All Jackson Roller Blinds are made on a chain driven clutch operated system. This provides smooth operation of the blind along with the ability to stop the blind precisely at the desired place.

The control chain is a qualified #10 plastic chain which is neutral in colour. It is normally supplied at 12" less than the exact drop of the blind in order to ensure that the blind can be made to cover the entire window. The chain comes with a connector and a stop ball which prevent the blind from being over extended or rolled up too far. Optional metal chain is also available.

All Blinds are shipped with a child safety device attached to the chain.

**Tube Information**

All tubes are made of extruded aluminum. Alloy 6063T5. Exterior surface of the tube is smooth to prevent creasing of the fabric.

Tube sizes are:

- 1 1/8" Using a 10 lb clutch
- 1 1/4" Using a 10 lb clutch
- 1 1/2" Using a 20 lb clutch
- 2" Using a 20 lb clutch

Choose your clutch colour. We will ship the same colour of components for the chain and safety device. There is no difference in the price.

Metal chain is also available at a modest surcharge.

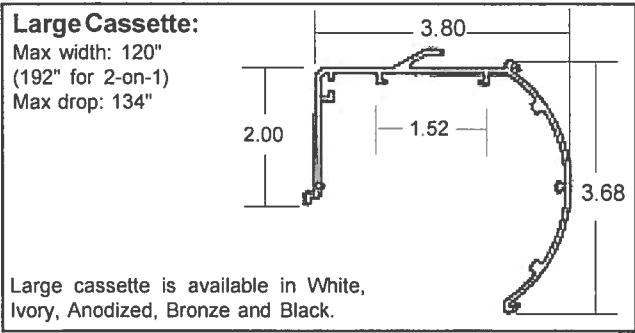

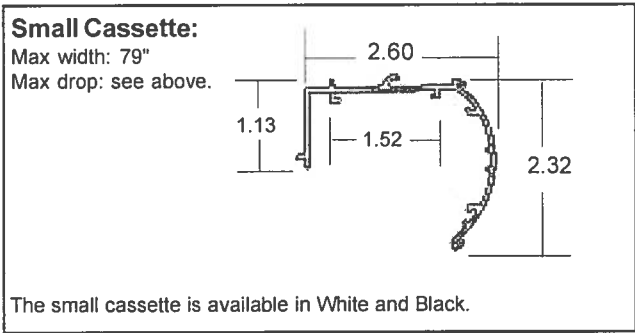

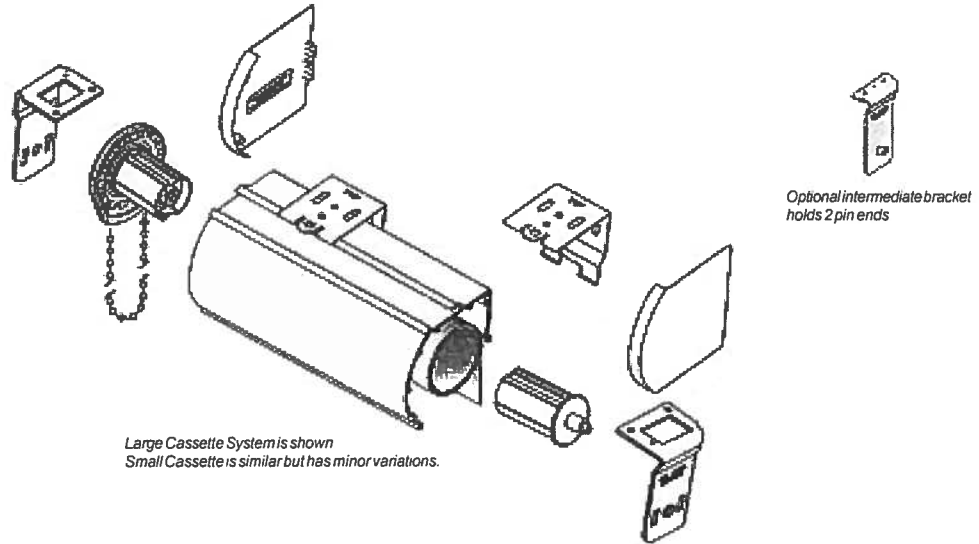

**Skyline Fabric Wrapped Cassette (Optional)**

We have added two cassette options for our roller blind program. There is a small cassette which is very limited in drop length capacity, and a large cassette with full capacity. Both of the cassette systems incorporate extruded aluminum housings complete with internal and external brackets and end caps. They both can be used with or without a fabric insert. The insert is automatically included, with a transfer tape backing, but it is not adhered at the factory. This allows a client to adhere the fabric in place at their discretion. The systems also allow for multiple blinds under one cassette. Inside mount must be ordered with the original blinds; retro-fitting does not work. For 2-on-1, please list each blind separately along with the total width. Deductions will be made at factory.

**P.E.S.A. Pin End Spring Assist (Optional)**

We have added a pin end spring assist to to enhance the consistency of the pull strength of our roller blinds. This is a spring that is inserted into the idle end of the blind. As the blind is lowered, the spring winds up and provides additional power to help raise the blind. Minimum width is 24" and the maximum width is 97". This is available with cassettes or fascia, but can not be used with the 2-on-1 option.

**Roller Blind Exterior Bottom Bar (Optional)**

Our basic blind comes with a traditional interior bottom slat which is inside the pocket sewn at the bottom of the roller shade. We also offer an external bottom bar. This is extruded aluminum and is available in white, ivory, anodized, bronze, and black. Use the "Bottom Bar" pricing shown on the bottom of each price page to upgrade to this system in place of the internal bottom bar. These colours correspond to the colours offered in our Fascia and Cassette programs. External bottom bar is available in White, Ivory, Anodized, Bronze and Black.
