Class of Estimate Descriptions

- Class 5 Rough estimate prepared based on very limited information. Used to make an assessment of initial viability and for long range capital planning.
- Class 4 Estimates prepared based on limited information with some engineering work completed and preliminary scope determination.
- Class 3 Estimates based on completed preliminary design documentation. This Class 3 estimate will form the basis for budget authorization and set initial control estimate against which project deliverables will be measured (i.e. on budget).**
- Class 2 Estimates prepared in progressive detail from a Class 3 and are used to establish a contract value against which decisions can be made to revise the scope of the project and manage risk at a specific milestone in the design development.
- Class 1 Pre-tender estimates prepared based on completed detailed design documentation (i.e. drawings, plans, specifications, etc.) as well as complete project delivery plans.
