when a machine is not functioning efficiently, a small trail of granular material is left behind and must be removed.

Placing one hand labourer behind the operation as a clean up man helps to rectify this problem.

3. SCRAPING: All areas of hard packed mud and granular material must be scraped loose. The only exception is where large quantities of mud, due to a watermain break, result in an excessive situation, in which case, the Inspector will arrange to have the Waterworks people remove the heavy material from these areas so that no more than one inch (1") remains. The balance is to be removed by the Contractor.
4. APPURTENANCES: (Under and/or around benches, newspaper and mail boxes, poles and to include level doorways)

Where possible, moveable appurtenances should be shifted to ensure that all material around and under items have been removed.

5. GUTTERS: All material from sidewalk (and curbs where applicable) is to be cleaned up and removed by the Contractor. Anything in excess of 10 mm of material which goes into the gutter as the result of scraping and hand labour operations, is to be removed by the Contractor. It is advisable, therefore, to instruct all personnel to scrape and hand sweep this material in towards the sidewalk to minimize this problem. The only alternative is to make a pass along the gutter on completion of the walk.

Either of the above alternatives may result in the need to utilize the curb lane, in which case, short term signing in accordance with the City of Winnipeg, Manual of Temporary Traffic Control must be adhered to. All foremen/lead hands are to be made familiar with this manual in the event of its need for implementation.

Failure to meet these standards will require spot locations or entire streets/sidewalks to be swept again within 24 hours.
