# III. Assessing Liklihood/probability of Risk Occurrence

Descriptor	Rating	Frequency	Probability				
Almost certain	Almost certain 5 Is expected to occur during projects of this type						
Likely4More likely as not, regularly occurs during projects of this type60%							
Moderate3As likely as not, might occur at sometime during a project of this type30% < x < 60°							
Unlikely 2 Could occur at some time during the project, rarely occurs on projects of this type 5% < x < 30%							
Rare   1   Only occur in exceptional circumstances on projects of this type   < 5%							
The first step in asse	ssing the likel	ability Data and Distributions: ihood / probability of a risk should always be to apply the project teams engineering ju roach is all that is required. Specific probability data is available from a variety of sou	•				

Total Severity	Category	Response
20-25	Critical	Expected cost to the project is unacceptably high. This risk must be eliminated or transferred before proceeding with the project. Attempt to avoid or transfer risk
10-20	Serious	Expected cost is high compared to total project cost. It probably is cost effective to eliminate or transfer this risk.
5-10	Important	Consider eliminating or transferring. If accept then manage proactively.
0-5	Acceptable	Accept and manage
