Reader's Guide

This **Reader's Guide** is intended to provide the reader with a basic understanding of the supplement to the 2025 adopted budget, developed from the budgeting process, as well as briefly describe the document's content and layout.

The **Supplement to the 2025 Adopted Budget** provides summary and detailed information on capital projects and financing for the capital program, and additional information for the operating budget, set out in the following sections:

- ❖ The **Capital Project Summary** provides a listing of capital projects for 2025 through to 2030, highlighting related financing sources.
- ❖ The **Capital Project Detail** section gives additional information about each project in the budget, including project descriptions, current year's budget and five-year forecast, cash flow projections, net impact on the operating budget, and previous budget authorizations, if applicable. The capital estimate and service area are identified, as well as the link to OurWinnipeg and the Strategic Priorities Action Plan to ensure all capital projects align with city objectives.
- ❖ The **Appendices** provide additional context information in support of the budget documents.

Capital Project Summary

2025 Adopted Capital Budget and 2026 to 2030 Five-Year Forecast

Notes:

1. In the following Capital Project Summary, tax supported capital projects are financed by cash to capital unless other funding is disclosed for the project.
2. The Transportation Master Plan will be submitted to Council for approval. Related projects are subject to change upon adoption of the plan.

Capital Project Detail

2025 Adopted Capital Budget and 2026 to 2030 Five-Year Forecast

Notes:

1. Capital Budget amounts are estimates only and are subject to materials management policy (e.g. tenders, bids, and contract awards including Public Private Partnership Proposals).
2. The Public Service uses a cost estimate classification determined using AACE International Recommended Practices for capital budget estimates – see Appendix C.
3. Included in the capital project authorizations are corporate and departmental overhead amounts (FTE related costs, administrative costs, etc.). Consistent with asset management principles, specific recoveries are included in the capital project business case/basis of estimate. Actual expenses may vary from budget depending on in-year circumstances.
4. Included in the capital budget authorizations, for Public Works only, are amounts for Strategic Municipal Infrastructure Research (SMIR), not to exceed 0.5% of tax-supported infrastructure preservation capital budgets, as approved by Council on April 30, 2003. Infrastructure is defined as permanent physical systems of a community, including roadways, utilities, water, sewage, buildings and parks. SMIR funding is essential to undertake research that will optimize life cycle costs and innovate to provide the best value for construction and preservation of Public Works infrastructure.
5. Capital projects could be aligned to multiple *OurWinnipeg* goals; however, the most relevant goal is noted on individual projects – see Appendix K. *OurWinnipeg* is the guiding development plan for the City.
6. Capital projects are also aligned to the Strategic Priorities Action Plan (SPAP) – see Appendix K. SPAP outlines Council's key priorities and actions.

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

Pedestrian and Cycling Program (continued):

Budget is used for the construction of new pedestrian and cycling facilities, facilities enhancements, studies, and support for public education, awareness and promotions of walking and cycling. The budget may be utilized for the purchase of land to facilitate the delivery of new and enhanced facilities as required. Funding is also used to support public engagement and design studies in advance of planned road renewals.

The Pedestrian and Cycling Program supports the delivery of the City's long-term vision to maximize transportation options by ensuring the accessibility, comfort, and safety of walking and cycling in Winnipeg.

The Director of Public Works may be required to reallocate funds within the Pedestrian and Cycling Program based on financing requirements.

Grants and land lease payments paid from the program are not subject to City overheads.

On July 15, 2015, Council approved the Winnipeg Pedestrian and Cycling Strategies (PCS) with the following motion: All costs included in the Pedestrian and Cycling Strategies are estimates, no budget allocation is included with the approval of the Pedestrian and Cycling Strategies document, and all projects and project costs relating to the Pedestrian and Cycling Strategies document will be considered by City Council through the annual budget process. Pedestrian and Cycling Action Plans will be presented to the Standing Policy Committee for information on a yearly basis to provide status updates on previous and current projects.

On July 13, 2016, Council approved the recommendation of the Standing Policy Committee on Infrastructure Renewal and Public Works: That all projects related to the Pedestrian and Cycling Strategies document be submitted to the Standing Policy Committee on Infrastructure Renewal and Public Works for recommendation to Council.

On April 20, 2021, the Standing Policy Committee on Infrastructure Renewal and Public Works passed a motion that every September the Public Service shall provide the standing committee with the next year's proposed work plan for the Pedestrian and Cycling Strategies document, highlighting any changes from the current five-year forecast.

Any surplus funds will automatically be transferred to the following year's Pedestrian and Cycling Program Budget. On December 15, 2021, Council directed that any surplus funds from Active Transportation (AT) infrastructure identified as part of the report described in Recommendation 2.J. of the 2022 budget be transferred and dedicated to the following year's AT capital program.

On December 15, 2021, Council directed (as per 2022 Adopted Capital Budget recommendation 2L) the Public Service to:

- i. Include active transportation facilities in all road renewals and rehabilitations that have been included in the 2022 Preliminary Capital Budget and 2023 to 2027 Five-Year Forecast, if facilities in those locations have been identified within the Winnipeg Pedestrian and Cycling Strategies.
- ii. That in the event the road project and the active transportation facilities exceed the delegated authorities of the public service, or the project cannot be built as contemplated in the Winnipeg Pedestrian and Cycling Strategies, the Public Service be directed to report back to the appropriate Committee of Council on their recommendation to construct the facilities as prescribed, with a request for additional spending authorities, or recommend an alternate plan to restore the connectivity of the active transportation strategies network.
- iii. Update the Winnipeg Pedestrian and Cycling Strategies in conjunction with the next update of the Transportation Master Plan to ensure that future roads investments requiring AT will be reviewed and analyzed prior to making road investments.

The Pedestrian and Cycling Program supports the following program areas:

Sidewalks Regional and Non-Regional - Various Locations

Includes construction of new sidewalks on regional streets where none presently exist and where provision is warranted. Provides additional funding to support pedestrian crossings improvements and/or crossing upgrades on regional streets. The prioritization of future locations will be guided by the Pedestrian and Cycling Strategies, which is currently being updated as part of the Transportation Master Plan 2050 process. Upon its completion, the priority sidewalk locations will be identified through the annual Pedestrian and Cycling Program update or the annual capital budget process.

Includes construction of new sidewalks on non-regional streets that must meet at least one of the following:

- connect existing sidewalks to a significant destination business/public facility/senior facility, etc.
- is located within 1.5 km of a school and has been identified by a Neighbourhood Based Consultation process (for example a School Travel Plan or Neighbourhood Area Plan);
- is required to connect pedestrians to a bus stop, where the property owners fronting the proposed sidewalk are not considered to be the main or a major benefiter from the new sidewalk, and likely would not support the sidewalk as a Local Improvement.

Pedestrian and Cycling Program (continued):

Bicycle Corridors

Development of new bicycle facilities on the Bicycle Network as prioritized in the Pedestrian and Cycling Strategies. Provides support to complete gaps in the Bicycle Network. Supports the supply and installation of permanent and temporary bicycle parking through an annual Bicycle Parking Grant program. Provides additional funding to support the development of Neighbourhood Greenways during local street renewal projects. Considers support for a pedestrian and cycling monitoring strategy. Supports the replacement of pre-cast curbs on existing routes, as required.

Development of Neighbourhood Greenways - bike routes introduced on neighbourhood streets with low vehicle speeds and volumes that may include a range of treatments to slow down traffic and reduce traffic volumes to improve safety for walking, biking and driving.

Recreational Walkways and Bicycle Paths

Construction of new recreational walkways and off-street bicycle path facilities where no walkway or cycle facility presently exists, and where the provision of such a facility is warranted.

Public Education, Awareness and Promotion

Support educational programming, public safety and awareness in support of walking and cycling. Supports the promotion of new and existing pedestrian and cycling facilities including a walking and cycling communications strategy. Considers support for a City-wide wayfinding system.

Partnership Grant Program

The Public Education, Awareness and Promotion grant program provides a funding opportunity for not-for-profit / community based industry partners who promote cycling and active transportation in Winnipeg. Grant applications are submitted, assessed and approved annually.

***Funding will support external consulting and/or up to two internal temporary full-time project management staff (2.0 full-time equivalents) to undertake contract administration, design work and public engagement activities related to active transportation construction projects, both stand-alone and as part of future street renewal projects.

The Director of Public Works be authorized to prioritize other pedestrian and cycling projects based on opportunities that arise if extra funding is available due to program projects being completed below estimates and/or funded through other capital programs. All additional works will be communicated through the annual pedestrian and cycling updates.

See Appendix H for details on Active Transportation project funding in the 2025 capital budget.

The estimated useful life of assets within this program ranges from five to 75 years dependent upon the asset class under consideration.

On January 29, 2025, Council authorized a first charge of up to \$2.286 million for 2026 projects in 2025 or prior to the adoption of the 2026 capital budget to facilitate their timely delivery, including Maryland St/Sherbrook St Upgrade to Protected Bike Lanes and Northwest Hydro Corridor Phase 2 Construction.

Projects within the program will not proceed until a class 3 estimate is obtained.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

** N/A as this is a rolling program.

Total			-	1,500	1,500	1,500	1,545	1,591	7,636

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

This program is to replace traffic signal bases in poor condition and LED bulbs at end of useful life. Traffic signal bases provide the structural foundation for traffic signal poles and cabinets and are crucial for the safe construction and operation of traffic signals. In total, approximately 500 high-risk bases must be replaced. Additionally, LED bulbs that provide for signal illumination are aging and fading, and many require replacement.

Projects within the program will not proceed until a class 3 estimate is obtained.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Class Estimate: See table below for 2025 class estimate

Strategic Priority Action Plan Theme: A Green and Growing City with Sustainable Renewal of Infrastructure

SPAP Action Item: 4.9 Increase coordination to address speeding, traffic calming, properly designed streets, and modern road and sidewalk engineering

Project name / description (in priority order)	Service	2025 Class Est	2025	2026	2027	2028	2029	2030	Total
Modem and camera renewal	Transportation Planning and Traffic Management	5	200	200	200	200	206	212	1,218
Camera network expansion	Transportation Planning and Traffic Management						290	386	676
Total			200	200	200	200	496	598	1,894

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

Funding for this program will provide for the renewal of Traffic Management Centre (TMC) equipment which has reached the end of its useful life. including the renewal of modems for both TMC cameras and traffic signal controllers as part of supporting the full range of TMC services.

Beginning in 2029, this program will further support the expansion of the camera network by 10 cameras each year with a goal to achieve full coverage of the regional street network by 2034. An additional \$33,000 in annual operating costs will be required each year to support licensing, data contracts and camera installation.

Projects within the program will not proceed until a class 3 estimate is obtained.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Rehabilitation of the Salt and Sand Storage Facility at 1220 Pacific Ave. The work consists of replacing the dome canvas, corrosion treatment of truss members, surface restoration of concrete walls, and sealing of gaps in between the concrete wall and floor.

The work would maintain the City's compliance with applicable federal and provincial legislation regarding the storage and use of snow and ice control products.

Project will not proceed until a class 3 estimate is obtained.

Class Estimate: Not applicable, as this is a program

Strategic Priority Action Plan Theme: A Green and Growing City with Sustainable Renewal of Infrastructure

SPAP Action Item: 4.9 Increase coordination to address speeding, traffic calming, properly designed streets, and modern road and sidewalk engineering

Projects within the program will not proceed until a class 3 estimate is obtained.

Any surplus funds will automatically be transferred to the following year's Regional and Local Street Renewal Program Budget.

Regional and Local Street Renewal (continued):

On May 14, 2008, Council concurred in the recommendation that a policy be adopted to incorporate Active Transportation facilities into any reconstruction or rehabilitation required on any infrastructure identified as an Active Transportation facility in the Proposed Active Transportation Network. On July 15, 2015, Council adopted the Pedestrian and Cycling Strategies as the long range pedestrian and cycling transportation policy for the City of Winnipeg. Depending on the proposed street renewal treatment and the planning and priority status of the proposed sidewalk or pedestrian and/or cycling facility, the Regional and Local Street Renewal program may include new sidewalks or implement the intention of the Winnipeg Pedestrian and Cycling Strategies.

On December 15, 2021, Council directed that any surplus funds from Active Transportation (AT infrastructure identified as part of the report described in Recommendation 2.J. of the 2022 adopted budget be transferred and dedicated to the following years' AT capital program.

On July 13, 2023, Council adopted the Proposed Funding Strategy for Multimodal Roadway and Bridge Infrastructure which approved funding of tree preservation and replacements as part of local street renewal projects. This can include tree protection, tree removal, tree replacement, the addition of modular suspended pavement systems, and any other work within the limits of street renewals to protect, maintain or improve the urban canopy.

A separate 2 percent property tax increase dedicated to regional and local road renewals is planned for 2025 and 2026, and 2028 to 2030. In 2027, the 2 percent property tax increase will be dedicated to tax supported operations. The roads capital program will be funded by the Provincial Strategic Infrastructure Funding.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Regional Street Renewal Program

The Regional Street Renewal program includes the renewal and reconstruction of the City's regional streets, sidewalks and recreational walkways/paths, as well as incorporating pedestrian and cycling facilities on regional street renewal projects where identified in the Winnipeg Pedestrian and Cycling Strategies. The program also funds the condition rating of regional streets. The purpose of this program is to maintain the level of service, structural integrity, and rideability of the transportation infrastructure network.

All Regional Street Renewal projects have a warranty period after substantial completion and/or in-service date for which costs may be incurred by the City. The Director of Public Works is authorized to establish projects to a maximum of \$100,000 each to charge costs associated with warranty work should the related Regional Streets project be closed. The capital budget for the new project will be allocated from other surpluses within the program.

Any new projects using surplus funds in the 2025 Regional Street Renewal Program shall be approved by the Standing Policy Committee on Public Works.

A Regional Street Renewal Reserve (RSRR) was established in 2014 to increase investment in regional streets. On March 20, 2019, Council approved a change to the RSRR to include repair, renewal, and replacement of bridges.

Use of the Regional Street Renewal Reserve for purposes other than regional street, sidewalk or bridge renewals requires approval of 2/3 of City Council.

On January 29, 2025, Council authorized a first charge of up to \$60.730 million for 2026 regional streets in 2025 or prior to the adoption of the 2026 capital budget to facilitate timely delivery of the projects. Refer to Attachment 1 of the 2025 Budget Council Recommendations for specific locations (also noted on the last page of the Regional and Local detail sheet).

On March 20, 2024, Council authorized first charges in the amount of \$70.705 million on 2025 streets in 2024 or prior to the adoption of the 2025 capital budget to facilitate timely delivery of the projects.

Local Street Renewal Program

Local Streets are all non-regional streets including residential streets, collector streets, industrial streets, and park streets. The Local Street Renewal program includes the renewal and reconstruction of the City's local streets, sidewalks, and alleys, as well as constructing new sidewalks on local street renewal projects where identified in the Winnipeg Pedestrian and Cycling Strategies or where the terms for New Non-Regional Sidewalks under the Pedestrian and Cycling Program are met. The program also funds the condition rating of streets, sidewalks, alleys and recreation walkways/paths. The purpose of this program is to maintain the level of service, structural integrity, and rideability of the transportation infrastructure network.

On November 20, 2013, Council amended the Local Improvement process by creating a pilot program for six years (2014-2019) whereby the City of Winnipeg will finance asphalt paving of granular lanes as local improvements to the maximum of 50% of the cost of the improvement; and approved that the \$1 million Granular Lane Fund be used as a funding source for the City's share of the amended Local Improvement Program. On July 19th, 2018, Council approved a six-year extension to this program (2020-2024). On December 15, 2021, Council extended the program to 2027. The approval of the annual budget will extend the program to the five-year capital forecast. A portion of the Granular Lane Improvement Program includes funding dedicated to the lane pulvimixing program: \$350,000 (2025), \$1.0 million (2026 - 2030).

PUBLIC WORKS - GENERAL CAPITAL FUND

Regional and Local Street Renewal (continued):

All Local Street Renewal projects have a warranty period after substantial completion and/or in-service date for which costs may be incurred by the City. The Director of Public Works is authorized to establish projects to a maximum of \$100,000 each to charge costs associated with warranty work should the related Local Streets project be closed. The capital budget for the new project will be allocated from other surpluses within the program.

Any new projects using surplus funds in the 2025 Local Street Renewal Program shall be approved by the Standing Policy Committee on Public Works.

A Local Street Renewal Reserve (LSRR) was established in 2013 to increase investment in local streets, lanes and sidewalks. On March 20, 2019, Council approved a change to the LSRR to include the repair, renewal, and replacement of bridges.

Use of the Local Street Renewal Reserve for purposes other than local streets, alleys, sidewalk or bridge renewals requires approval of 2/3 of City Council.

As per recommendations B.1 and B.2 of the Road Construction Working Group Report, approved by Council on September 26, 2019, specific local streets are included in the program details. See next pages for program details.

On January 29, 2025, Council authorized a first charge of up to \$2.0 million for 2026 local streets in 2025 or prior to the adoption of the 2026 capital budget to facilitate timely delivery of the projects. Refer to Attachment 1 of the 2025 Budget Council Recommendations.

Total			3,549	3,900	3,290	5,643	4,980	12,208	33,570

Project list and timing is subject to change due to operational requirements, unexpected urgent needs, and planned project costs.

Projects within the program will not proceed until a class 3 estimate is obtained.

Annual program to carry out reactive and emergency repairs, preventative maintenance, improvements, major repairs, minor rehabilitation or replacement of existing bridges, overpasses, underpasses, culverts and related bridge infrastructure, ensuring continued and continuous service of these facilities to the maximum practical extent.

On March 20, 2019, Council approved a change to the Local Street Renewal and Regional Street Renewal reserves to include the repair, renewal, and/or replacement of bridges as an eligible expense to be funded from these reserves.

On January 29, 2025, Council authorized a first charge of up to \$3.9 million for 2026 projects in 2025, or prior to the adoption of the 2026 capital budget, to facilitate their timely delivery.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

** N/A as this is a rolling program

Authorization (\$000's)						
Detailed Design & Construction					19,682	19,682

The project will rehabilitate the existing two lane Louise Bridge to improve condition, increase vertical clearance (to 4.15 m), and strengthen the bridge. The existing Louise Bridge is in poor condition due to age-related deterioration. It requires annual closures for reactive repairs and requires significant work to remain operational.

A rehabilitation of the existing bridge would provide a minimum 30 years of additional service life until an expanded bridge is required to complete the remainder of the Eastern Rapid Transit Corridor under the Rapid Transit Priority 4 investments.

On March 20, 2019, Council approved a change to the Local Street Renewal and Regional Street Renewal reserves to include the repair, renewal, and/or replacement of bridges as an eligible expense to be funded from these reserves.

Pembina Highway Overpass (Abinojii Mikanah) Rehabilitation (continued):

The overpass on Pembina Highway over Abinojii Mikanah requires bridge deck rehabilitation, including reconstruction of the exit loop ramps. Detailed design and construction is planned for 2025 & 2026.

Note that construction of a pedestrian-cycling overpass over Pembina Highway, connecting legs of Awasisak Meskanow, is not included in the project scope.

An additional \$4.1 million and \$4.0 million for roadworks is funded from the Regional and Local Street Renewal Program in 2025 and 2026, respectively.

The rehabilitated structure will provide an additional 50 years of service life and the new pedestrian overpass structure will provide a service life of 75 years.

Project will not proceed until a class 3 or better estimate is obtained.

Osborne Street Underpass (continued):

The scope of work for this project is to examine cost effective functional design alternatives for an active transportation grade separation, in the vicinity of the existing Osborne Street Underpass, to address a gap in the Active Transportation Network to cross the Canadian National Railway mainline. In addition, functional design will be undertaken to review rehabilitation of the existing Osborne underpass to address deficiencies in land drainage, vertical clearance, pavement condition, and traffic operations through the Osborne/Pembina/Corydon/Donald intersection. Detailed design is anticipated to commence in 2028.

On January 29, 2025, Council authorized a first charge of up to \$500,000 for 2026 preliminary design work in 2025 or prior to the adoption of the 2026 capital budget to facilitate timely delivery.

Project will not proceed to construction until a class 3 or better estimate is obtained.

Lagimodiere Twin Overpasses Rehabilitation (Concordia Avenue & CPR Keewatin) (continued):

This project includes major rehabilitation of the Lagimodiere Twin Overpasses over Concordia Avenue and the Canadian Pacific Railway (CPR) Keewatin rail lines. Improvements to traffic capacity and roadside safety will be determined as part of a preliminary design study. The timeline for preliminary design and detailed design and construction is noted in the class estimate table above. Construction is forecasted to take place over a two-year period from 2026 to 2027 with a total project class 5 estimate of \$39.7 million. The major benefit of constructing this project includes maintaining current levels of service related to bridge capacity and condition. Significant risks associated with constructing this project include project delays related to railway coordination. Significant risks of not constructing or deferring the project include inability to maintain quality level of service. The rehabilitated structure will provide an additional 50 years of service life. Construction will not commence until a class 3 estimate is obtained.

On January 29, 2025, Council authorized a first charge of up to \$20.0 million in 2025 or prior to adoption of the 2026 capital budget.

Strategic Priority Action Plan Theme: A Green and Growing City with Sustainable Renewal of Infrastructure

SPAP Action Item:4.10 Initiate replacement of the Arlington Bridge

The full Arlington Bridge project includes decommissioning of the existing bridge, and a detailed design and construction of a replacement bridge on the existing alignment.

This is a six-year project with a total funding requirement of \$166.3 million plus debt financing. Funding allocated in 2025 allows the Project to move forward while the remaining funding sources are determined. Approximate breakdown of \$22 million is as follows:

- Decommissioning of Existing Bridge \$17 million

- Construction \$13 million

- Engineering \$1.4 million

- Contingency and Overhead \$2.6 million

- New Bridge Early Works \$5 million

- Engineering \$5 million

Strategic Priority Action Plan Theme: None

The Disraeli Bridges and Overpass Facility was procured using a public-private partnership (P3) approach and the facility opened on November 19, 2012.

The City will make on-going lease payments to Plenary Roads Winnipeg (PRW) extending until 2042. These payments are required under a 30-year contract with PRW and cover the remaining capital cost of the facility as well as the maintenance of the facility.

There are significant provisions in the contract to ensure the City's specifications are met and the facility is returned to the City in good condition at the end of the contract. Costs associated with monitoring this contract, including the salary recovery of the Senior Project Review/P3 Specialist and other P3 costs are also included in this budget. Non-performance deductions may occur where the City's specifications are not met.

A portion of the payment to PRW represents an annual amount dedicated to the maintenance of the facility, including long-term rehabilitative costs. This amount is adjusted for changes to the Consumer Price Index on an annual basis.

PUBLIC WORKS - GENERAL CAPITAL FUND

Disraeli Bridge and Overpass Facility (continued):

A portion of the project (\$75 million) was financed by \$25 million in external debt, with the balance being financed internally. The Public Service issued \$25 million in external debt at an interest rate of 3.759% over a repayment term of 40 years. Debt servicing represents interest and principal repayment of external debt and internal financing.

The above annual estimates relate to the maintenance phase of the project and include the authorization for the lease payments and debt servicing related to the facility.

In accordance with Bylaw 8164/2002 where the City's capital budget has not been adopted before January 1 of the year to which the budget is applicable, the Chief Administrative Officer is authorized, before the adoption of the capital budget, to approve expenditures not exceeding 30% of the amount the City of Winnipeg is contractually obligated to pay annually in respect of Public-Private Partnerships, as a first charge against the General Capital Fund.

As financing and administration costs are implicit in the lease payments, this project is exempt from the Corporate Administration and Interest charges.

The Chief Peguis Trail Extension from Henderson Highway to Lagimodiere Boulevard was procured using a public-private partnership (P3) approach and the facility opened on December 2, 2011.

The City will make on-going lease payments to DBF2 extending until 2041. These payments are required under a 30-year contract with DBF2 and cover the remaining capital cost of the facility as well as the maintenance of the facility.

There are significant provisions in the contract to ensure the City's specifications are met and the facility is returned to the City in good condition at the end of the contract. Costs associated with monitoring this contract, including the salary recovery of the Senior Project Review/P3 Specialist and other P3 costs are also included in this budget. Non-performance deductions may occur where the City's specifications are not met.

A portion of the payment to DBF2 represents an annual amount dedicated to the maintenance of the facility, including long-term rehabilitative costs. This amount is adjusted for changes to the Consumer Price Index on an annual basis.

A portion of the project was financed by the City issuing \$18.7 million in external debt. The debt servicing above represents the repayment of principal and interest on the external debt associated with the project over a period of 40 years.

PUBLIC WORKS - GENERAL CAPITAL FUND

Chief Peguis Trail - Henderson Highway to Lagimodiere Boulevard (continued):

The above annual estimates include the authorization for the lease and financing payments to be incurred and charged to the Projects in the General Capital Fund.

In accordance with Bylaw 8164/2002 where the City's capital budget has not been adopted before January 1 of the year to which the budget is applicable, the Chief Administrative Officer is authorized, before the adoption of the capital budget, to approve expenditures not exceeding 30 of the amount the City of Winnipeg is contractually obligated to pay annually in respect of Public-Private Partnerships, as a first charge against the General Capital Fund.

As financing and administration costs are implicit in the lease payments, this capital project is exempt from the Corporate Administration and Interest charges.

Projects within the program will not proceed until a class 3 estimate is obtained.

The asset management program in the Public Works Department is centered on the application of quality management principles to the operation, maintenance, and renewal of infrastructure. A primary objective is the development and implementation of methodologies to preserve the infrastructure and to identify the funding necessary for the long-term preservation of the assets to support service delivery.

An objective of the asset management program is to extend this systematic structural quality management approach to all the infrastructure under the Public Works Department responsibility. Funds are required to implement new or maintain existing asset management programs.

Funds may be used to support seasonal temporary positions (up to 2.0 full-time equivalents) to undertake infrastructure inventory data collection, analysis and reporting.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

PUBLIC WORKS - GENERAL CAPITAL FUND

Waterway Access Improvement Program (continued):

This program will improve the accessibility and safety at existing and new waterway access points along the Red, Assiniboine and Seine rivers to permit year-round access.

Project prioritization will be guided by the Waterway Access Improvement Study currently under development. Funding for this study (\$300,000) has been included in the 2024 Riverbank Stabilization program managed by the Property, Planning and Development department.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

** N/A as this is a rolling program.

PUBLIC WORKS - GENERAL CAPITAL FUND

Parkland Naturalization and Restoration Program (continued):

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

This program will support the implementation of restoration and naturalization projects within parks to address gaps in service, particularly in geographic areas of higher poverty, and in accordance with the Greenspace, Natural Corridors and Biodiversity Plan (pending) and Natural Areas Asset Management Plan (to be developed).

Funds may be used to hire seasonal temporary positions (up to 2.0 full-time equivalents) to support the implementation of various naturalization and restoration projects.

The estimated useful life of assets within this program ranges from one to 100 years dependent upon the natural asset under consideration.

Projects within the program will not proceed until a class 3 estimate is obtained.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Total	300	1,200	1,238	1,275	1,275	1,275	6,563

Projects within the program will not proceed until a class 3 estimate is obtained.

Program is focused on playground restorations, including play equipment and safety surface replacements, along with associated amenity and pathway improvements to enhance accessibility, and other park and recreation enhancements. It is generally delivered by the Planning, Property and Development Department on behalf of the Parks and Open Space Division of the Public Works Department.

Funding is to be allocated annually as follows:

- Approximately \$300,000 each year dedicated to address general playground and amenity safety concerns as they arise city-wide.
- Remaining funding to be divided equally between each of the fifteen electoral wards.
- Any grants paid from the program require Council approval; upon approval grants will not be subject to City overheads.

The Director of Public Works may be required to reallocate ward budgets on approval of the ward councillors.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

**The 2026 and 2027 funding for the St. Boniface ward has been dedicated to the St. Boniface Outdoor Aquatic Facility. See project details on page 115.

Strategic Priority Action Plan Theme: A Livable Safe Healthy Happy City

SPAP Action Item: 3.5 Increase funding to local and regional parks based on the optimal stage in infrastructure lifecycles

These capital dollars represent the City's ongoing commitment to Assiniboine Park building repairs, upgrades and park improvements.

The first year of funding for this capital grant was 2010 with \$5.123 million provided each year from 2010 to 2019 and \$5.1 million in 2021. The redetermination process for the grant was last completed in 2020 and funding has been included at \$5.9 million from 2025 - 2027, \$5.4 million annually thereafter.

Additional funding of \$2.0 million in each of 2025, 2026 and 2027 will support replacement of the Animal Hospital that is required for the Zoo's accreditation. This represents the City's 30% contribution to the project.

The capital grant authorized through this capital budget is currently under redetermination to confirm future requirements for 2025 onward.

The release of capital funds is subject to annual explanation and submission from Assiniboine Park Conservancy of projected cash flow needs, to the Public Service.

As this is a capital grant program, it is exempt from interest and administrative overhead capital charges.

The estimated useful life of assets within this program ranges from five to 75 years dependent upon the asset class under consideration.

* N/A - No amounts have been included in the "Previous Budgets" due to this commitment's on-going nature.

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

Projects within the program will not proceed until a class 3 estimate is obtained.

This program supports sustainable urban forest management practices in alignment with the service targets established in the Winnipeg Urban Forest Strategy.

The program will further support consultation and external services including studies, policy development, plans, and other related action items established in the Winnipeg Urban Forest Strategy, as required.

Funding in 2025 includes seasonal temporary positions (up to 12 full-time equivalents).

The funding from Natural Resources Canada of \$4.591 million relates to the cost-sharing agreement and ancillary agreement between the Federal Government and the City of Winnipeg for the Two Billion Trees grant program.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

** N/A as this is a rolling program.

COMMUNITY SERVICES - GENERAL CAPITAL FUND

Library Facility Safety, Security and Accessibility Improvements Program (continued):

This capital program addresses workplace and public health, safety, security, and accessibility issues. Library facility amenities must be refurbished to meet public health and safety standards, regulations, and to meet the needs of the public.

Capital funding is required to address three areas:

1. Safety/security issues need to be addressed in many libraries including installing and upgrading closed circuit television system video monitoring technology, and other building upgrades as required to ensure that libraries remain safe and welcoming to the community and to deter vandalism and graffiti.
2. Universal design / accessibility issues, both physical and customer-service related, need to be addressed including upgrading lighting, adding exterior ramps, upgrading public and staff washrooms, improving wayfinding signage, and installing life-safety apparatus to meet the needs of persons with disabilities. Also includes signage needs on the exterior and interiors of library facilities, including electronic signs, for promotion of services and programs that are required to make libraries more visible to the community.
3. Health related items such as Automated External Defibrillators (AEDs) and sanitary water bottle filling stations.

The expected life of library buildings is 50 years. The expected life of library AEDs, security and CCTV equipment is 10 years or less.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Projects within the program will not proceed until a class 3 estimate is obtained.

This capital program is required to support small renovations and replacement of interior infrastructure (e.g. workstations, public work space, furniture, shelving and children's literacy areas) at libraries. Renovations and interior infrastructure replacement is required in order to ensure that library branches are safe, functional, accessible and part of a welcoming environment for library users.

The expected life of library buildings is 50 years. The expected life of library furniture, fixtures, and equipment is 15 years or less.

COMMUNITY SERVICES - GENERAL CAPITAL FUND

Recreational Facility Safety, Security and Accessibility Improvements Program (continued):

This capital program addresses workplace and public safety, health, and accessibility issues. Recreation and aquatic facility amenities must be refurbished to meet public health and safety standards, regulations, and to enhance facilities to meet the needs of the public. Capital funding is required to address three areas:

1. Safety, security, and health issues need to be addressed including upgrading lighting, installing and upgrading closed circuit television video monitoring technology, Automated External Defibrillator (AED) replacements at facilities and other building upgrades as required to ensure that facilities remain safe and welcoming to the community.
2. Address physical and customer service accessibility issues including washrooms, change rooms, specialty change rooms, kitchens, signage, public entranceways and installing life safety apparatus to meet accessibility needs.
3. Upgrades and replacements for communications systems including public address systems, radios, visual alarms, and facility signage including electronic signs for promotion of services and programs.

The expected life of recreation buildings is 50 years. The expected life of library AEDs, security and CCTV equipment is 10 years or less.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Capital funding is required to replace cardio and strength based fitness equipment, on a rotating cycle, at the City's multi-use recreation and aquatic facilities, to continue to meet the program needs of patrons and to minimize safety issues that could arise from aging fitness equipment. Lifecycle renewal of fitness equipment is a key part of the department's asset management plan in order to maintain customer levels of service.

The expected life of commercial cardio equipment is five years. The expected life of strength based fitness equipment varies based on intensity of use but is estimated as 10 years or more.

Class Estimate	5	5	5			
Authorization (\$000's)						
Preliminary Design	647					
Detailed Design & Construction	1,600	336	474			

St. Boniface Outdoor Aquatic Facility (continued):

The St. Boniface Outdoor Aquatic Facility project involves the design and construction of a new destination outdoor pool that will be physically accessible and include contemporary pool features such as a beach entry, slides, spray features, shaded seating areas, diving board(s) and a new pool change/washroom and mechanical systems building. The project will also include any associated park redevelopment needed to accommodate the outdoor pool.

In 2024, the City (Ward Councillor and Public Service) identified six possible park locations for the St. Boniface Outdoor Aquatic Facility and launched a public engagement process in Fall 2024 to get community input. Three of the locations were prioritized for further study including an assessment of potential capital costs. A recommended location will be brought forward for Council's consideration in late 2025/early 2026. The new outdoor pool is anticipated to cost in excess of \$10 million but an updated Class 5 estimate will be developed based on the site selected and the initial concept.

Capital funding in 2025 of \$647,000 will support preliminary design to obtain a class 3 estimate for the project. Project construction is subject to leveraging other governmental or third party funding. Construction will not proceed until a Class 3 or better estimate is obtained and the project is fully funded. Funding includes \$490,000 rebudgeted from 2021, 2022 and 2023 Parks and Recreation Enhancement Program - see Appendix D.

Funding of \$1.4 million for the Winakwa Community Centre Spray Pad has been reallocated to the St. Boniface Outdoor Aquatic Facility. Refer to the Spray Pad Investment Program on page 117.

On January 29, 2025, Council authorized a first charge of up to \$336,000 in 2025 or prior to the adoption of the 2026 Capital Budget to facilitate timely delivery of projects. Total available funding in 2025 is \$2.583 million (\$2.247 million plus \$336,000).

An incremental increase to operating budget will be required but cannot be estimated at this time. Additional funds will be included / requested when the design advances and operating costs can be determined.

The expected life of an outdoor pool is 35 years.

Class Estimate: Not applicable, as this is a program

Strategic Priority Action Plan Theme: A Livable Safe Healthy Happy City

SPAP Action Item: 3.6 Increase funding to implement the Winnipeg Recreation Strategy

This capital program will construct nine new spray pads to address service gaps and replace and/or decommission 16 wading pools.

Selected locations will be in alignment with the levels of service defined in the Council adopted Wading Pool Rationalization & Spray Pad Reinvestment Strategy included in the Winnipeg Recreation Strategy. Spray pads are intended to serve a two kilometer (km) catchment area. However, if the spray pad is serving a geographic area of higher poverty the catchment area is one km.

Recommendations on implementation considered the decision-making parameters identified in the two strategies noted above. For spray pad investments, considerations include: opportunities to improve service and address an existing service gap; co-location at multi-use sites to have supportive amenities such as washrooms and parking; supports a geographic area of higher poverty; provides an opportunity to consolidate older wading pools within the target level of service catchment; and supports existing community plans or initiatives. Considerations related to decommissioning wading pools are: asset age and condition; notable design or functional challenges; low utilization rates; proximity to existing (or planned) alternate wading pools/spray pads within the target level of service catchment; and opportunities for investment in alternate recreation/park amenities.

Funding for the Winakwa Community Centre Spray Pad in 2026 has been dedicated to the St. Boniface Outdoor Aquatic Facility project. As a result, the wading pools at Winakwa CC, Lamond Park, and Berkshire Park will not be closed.

When wading pools and the associated wading pool buildings are decommissioned and removed, the area will be backfilled and sodded.

The expected life of a spray pad is 25 years.

The program will support one temporary full-time equivalent position that is required to coordinate and advance the projects within the program.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

COMMUNITY SERVICES - GENERAL CAPITAL FUND

Spray Pad Investment Program (continued):

Implementation Plan:

Wherever feasible, the implementation approach is to complete construction of the spray pad prior to decommissioning the identified wading pools. There are a few exceptions where other considerations (in one instance other community plans/initiatives) have resulted in a slightly different timeline.

Spray Pad Investment	Design Started	Spray Pad In Service	Wading Pools To Be Decommissioned	Year
Beryl Watts Park Spray Pad	2025	2027	Beryl Watts Wading Pool Luxton Community Centre Wading Pool	2026 2027
Tyndall Park Community Centre Spray Pad	2025	2027	Tyndall Park CC Wading Pool Walsall Park Wading Pool Northwood Community Centre - Frank Whyte Site Wading Pool	2026 2027 2027
South Winnipeg Community Centre - Richmond Site Spray Pad	2025	2027	None	
Michaëlle Jean Park/Norquay Community Centre Spray Pad	2025	2027	An existing wading pool with spray features, will be converted to function exclusively as a spray pad. Renovation to existing asset to remove the basin.	
Chalmers Community Centre Spray Pad	2026	2028	East End Culture & Leisure Centre Wading Pool Elmwood Winter Club Wading Pool Morse Place Community Centre Wading Pool	2025 2028 2028
Bruce Park Spray Pad	2026	2028	Bruce Park Wading Pool Marjorie Park Wading Pool King Edward & Ness Wading Pool	2027 2028 2028
Norberry-Glenlee Community Centre - Walter Jennings Site Spray Pad	2027	2029	None	
Keenleyside Park/East Elmwood Community Centre Spray Pad	2027	2029	Keenleyside Park/East Elmwood CC Wading Pool Braeside Park Wading Pool Tomlinson Park Wading Pool	2028 2029 2029
Tuxedo Community Centre Spray Pad	2028	2030	Westdale Wading Pool	2029
Riverview Community Centre Spray Pad	2028	2030	Riverview Community Centre Wading Pool	2029

The five spray pads identified below, approved in previous budgets, will be coming into service in 2024 and 2025. These spray pad investments are funded and the 13 wading pool closures identified below are authorized for closure through this spray pad capital investment program:

Spray Pad Investment	Constructed	Spray Pad In Service	Wading Pools To Be Decommissioned	Year
Central Corydon Community Centre - Crescentwood Site Spray Pad	2023	2024	Central Corydon CC -Crescentwood Wading Pool Harrow Park Wading Pool Cordova Park Wading Pool	2022 2024 2024
Champlain Community Centre Spray Pad	2024	2025	Champlain Wading Pool	2023
Bronx Park Community Centre Spray Pad	2024	2025	Bronx Park CC Wading Pool Centennial Park Wading Pool	2024 2025
Valour Community Centre - Clifton Site Spray Pad	2024	2025	Valour Community Centre - Clifton Site Wading Pool Sargent Park Wading Pool John M. King School Wading Pool	2024 2025 2025
Turtle Island Neighbourhood Centre Spray Pad	2024	2025	Turtle Island Neighbourhood Centre Wading Pool William Whyte School Wading Pool Strathcona Recreation Centre Wading Pool Aberdeen Recreation Centre Wading Pool	2024 2025 2025 2025

Construction will not commence until a Class 3 estimate is obtained.

Upon completion of approved projects, any unspent budget will be reallocated to other projects within the program based on need at that time.

The project lists and timing are subject to change due to operational requirements, identification of technical limitations or regulatory requirements that make implementation unfeasible, and unexpected urgent needs.

Class Estimate	5	5				
Authorization (\$000's)						
Preliminary Design	750					
Detailed Design & Construction	1,750	2,500				

Project construction will not proceed until a class 3 estimate is obtained and the project is fully funded.

The project involves the development of a new Bonavista Recreation and Leisure Centre to serve established and new neighbourhoods in southeast Winnipeg. An approximately 11 acre parcel of parkland has been acquired in the Bonavista neighbourhood (on Warde Avenue) for development of the facility and other outdoor recreation and parks purposes.

The 2024 Capital Budget included funds to complete a feasibility study, with a public engagement process, and obtain a class 4 cost estimate for the facility. City funding in 2025 and 2026 will support design and construction of the facility and is subject to leveraging other governmental funding.

The current class 5 total estimated project cost is \$16 million. The total estimated project cost will be refined and updated upon completion of the feasibility study.

The expected life of recreation buildings is 50 years.

Incremental operating costs for the recreation and leisure centre cannot be estimated at this time and will be included when known.

SPAP Action Item: 3.6 Increase funding to implement the Winnipeg Recreation Strategy

An indoor aquatic facility is planned as a future component of the South Winnipeg Recreation Campus (SWRC) in order to provide an integrated, multi-use, multi-generational regional recreation facility that meets the needs of growing communities in southwest Winnipeg. The SWRC is intended to serve a catchment area of four to six kilometers that will be home to more than 120,000 residents.

Funding in 2026 is for preliminary design to obtain a class 3 estimate for the indoor aquatic addition which is planned to consist of lap and leisure pools along with affiliated mechanical/filtration systems, change rooms, administrative and program spaces, and site development. The current class 5 total estimated project cost is \$55 million. The total estimated project cost will be refined and updated upon completion of the preliminary design and class 3 estimate.

Incremental operating costs cannot be estimated at this time and will be included when known.

The project is subject to leveraging other governmental or third party funding. Project construction will not proceed until a class 3 estimate is obtained and the project is fully funded.

COMMUNITY SERVICES - GENERAL CAPITAL FUND

Tyndall Park Community Centre - Gymnasium Expansion (continued):

In the 2016 Capital Budget, Council approved \$100,000 for a feasibility study to explore the need, design options, and costs of a potential renovation and expansion of the Tyndall Park Community Centre to provide additional space to address the community centre's programming needs, expanded catchment area, and accessibility requirements. The feasibility study completed in 2019 recommended a facility addition consisting of a gymnasium and multi-purpose room. Public engagement completed in early 2020 confirmed support for the proposed concept.

The current class 5 total estimated project cost is \$10 million but the estimate requires updating due to substantial changes in market conditions and new regulatory requirements including the January 2024 adoption of the 2020 National Building Code.

Capital funding in 2026 of \$500,000 will support preliminary design to obtain a class 3 estimate for the expansion and related site works. The design process will also incorporate public and stakeholder engagement to confirm project scope and obtain feedback on the proposed design.

The total estimated project cost will be refined and updated upon completion of the preliminary design and class 3 estimate. Additional funding will be required in future years to advance detailed design and construction of the facility.

Capital funding in 2026 is initial funding toward the City's contribution for an infrastructure funding agreement that would allow construction of the project to proceed.

The expected life of recreation buildings is 50 years.

An incremental increase to the Universal Funding Formula operating grant will be required but cannot be estimated at this time. Additional funds will be included / requested when the design advances and operating costs can be determined.

City funding in 2026 is subject to leveraging other governmental funding.

COMMUNITY SERVICES - GENERAL CAPITAL FUND

East of the Red Recreation Plex (continued):

Based on a 2018 feasibility study and subsequent update completed in 2023, the East of the Red Recreation Plex (ERRP) is proposed as a 92,000 square foot, City-owned-and-operated, regional, multi-use, multi-generational recreation facility. The facility consists of an aquatic facility, two gymnasiums, multi-purpose room and activity spaces, community kitchen, indoor track, movement studios, accessible change rooms and fitness space, all designed to be attached to the recently constructed Transcona Library located at 1 Transcona Boulevard. Additionally, through the preliminary design process, a child care centre is also being considered for inclusion in the facility. A public engagement process on the ERRP project and amenities was undertaken in the fall of 2021. At that time, the Class 5 estimated capital cost of ERRP was \$89.192 million (assuming construction commencing in 2026).

The 2023 Capital Budget included \$2 million to complete preliminary design and obtain a class 3 cost estimate which will further inform capital budget requirements for the project. Preliminary design is underway and anticipated to be complete in Q1 of 2025.

The following next steps are preliminary and are subject to change and confirmation of sufficient funding:

2025 Q2 - Capital budget submission for detailed design and construction submitted for Council consideration, subject to the approval of a funding contribution agreement with other levels of government.

2026 Q2 - Capital project fully approved/funded. This step assumes a one-year process to negotiate a funding contribution agreement with other levels of government.

2026 Q3 - Detailed design services awarded/commence (approx. 12 months duration)

2027 Q3 - Detailed design complete, class 1 cost estimate established

2027 Q4 - Construction contract tender

2028 Q1 - Construction contract award/start of work (approx. 24 months duration)

2030 Q1 - ERRP commissioning and facility opening

Capital funding in 2026 and 2027 provides initial funding toward the City's contribution for an infrastructure funding agreement that would allow detailed design and construction of the project to proceed.

The expected life of recreation buildings is 50 years.

Incremental operating costs cannot be estimated at this time and will be included when known.

City funding is subject to leveraging other governmental funding.

Class Estimate: See table below

Strategic Priority Action Plan Theme: A Livable Safe Healthy Happy City

SPAP Action Item: 3.6 Increase funding to implement the Winnipeg Recreation Strategy

	2025	2026	2027	2028	2029	2030
Class Estimate			5			
Authorization (\$000's)						
Preliminary Design			400			
Detailed Design & Construction			1,223			

Project construction will not proceed until a class 3 estimate is obtained and the project is fully funded.

The cost of the project is currently estimated at a class 5 level as \$7.5 million and the potential to partner with other levels of government is anticipated. Capital funding in the amount of \$400,000 in 2027 will pay for the preliminary design of the outdoor pool to obtain a Class 3 cost estimate. The total estimated project cost will be refined and updated upon completion of the preliminary design and class 3 estimate. Additional funding will be required in future years to advance detailed design and construction of the facility.

Capital funding in 2027 also includes \$1.223 million as initial funding toward the City's contribution for an infrastructure funding agreement that would allow detailed design and construction of the project to proceed.

The existing outdoor pool at this site is in poor condition and lacks the capacity to adequately serve the needs of the community. The pool is located in a geographic area of higher poverty and it does not meet current accessibility standards nor provide adequate play value and amenities. The new pool will include contemporary pool features such as an accessible pool access ramp, slides, spray features, shaded seating areas, diving board(s), a new pool change/washroom and mechanical system building.

The expected life of an outdoor pool is 35 years.

Incremental operating costs cannot be estimated at this time and will be included when known.

Fort Rouge Leisure Centre and Osborne Library are part of a multi-use facility that also includes Sam Southern Arena. Located in a geographic area of higher poverty, the facility is well-used with high utilization rates and is an important community asset. However, the building has a number of functional limitations and accessibility challenges including the lack of elevator access to the second floor programming spaces. There is also a need to address safety and security concerns while ensuring the facility remains a welcoming community space.

The feasibility study will assess redevelopment opportunities for the building and surrounding site. Public engagement will be included as part of the planning process. The final study will include a preferred concept with a Class 4 cost estimate.

Project construction will not proceed until a class 3 estimate is obtained and the project is fully funded.

St. James Civic Centre is over 50 years old and phased capital projects to renew and upgrade the facility have been occurring for the last few years. Capital investment is required to renovate the existing pool change rooms and to construct a universal change room addition attached to the west side of the St James Civic Centre. Concerns about the size and limited level of accessibility of the pool change rooms has been increasing. The current change room configuration does not have sufficient space to create universal change rooms so an addition is required.

Preliminary design of the addition has been completed. Funds in 2029 will advance detailed design followed by construction with \$3 million allocated in 2030. An additional \$2.5 million is required for construction to proceed.

Project construction will not proceed until a class 3 estimate is obtained and the project is fully funded.

The expected life of recreation buildings is 50 years.

Incremental operating costs cannot be estimated at this time and will be included when known.

Fort Garry Lions Outdoor Pool is located at the intersection of Pembina Highway and McGillivray Blvd. It is the most southern outdoor pool owned by the City. It provides outdoor aquatic opportunities to residents living in nearby neighbourhoods including areas of higher poverty along Pembina Highway. Originally constructed in 1960, the pool is reaching the end of its useful life and in poor condition with limited accessibility.

Funding in 2030 will support a feasibility study and Class 4 cost estimate for the redevelopment of the outdoor pool, wading pool, and supporting site amenities. The feasibility study will look at options to redevelop the pool and site to create a larger destination pool that is fully accessible and increases the play and leisure value for all ages.

Project construction will not proceed until a class 3 estimate is obtained and the project is fully funded.

Located in an area of higher poverty, the Freight House Recreation Centre building was built in 1903, is in very poor condition and is oddly configured, with many different stakeholders and programs segmented throughout the building. The feasibility study will help determine the current condition of the facility and potential options for reconfiguring and/or redeveloping on the site. The study will include engaging with stakeholders and the public to determine a collective vision for the building and site that will better serve the community now and in the future. Future operating and capital requirements at a Class 4 level will be determined through the options analysis of the feasibility study.

Project construction will not proceed until a class 3 estimate is obtained and the project is fully funded.

Pan Am Pool is a major competitive aquatic sports venue that supports international, national, and provincial competitive events. It attracts residents from across Winnipeg due to its unique and specialized amenities. However, the facility is more than 50 years old, struggles to meet usage demands, is becoming increasingly obsolete and unable to meet the service requirements. Many of its building components are also reaching end-of-life. Further study and lifecycle analysis is needed to determine the most cost-effective approach to maintain this city-wide service while minimizing risk.

The redevelopment study will involve working with interested stakeholder organizations to explore options for the redevelopment or replacement of Pan Am Pool including the potential of different partnership arrangements. The project will assess the limitations and opportunities of the current location and facility to develop a feasibility assessment and business case for the redevelopment or replacement of Pan Am Pool that considers current and future service needs, facility lifecycle needs, different development approaches, alternate locations, possible operating models and costs, along with Class 5 estimates of capital costs and financing opportunities.

Project construction will not proceed until a class 3 estimate is obtained and the project is fully funded.

Strategic Priority Action Plan Theme: A Livable Safe Healthy Happy City

SPAP Action Item: 3.6 Increase funding to implement the Winnipeg Recreation Strategy

The Community Centre Renovation Grant Program (CCRGP, approved in February 2012, is to provide up to \$2.00 million in dedicated funding to renovation projects for City-owned, board-run community centres in order to maintain and/or improve community centre infrastructure. The program is open to all General Council of Winnipeg Community Centres (GCWCC in Winnipeg, is subject to an application process with two intake periods per year, project evaluation completed by a joint committee of GCWCC and the City, with maximum City contributions to each project of \$100,000 per project, subject to the grant program criteria.

Annually, up to \$965,000 is funded by the Land Operating Reserve. Transfers from the Land Operating Reserve (not to exceed \$1.2 million in aggregate) to the General Revenue Fund (\$235,000 for GCWCC programming grant) and General Capital Fund (\$965,000 for this CCRGP) are to be equal to 15% of the aggregate of gross land sales and the City's proportionate share of land sales derived from government business partnerships for the fiscal year two years prior to the budget year under consideration (e.g. transfer amounts for the 2024 budget year are based on 15% of the aggregate of actual gross land sales and the City's proportionate share of land sales derived from government business partnerships from 2022).

If actual gross land sales and the City's proportionate share of land sales derived from government business partnerships are less than the amount to achieve the maximum \$1.2 million aggregate amount (i.e. \$235,000 programming grant + \$965,000 for the CCRGP for this program, the transfer to the General Revenue Fund of up to \$235,000 is made first with the residual balance, if any, transferred to the General Capital Fund for the CCRGP.

The program includes one temporary full-time equivalent position in the Community Services department to help coordinate and advance the CCRGP projects and is recovered through the program.

The expected life of recreation buildings is 50 years.

As this is a capital grant program, it is exempt from interest and administrative overhead capital charges.

* N/A - No amounts have been included in the "Previous Budgets" due to this commitment's on-going nature.

Strategic Priority Action Plan Theme: A Livable Safe Healthy Happy City

SPAP Action Item: 3.7 Restore the community incentive grant program

The Community Incentive Grant Program (CIGP), established by Council on March 6, 1985, was designed to encourage non-profit community recreation and sport organizations to undertake capital projects which would result in long-term benefits to the community at large in terms of improved service and facilities.

Community Committees are the delegated authority to allocate CIGP funding.

The total funding is allocated equally to each Community Committee/ward, net of operating expenses for one permanent full-time equivalent position that is required to coordinate, administer, and support new and existing projects in the program.

The 2025 - 2027 funding allocated to the St. Boniface Ward has been dedicated to the St. Boniface Outdoor Aquatic Facility. See project details on page 115. The CIGP budget in years 2025 - 2027 is to be split evenly between the remaining 14 wards.

As this is a capital grant program, it is exempt from interest and administrative overhead capital charges.

* N/A - No amounts have been included in the "Previous Budgets" due to this commitment's on-going nature.

On July 18, 2007, Council approved the award of a public private partnership (P3) contract for the development and operation of the East District Police Station based on a 30-year lease term. Occupancy date was in September 2008.

The above annual cash flow estimates include the authorization for the lease payments to be incurred and charged to the project in the General Capital Fund. They include technical maintenance, but not utility and other operating maintenance expenses.

As financing and administration costs are implicit in the lease payments, this capital project is exempt from the administration and short-term financing charge.

On March 22, 2016, Council authorized a first charge of up to 30% of the annual lease payments prior to the adoption of the annual capital budget, in the event the capital budget is adopted after December 31, in order to facilitate payments on the P3 contract.

In accordance with Bylaw 8164/2002, where the City's capital budget has not been adopted before January 1 of the year to which the budget is applicable, the Chief Administrative Officer is authorized, before the adoption of the capital budget, to approve expenditures not exceeding 30% of the amount the City of Winnipeg is contractually obligated to pay annually in respect of Public-Private Partnerships, as a first charge against the General Capital Fund.

The terms of the lease agreement between the City of Winnipeg and Huntingdon Real Estate Investment Trust ("HREIT") for the development and operation of the East District Police Station included a leasehold improvement allowance of \$825,000 to be provided in years seven (7), fourteen (14) and twenty-one (21) of the initial lease term. The commencement date of the lease agreement was September 15, 2008, and, as such, the first leasehold improvement allowance was due and payable during the one-year period from September 15, 2015.

In 2014, HREIT was acquired by Slate Management Corporation ("Slate") and, in accordance with the terms of the lease agreement, Slate remitted to the City in 2015/16 an \$825,000 leasehold improvement allowance, the first of three. In September 2022, Slate remitted the second \$825,000 leasehold improvement allowance, which is the financing source for this capital program budget. The Municipal Accommodations Division (Assets and Project Management Department), in close consultation with the Winnipeg Police Service, is responsible for delivery of the leasehold improvements work.

The work to which this funding will be allocated is to be determined pending a review in 2023 of the building's condition by Municipal Accommodations and Winnipeg Police Service staff. Note that the allowance is restricted to leasehold improvements as defined in the lease. Monies cannot be directed towards structural or infrastructure items, which fall under the landlord's responsibility.

Projects within the program will not proceed until a class 3 estimate is obtained.

Information received from the members of the public calling 9-1-1 is communicated to field responders (police, fire, and paramedic) via the City of Winnipeg's radio system. For this reason, the City of Winnipeg Public Safety services (Winnipeg Police Service (WPS) and Winnipeg Fire Paramedic Service (WFPS)) rely on P25 compliant radios to provide a mission-critical link between members in the field and 9-1-1 Communication Centre for real-time exchange of information and effective coordination of emergency response. The P25 system and equipment are required to maintain the safety of the residents of the City of Winnipeg. In addition, the P25 radios provide officer safety protection and are relied upon in all manner of events, including dangerous and violent incidents.

This program supports hardware renewals including the radios, mobiles, consoles, consolettes and infrastructure.

Public Safety Answering Point Equipment Program (continued):

This program is directly related to the Federal regulations governing Public Safety Answering Point (PSAP) providers.

The purpose of this program is to:

- Maintain and update operating systems, providing sufficient and robust functionality and security for the 9-1-1 system.
- Support cybersecurity best practices in a 9-1-1 communications centre settings.
- Allow for call handling system upgrades as they become available.
- Implement functionality on the call handling platform, including additional data flows from multimedia sources.

The goal is to provide the city's residents with a more effective emergency response that can scale and match their dynamic set of needs for years to come by:

- Reducing Emergency Responder arrival times to events – due to better situational awareness of events going on within the city
- Improving response times for non-emergency calls.

*N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

With this capital funding the Winnipeg Fire Paramedic Service (WFPS) seeks to maximize the efficiency of the station network. This is achieved through relocations, replacements, and major enhancements to stations that help reduce costs but maintain the desired level of response.

This project will enable the WFPS to build a new station in Waverley West to service city growth and address response time issues. This station will be staffed with reallocated resources (staff and apparatus) from the St. Boniface Industrial Park and Windsor Park consolidation.

Land for this station was previously purchased by Community Services as part of the South Winnipeg Recreational plan. This project includes site servicing costs.

FIRE PARAMEDIC SERVICE - GENERAL CAPITAL FUND

Facility Optimization - Waverley West Station (continued):

2024:

Detailed design and contract administration conditional to approval of the final budget

2025:

Begin construction

2026:

Complete construction

On March 20, 2020, Council received as information the Winnipeg Fire Paramedic Master Plan. On January 28, 2021, Council referred the recommendations outlined in Appendix 2 of the Master Plan to the 2022 Budget process. This project is part of the recommendations in this Plan.

With this capital funding the Winnipeg Fire Paramedic Service seeks to maximize the efficiency of the station network. This is achieved through relocations, replacements, and major enhancements to stations that help reduce costs but maintain the desired level of response.

This project will consolidate the Silver Heights (#19, 320 Whytewold Rd.) and Portage Avenue stations (#36, 2490 Portage Ave.) on the existing city property. The consolidated station will maintain service capability and coverage of both areas.

The new consolidated station will be the relocated modular station from Waverley West. The modular station will stay in place until it is replaced with a permanent one in 2034.

FIRE PARAMEDIC SERVICE - GENERAL CAPITAL FUND

Facility Optimization - Silver Heights Fire Paramedic Station Consolidation (continued):

2026:

A Silver Heights site will be finalized based on existing City owned land in the CentrePort area. The site will be developed to receive the modular station.

2027:

The Modular Station in Waverley West will be disassembled and moved to the new site in CentrePort. Crews will move in, and the two old stations will be decommissioned.

The former Modular Station site will be restored to its former condition.

On March 20, 2020, Council received as information the Winnipeg Fire Paramedic Master Plan. On January 28, 2021, Council referred the recommendations outlined in Appendix 2 of the Master Plan to the 2022 Budget process. This project is part of the recommendations in this Plan.

Total			1,003	1,003	1,015	1,002	1,025	990	6,038

These capital funds support an ongoing program of repair and structural maintenance to ensure station asset lives are maximized, thereby ensuring the service has an operable station network from which emergency response vehicles can be deployed across the whole city to meet required response times.

FIRE PARAMEDIC SERVICE - GENERAL CAPITAL FUND

Station Capital Maintenance (continued):

Projects within the program will not proceed until a class 3 estimate is obtained.

Priorities for 2025-2030 include but are not limited to:

- Roofing
- Concrete repairs to station forecourts as required
- Heating, ventilation, and air conditioning repairs, and electrical upgrade
- Back-up power solutions
- Hazardous material abatement and interior renovations

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

From 2025, the use of station assets for purposes related to paramedic operations will be financially supported through lease payments funded as part of the new Emergency Medical Services contract with Shared Health.

Total			775	4,431	1,498	1,778	1,858	938	11,278

This capital program supports the on-going replacement of emergency response equipment that is nearing the end of its useful operating life. The replacement timing is set to ensure continuity of front-line emergency operation while maximizing the operating life of the equipment and ensuring value for money.

FIRE PARAMEDIC SERVICE - GENERAL CAPITAL FUND

Equipment Obsolescence (continued):

The Fire Paramedic Service needs to replace the following specialized equipment in a cyclical process as it nears the end of its operating life. Funding for this equipment is provided by both the City of Winnipeg and Shared Health. The following list identifies the equipment and the funding source:

Priorities for 2025-2030 include but are not limited to:

City of Winnipeg funded assets:

- Replacement of specialty fire and rescue equipment
- Replacement of fire and rescue equipment and mechanical services equipment
- 911 communications centre equipment and radios
- Mobile data devices such as rugged mobile tablets

Shared Health funded assets:

- Replacement of emergency medical equipment
- P25 Radios and equipment
- Renewal of emergency call handling equipment
- Mobile data devices such as rugged mobile tablets

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

** The City of Winnipeg will take out debt on behalf of Shared Health for this project. Shared Health will pay the interest and principal on this debt over a five-year period.

*** Shared Health has confirmed up to \$2 million of its baseline funding to cover the funding effects of the capital program each year. The cost of this project in each year draws from this funding amount.

The Canadian Radio-television and Telecommunications Commission (CRTC) Next Generation 9-1-1 (NG9-1-1) standards require upgrades to call handling systems to ensure 9-1-1 data can be appropriately managed. These changes better respond to the needs of the public, and ensures support regardless of the device they are calling on or the way they wish to communicate. It also requires primary and back-up Public Safety Answering Points (PSAP) centres have physical and electronic security measures in place. These funds will be used to improve the 9-1-1 back-up centre to meet national standards, and to upgrade 9-1-1 communication systems and processes to meet the new NG9-1-1 standards.

Strategic Priority Action Plan Theme: None

Emergency Vehicle Pre-emption (EVP) takes advantage of the City investment in centralized traffic signal control to provide intelligent traffic signalization for emergency vehicles. This increases priority for approaching emergency vehicles to enable the clearance of the junctions along their route and allowing safer and more rapid progression through to the emergency incident.

EVP was identified as a crucial addition to facilitate the station optimization program in meeting station reductions while maintaining response capability and coverage.

In 2024, Winnipeg Traffic Management Centre and the Winnipeg Fire Paramedic Service (WFPS) 911 Communication Centre will complete a trial of pre-emptive system on selected intersections.

Based on the outcome of the trial, full implementation will start in 2026.

Full city implementation will take two years. Traffic pre-emption control units will be added to most signaled control intersections and custom configured for local intersection conditions by traffic signals engineers. All WFPS vehicles will have pre-emption systems installed.

Downtown Enhancement Program (continued):

The program objective is the functional and aesthetic improvements and required upgrades to public spaces and streetscapes in the Downtown and Exchange District National Heritage Site. The funds enhance accessibility, safety, comfort and urban design quality of pedestrian environments and fulfill the commitment to the "Downtown First" philosophy. The Downtown Winnipeg Urban Design Guidelines provide the guiding principles to support design and enhance the livability of Winnipeg's Downtown urban environment.

The program supports and develops ongoing opportunities for future Public / Private development and redevelopment partnerships and projects such as Old Market Square, Broadway, Millennium Library Park, Bonnycastle Park and the Assiniboine River Walk. Projects have traditionally relied on and/or leveraged other partnership opportunities and have supported private redevelopments.

These public open space and streetscape improvements are over and above and exclusive of work assumed by the Public Works, Transit, and Water and Waste Departments who are responsible for existing infrastructure such as curbs, street and sidewalk repairs, street trees, planters, boulevards, required maintenance, and accessibility standards.

Planned use of 2025 budget funding includes, but is not limited to:

- Air Canada Park - light trellis and seating areas

Projects within the program will not proceed until a class 3 estimate is obtained.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The City of Winnipeg is legally obligated through the approved Development Agreement Parameters to provide payback on older Developer Agreements based on the approved 48/52 split on the development of park costs. The funding formula is that the City of Winnipeg contributes 52% to the park development costs. Additionally, recognizing the need to do work concurrently beyond the basic requirements of the Development Agreement, these funds will cover provision of basic amenities that are more cost-effective and practical to install at the time of initial development (such as pathways, lighting, site furnishings, tree planting), particularly for linear park developments.

Applications from some of the outstanding (older) agreements are now being received due to the ongoing build out.

Calculations are based on industry consultation and the actual reviewed costs of works as they are completed each calendar year. Capital requirements are updated on an ongoing basis to reflect industry build out and Development Agreement amendments.

Funding includes \$132,000 rebudgeted from 2021 Developer Payback - see Appendix D.

* N/A - No amounts have been included in the "Previous Budgets" due to this commitment's on-going nature.

Business Improvement Zones, Image Routes and Neighbourhood Main Streets (continued):

The City of Winnipeg reinvests in partnered projects in Business Improvement Zone (BIZ) districts and Neighbourhood Main Streets. These areas have their own distinct character with their own style of mixed-use, walkable business districts that serve as the cores of their neighbourhoods. These funds provide the opportunity for the residents and business owners to work in partnership with the City, BIZs, private sector, not-for-profit, other funding agencies, and other government bodies. This capital fund gives the incentive for the BIZ groups to go out and match dollars from sources other than the City. This capital fund, through partnerships, assists in stimulating community revitalization.

This enhancement program takes the form of decorative medians, pedestrian lighting, banner poles, special entry nodes, special pavement treatments, character signage, plants, trees and site furnishings, to ensure the renewal and sustainment of the infrastructure that creates a sense of place and destination in and along Business Improvement Zones and on Image Routes.

Projects in 2025 to 2030 are adjusted based upon community readiness and partnership opportunities.

These organizations utilize grants received from the City to leverage additional funding to undertake projects. Any one of the sixteen (16) Business Improvement Zones may be considered and reviewed for the Streetscape Enhancement Capital Grant funding. Specific allocations to BIZ groups will be subject to Council approval by way of a separate report in early year of capital funding being allocated. Project funding will be delivered as a grant to each BIZ group through legally executed grant agreements.

As this funds capital grants within this program, it is exempt from interest and administrative overhead capital charges.

Projects within the program will not proceed until a class 3 estimate is obtained.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

PLANNING PROPERTY AND DEVELOPMENT - GENERAL CAPITAL FUND

Cemetery Planning and Development (continued):

Funding is required for the establishment of new full body interment sections at Brookside Cemetery, as existing interment sections are reaching capacity and investment is needed in order to meet community demand. This work will include initial site planning work, new roadway construction, installation of new beam foundations and landscaping work. These revenue-generating products/services will contribute to the Cemetery Service's goal of reaching financial self-sustainability.

The 2025 capital budget amount of \$291,000 will be primarily used to undertake a significant expansion project at Brookside Cemetery, as interment space will be fully exhausted within three years. This work will include site planning, site grading, the construction of new roadways and pathways, new tree planting and the installation of new beam foundations.

Projects within the program will not proceed until a class 3 estimate is obtained.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

PLANNING PROPERTY AND DEVELOPMENT - GENERAL CAPITAL FUND

New Columbaria Investment (continued):

Funding is needed for the purchase and installation of columbaria and other cremation interment options within the Garden of Remembrance at each of Brookside, St. Vital and Transcona Cemeteries. The existing supply of product at each cemetery is limited and expansion is needed in order to accommodate new product sales. These revenue-generating products/services will contribute to the Cemetery Service's goal of reaching financial self-sustainability.

The 2025 capital budget of \$100,000 will be used to expand columbaria capacity at Transcona Cemetery. This includes site planning, the installation of new pathways, columbaria foundations and landscaping, as well as the procurement of new columbaria units. This investment should provide several years of new capacity and will generate ongoing revenue for the Branch.

Projects within the program will not proceed until a class 3 estimate is obtained.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Riverbank Stabilization - Physical Asset Protection (continued):

This program is intended to address riverbank erosion and slope instability risks to public riverbank lands, while also providing improved public access to these spaces. The riverbank improvements will typically include some form of erosion protection supplemented by stabilization works where warranted. The funds will be used for engineering design, contract administration, construction and land acquisition. The program will provide new or enhanced riverbank access such as upper-bank walk/bike paths and Active Transportation routes, mid and lower bank paths, viewing nodes, and river's-edge landings. Site restorations in project areas will (re)establish robust and diverse naturalized riparian habitats.

Prioritized riverbank improvement projects that will protect existing and/or facilitate new public access to the river and riverbank areas. The Planning Property and Development Department's Waterways Branch maintains a Riverbank Asset Management System (RAMS) which includes characterizations of over 200 City-owned riverbank sites with risk-based evaluations taking into account the condition of the riverbank and current or anticipated impacts to existing and planned assets.

Projects will involve inter-departmental collaboration as they will take place on land administered by other City Departments and the riverbank works will accommodate and protect assets within the portfolios of other departments, in particular Public Works Department (paths, parks/park amenities, streets) and Water and Waste Department (primary line of defence, outfalls and river crossings). Subject to available funding, some riverbank improvements may be delivered within a project administered by another department.

Funding includes \$110,000 rebudgeted from 2020 & 2021 Riverbank Stabilization - Physical Asset Protection - see Appendix D.

In accordance with the mandate given by Council, having upgraded to the AMANDA 7 platform and completed the first phase of the Expansion of Digitization Permitting System aspects of the project, the following elements will be completed through the second phase expansion of the digital permitting system ("EDPS") and redevelopment of Permits Online by 2025/26 with a focus on accessibility and usability:

- Implementation of all building and trade permit applications in the AMANDA 7 to enable online self-service;
- Fully digitalize all permits and inspections processes, land development and planning services with the goal of improving communication between the Planning, Property and Development Department, industry and the general public with respect to responses and decision-making time, and clarifying and streamlining processes;
- Improved "line-of-sight" on applicants' permit/status due to enhance transparency and upgraded workflows;
- New design and navigation tools to increase transparency and provide applicants with the solid guidelines to increase application compliance, accuracy, speed, improved stakeholders' information, while reducing staff involvement in administrative tasks by resolving them with automated solutions, and;
- Temporary operational support to manage increased online and staff requests.

Project may include a maximum of six temporary capital-funded full-time equivalents. Temporary staffing costs of approximately \$1.4 million were included in the \$4.181 million initial overall project budget.

The development work is active and ongoing and is critical to support the Housing Accelerator Fund Initiative #7 (Digitalize and Facilitate Faster Development and Permit Approvals) and legislated Bill 37 milestones.

Strategic Priority Action Plan Theme: The Downtown

SPAP Action Item: 1.1 Accelerate completion of the downtown secondary plan (CentrePlan).

The project will fund a one-time grant of \$200,000 to CentreVenture Development Corporation for the interim activation of Graham Avenue; specifically, to support the physical installation of temporary elements including, but not limited to:

- Decorative street painting;
- Moveable planters;
- Seating, picnic tables;
- Hanging decorative lights.

Potential programming, with the participation of True North, the Downtown BIZ and others, could include such things as pop-up dining/ patios, farmers' markets, ice carving, street hockey, etc.

Project will not proceed until a class 3 estimate is obtained.

ASSETS AND PROJECT MANAGEMENT - MUNICIPAL ACCOMMODATIONS

Health/Life Safety/Emergency Systems Refurbishment/City-wide Accessibility (continued):

Capital Program to fund investments ensuring health/life safety requirements and the highest-and-best use investments associated with preserving continued facility operations that arise annually. Specifically, this program encompasses planned or emergency refurbishment, replacement, repair and maintenance upgrade projects for fire and life safety (e.g., emergency lighting), heating, ventilation, air conditioning, electrical, plumbing, building envelope, structural requirements, emergency power generation, and uninterrupted power systems. Funding is also allocated for critical systems including building automation and climate control, security, access control, and closed caption television systems. This program also ensures adherence to regulatory compliance upgrades, asbestos and other hazardous material remediation, and asset condition assessments. Finally, this program addresses physical accessibility issues such as lighting, signage, and public entranceways.

Planned works for the 2025 budget amount include Winnipeg Police Service headquarters building systems repairs and refurbishment, roof and building envelope refurbishment and replacement (various sites including 245 Smith Street, 1539 Waverley Street, 2546 McPhillips Street & 185 King Street), air handling unit replacement at Park City West & Heritage Victoria Community Centres, outdoor aquatics short-term capital repairs (various sites), building automation and security systems upgrades (various locations) and City-wide accessibility initiatives (various locations).

This program may include a maximum of 3 temporary capital funded full-time equivalents.

Funding includes \$3.333 million rebudgeted from 2021 and 2022 capital program - see Appendix D.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Per Council decision on January 30, 2025, this capital grant funding represents the maximum City contribution of the currently estimated \$2.5 million cost to construct a clubhouse at the Wildewood Golf Course. The construction of the clubhouse is to be undertaken by the lessee of the golf course with Municipal Accommodations providing oversight. The City's share is subject to a share of funding from other levels of government, private fundraising (donations) and/or mortgage financing to be obtained by the grantee, Wildewood Golf Club Inc.

As this funding represents a one-time capital grant, the class estimate is not applicable. Also not applicable are corporate administration and Municipal Accommodations Project Management overheads.

Specialized shelving and equipment for Archives building	Council Services				200				200
Total				-	200	-	-	-	200

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

The City Clerk's Department, Archives and Records Control Branch, supports records and information management City-wide, manages access and privacy responsibilities for the City, and operates the City of Winnipeg Archives and the Corporate Records Centre. The Corporate Records Centre at 1450 Mountain Avenue allows for the ability to increase storage capacity for records scheduled for retention under the Records Management By-law 123/2020 ("the by-law"), utilize specialized shelving solutions to better accommodate variable sized box transfers from departments, and realize operational efficiencies. Archival storage and public access/research services continue to be delivered out of a leased facility at 50 Myrtle.

Ongoing development of the Corporate Records Centre is essential to meet the City's records management requirements. Cost-effective storage and inventory management services enable departments to better manage records in accordance with the by-law, regulatory requirements, and the administrative standard, resulting in an increase in routine transfers of records out of expensive operational space to the more cost-effective Corporate Records Centre.

CITY CLERKS - GENERAL CAPITAL FUND

Corporate Records Centre (continued):

This program ensures that the Corporate Records Centre can continue to meet the demand for storage of records scheduled under the by-law. Costs will include installation of additional specialized shelving solutions and the purchase of equipment to manage the growing inventory to ensure that City records are protected as required by law, and can be accessed and retrieved in an effective manner.

Development of the Corporate Records Centre supports the City's commitment to increased transparency and better response times to requests through access legislation.

The expected life of the asset is five years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Total			100	200	-	-	200	200	700

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

The City Clerks Department has a statutory responsibility to convene elections. Every four years the department must ensure the renewal of election systems and equipment. Systems which need to be updated for every general election include the list of electors, geographic information mapping, worker management, training, results reporting, security systems and websites. Given that most of these systems are typically used once every four years, they need extensive updates or complete rewrites to align with updated technology.

This fund is also utilized to renew smaller election equipment including laptops, tablets and mobile network connection devices. This technology is constantly evolving and the equipment needs to be updated on a regular basis.

The expected life of the asset is five years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Project name / description (in priority order)	Service	2025 Class Est	2025	2026	2027	2028	2029	2030	Total
Maintenance and replacement of audio / video equipment	Council Services				150				150
Total				-	150	-	-	-	150

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

The City Clerks Department facilitates meetings of Council, Committees and the Board of Revision online via the Zoom platform. The department provides live streaming, live television broadcast, recording and providing various audio / video capabilities in six separate meeting areas, including the Council Chamber and the Board of Revision meeting rooms. These facilities are used for 300+ meetings of Council and its committees, and to facilitate the hearing of up to 5,000 appeals annually.

The equipment used to facilitate these meetings is used daily. Equipment includes automated cameras, microphones, speakers, amplifiers, digital recorders, live streaming equipment, closed captioning converters, digital storage, and television broadcast stations. In addition to the wear and tear this equipment sustains due to its daily use, this technology changes rapidly and needs to be regularly replaced. This program ensures that the department can continue to meet its legislated requirements of allowing participation in Council and Committee meetings by communication devices (i.e. Zoom) as well as the broadcasting and livestreaming of the meetings.

Audio / Video Equipment Replacement (continued):

The department also regularly provides audio/video services for numerous City of Winnipeg events including openings, announcements, and flag raisings, where audio equipment, and other technology is required. Equipment used for protocol events including speakers, amplifiers, pool sound, etc. is often used outdoors and is required to be moved from event to event. As such, the equipment is subject to wear and tear and does require regular maintenance and replacement to ensure 100% operational ability and reliability.

The expected life of the asset is five years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Renovations at 380 William Avenue will create a space that meets the programming needs of today's City of Winnipeg Archives, including the legislated and fiduciary requirements for the long-term storage and preservation of archival records.

The scope of work will include creating a new climate-controlled vault; renovating existing areas to create multi-purpose space, offices and meeting areas, as well as citizen focused research and workshop areas; improved shipping/receiving functions; numerous building code / life safety upgrades including the addition of new sprinklers throughout the facility and mechanical and electrical upgrades.

The renovations will enable the framework outlined in "A Reconciliation Framework for Canadian Archives", allowing the City to advance reconciliation efforts through governance, operations and organizational culture changes including fair representation, professional practice and relationship building.

Detailed design and class 1 estimate were completed in 2024, with construction to start in 2025. Project costs have increased due to refined estimate (class 1), inflationary increases, industry cost escalation, regulatory changes (National Building Code update, including new Seismic Design requirement, WADS update, new Energy Code, etc.), hazardous waste removal, and Sustainable Design requirements.

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

The City of Winnipeg purchased its first automated voting machine system in 1994. In 2010, that system was replaced with the current automated voting machine system. The system, which includes both software and hardware for 230 voting machines, offers accessibility options for advance voting as well as detailed results by voting subdivision. Although the City Clerk's Department expects to continue to utilize these voting machines for the 2026 General Election, they will need to be replaced prior to the 2030 General Election.

This will replace the current system and be ready with a new system for the 2030 General Election.

SPAP Theme: The Downtown

SPAP Action Item:1.6 Develop a city-wide housing strategy and action plan including in downtown

On September 26, 2024, Council approved grants totaling up to \$16.1 million to True North Real Estate Development Limited to support a redevelopment of public space at Portage Place Mall. This funding will support construction of a new road that will extend Edmonton Street north of Portage Avenue to the Promenade located behind the mall as well as streetscaping and other upgrades to nearby streets (\$7.5 million). It will also support construction of a new skywalk, upgrades to existing skywalks, lighting and security features within the development (\$6.5 million), and construction of a community drop-in space located within the development (\$2.1 million). In addition to these funds, Council also approved up to \$10 million from the Housing Accelerator Fund from 2025 to 2026 and an estimated \$13.6 million of municipal Tax Increment Financing over 25 years for this project.

Portage Place Redevelopment Capital Grant (continued):

\$4 million of Previous Budgets funded by 2024 Province of Manitoba Strategic Infrastructure Funding, subject to Provincial approval - see Appendix G.

Funding includes \$2.1 million rebudgeted from 2023 Recreation and Library Facility Investment Strategy Program - see Appendix D.

The business case requests funding to upgrade the City's Information Technology (IT) infrastructure by updating server storage, network infrastructure, and data centers. This funding is crucial to ensure continuous performance, reliability, and alignment with technological advancements. Regular updates will maintain system integrity, enhance security, and improve productivity across all City departments. These investments are essential to prevent technological obsolescence and support the City's evolving needs. It will keep our city technologically current, enhancing system integrity and cybersecurity—a critical concern today—and improving productivity. The funding will also facilitate the development of a modern network infrastructure that is ready for future integration with cloud services, colocation data centers, and Infrastructure as a Service (IaaS) providers.

This program may include a total of nine temporary capital funded full-time equivalent;

One for City-wide Data Centre sustainment

Two for City-wide Network Product Evergreen

Six for City-wide Server-Storage Evergreen

INNOVATION & TECHNOLOGY - GENERAL CAPITAL FUND

Technology Infrastructure Program (continued):

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

Projects within the program will not proceed until a class 3 estimate is obtained.

The Digital Customer Experience program aims to improve citizen engagement at the City of Winnipeg by providing enhanced access to information and services. Through funding projects, innovative practices will be implemented across departments to improve accessibility and service delivery, boosting resident satisfaction and confidence in City services and operations. The program seeks to enhance the City's existing digital customer platforms, such as Verint, MyUtility, and Lawyer Gateway, consolidating access into a unified online channel. This platform will cater to various external users, including citizens, lawyers, landlords, and utility customers, providing expanded features and functionalities. The City envisions investing in competitive, scalable, and robust information technologies that provide instantaneous customer information. These future-oriented solutions will equip City employees with up-to-date tools, enable field employees to access and update data on mobile devices.

This program may include a total of three temporary capital funded full-time equivalent positions for Citywide 311 System Maintenance.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

Projects within the program will not proceed until a class 3 estimate is obtained.

Assessment & Taxation Systems Program (continued):

The program focuses on projects designed to meet regulatory directives, maintain application functionality, and streamline processes through automation in the Assessment and Taxation Department (ATD). Many of ATD's applications are outdated and need updates to ensure efficiency and regulatory compliance. These applications manage assessments for over 240,000 properties valued at \$104 billion, generating substantial municipal revenue annually. For example, MANTA, the primary taxation system, handles property and business tax billing, collections, penalties, and accounts receivable. Due to the scale of these tasks, automated and accurate processes are crucial. However, current taxation processes necessitate year-round Information Technology (IT) involvement to facilitate billing and collection activities, which is one of the many benefits this program of projects aims to generate.

The initiatives in this program may include a maximum of three temporary capital funded full-time equivalent positions.

Community Services Library Technology Upgrade & Replacement Program (continued):

The Winnipeg Library Service supports the digital economy and fosters digital literacy by making public access computers available to all customers. Capital funds are required to upgrade and replace access computers and support new innovative and efficient technology applications in libraries to address the changing needs of customers and move towards consistent service levels in all facilities by:

- increasing the number of public access computers system-wide;
- upgrading and replacing aging public access computers, monitors and peripheral devices;
- upgrading self-checkout technology and the provision of additional smart lockers;
- refreshing IdeaMILL technology to ensure the makerspace has access to current technology;
- expanding and enhancing information services through technological innovation and digitalization projects.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Planning, Property & Development Desktop Evergreen Program (continued):

This initiative entails an ongoing Information Technology (IT) hardware replacement program, emphasizing the transition from desktop computers to laptops. Its key objectives are to supply modern IT hardware, including laptops and docking stations, which support contemporary web standards and security protocols. The program aims to enhance organizational efficiency, ensure system stability for seamless end-user support, and promote the adoption of a modern hybrid work model. Central to this initiative is the aim to extend the lifespan and effectiveness of the city's hardware investments, thereby enhancing system functionality, bolstering security measures, and ensuring compatibility with current web technologies. By fostering a shift towards laptops, the initiative seeks to improve usability, user experience, and mitigate security risks and compatibility issues across Property Planning & Development. The program anticipates that maintaining and enhancing technological infrastructure will catalyze organizational improvements, fostering efficiency and reliability. Funding for reliable and secure IT assets will enable continual upgrades and maintenance, enhance information accessibility and streamline workflows, ultimately improving service delivery.

INNOVATION & TECHNOLOGY - GENERAL CAPITAL FUND

Geospatial Information Systems Program (continued):

The City of Winnipeg seeks to modernize its Geospatial Information System (GIS) to support efficient City operations. Currently our GIS, GeoMedia provided by Hexagon is outdated and lacks the capabilities needed to meet the evolving demands of Public Works, Water and Waste, and Property Planning and Development. With the impending contract expiration and a pressing need for advanced spatial analysis and real-time data integration, we propose transitioning to a more technologically advanced GIS solution. A GIS that supports a wide range of data formats and facilitates interoperability with other systems and data sources is critical to the effective internal operation of the City of Winnipeg.

This project may include one temporary capital funded full-time equivalent. 0.5- Water and Waste Department Geospatial Information System Enhancement and 0.5 - City-wide GIS.

Information Management & Analytics Program (continued):

Projects within the program will not proceed until a class 3 estimate is obtained.

The City of Winnipeg recognizes the importance of digital platforms in delivering efficient services through data and Artificial Intelligence, improving customer experiences, optimizing processes, and ensuring regulatory compliance. However, current reliance on point-to-point connections leads to system inconsistencies and outdated information. To resolve these issues, several initiatives have been identified to enhance Information Technology (IT) capabilities at both the City and departmental levels.

This program will enhance data access, analytics, dashboarding, and reporting, enabling timely data reporting and insights for evidence-based decisions. Integrating Water & Waste Department (WWD) existing information systems will provide seamless information access, automate processes, and establish a single source of truth, essential for WWD to become a Utility of the Future and improve service levels.

This project may include one temporary capital funded full-time equivalent. The estimated life of the assets is 10 years.

*N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Class Estimate: 3

Strategic Priority Action Plan Theme: None

This initiative will improve operational access to critical wastewater treatment plant operations Supervisory Control and Data Acquisition System (SCADA) data. It will also enable improved sharing of data and information, and provide improved analytics and reporting. Further, this will assess and implement technology and develop processes required to ensure continued operations of the wastewater SCADA systems and increased security to safeguard our data.

The estimated life of this asset is 10 years.

INNOVATION & TECHNOLOGY - GENERAL CAPITAL FUND

Project Name: **Digital Records & Workflow Program (formerly Document Management System)**

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

Projects within the program will not proceed until a class 3 estimate is obtained.

Digital Records & Workflow Program (continued):

This program includes initiatives aimed at digitalizing, automating and streamlining the flow of digital information within the City of Winnipeg. Projects will focus on document management, version control, collaboration tools, and automation of repetitive tasks. The purpose of these initiatives is to provide staff with a centralized and integrated repository to organize and standardize document management and to improve operational efficiency and effectiveness. Currently there are service gaps with respect to capable records management capabilities, trusted and reliable management of documents, a persistent reliance on paper-based processes and document generation, and absence of standardized automated workflows.

This program may include a maximum of 0.5 temporary capital funded full-time equivalents for Water and Waste Department Specialized File Management.

The estimated life of this asset is 10 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

Projects within the program will not proceed until a class 3 estimate is obtained.

The City of Winnipeg recognizes the imperative to optimize its diverse asset portfolio, spanning linear, vertical, waste collection, laboratory equipment, and mobile assets, to bolster productivity, reduce costs, minimize downtime, and enhance long-term asset performance. Asset management entails two core components: asset oversight, focusing on maximizing asset value and performance through technology-driven data gathering and analysis for robust management planning, and work management, which involves operational activities to maintain assets in alignment with service level agreements (SLAs). Various initiatives have been identified with a brief description of each at high level.

1. City-wide Work & Asset Management System Design & Implementation - Revolutionize operational management across departments by enhancing asset lifecycle management, maintenance planning, and workforce productivity.
2. Water & Waste Digital Enablement for Plant & Field - modernize operational processes by leveraging digital technology solutions that enables plant and field employees to be more efficient.
3. Water & Waste Collection Management System - Integrate data from various sources and establish a unified source of truth for solid waste management.
4. Water & Waste Laboratory Information Management System - Enhance laboratory operations' efficiency and effectiveness by standardizing data management and ensuring regulatory compliance.
5. Water & Waste Asset Information and Data Integration - centralize and integrate utility asset information to improve visibility, maintenance planning, regulatory compliance, and data-driven decision-making.
6. Water & Waste Oracle Work & Asset Management - Update product to ensure the system can support the day-to-day operations within the Water and Waste Department.

Collectively, these projects represent a strategic investment in operational excellence, innovation, and stakeholder value delivery, positioning the organization for sustainable growth, competitive advantage, and long-term success in a dynamic business landscape.

This program may include a maximum of one temporary capital funded full-time equivalent.

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

Projects within the program will not proceed until a class 3 estimate is obtained.

Public Safety Systems Program (continued):

The Public Safety Systems Initiative is a critical step forward for the City of Winnipeg in optimizing emergency response services. The proposal to incorporate this Information Technology (IT) Equipment Obsolescence initiative alongside the transition to Next Generation 911 (NG911) technology into the IT investment plan directly tackles the issue of outdated emergency response systems and constrained emergency infrastructure. By acknowledging the challenges posed by aging equipment and traditional emergency response systems, the Fire Paramedic Service demonstrates a proactive approach to improving public safety. Upgrading to Next Generation 911 technology not only enables the integration of modern communication methods and multimedia data, but also enhances the overall responsiveness of emergency services. This transition requires significant upfront investment in infrastructure upgrades and technology integration but results in enhanced public safety. The initiative aligns with the evolving needs of the community and establishes a new benchmark for emergency services. This proactive approach not only enhances operational efficiency but also addresses potential risks and challenges encountered by both responders and the public.

This program may include a maximum of two temporary capital funded full-time equivalent.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

** Shared Health has confirmed up to \$2 million of its baseline funding to cover the funding effects of the capital program each year. The cost of this project in each year draws from this funding amount.

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

Projects within the program will not proceed until a class 3 estimate is obtained.

To adapt to the rapid technological advancements and the growing complexity of City management, implementing a Digital Operations Platform (DOP) has become essential. This shift aims to ensure efficiency, transparency, and sustainability in City operations. This program is to propose a strategic plan to enhance the City's operational efficiency through three targeted Information Technology (IT) investments. First, the City requires an investment to modernize our current Enterprise Resource Planning (ERP) solutions, mainly PeopleSoft, to a modern DOP. Second, until a proper DOP is fully implemented, our PeopleSoft solution requires continuous investment to maintain its reliability and sustainability. Third, funding is required for projects targeted at improving our operational processes that aren't typically addressed by a modern DOP; such as a comprehensive project management solution and a solution focused at managing fiscal planning and monitoring.

This program may include a maximum of 10 temporary capital funded full-time equivalent: three for City-wide Project Management System Implementation, and seven for City-wide Enterprise Resource Planning System Modernization (ERP) PeopleSoft Renewal.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Strategic Priority Action Plan Theme: A City that Works for Residents through Improved Customer Service

SPAP Action Item: 5.5 Review the Local Improvement Program for gravel backlanes

Project name / description (in priority order)	Service	2025 Class Est	2025	2026	2027	2028	2029	2030	Total
To be determined***	Roadway Construction and Maintenance	N/A **	1,000	1,000	1,000	1,000	1,000	1,000	6,000
Total			1,000	1,000	1,000	1,000	1,000	1,000	6,000

Individual projects and project budgets are approved by Council via by-law, based on successful local improvement petitions from residents undertaken during the year. Projects within the program will not proceed until a class 3 budget is obtained.

Local Improvement capital projects are those which are financed partly by a direct levy on the properties benefited. The program is governed by Local Improvements By-law No. 98/72 and is subject to advertising and subsequent approval by the majority of ratepayers involved. The types of expenditure generally falling within this category are: paving of local streets and lanes; sidewalk and boulevard construction; installation of new watermain and sewers; ornamental street lighting and lane lighting. The expected life of the assets varies between 10 and 30 years depending on the type of local improvement.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

** N/A as this is a rolling program.

*** To be determined based on local improvements to be approved.

Total			1,173	1,600	600	1,000	1,000	600	5,973

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

Projects within the program will not proceed until a class 3 estimate is obtained.

Transit's operations are housed at three primary locations - The Fort Rouge complex, North Main garage, and Brandon garage. The Fort Rouge and North Main facilities are approximately 40 and 80 years old, respectively, and are operating at capacity. The department funds the repair and maintenance of its infrastructure mainly through the operating budget; however, many of the structural, mechanical and electrical systems in the existing infrastructure are past their design and economic lives and capital funding is required to bring the infrastructure up to acceptable standards.

This multi-year capital program addresses the need for both larger and smaller scale projects within Transit's existing facilities, stops and stations. These projects are mainly required due to the age and condition of the assets.

Surplus funds will automatically be transferred to the following year's Transit Building Replacement and Renewal program budget.

Includes two temporary capital funded full-time equivalent Project Coordinator/Manager positions.

Funding includes \$485,000 rebudgeted from 2020 and 2021 Transit Building Replacement / Refurbishment (funded by \$350,000 Canada Community - Building Fund and \$135,000 in Cash to Capital) - see Appendix D.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

** N/A as this is a rolling program.

Ventilation upgrades - phase 4	Public Transit	5	2,892						2,892
Total			2,892	-	-	-	-	-	2,892

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

Projects within the program will not proceed until a class 3 estimate is obtained.

Transit's Fort Rouge Garage at 421 Osborne Street includes two major buildings that total approximately 480,000 square feet in area. The buildings were constructed in 1969 and 1978 and house over 70% of Transit's bus inventory.

The Fort Rouge campus storage, maintenance, and administration facilities require replacement of the existing ventilation systems (which includes makeup air units and exhaust fans) in response to a regulatory change in allowable levels of airborne nitrogen dioxide (NO2) in diesel exhaust, age, inefficiency of equipment, and pressure imbalances throughout the buildings. Work over the next year will focus on ventilation upgrades.

Funding includes \$392,000 rebudgeted from 2021 Transit Roof Replacement and Ventilation Upgrade (funded by Canada Community - Building Fund) - see Appendix D.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Projects within the program will not proceed until a class 3 estimate is obtained.

TRANSIT - TRANSIT SYSTEM FUND

Transit Buses (continued):

This program is for the on-going purchase of Transit buses to replace those that have reached the end of their useful life. Costs include all outfitting associated with these purchases.

In 2025 and 2026 this program will purchase zero emission buses plus the associated charging/fueling infrastructure. In 2027 to 2030 this program will purchase diesel buses. Future bus and infrastructure purchases are planned based on needs, funding, and climate goals.

	2025	2026	2027	2028	2029	2030
Forecasted Number of Zero Emission Buses Included in Budget and Forecast above **	20	51				
Forecasted Number of Diesel Buses Included in Budget and Forecast above **			20	25	15	19
Total	20	51	20	25	15	19

** The projection of the number of buses included in the budget is provided as an estimate only and is subject to change as the price per bus and model selected is based on a number of factors. These factors include the movement in the Statistics Canada Monthly Industrial Product Price Index which is influenced by the fluctuation in the Canadian currency and inflation, the timing of order placement in relation to the budget approval, operational requirements and changes to technology or product development.

Includes two temporary capital funded full-time equivalent (FTE) positions including one Coordinator Contracts and one Program Manager. In addition, all Transit Investing in Canada Infrastructure Program (ICIP) projects also share two temporary positions, a Program Manager and a Financial Analyst.

Estimated useful life - 18 years.

On January 29, 2025, Council authorized a first charge of up to \$45.0 million in 2025 or prior to the adoption of the 2026 capital budget.

On March 20, 2024, Council authorized a first charge of up to \$38.0 million in 2024 or prior to the adoption of the 2025 capital budget.

On April 29, 2021, Council approved this project be submitted for consideration to the Investing in Canada Infrastructure Program (ICIP) funding. Delivery of the project was contingent on receiving approval under this program. In November 2022, the City received notification that this project was approved for funding under the ICIP.

Surplus funds will automatically be transferred to the following year's Transit Buses program budget.

Operating costs reflect the estimated net amount of savings in diesel fuel and maintenance, offset by added costs from incremental salaries, maintenance and other expenses needed to support the new zero emission fleet. These amounts have not yet been reviewed by Council and are subject to change during future budget processes.

Future operating budget impacts, following project completion, may need to be adjusted.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Class Estimate: Not applicable

Strategic Priority Action Plan Theme: None

The Southwest Rapid Transitway (Stage 2) and Pembina Highway Underpass (SWRT) was approved by Council on June 25, 2014, using a Public Private Partnership (P3) approach and the transitway opened on April 12, 2020.

The City will make on-going lease payments to Plenary Roads Winnipeg Transitway LP (PRW) extending until 2049. These payments are required under a 30-year contract with PRW and cover the remaining capital cost of the Transitway as well as on-going maintenance.

There are significant provisions in the contract to ensure the City's specifications are met and the facility is returned to the City in good condition at the end of the contract. Costs associated with monitoring this contract, including the salary recovery of the Senior Project Review/P3 Specialist and other P3 costs are also included in this budget. Non-performance deductions may occur where the City's specifications are not met.

A portion of the payment to PRW represents an annual amount dedicated to the maintenance of the Transitway, including long-term rehabilitative costs. This amount is adjusted for changes to the Consumer Price Index on an annual basis.

TRANSIT - TRANSIT SYSTEM FUND

Southwest Rapid Transitway (Stage 2) and Pembina Highway Underpass (continued):

The above annual estimates relate to the maintenance phase of the project and include the authorization for the lease payments, debt servicing, and other charges related to the facility.

On March 22, 2016, Council authorized a first charge of up to 30% of the annual lease payments prior to the adoption of annual capital budget in the event the capital budget is adopted after December 31, in order to facilitate payments on the P3 contract.

In accordance with By-law 8164/2002 where the City's capital budget has not been adopted before January 1 of the year to which the budget is applicable, the Chief Administrative Officer is authorized, before the adoption of the capital budget, to approve expenditures not exceeding 30% of the amount the City of Winnipeg is contractually obligated to pay annually in respect of Public-Private Partnerships, as a first charge against the General Capital Fund.

On April 29, 2021, Council approved that effective January 1, 2024, the funding source for the Southwest Rapid Transitway (Stage 2) and Pembina Highway Underpass Payment Reserve be changed from 10 years of dedicated annual 0.33% property tax increase (2016 - 2025) to eight years (2016 - 2023).

As financing and administration costs are implicit in the lease payments, this project is exempt from the Corporate administration and interest charges.

The project will see the replacement of Winnipeg Transit's existing North Garage, currently located at 1520 Main Street, to a new location. The project includes the development of an energy efficient bus storage and maintenance facility with increased bus capacity, designed to facilitate the transition to a zero emission bus fleet.

On April 29, 2021, Council approved this project be submitted for consideration to the Investing in Canada Infrastructure Program (ICIP) funding. Delivery of the project was contingent on receiving approval under this program. In December 2022, the City received notification that this project was approved for funding under the ICIP.

Includes one temporary capital funded full-time equivalent (FTE) Project Manager position. In addition, all Transit Investing in Canada Infrastructure Program (ICIP) projects share two temporary positions, a Program Manager and a Financial Analyst. This project will also contribute towards the salary, benefits, support and office costs for the Chief Construction Officer.

TRANSIT - TRANSIT SYSTEM FUND

North Garage Replacement (continued):

Major benefits of replacing the North Garage include:

- Support the transition to a zero emission bus fleet
- Maintain essential level of service
- Improve bus storage capacity
- Improve health and safety of staff

Significant risks of constructing the project:

- Remediation of the land
- Resource availability
- Change in market conditions
- Funding agreement approvals/delays

Significant risks of not constructing or deferring the project:

- Inability to meet new / updated building regulations
- Inability to maintain essential level of service
- Inability to accommodate future growth

Standard corporate and departmental administrative charges have not been applied to this major capital project.

Operating costs reflect the estimated incremental amounts for the new garage including utilities, building maintenance, and salaries. These amounts have not yet been reviewed by Council and are subject to change during future budget processes.

Future operating budget impacts, following project completion, may need to be adjusted.

Total			6,864	13,536	-	-	-	-	20,400

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

Projects within the program will not proceed until a class 3 estimate is obtained.

The Primary Transit Network Infrastructure program will support the Winnipeg Transit Master Plan complete redesign of the transit network City-wide. In the proposed new transit network, several new routes will require dedicated bus loops, stations, mobility hubs, comfort stations for bus operators, and new traffic signals where buses/ riders will be turning onto or crossing major arterial streets. This program includes public engagement, communications, and marketing to ensure Winnipeg Transit customers and the broader public are aware and can provide input on the proposed changes and their impacts. The program also funds installation and removal of bus stop signs and other similar elements required to transition the City-wide transit network.

Projects within the program include \$2.615 million towards active transportation improvements that provide connectivity to transit routes and rapid transit stations and may include phase two of the Northwest Hydro Corridor Active Transportation Project.

Includes one temporary capital funded full-time equivalent Project Manager position. In addition, all Transit Investing in Canada Infrastructure Program (ICIP) projects share two temporary positions, a Program Manager and a Financial Analyst.

Operating costs reflect incremental increase of 1.5 additional operating FTEs to maintain and service the new infrastructure.

On March 20, 2024, Council authorized a first charge of up to \$6.864 million in 2024 or prior to the adoption of the 2025 capital budget.

This program has been approved for funding under the Investing in Canada Infrastructure Program.

Future operating budget impacts, following project completion, may need to be adjusted.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

This project will support the retro-fit of wheelchair securements on existing buses purchased before 2021.

Beginning in 2021, all new buses received will be equipped with wheelchair securements that will meet the Accessibility for Manitobans Act (AMA) regulations. The AMA is proposed provincial legislation which mandates accessibility regulations that are not elective and must be met. The transportation regulations themselves are currently in development, and are expected to be issued soon.

This retrofit project, in addition to making the ride safer for all passengers including the most vulnerable, would allow customers to use both Winnipeg Transit Plus and conventional transit together to complete a trip. This approach is expected to provide more independence and flexibility for customers.

Includes four temporary capital funded full-time equivalent positions including one Project Manager/Coordinator, one Bus Exterior Repairer, one Mechanic Helper, and one Mechanic. In addition, all Transit Investing in Canada Infrastructure Program (ICIP) projects share two temporary positions, a Program Manager and a Financial Analyst.

TRANSIT - TRANSIT SYSTEM FUND

Wheelchair Securements Retro-fit (continued):

On January 29, 2025, Council authorized a first charge of up to \$4.125 million in 2025 or prior to the adoption of the 2026 capital budget.

On March 20, 2024, Council authorized a first charge of up to \$500,000 in 2024 or prior to the adoption of the 2025 capital budget.

Operating costs reflect incremental increase of 0.5 additional operating FTEs to maintain and service the new securements. This amount has not yet been reviewed by Council and is subject to change during future budget processes.

This project has been approved for funding under the Investing in Canada Infrastructure Program.

Future operating budget impacts, following project completion, may need to be adjusted.

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

The Shoal Lake Aqueduct (SLA), which has been in continuous service since 1919, delivers water to Winnipeg from Shoal Lake, a distance of 156 kilometers (97 miles).

Funds are for condition assessment and renewal work identified through on-going monitoring and inspection programs. Work identified to date includes renewal of the aqueduct pipe, berm, underdrain system, drainage siphons, select boathouses, overflow structures, bar screens, vent pipes, manholes, culverts, ditches, drainage siphons, and bridging structures as well as vegetation management.

Projects within the program will not proceed until a class 3 estimate is obtained.

The expected life of the assets is 40 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

The Shoal Lake Aqueduct, which has been in continuous service since 1919, is the sole water supply infrastructure for the City of Winnipeg. The Shoal Lake Intake Structure is the transition headworks to receive water from Shoal Lake and to control the water flow into the aqueduct. Given the critical nature of the intake structure to the safe operation of the aqueduct and the City's water supply, a condition assessment was undertaken and identified a number of rehabilitation and replacement requirements. This included the replacement and refurbishment of various mechanical components that date back to the original construction, the replacement of the maintenance/communication facility, as well as renewals to the existing infrastructure. The recommended improvements will be completed in phases on a risk-based priority.

Projects within the program will not proceed until a class 3 estimate is obtained.

The expected life of the assets is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The Branch I and II Aqueducts, along with the Branch Interconnection Aqueduct are specialized pipes which are unique in size, materials, construction techniques and failure modes. The Branch I Aqueduct was installed between 1914 to 1918 and the Branch II and Interconnection Aqueducts were installed between 1959 and 1963. All of these require specialized inspection, testing, and maintenance to preserve the asset.

Funds are for the condition assessment and renewal of the Branch Aqueducts, interconnection, and associated ancillaries.

Projects within the program will not proceed until a class 3 estimate is obtained.

The expected life of the assets is 40 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

A drinking water system infrastructure assessment is required under the Provincial Drinking Water Safety Act. The objective of the report is to carry out an onsite evaluation to identify, analyze, and mitigate any potential adverse health risks and environmental impacts associated with the water system in a "source to tap" methodology. This work will also determine whether the water system's source, facilities, equipment, and operations are effective in producing safe drinking water, and meet current regulations.

Infrastructure assessment reports are required on a five-year reporting frequency.

WATER AND WASTE - WATERWORKS SYSTEM FUND

Class Estimate: 5

Strategic Priority Action Plan Theme: None

The Deacon Reservoir is used to supplement the City's water supply when the daily demand exceeds the capacity of the Shoal Lake Aqueduct and to provide water during Shoal Lake Aqueduct shutdowns. A topographic survey of the top of the reservoir dikes found some top of dike elevations that were substantially lower than design elevations. Geotechnical testing was completed and found that the dike fill remains well compacted and consolidation of the soils below the dikes is ongoing but is slowing over time. Based on existing water demands and the operational strategy of the reservoir, consolidation will continue to be monitored through dike surveys and any dike raises will be deferred until water demands increase.

Preliminary design work will provide a class 3 estimate prior to construction.

The expected life of this asset is 50 years.

WATER AND WASTE - WATERWORKS SYSTEM FUND

Project Name: **Discharge Meter Renewals at the In-town Pumping Stations (formerly Discharge Meter Upgrades at the In-town Pumping Stations)**

Standing Policy Committee: Water, Waste and Environment

Strategic Priority Action Plan Theme: None

The in-town pumping stations supply 100% of the City's daily water use. Accurate flow measurement of water leaving the pumping stations is critical to the operation of the water distribution system. Due to age and lack of hardware support, the accuracy of the existing meters is not within an acceptable range.

Funds will replace the meters and provide a means of secondary measurement.

The expected life of this asset is 25 years.

WATER AND WASTE - WATERWORKS SYSTEM FUND

The McPhillips, Hurst, and MacLean Regional Pumping Stations and the Deacon and Tache Booster Pumping Stations are used to distribute potable water throughout Winnipeg. Power quality benchmark testing has found that the electric motors used to distribute potable water from the McPhillips Regional Pumping Station are causing an unacceptable temporary voltage drop upon motor start-up. Preliminary design will be undertaken to determine the options available to limit voltage drop and may identify power quality requirements at other water pumping stations.

A pump asset condition assessment will also be undertaken to identify renewal requirements at the water pumping stations. A renewal prioritization schedule will be developed.

The estimated life of these assets are from 40 to 60 years.

The Winnipeg Drinking Water Treatment Plant provides treated drinking water to the City of Winnipeg. The continued upkeep and maintenance of the Water Treatment Plant's assets is required to ensure a continuous supply of water. An asset refurbishment and replacement plan has been developed to address asset lifecycle issues at the Water Treatment Plant as they arise.

Condition assessment of the Water Treatment Plant assets is ongoing and the asset refurbishment and replacement program will address items as they are identified and prioritized.

Projects within the program will not proceed until a class 3 estimate is obtained.

The estimated life of a rehabilitated asset ranges from 20 to 80 years, depending on asset type, condition, and the rehabilitation method used.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

Maintaining the condition and performance of electrical equipment is vital to the safe and continuous supply, treatment, and distribution of drinking water for the City of Winnipeg. Electrical inspections will be undertaken in a phased approach at the City's various water facilities to test and assess the condition and performance of critical electrical equipment. Renewals are required to maintain reliable operation.

Power quality monitoring at the Winnipeg Drinking Water Treatment Plant (WTP) has also identified the need for a comprehensive grounding study for the facility and items that could lead to equipment issues. An investigation and recommendations for mitigation strategies will be undertaken.

Projects within the program will not proceed until a class 3 estimate is obtained.

The expected life of the assets is 40 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The City's Regional Water Distribution System consists of three regional pumping stations (MacLean, McPhillips, and Hurst) and two booster pumping stations (Deacon Booster Pumping Station (DBPS) and Tache Booster Pumping Station). These pumping stations are critical infrastructure for the City and failure of any of the systems at these facilities has the potential to disrupt the City's residential, commercial, industrial, and fire protection water supplies. Renewals are required to ensure reliable operation.

Projects within the program will not proceed until a class 3 estimate is obtained.

The estimated life of the assets is 20 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The Tache Booster Pumping Station, on the Branch 1 Aqueduct, was constructed in 1950 in order to develop the full capacity of the aqueduct. A study in 2017 identified a number of required upgrades to the pumping station and the aqueduct surge tower adjacent to the station. The work includes upgrading the station's electrical, heating and ventilation systems, upgrading the foundation and roof structures, and upgrading and reconfiguring the valve and piping system between the pumping station and the surge tower. Also, aesthetic, security fencing, and landscaping upgrades to the site and facilities will be undertaken to integrate with the proposed residential redevelopment of the surrounding area.

The expected life of the structural upgrades are 50 years and the expected life of the electrical and mechanical components are 25 years.

Process wastewater from the Winnipeg Drinking Water Treatment Plant (WTP) is conveyed through a single force main from the WTP to the wastewater interceptor at Dugald Road. This force main has been identified as a single point of failure and is critical to the operation of the WTP. A full or partial blockage of the force main could impact the WTP's ability to produce drinking water for the City.

This project includes preliminary design, detailed design, contract administration, and construction to maintain the reliable operation of the WTP force main.

The expected life of the assets is 40 years.

Strategic Priority Action Plan Theme: None

Project name / description (in priority order)	Service	2025 Class Est	2025	2026	2027	2028	2029	2030	Total
High risk river crossing condition assessment	Water	3	1,400						1,400
Goulet-Doucet feeder main renewal	Water	3	650						650
Riverbank stabilization	Water	3	750						750
Valve and chamber renewals	Water	3	194	384	274		211	217	1,280
Condition assessment	Water	3	700	250		250		250	1,450
Total			3,694	634	274	250	211	467	5,530

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

Projects within the program will not proceed until a class 3 estimate is obtained.

Feeder mains are specialized large diameter pipes used to convey drinking water throughout the City. The majority of feeder mains were installed in the 1960s and require inspection, testing, and maintenance to preserve the asset. Funds are for condition assessment and rehabilitation work, including structural assessments, inspections, purchase of testing equipment, replacement of valves and related components, structural repairs, valve chamber rehabilitation, and restoration works.

Condition assessments of the feeder mains are ongoing and the feeder main condition assessment and rehabilitation program will address items as they are identified and prioritized.

The estimated life of a rehabilitated asset ranges from 20 to 80 years, depending on asset type, condition, and the rehabilitation method used.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Strategic Priority Action Plan Theme: None

The majority of the City's inventory of water meters are at end of life. This project is to replace existing water meters and transition to an advanced metering system to transmit water consumption data through remote meter reading. The new metering system will enable operational efficiencies and provide enhancements to customer service.

Funding in previous years was used to review current water meter operations and validate the best current replacement technology.

This project may include a maximum of 19 temporary capital funded full-time equivalent.

The estimated life of a water meter is 15 years.

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

This is a continuing program to renew deteriorating water main infrastructure. Funding is used for water main renewal, cathodic protection, valve and hydrant renewal, water system studies, assessments and replacement of problem water services within the City right-of-way, and hydraulic improvements for fire protection purposes. Funding is also used for integrated right-of-way renewal programs coordinated with the Public Works Department.

Funds will also be utilized to manage the water infrastructure asset register, and ongoing operating costs associated with software licensing and maintenance have been included in the operating budget.

Projects within the program will not proceed until a class 3 estimate is obtained.

The expected remaining life of each rehabilitated water main ranges from 20 to 80 years, depending on the rehabilitation technology and the asset condition.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

** N/A - as this is a rolling program.

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

The Water and Waste Department's three sewage treatment plants use a Distributed Control System (DCS) with a Human Machine Interface (HMI) for process control. A network of specialized computers monitors thousands of sensors throughout the plants and controls the treatment processes by making calculations and adjustments prescribed by operators and process control analysts.

An Automation Master Plan was developed for the sewage treatment plants in 2012. The DCS system will be replaced with a Programmable Logic Controller (PLC) based system and a new HMI system will be installed at all three treatment plants. The replacement of the DCS and HMI systems at the North End and South End Sewage Treatment Plants are part of the major capital upgrade projects at these facilities.

This program will develop a plan to ensure operational reliability throughout the upgrades and in the long term once the upgrades are complete. The major components of this program include: maintaining the DCS and HMI systems until replacement, upgrading the inter-plant communication systems and network security components, and replacement of the West End Sewage Treatment Plant DCS and HMI systems.

The class estimate will be refined to a class 3 prior to undertaking upgrades.

The expected life of the assets is 10 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Detailed Design & Construction	4,220	17,351				

This project is for construction of improved screening and grit removal systems at the West End Sewage Treatment Plant (WEWPCC).

Estimate will be refined to Class 3 through preliminary design. Project will not proceed until a class 3 estimate is obtained.

Primary sludge from the WEWPCC and South End Sewage Treatment Plant (SEWPCC) is hauled to the North End Sewage Treatment Plant (NEWPCC) for treatment and biosolids production. The new NEWPCC biosolids facility requires an upgrade at the WEWPCC for degritting the primary sludge prior to hauling as grit causes equipment damage.

This project was originally included in the Asset Refurbishment and Replacement Program (ARRP). Previously approved budget from the ARRP will be used for the Preliminary Design phase of this project in 2024.

WATER AND WASTE - SEWAGE DISPOSAL SYSTEM FUND

Asset Refurbishment and Replacement Program (continued):

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

A risk and criticality review of the City's three sewage treatment plants has been undertaken to assess the condition of assets and to develop a refurbishment and replacement plan for the next 25 years. The improvements identified will address process reliability, mechanical, electrical, structural components, building envelope, and safety at all three locations including any related works required such as environmental studies/assessments or decommissioning of assets. Operational efficiency improvements will also be identified and implemented in a coordinated fashion with the enhanced maintenance program.

Asset assessment and plan development are ongoing, which will continue to address items as identified. Class estimates for individual projects within this program will be revised to class 3 through preliminary engineering prior to construction.

The expected life of the structural components are 50 years and the expected life of the electrical and mechanical components are 25 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The West End Sewage Treatment Plant (WEWPCC) ponds provide solar ultraviolet disinfection required for Environmental Act Licence compliance. Abundant migratory birds can contribute fecal contamination resulting in licence violations.

Birds prefer the smaller cells for nesting. Revegetating the banks of the small ponds will discourage long-term settlement and minimize wildlife impacts on water quality.

Strategic Priority Action Plan Theme: None

A facilities plan for the South End Sewage Treatment Plant (SEWPCC) will review and describe existing processes and provide recommendations for future work to meet requirements of its Environment Act Licence and plan for future development in the catchment. Future work may include asset renewal, expansion for growth and future capacity, and modifications to the existing plant.

Recommendations will include Class 5 cost estimates.

Developing a facility plan that accommodates future growth will protect water quality and reduce the risk of licence violations.

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

As part of the Canadian Standards Association Occupational Health and Safety Program, a standard entitled CSA Z462, Workplace Electrical Safety Standard has been adopted within the new Canadian Electrical Code.

The program will implement the recommendations from the Arc Flash Study on a priority/risk basis in conjunction with other electrical upgrades at the Department's facilities. This work includes decreasing the potential arc flash energy at various distribution points, upgrading equipment to lower fault energies, procuring personal protective equipment, and providing training. This is for compliance to the arc flash requirements in the electrical code. The Arc Flash Study was initially completed in 2011 and must be updated every five years.

Projects within the program will not proceed until a class 3 estimate is obtained.

The expected life of the assets is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

WATER AND WASTE - SEWAGE DISPOSAL SYSTEM FUND

Lift Station Renewals (continued):

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

This is a program for mitigating hydraulic, structural, safety, odour and aesthetic problems, as well as for undertaking capacity assessments, for the 75 lift stations and associated force mains, gate chambers, and related works in the sewage collection system.

Projects within the program will not proceed until a class 3 estimate is obtained.

The estimated life of the assets is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

WATER AND WASTE - SEWAGE DISPOSAL SYSTEM FUND

Combined Sewer Overflow and Basement Flood Management Strategy (continued):

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

The Combined Sewer Overflow (CSO) and Basement Flood Management Strategy projects will be driven by the CSO Master Plan, which was approved by the Province of Manitoba on November 13, 2019, developed to meet the requirements of Environment Act Licence No. 3042. The objectives of this multi-year program are to comply with the regulations to mitigate the impact of CSOs on the local water courses and improve basement flooding protection.

Funds budgeted are for the development and implementation of a CSO Master Plan as well as for sewer relief works associated with basement flooding and CSO mitigation including sewers, chambers, weirs, and other related works. Funds are also budgeted for monitoring and reporting programs as well as systems, pilot studies, land acquisition, and integration with other major sewer programs. Funds are budgeted for opportunistic projects that fall under the Master Plans objectives that have been developed after 2019 Master Plan was finalized.

As part of the 2022 capital budget process, funding was adjusted to reflect the Council Notice of Motion on April 29, 2021, which increased the CSO program budget by 50% annually in 2024-2027 to expedite the work.

This program includes a maximum of 3 temporary capital funded full-time equivalents.

Projects within the program will not proceed until a class 3 estimate is obtained.

The expected life of the sewers is 50 years, mechanical components is 25 years and Supervisory Control and Data Acquisition (SCADA) system is 10 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Detailed Design & Construction		21,450	33,262	28,536		

On July 13, 2023, Council approved an advancement for Southwest Interceptor by increasing the budget from \$1 million to \$8 million in 2023 funded by 2023 Provincial infrastructure funding.

Currently, all sewage from the land in Winnipeg south of Abinojii Mikanah and west of the Red River, plus the communities of Lindenwoods and Whyte Ridge, flow to the South End Sewage Treatment Plant (SEWPCC). This flow crosses the Red River between the Fort Garry bridges; at this location the D'Arcy lift station raises the sewage to a sufficient height to allow it to flow by gravity under the Red River.

This crossing represents a single point of failure. If there is a failure of the lift station or the siphon, there is a substantial risk of basement flooding and/or overflows to the Red River. System redundancy is required to convey flows to the treatment plant in the event of a failure of either D'Arcy lift station or the associated siphons. Also, due to the high wet weather flows experienced at the D'Arcy lift station, the additional system capacity will reduce the risk of basement flooding and overflows to the river.

The Southwest Interceptor will provide an additional river crossing of the Red River. A conceptual study will be undertaken to review options and sizing. The project will be broken up into phases; the total cost of the project is estimated at \$92.598 million.

Operating costs are for additional operation and maintenance activities after the station goes in to service. These amounts have not been reviewed by Council and are subject to change during future budget processes.

The major benefits of constructing this project include enabling growth in southwest Winnipeg and maintaining essential level of service.

Significant risks associated with constructing this project include unknown ground conditions and construction of a river crossing.

Significant risks of not constructing the project or deferring the project include inability to accommodate future growth and inability to maintain essential level of service.

The expected life of this asset is 75 years.

Vacuum trucks are specifically designed trucks that periodically assist in cleaning underground sewers and catch basins. These vehicles then transport the solids/trash/debris material that has built up in sewers to Brady Road Resource Management Facility for disposal. In order to meet the liquid waste definition from the licence for Brady Road Resource Management Facility, Licence No 3081 R, the vacuum truck materials must meet specific criteria for disposal. This project includes a feasibility study (2023), interim solution (2024), and design and construction of a dedicated facility (2028) to dewater material from vacuum trucks prior to disposal.

This project will result in operation and maintenance costs that have yet to be defined through preliminary design. These amounts have not been reviewed by Council and are subject to change during future budget processes.

The estimated life of this asset will be determined during the feasibility study.

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

This is a program to replace and/or rehabilitate combined, wastewater, and land drainage sewer infrastructure that are no longer meeting level of service objectives. A portion of the funding will be used for condition assessment of sewer assets; sewers will be replaced or rehabilitated using appropriate technologies on a risk-based level of service basis. Funds will also be utilized to update the sewer asset register, and ongoing operating costs associated with software licensing and maintenance have been included in the operating budget.

Funding will also be utilized for the assessment, repair and/or replacement, under certain conditions, of private wastewater sewer services within the public right-of-way under the Sewer By-Law, and for the development of wastewater and land drainage design standards.

Projects within the program will not proceed until a class 3 estimate is obtained.

The expected remaining life of each rehabilitated sewer ranges from 20 to 100 years, depending on the rehabilitation technology and the asset condition. The expected life of the asset register is 10 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

** N/A as this is a rolling program.

The Northwest Interceptor system conveys sewage from homes, businesses, and institutions in the growing northwest quadrant of Winnipeg to the North End Sewage Treatment Plant (NEWPCC) for treatment. This sewer system also receives wastewater from the RM of Rosser, and will receive wastewater from the CentrePort South development site. Planning for future growth in this interceptor system is necessary to identify capacity requirements based on expected development.

This study will assess the capacity of the regional interceptor system and determine where future upgrades may be required based on future growth projections.

Additional funds may be required in future years to implement recommendations of this study.

The expected life of this asset is 75 years.

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

This program is for the condition assessment, renewal of the sewer river crossings, and for the installation of leak detection equipment on the existing waterway crossings.

The department has completed a risk assessment of all river crossings in order to determine a prioritization plan for ongoing condition assessment as well as to upgrade and replace any at-risk crossings as required by Environment Licences issued by the Province of Manitoba for the wastewater collection system in the City of Winnipeg.

Incremental funding of \$10 million from the Government of Manitoba announced March 6, 2024 was added to the capital budget in 2024, for the design and construction of the permanent river crossing replacement of the Red River near the Fort Garry Bridge. Total project cost is estimated at \$27.412 million.

*N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

Solid waste must be disposed of in engineered landfill cells under the conditions of the Environment Act Licence No. 3081 R. As the capacity of existing landfill cells is consumed, new cells and their supporting infrastructure must be designed and constructed. The funding identified provides for design, excavation, liners, leachate collection, associated surface and ground water management, access roads, and associated engineering work.

Operating costs are for roadway maintenance, snow clearing and ditch maintenance. These amounts have not been reviewed by Council and are subject to change during future budget processes.

Soil fabrication for Summit Landfill regulatory cover	Solid Waste Disposal	3	1,400	750	110				2,260
Total			1,400	750	110	-	-	-	2,260

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

This program is for all-season soil fabrication to comply with the Province's regulatory requirement to place a vegetative layer for landfill post-closure. The soil fabrication process uses residuals from City services; such as biosolids from wastewater treatment, street sweepings from winter road operations (sand and grit), and wood waste. This program also aligns with the Biosolids Master Plan, Winnipeg Comprehensive Urban Forest Strategy (adopted by Council December 2023), Brady Road Master Plan, Winnipeg Climate Action Plan, Closed Landfills Disposition Study, and Leachate Treatment Study.

Fabricating soil is a lower-cost alternative to purchasing top soil and uses materials that would otherwise be landfilled. The fabricated soil is spread and seeded at the City landfills to establish the required vegetative layer. Operations include ongoing environmental and vegetative monitoring.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

WATER AND WASTE - SOLID WASTE DISPOSAL FUND

Project Name: **Brady Road Resource Management Facility - Landfill Gas Capture Expansion**

Strategic Priority Action Plan Theme: None

There is an obligation under the Province of Manitoba Environment Act Licence No. 3081 R for the Brady Road Resource Management Facility (BRRMF) to control odours leaving the landfill site. If the gas is not collected, objectionable odours may be experienced by the nearby neighbourhoods from the active filling area. Additionally, flammable gases will be released uncontrolled from the decomposing waste which may pose public health and safety risks. The Climate Change and Emissions Reductions Act requires the City to collect and destroy methane gas generated by the BRRMF, consistent with Provincial directives on greenhouse gas reduction and odour control.

Operating costs starting in 2028 are for additional operation and maintenance activities after expansion. These amounts have not been reviewed by Council and are subject to change during future budget processes.

The estimated life of the assets is 50 years.

WATER AND WASTE - SOLID WASTE DISPOSAL FUND

Strategic Priority Action Plan Theme: A Green and Growing City with Sustainable Renewal of Infrastructure

SPAP Action Item: 4.8 Develop and implement a city-wide residential food waste collection (green cart) and processing program

On October 26, 2023, Council approved a project and authorized \$500,000 for professional consulting services to assist in the development of an organics (primarily residential food waste) processing services program (Green Cart Program). Additional budget totalling \$20.372 million is required for a Project Manager, consulting services, and cart procurement to implement the Green Cart Program. Consulting services will include technical engineering advice, oversight and quality assurance to help ensure that the design, construction and operation of the organics processing facility is in full compliance with project scope documents, operating protocols, contract terms, good construction and operating practices, and applicable environmental and regulatory compliance, construction and safety practices.

This project includes a maximum of one temporary capital funded full-time equivalent.

Operating costs starting in 2028 are for salaries, benefits, collection contract, and replacement carts/parts. These amounts have not been reviewed by Council and are subject to change during future budget processes.

WATER AND WASTE - LAND DRAINAGE UTILITY FUND

Flood Pumping Station Renewals (continued):

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

A 2007 report on the adequacy and operation of the City's regional flood pumping stations (FPS) identified station renewals required in the near and long term. These renewals improve overall station reliability during high river levels and rainfall events and may include changes to ventilation, electrical, mechanical, structural, or architectural components of the stations. A program to address high priority reliability items has been developed for implementation. All station renewals will include implementation of remote monitoring which is critical during flood and rainfall events.

The program includes the condition assessment of all flood pumping stations to establish rehabilitation priority and future funding requirements.

Projects within the program will not proceed until a class 3 estimate is obtained.

The expected life of the assets is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

SRB Renewals	Land Drainage and Flood Control				600			600	1,200
Total			-	-	600	-	-	600	1,200

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

The City maintains over 100 stormwater retention basins (SRBs) with the land drainage system. This program renews aging and deteriorated infrastructure along the public shorelines and infrastructure associated with the SRBs.

Projects within the program will not proceed until a class 3 estimate is obtained.

Projects within the program include: 6-11 Revetment (St. Norbert - Seine River: Dalhousie Dr at Pembina Hwy, south pond), 6-16 Revetment (Waverley West: Point West Dr at Bairdmore Blvd), and 6-25 Revetment (Linden Ridge: south side of Falcon Ridge Dr).

The estimated life of the assets range from 15 to 50 years, depending on asset type, condition, and rehabilitation method used.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Total			3,000	3,200	2,000	2,000	3,000	3,000	16,200

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

An Outfall Condition Assessment was completed in 2019. This assessment prioritizes Winnipeg's outfall sites that require renewal, identifies potential renewal techniques for each outfall, and provides high level cost estimates for this work. The City will program and undertake risk-based work on a yearly basis to maximize use of funding for the renewal of sewer outfalls, repairs to piping and related appurtenances, and to improve riverbank stability issues. Funds are also included for condition assessments and re-inspections, as required.

Projects within the program will not proceed until a class 3 estimate is obtained.

The expected life of the assets is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

** N/A - as this is a rolling program.

Cornish gate chamber renewal	Land Drainage and Flood Control	3	213	2,977					3,190
Total			2,889	2,977	-	-	-	-	5,866

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

All land drainage gate chambers have been upgraded to a protection level of 24.5 feet James Avenue. The current focus of this program is to renew existing gate chambers to maintain levels of service for flood control on both combined and separated sewer districts. Under high river level (flood) conditions, the river water backs up into the land drainage and combined sewer systems.

Funds are also provisioned for the renewal of sewer flap gates and associated structures to ensure that all systems are adequately protected from river water intrusion.

Projects within the program will not proceed until a class 3 estimate is obtained.

The expected life of the assets is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The provision for development agreement paybacks is an allowance for the City to repay developers who bridge finance the installation of oversized underground infrastructure at the request of the City at a time when City capital funding is not provided. The policy framework for bridge financing the oversized services was defined in the Development Agreement Parameters, adopted by Council on July 17, 2002.

The expected life of the installed assets is over 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this commitment's on-going nature.

Strategic Priority Action Plan Theme: None

Real-time water level monitoring at storm retention basins is required to ensure ongoing operation of the systems and for flood protection activities. The previous monitoring contract has ended and monitoring will now be done in-house. This project will install permanent power supply needed for continuous water level monitoring at strategic locations.

The expected life of the installed assets is 15 years.

WINNIPEG FLEET MANAGEMENT AGENCY - FLEET MANAGEMENT AGENCY FUND

The Winnipeg Fleet Management Agency (WFMA) offers three types of fuel at below market prices - unleaded gasoline, clear diesel and marked diesel available at five fully automated 24/7 locations strategically located throughout the city. Fuel is managed using a charge-back system based on fuel consumption for each individual fleet vehicle. This program funds capital improvement expenditures to infrastructure at WFMA fuel sites.

Strategic Priority Action Plan Theme: None

The Millennium Library Parkade requires capital repairs to be undertaken between 2025-2027 that, if left unattended, could cause an unplanned closure of the parkade. The primary elements being repaired are structural work on the P1 slab to address concrete deterioration, replacing lighting system controls that are obsolete and replacing the air handler unit that is past its useful life. The repairs are staggered over three years to allow for continued use of the parkade.

MBEA: Municipal By-law Enforcement Act

Basis of Budgeting

Service-Based Budget

The City reports budget information on a service-based basis (how much the service will cost and how the service is to be funded), regardless of which area or department delivers the service. The service-based budget is intended to provide more transparent reporting and a more direct link between budgets provided and the services delivered. As part of the budget document a more traditional, by department view is also provided (see Appendix 1 of the 2025 Budget and the Supplement to the 2025 Budget).

Balanced Operating Budget

The City of Winnipeg Charter requires that the City adopt a balanced operating budget for the current year (estimated expenditures for a fiscal year do not exceed the estimated revenues for the year). Council policy provides that year-end surplus be transferred to the Financial Stabilization Reserve. Any operating deficits arising in-year must be addressed in the next year's budget.

As per the [Multi-Year Budget Policy](#), the 2024 to 2027 tax supported operating budget were balanced in all four years.

Consolidation

The annual operating budget adopted by Council provides the spending authorization for each fund, and therefore the current year budget is adopted on a non-consolidated basis. That is, inter-fund transactions have not been eliminated in order to ensure full spending authority is provided. However, each year in the budget document, a consolidated budget is prepared for the current year which eliminates inter-fund transactions. This consolidated budget is then available each year-end to allow comparison and variance reporting to the annual financial statements, also prepared on a consolidated basis (see Appendix 7 of the 2025 Budget).

Expense and Revenue Recognition

The City of Winnipeg develops its operating budget for tax supported and utility operations on a modified accrual basis. The modified accrual basis of accounting records revenue when it is earned, measurable and available. Expenditures are recognized when the liability is incurred, except for certain expenses, for example, those associated with retirement allowances, accrued vacation, worker's compensation, compensated absences, and landfill liabilities which are budgeted on a cash basis. Debt servicing payments are budgeted for when due (depreciation of assets is not budgeted except for SOAs). Revenue from land sales is recorded in accordance with accounting principles used within the real estate industry. Other sources of revenue budgeted are based on previous year's actuals while also considering inflation.

The City uses the full accrual basis of accounting. Revenue is recorded as it is earned and measurable. Expenses are recognized as they are incurred and measurable based on receipt of goods and/or the legal obligation to pay. The City's financial statements are developed in accordance with generally accepted accounting principles for local governments, as recommended by Public Sector Accounting Board (PSAB).

Revenue

The City's sources of income are noted on page 361. Fees and charges revenue is increasing by 5% in 2025 and 2.5% in each of 2026 and 2027, primarily to account for previous years' high inflationary impacts.

Property taxes revenue, which accounts for 34% of City revenue, is increasing by 5.95% in 2025 and 3.5% thereafter. Other governmental revenue is budgeted based on existing agreements or commitments.

Appendix A

Fees and Charges

A Fees and Charges Schedule is published annually in accordance with the Fees and Charges By-Law (196/2008) to identify the current fees and charges administered by the City of Winnipeg and the authority under which they are administered. The Chief Financial Officer is authorized to increase annually any fee imposed by the City by an amount equal to or less than the rate of inflation. New fees or fee increases greater than inflation must be approved by Council unless specifically otherwise delegated. New fees or fee increases greater than inflation are included as part of the annual budget process.

Salaries and Benefits

Of the total City's services expenditures, about half are made up of salaries and benefits. The City negotiates with bargaining units to establish the rates used to compensate City staff. Depending on the bargaining unit the position is associated with, rates used in the budget consist of either the rates in the settled collective agreements or an estimated rate for positions in a bargaining unit.

Debt and Debt Payments

The City may only incur debt for the purposes of capital expenditures. With the approval of the Provincial Minister of Finance, a borrowing by-law is passed by Council which authorizes borrowing for the capital budget.

Annual payments of principal and interest are budgeted in the City's operating budget as debt and finance charges.

Reserves

Reserves are established by Council, as required for future financial commitments and are operated under the regulations and policies prescribed by provincial legislation or City by-laws as applicable. Budgets are prepared for reserve expenditures and revenues, and transfers to and from reserves are included in the tax-supported, utility, and capital budgets.

Capital Assets

Capital assets are generally defined as those with a cost exceeding \$100,000 (non-recurring capital projects and recurring/ongoing capital programs) with a minimum 10-year life. These assets are budgeted for in the capital budget and the financing costs are expensed in the operating budgets. Major equipment or automated systems development projects are also included in the capital budget although their useful life may be less than 10 years. Land acquisition and local improvements are considered capital works regardless of expected cost. Smaller asset purchases are expensed in the operating budgets.

Further information on developing the capital budget is disclosed in the "Budget Context and Overview" section of the 2025 Budget.

Capital Leases

Leases are classified as capital or operating leases. Leases which transfer substantially all of the benefits and risks incidental to ownership of property are accounted for as capital leases. All other leases are accounted for as operating leases and the related lease payments are charged to expense as incurred.

Major Capital Projects

On October 28, 2015 Council concurred in the recommendation of the Executive Policy Committee and adopted the following:

- That an adjustment to the dollar value for the definition of a Major Capital Project for reporting to the Standing Policy Committee on Finance be approved from \$10 million to \$20 million to reflect construction inflation since Council originally adopted the policy in 1999.
- That the threshold for Major Capital Project reporting to the Standing Policy Committee on Finance be automatically revised annually for construction inflation and disclosed in the Annual Capital Budget put forward to Council for adoption.
- That the adjusted dollar value for reporting to Standing Policy Committee on Finance be applied on a prospective basis. Projects currently reporting that are under the revised threshold will continue reporting until the project is completed.

On March 22, 2023 Council concurred in the recommendation of the Public Service and adopted that the threshold for Major Capital Projects be maintained at \$25 million for the 2023 Budget and as an ongoing process direct the Public Service to provide for Council consideration, at the start of each new multi-year budget cycle, a revised threshold, if required, to be utilized for that entire multi-year budget cycle. Projects currently reporting that are under the threshold will continue reporting until the project is completed.

On March 20, 2024 Council concurred in the recommendation of the Public Service and adopted that the threshold for Major Capital Projects be maintained at \$25 million for the 2024-2027 multi-year budget cycle.

Projects \$25 million or greater are required to form a Major Capital Projects Advisory Committee within 180 calendar days of project authorization and begin reporting financial status to the Standing Policy Committee on Finance and Economic Development (SPC FED). Reporting is to be done on a quarterly basis, unless otherwise directed by SPC FED, until the project is complete. The SPC FED may, at its discretion, request projects below this threshold to report to the Committee.

Listing of Major Capital Projects previously approved and active for 2025:

- 1) North End Sewage Treatment Plant (NEWPCC) Upgrade Projects: Power Supply and Headworks Facilities
- 2) South End Sewage Treatment Plant (SEWPCC) Upgrading and Expansion
- 3) Water Supervisory Control and Data Acquisition (SCADA) Upgrade and Expansion
- 4) South Winnipeg Recreation Campus Phase One – Recreation Centre
- 5) St. Vital Bridge Rehabilitation
- 6) Transition to Zero Emission Buses (now called Transit Buses)
- 7) Transit North Garage Replacement
- 8) North End Sewage Treatment Plant (NEWPCC) Upgrade Projects: Biosolids Facilities
- 9) CentrePort South Regional Water and Wastewater Servicing – Phase 1A
- 10) Water Meter Renewals
- 11) Pembina Highway Overpass (Abinojii Mikanah) Rehabilitation
- 12) Ferry Road and Riverbend Combined Sewer Relief Works: Rutland Trunk Sewer
- 13) Armstrong Combined Sewer Relief

City of Winnipeg Cost Estimate Classification*

Cost Estimate Class	Project Definition	Project Definition/ Design % Complete	Accuracy of Cost Estimate
Class 5	Concept Screening, Rough Order of Magnitude Estimate	~1%	-50% to +100%
Class 4	Feasibility	~10%	-30% to +50%
Class 3	Preliminary Design (for Budget Authorization)	~30%	-20% to +30%
Class 2	Detailed Design in progress	~60%	-15% to +20%
Class 1	Detailed Design Documentation Complete, Pre-Tender Estimate	~99%	-10% to +15%

Class of Estimate Descriptions

- Class 5 Rough estimate prepared based on very limited information. Used to make an assessment of initial viability and for long range capital planning.
- Class 4 Estimates prepared based on limited information with some engineering work completed and preliminary scope determination.
- Class 3 Estimates based on completed preliminary design documentation. This Class 3 estimate will form the basis for budget authorization and set initial control estimate against which project deliverables will be measured (i.e. on budget).**
- Class 2 Estimates prepared in progressive detail from a Class 3 and are used to establish a contract value against which decisions can be made to revise the scope of the project and manage risk at a specific milestone in the design development.
- Class 1 Pre-tender estimates prepared based on completed detailed design documentation (i.e. drawings, plans, specifications, etc.) as well as complete project delivery plans.

* Determined using AACE International, Recommended Practices 17R-97, 18R-97, 56R-08, 97R-18 & 98R-18

Payments as a Percentage of Cash to Capital and Canada Community-Building Fund	44.12%	32.23%	40.89%	40.27%	25.32%	26.50%	26.75%

Notes:

- Public Private Partnership (P3) payments include annual service/financing payments and debt servicing payments.
- On December 15, 2009, Council directed that the annual lease/service payments and debt servicing costs for tax supported public private partnerships be funded annually up to a maximum of 30% of the cash to capital contribution and the Canada Community-Building Fund.
- On December 16, 2020, Council amended the P3 Policy to: If the funding of annual lease/service payments and debt servicing costs for tax supported public private partnerships exceeds 30% of cash to capital contribution and Canada Community-Building Fund, no additional tax supported public private partnerships can be entered into until funding of annual lease/service payments and debt servicing costs for tax supported public private partnerships is reduced to a level below 30% of cash to capital contribution and Canada Community-Building Fund.
- The "Southwest Rapid Transitway (Stage 2) and Pembina Highway Underpass" capital project was approved by Council on June 25, 2014. As this is a utility project, it does not impact this Public Private Partnership payments calculation.

2024 Adopted	2024 Amended ⁴	2025 Adopted	2025 Amended ^{4,5}	2026 Forecast	2027 Forecast
-----------------	------------------------------	-----------------	--------------------------------	------------------	------------------

1. The above listing identifies the funding in the 2024 budget, the 2025 adopted budget, and the 2026 - 2027 forecast. The table below provides a summary by funding sources included in the budget. There are no funding amounts included for 2028 to 2030.

Funding Sources (in thousands \$):

	2024 Adopted	2024 Amended	2025 Adopted	2025 Amended	2026 Forecast	2027 Forecast
Investing in Canada Infrastructure Program	37,869	14,656	19,488	19,488	40,932	-
Strategic Infrastructure Funding	36,100	63,244	43,612	43,612	18,168	93,900
Incremental Government of Manitoba Funding	10,000	10,000	6,000	6,000		
	83,969	87,900	69,100	69,100	59,100	93,900

2. On May 22, 2024, the Executive Policy Committee referred the \$4 million annual increase in Strategic Infrastructure Basket (SIB) funding to the 2025 budget process. The Provincial Strategic Infrastructure basket funding is projected at \$93.9 million per year starting in 2024 (previous annual amount \$89.9 million) - see table below.

Projects (in thousands \$):

	2024 Adopted	2024 Amended	2025 Adopted	2025 Amended	2026 Forecast	2027 Forecast
Balance as per table above	83,969	87,900	69,100	69,100	59,100	93,900

Projected Provincial Strategic Infrastructure basket funding	89,900	93,900	93,900	93,900	93,900	93,900
Variance due to rounding or timing in the budget	69	-	(500)	(500)	500	-

3. On September 26, 2024, Council approved grants totalling \$16.1 million to True North Real Estate Development Ltd. to support redevelopment of public space at Portage Place Mall. \$6.5 million of this grant is funded by Province of Manitoba Strategic Infrastructure funding (\$4 million from 2024 and \$2.5 million from the 2025 allocation).

4. On February 18, 2025, EPC amended the 2024 capital funding based on the 2024/25 SIB allocation approval received from the Minister of Municipal and Northern Relations. This impacted 2025 allocation and the implications are reflected in the 2025 Amended Budget. The Chief Financial Officer has delegated authority to change the funding sources for approved capital projects provided there is no impact to the total project cost or City Capital Budget.

5. Amended based on cashflow adjustments and previously allocated funding from the 2023 Strategic Infrastructure Basket (SIB). Proposing to defer South End Water Treatment Plant to end of 2025 for \$1.1 million offset by advancing funds to Transit Buses. Offsetting adjustment for both projects are reflected in 2025 amended SIB.

6. Other than the Safety Shield Extensions, funding for Transit supports projects applied for through the tri-patriate Investing in Canada Infrastructure Program. Funding for projects in this program are shared by the City of Winnipeg, the Province of Manitoba and the Federal Government.

7. Shared Health Capital Grant information is not included.

Waterway Access Improvement Program	100	100	100	150	155	159	764
Primary Transit Network Infrastructure		2,615					2,615
TOTAL	\$ 8,301	\$ 14,796	\$ 14,864	\$ 20,950	\$ 16,562	\$ 17,058	\$ 92,531

Notes:

1. On May 14, 2008, Council concurred in the recommendation that a policy be adopted to incorporate Active Transportation (AT) facilities into any reconstruction or rehabilitation required on any infrastructure identified as an AT facility in the proposed active transportation network.

2. The six-year AT investments in the 2025 adopted capital budget and 2026 - 2030 forecast total **\$92.5 million, an increase of \$11.1 million over** the 2024 6-year total (\$81.4 million).

3. The amounts above identify the budget dollars dedicated to AT facilities within the 2025 adopted capital budget and five-year forecast. Funding for the AT work is included within the total funding for the projects/programs noted. There may be other AT projects that could not be estimated at time of printing.

4. Outside of sidewalks and recreational walkways & bike path renewals, additional active transportation related projects will be undertaken as part of regional and local street renewals within the Regional and Local Street Renewal Program. Further study is required prior to confirming cost estimates.

Summary of Principal and Interest Payments by Fund

(in \$000's)	2024		2025	
	<u>Principal</u>	<u>Interest</u>	<u>Principal</u>	<u>Interest</u>
Tax Supported				
Sinking Fund	7,245	20,871	8,327	23,677
Other terms	8,181	2,413	13,585	4,050
	<u>15,426</u>	<u>23,284</u>	<u>21,912</u>	<u>27,727</u>
Utilities and Special Operating Agencies				
Sinking Fund	13,844	24,499	16,150	25,209
Other terms	3,956	2,087	5,825	6,477
	<u>17,800</u>	<u>26,586</u>	<u>21,975</u>	<u>31,686</u>
Reserves				
Sinking Fund	1,680	3,762	1,680	3,762
Total	34,906	53,632	45,567	63,175

1) Sinking fund amounts represent the principal and interest due on 40-year and 30-year debt. Other term amounts are payments required on all other debt the City has incurred.

2) Principal and interest payments for Disraeli Bridge and Overpass Facility and Chief Peguis Trail - Henderson Highway to Lagimodiere Boulevard are charged to the capital fund and have not been included in this schedule.

3) Interest and principal amounts for internal financing are excluded from this schedule.

4) Additional debt related information such as outstanding borrowing authorizations, debt by fund, and significant policies are reported in the 2023 annual report. Refer to pages 66 to 68. Total City debt as at December 31, 2023, is around \$1.4 billion - see details below. The 2024 annual report is not yet available at the time of printing.

Service Based Budget Alignment to Strategic Plans

OurWinnipeg

OurWinnipeg 2045, adopted by Council on May 26, 2022, is Winnipeg's 25-year development plan and sets out:

- (a) the city's long-term plans and policies respecting
 - (i) its purposes,
 - (ii) its physical, social, environmental and economic objectives, and
 - (iii) sustainable land uses and development;
- (b) measures for implementing the plan; and
- (c) such other matters as the minister or council considers necessary or advisable

The vision for OurWinnipeg 2045 is to be a thriving, sustainable and resilient city, grounded in a strong commitment for human rights, that is welcoming and contributes to an equitable, and high quality of life for all. This table outlines which OurWinnipeg goals are aligned with service area goals.

Strategic Priorities Action Plan

During 2023, Council adopted a Strategic Priorities Action Plan which outlines key priorities and actions for the four-year Council term. Within the plan, Council identified 5 broad themes as strategically important. Under these 5 themes Council further identified 42 specific priority actions for focus and investment.

In addition to the 5 themes, some services have identified goals and budget priorities which are primarily focused on Corporate Support & Governance in supporting city operations as a whole rather than a specific theme. This table outlines which Strategic Priorities Action Plan themes service areas feel are advanced by currently identified goals and measures.

		Strategic Priorities Action Plan Themes					
		The Downtown	A Strong Economy	A Liveable Safe, Healthy, Happy City	A Green & Growing City with Sustainable Renewal of Infrastructure	A City that Works for Residents through Improved Customer Service	Corporate Support & Governance

Financial Management Plan Update

City Council adopted the Financial Management Plan (FMP) on March 20, 2020. The Plan sets forth the guidelines against which current and future financial performance will be measured, and provides a sustainable long-term approach for the City's fiscal strategy.

Periodic review and reporting on the (FMP) are done in accordance with *OurWinnipeg*. The following provides a progress report on the FMP goals, which are aligned to *OurWinnipeg* goals of Leadership & Good Governance, and Economic Prosperity. The measures reported against the financial management plan goals include the financial implications of the COVID-19 pandemic.

The following is a summary of the goals and results for 2020 to 2023 Financial Management Plan.

#	OurWinnipeg Goal	FMP Goal	2023 Status	2022 Status	2021 Status	2020 Status
1		Ensure a sustainable revenue structure Target: A revenue structure that keeps pace with inflation adjusted for growth	✓	✗ *	✗ *	✗ *
2		Support a sustainable and competitive tax environment Target: A stable and competitive taxation system	✓	✗	✓	✓
3		Support Economic Growth Target: Increase assessment base	✓	✓	✓	✓
4		Support long-term financial planning Target: Transition to multi-year balanced tax supported operating budgets	✓	✓	✓	✓
5		Build, maintain and enhance infrastructure Target: Continue to implement leading practices for asset management	✓	✓	✓	✓
6		Manage expenditures Target: Operating expenditure increases should not exceed inflation adjusted for population growth	✓	✓	✓	✓
7		Manage debt Target: That debt issuance and outstanding debt is in accordance with the debt management policy and debt strategy	✓	✓	✓	✓
8		Ensure adequate reserves and liquidity Target/Measure: Reserve balances maintained at Council approved levels	✗	✗	✓	✓

* Primarily due to financial impacts of the COVID-19 pandemic.

Leadership and Good Governance

Economic Prosperity

Appendix M

Goal #1: Ensure a sustainable revenue structure

Target: A revenue structure that keeps pace with inflation adjusted for growth
Measure: Increase in operating revenue should be, at a minimum, inflation adjusted for population growth.

Between 2022 and 2023, inflation adjusted for population growth, was 7.7%. Operating revenues for the City for this same period increased by 9.0% while total consolidated revenues increased by 16.3%.

During this period municipal taxes grew at a rate of 3.50% for increases for improvements to local and regional streets and bridges (2%), payments for Stage 2 of the Southwest Rapid Transitway (0.33%), and for operations (1.17%). Frontage levy rate increased by \$1.50 per foot.

Sales and service revenue, and regulatory fees increased mainly due to the majority of City operations returning to normal operating levels. Provincial transfers had also increased by almost 16%. Other revenue increased due to higher interest rates.

For more information on revenue variances refer to the City’s [2023 Annual Financial Report](#).

The 2024 to 2027 Multi-Year Budget includes new and above inflation fee increases such as 911 monthly levy of \$1 per phone line, accommodations tax increase of 1% in 2024, 4-year water and sewer rates, 10 cent transit fare increases, and other fees and charges increases. Fees and charges are projected to increase at rate of 5% in 2024 and 2025 and 2.5% in 2026 and 2027. The 2024 and 2025 fees and charges rate increases are consistent with the high inflationary increases in previous years, while smoothing out the impact to users over three years (2023-2025).

The City recognizes the need for new long-term growth revenue sources to be able to continue providing the level of services its citizens expect and to maintain a sustainable revenue structure to avoid future years’ operational deficits.

Goal #2: Support a sustainable and competitive tax environment

Target: A stable and competitive taxation system

Measure: Assessing that taxation levels adopted through multi-year budgets meet service requirements.

In 2024, the City approved a 4-year balanced multi-year operating budget and a 6-year balanced capital budget with tax increases of 3.50% dedicated to infrastructure and operational funding. The balancing of both the operating and capital budgets over four years indicates that taxation levels are sufficient to meet current operating service requirements. In 2023, an estimated amount equivalent to 1.17% property tax increase was allocated to the operating budget.

This chart shows the relationship between the percentage growth in property and business tax revenue compared to tax supported service costs. Based on tax increases and projected growth in the tax base, current taxation levels grew at an average of 3.4% from 2020 to 2023, in comparison to 3.8% for service costs for the same period.

2024 Typical Municipal Residential Property Tax Bill Across Canada

The City works with its partners, CentreVenture and Economic Development Winnipeg to encourage development in the City. As well, the table above illustrates that the City continues to have one of the lowest property taxes compared with other Municipalities.

The above data does not consider infrastructure. The 2024 Infrastructure Plan identifies an infrastructure deficit of ~\$8.0 billion for infrastructure needs over a 10-year period ending in 2033 (refer to goal #5). This deficit reflects additional service requirements in future years and the City will need to consider other funding sources for these projects in future years' budgets, if current taxation levels are to be maintained.

Goal #3: Support Economic Growth

Target: Increase assessment base

Measure: Growth in the assessment base.

Based on the data below, the City's property assessment base has been growing annually from 2012 to 2024. The 2024 assessment base has increased 1.19% from 2023.

Note: Property is reassessed every two years under provincial legislation. Manitoba's reassessment cycle changed to three years in 2023 only to allow real estate market trends impacted by COVID-19 pandemic to be more accurately reflected in property assessments. The assumption is that the reassessment cycle will go back to two years with the next one scheduled for 2025.

Appendix M

Goal #4: Support long-term financial planning

Target: Transition to multi-year balanced tax supported operating budgets
Measure: Successful adoption of a multi-year balanced budget

On June 21, 2018 Council directed the Public Service to start a process to implement a multi-year budget approach effective for the 2020 budget year, with a focus on addressing the structural deficit in tax-supported City operations. Prior to the City of Winnipeg’s 2020 multi-year budget process, the City had a structural deficit in its Tax supported operating budget. A structural deficit is a deficit that results from a persistent and underlying imbalance between budgetary revenues and expenditures. On March 20, 2020, Council adopted the 2020 – 2023 Operating and Capital Budget, which includes the City’s first four-year balanced operating budget. The 2020 multi-year budget process eliminated these deficits and balanced the budget such that operating expenditures would equal operating revenues for 2020 through to 2023. The City’s second balanced multi-year tax supported budgets is shown below.

Goal #5: Build, maintain and enhance infrastructure

Target: Continue to implement leading practices for asset management

Measure: How effective budget decisions are on impacting the infrastructure deficit

The City's 2024 Infrastructure Plan incorporates a four-year update that expands upon the information previously outlined in the 2020 Infrastructure Plan and makes connections to primary and secondary planning documents such as OurWinnipeg 2024, Complete Communities 2.0, Poverty Reduction Strategy and the Climate Change Action Plan. The Infrastructure Plan also makes connections to the themes outlined in the Strategic Priorities Action Plan (SPAP).

Having additional insight and a broad overview of the City's infrastructure needs and financial reality, the Infrastructure Plan is intended to be a 10-year blueprint for maintaining sustainable and affordable service delivery for residents by incorporating the information from the Infrastructure Plan into the City's investment planning cycle and multi-year budget process.

Since the 2020 Infrastructure Plan, Council approved significant capital funding towards the City's top priorities identified in the plan. Three projects have been completed and 12 projects which were previously unfunded are now forecasted in the 2024 budget. This equates to just over \$1 billion in strategic investments across a multitude of services.

Note that the increase to the City's infrastructure deficit is the net result of several factors:

- An expanded scope that now includes Programs (above the \$5 million threshold)
- Newly identified investment needs
- Project cost estimate revisions and refinement since 2020 and
- Previously unfunded projects receiving capital budget approvals, investments that were re-assessed or have been identified beyond 2033

Appendix M

According to the City’s 2024 Infrastructure Plan, Winnipeg’s capital infrastructure deficit over 10 years (2024 to 2033) is now estimated at \$7.8 billion.

This equates to an Infrastructure Funding Level of 39%. This means that the approved capital budget is addressing 39% of the City’s total infrastructure needs from 2024-2033 (investments over \$5 million only).

[2024 Infrastructure Plan](#)
(Source: downloaded on November 26, 2024)

The Public Service will continue to monitor approved infrastructure investments over a period of time to help establish a recommended financial investment target that aligns with the City’s total infrastructure needs.

Tracking investment performance and establishing targets helps determine how effective the investments decisions were at reaching that target. The results would inform how long-term strategies would need to be adjusted in support of future investment needs.

The Public Service is advancing the City’s Asset Management Program by enhancing the tools available for departments to use, such as lifecycle costing, when considering capital investments. The Infrastructure Plan is a key tool to better inform decision-making during the multi-year budget process and has been improved by providing more access to data through an interactive, on-line platform.

<https://www.winnipeg.ca/infrastructureplan>

Continuing to provide detailed information about the City’s infrastructure as a whole and understanding the total cost of owning and operating an asset offers a holistic overview of the City’s infrastructure needs.

The Public Service is also leveraging technology by means of an innovative, digital platform to automate the investment planning process. This automation will enhance data accuracy and integrity, reduce manual inputs, and provide real-time reporting to ensure decisions are based on the most current and reliable information.

Additionally, it will align data from multiple departments, creating a unified, single source of truth. This alignment will foster better collaboration and lead to more effective and cohesive investment decisions.

Another fundamental element that has recently been completed was the development of a Level of Service (LOS) Framework. Establishing LOS is foundational to an evolving asset management program that balances costs, opportunities, and risks against the desired LOS. Having a clearly defined LOS framework allows strategic objectives to be linked with customer expectations and the technical performance of an asset. It also allows the Public Service to use target levels of service as a baseline during lifecycle analysis and to evaluate the impacts of changes to LOS.

Goal #6: Manage expenditures

Target: Operating expenditure increases should not exceed inflation adjusted for population growth

Measure: Increases in operating expenditures over the prior year do not exceed inflation adjusted for population growth

Between 2022 and 2023, inflation adjusted for population growth, was 7.7%. This exceeded the consolidated City expenditures growth of \$1.9 million or 0.1% (\$1.915 billion in 2023 vs. \$1.913 billion in 2022).

Expenditures remained flat compared with 2022; however, operating expenditures for public works decreased primarily due to unprecedented snow clearing and ice control costs in 2022. All other services had increased by 2.9% in comparison to 2022.

CITY SERVICES Percentage Change - 2023 to 2022 Actuals

Actual (in millions of \$)	2023		2022 Restated		Increase/(Decrease)	
	\$	%	\$	%	\$	%
Public Works	380.4	19.9%	421.2	22.0%	(40.8)	-9.7%
Other Services including civic corporations (i.e. Public Safety, Permits, Libraries, Organizational Support, etc).	1,535.0	80.1%	1,492.3	78.0%	42.7	2.9%
Consolidated expenses	1,915.4	100.0%	1,913.5	100.0%	1.9	0.1%

Appendix M

Goal #7: Manage debt

- Target:

That debt issuance and outstanding debt is in accordance with the debt management policy and debt strategy
- Measure:

Net Debt as a percentage of revenue

Measuring net debt as a percentage of operating revenue indicates the organization’s ability to service debt.

To help manage the City’s debt responsibly and transparently, on February 22, 2024, Council approved an updated debt strategy for the City which removed debt per capita and debt servicing as a percentage of revenue metrics and streamlined measurements using the City as a whole. The following table provides the City Council approved limits and debt metrics as at December 31, 2023. It is anticipated that these actual ratios will increase in the next several years as the City undertakes planned increases in capital investment.

Debt Metrics	Maximum	As At December 31, 2023	Forecasted Peak
Debt as a % of revenue			
City	100.0%	57.3%	94.1%
Note: "City" includes "Tax-supported and other funds", "Utilities and Other" and consolidated entities. "Tax-supported and other funds" includes Municipal Accommodations and Fleet Management. "Utilities and Other" includes Transit System, Waterworks System, Sewage Disposal System and Solid Waste Disposal. "Forecasted Peak" does not account for the implications of consolidated accounting entries.

Goal #8 Ensure adequate reserves and liquidity

Target / Measure: Reserve balances maintained at Council approved levels

Maintaining adequate reserves provides the City with the ability to respond to unexpected events and extraordinary situations, maintain stable taxes, and ensure sufficient funds are available for major capital projects. Having sufficient liquidity also ensures the City's ability to respond to unexpected events and is an important factor in credit rating determination as it is one indicator of the City's ability to service its financial obligations.

On March 23, 2015, Council approved a change in the level for the Financial Stabilization Reserve Fund (FSR) from 8% to 6% of tax supported expenditures. The ending balance in the FSR in 2023 is below the target level at 1.2% of tax supported expenditures.

The City is continuing to face operational pressures and economic factors such as inflation which have required draws from the FSR over the year. As a result, the FSR balance continues to be below the threshold amount in 2023; Council will need to adopt a replenishment plan.

City liquidity is at 51% for December 2023 (see [page 38 of the 2023 Annual Financial Report](#)). The City continually monitors its reserve and liquidity positions against future requirements to ensure adequate balances are maintained.

Policies, Strategies and Plans

In addition to the policies noted in the Budget Context and Overview section of the 2025 Budget, the City of Winnipeg undertakes a number of strategic planning activities and has adopted a number of strategic plans and policies. Generally, strategic plans are used to:

- Set policy & direction
- Priorities & align resource allocation
- Educate and inform

Corporate Strategic Plan

The corporate strategic plan outlines key administrative directions, goals, and priorities for the City of Winnipeg public service. It establishes a roadmap for the public service to become more responsive to the needs of Council and residents.

Loan Guarantee Policy

On September 28, 2016, Council adopted a renewed Loan Guarantee policy to ensure that loan guarantees are only provided to organizations that assist the City in achieving its goals while minimizing the financial risk associated with the guarantee.

As of December 31, 2022, the City has unconditionally guaranteed the payment of principal and interest on capital improvement loans for several organizations. The City does not anticipate incurring future payments on these guarantees.

<https://www.winnipeg.ca/finance/files/LoanGuaranteePolicy.pdf>

Purchasing Policy

The Council Adopted Purchasing Policy provides governance of purchasing functions, including the delegation of authority related to procurement.

<http://winnipeg.ca/finance/findata/matmgt/policy/policy.pdf>

Appendix N

Social and Sustainable Procurement Practices

The City of Winnipeg has adopted a Social Procurement Framework and Sustainable Procurement Action Plan to amplify the positive impacts of its spending. Sustainable procurement embeds relevant sustainability considerations into the selection of goods and services, along with factors such as price, quality, service, and technical specifications. Sustainable procurement means getting best value for the City over the total life of a good or service, while seeking opportunities that add environmental, ethical, social, and Indigenous value.

<https://www.winnipeg.ca/building-development/doing-business-city/sustainable-procurement>

Debt Strategy

A Debt Strategy sets debt limits to establish a prudent level of debt to support the City’s capital infrastructure program while maintaining an appropriate credit rating, long-term financial flexibility and sustainability. The Debt Strategy is distinct from the City’s Debt Management Policy – see below for the purpose of the debt management policy.

Leading practices incorporate the following concepts into a debt strategy:

- Debt Capacity: the ability to sustain debt service costs over the long term.
- Affordability: the ability to pay debt service costs as well as life-cycle costs to maintain the asset.
- Flexibility: the ability to respond, in the short term, to emerging capital needs.

The City’s debt strategy includes a proposed limit, which will provide a framework for future decision-making with respect to new debt authorizations.

Financial Ratios (Debt)	Where are we Now	Forecasted Peak	Recommended Limits
Measure of Sustainability:			
Net Debt as a percentage of revenue			
Total City, including other entities	57.3%	96.9%	100.0%

<https://legacy.winnipeg.ca/finance/files/debtstrategy.pdf>

Debt Management Policy

The City of Winnipeg (City) recognizes that the foundation of any well-managed debt program is a comprehensive debt policy. This Debt Management Policy:

- sets the parameters for issuing debt and managing outstanding debt;
- provides guidance to decision makers regarding the timing and purposes for which debt may be issued; and
- provides guidance on the types of debt and structural features that may be used. It does not set out a specific debt strategy or outline debt limits.

The policy summarizes the City’s legal authority, restrictions, and responsibilities relating to external debt, which flow from The City of Winnipeg Charter, and addresses other areas related to debt management.

https://legacy.winnipeg.ca/finance/files/approved_debt_management_policy.pdf

Investment Policy

The Investment Policy provides the City with an approved framework for managing investments.

The guiding principle of this Policy is to incorporate industry leading practices to ensure the safety of principal and liquidity of the investment portfolio

Safety of principal is the overriding consideration in investment decisions.

https://winnipeg.ca/finance/files/approved_investment_policy.pdf

Asset Management Policy

The Asset Management Policy is a comprehensive approach to managing the City's assets to meet well-defined levels of service at the lowest total cost of ownership within an acceptable level of risk in accordance with the Council adopted Asset Management Policy.

<http://winnipeg.ca/Infrastructure/pdfs/FI-011AssetManagementPolicy.pdf>

City Asset Management Plan

The City Asset Management Plan summarizes the inventory, overall replacement value, age, and condition of all the City's major asset groups and presents this information in a format that compares the data across various service areas. It also outlines the funding deficit and strategies associated with meeting level of service targets for existing and new infrastructure.

<https://www.winnipeg.ca/infrastructure/pdfs/City-Asset-Management-Plan-2018.pdf>

Glossary of Terms

Accommodation Tax - A 6% levy on the purchase price of short-term continuous accommodation of 30 days or less consumed and paid for after May 31, 2008. Amounts are collected in the Destination Marketing Reserve.

Active Transportation (AT) - refers to any human-powered mode of transportation, which mainly includes walking, cycling and rolling. The Pedestrian and Cycling Strategies, adopted by Council on July 15, 2015, present the needs for both walking and cycling modes jointly but address the distinctly different needs of pedestrians and cyclists.

Administrative Buildings - Facilities or assets that do not contain or provide services to the public (i.e. facilities which are solely accessed by city staff and/or suppliers).

Advance Payments – Local Improvements account - see Future Services Account.

Assessed Value - Value determined by estimating the market value of a property for a specific reference year. Taxes are levied on the basis of the assessed value of a property.

Assessment Roll - A document that records assessments that are made in respect to properties described in the document and includes a real property assessment roll, a personal property assessment roll, and a business assessment roll.

Asset Management - is an integrated business approach with the aim to minimize the lifecycle costs of owning, operating, and maintaining assets, at an acceptable level of risk, while continuously delivering established levels of service to the residents of Winnipeg. It includes the planning, design, construction, operation, and maintenance of infrastructure used to provide City services. By implementing asset management processes, infrastructure needs can be prioritized, while ensuring timely investments to minimize repair and rehabilitation costs, in order to maintain City assets.

Balanced Budget - The City of Winnipeg Charter enacted by the Manitoba Legislature defines an operating budget to be balanced when the estimated expenditures for a fiscal year do not exceed the estimated revenues for the year.

Basis of Accounting - The City of Winnipeg uses the full accrual basis of accounting. Revenue is recorded as it is earned and measurable. Expenses are recognized as they are incurred and measurable based upon receipt of goods or services and/or the creation of a legal obligation to pay. The City's financial statements are developed in accordance with generally accepted accounting principles for local governments, as recommended by Public Sector Accounting Board (PSAB).

Basis of Budgeting - The City of Winnipeg develops its operating budget for tax supported and utility operations on a modified accrual basis (see Modified Accrual Basis). Difference between the basis of budgeting and accounting include, for example, retirement allowances, vacation, workers compensation, compensated absences, contaminated sites, landfill liability and other accrued employee benefits which are budgeted on a cash basis.

Benchmark - A standard or reference point against which something is measured. The term is used in two different ways: in conjunction with setting long-term goals or targets for a broad range of societal and economic policies; and as a measure of effectiveness in comparing key aspects of an organization's performance with that of similar organizations.

Appendix O

Budget Cycle - A four-year budget cycle beginning with operating and capital budgets adopted by Council for the second fiscal year following a general election of members of Council as provided for in the Multi-Year Budget Policy.

Budget Process - Executive Policy Committee (EPC) of City Council is responsible for budget development. The budget is presented to City Council for consideration and adoption. Each year, both an operating and a capital budget are approved by City Council.

Both budgets contain multi-year views. The capital budget includes six years of budget information, including the current-year adopted budget and five forecast years. The operating budget contains four years of budget information.

Budget Working Group – The working group of Councillors with the functions outlined in the Multi-Year Budget Policy and consists of members of council appointed by the Mayor.

Building Safer Communities Fund (BSCF) - The purpose of the BSCF is to support the development of new or enhanced community-based initiatives that address gun and gang violence in Winnipeg. Investments are intended to support community organizations and municipal departments that focus on children, youth, and young adults (between the ages of 6-26) who are involved in (or at risk of joining) gangs, and to ultimately address conditions that may lead a young person to engage in gang activity in the first place.

Business Tax - This is a tax on businesses that occupy space within the City of Winnipeg. Taxes are calculated by applying the annual business tax rate as a percentage of the annual rental value (ARV) of the business premise. The annual rental value is determined by taking into account the rents paid by premises similar in size and location and includes the cost of services necessary for the comfortable use or occupancy of the premise.

Business Tax Adjustments / New Additions - Are taxes added to the taxation roll after tax bill update (TBU). These supplemental taxes are billed based on the change in the ARV for a given business. The Assessment and Taxation Department is allowed to issue supplemental tax bills for the current tax year and to January 1st of the prior year. For businesses, supplemental tax bills are normally prepared when businesses close, move or newly start up.

By-laws - Legislation enacted by City Council under the provisions of The City of Winnipeg Charter.

Canada Community-Building Fund (formerly Federal Gas Tax) Reserve - City Council, on January 25, 2006, authorized the establishment of the Federal Gas Tax Revenue Reserve Fund. The purpose of the reserve is to account for funds received from the Province under the Federal Gas Tax Funding Agreement.

On November 18, 2005, the Government of Canada and the Province entered into an agreement on the Transfer of Federal Gas Tax Revenue under the New Deal for Cities and Communities. Under this deal, the Province agreed to administer the funds on behalf of the Federal Government and to conditionally provide the funds to the City, subject to receipt of funding from the Federal Government. The funds are intended specifically for eligible projects such as: Public Transit; Water; Wastewater; Solid Waste; Community Energy Systems; and Active Transportation Infrastructure.

On March 24, 2006, the Province and the City signed the Gas Tax Funding Agreement. The agreement was effective as of April 1, 2005 and continues until March 31, 2015, or unless terminated earlier in accordance with section 10 of the agreement.

On July 16, 2014 City Council authorized that the purpose of the Federal Gas Tax Revenue Reserve be amended to include 18 project categories as listed in Schedule 1 of the most recent Manitoba-City of Winnipeg Municipal Gas Tax Agreement to administer the Canada-Manitoba Administrative Agreement on the Transfer of Federal Gas Tax Revenue. The list of eligible project categories includes local roads and bridges, broadband connectivity, public transit, drinking water, wastewater, solid waste, brownfield redevelopment, sport infrastructure, recreational infrastructure and cultural infrastructure.

On July 28, 2021, Province of Manitoba confirmed that the:

- (1) Federal Gas Tax Fund program had officially been renamed the Canada Community-Building Fund (CCBF); and
- (2) fire halls and fire station infrastructure are eligible investments under the new program and project expenditures for this investment category incurred as of April 1, 2021 will be considered eligible.

On September 5, 2024, the City of Winnipeg received notice that the Province of Manitoba and the Federal Government have finalized the next 10-year agreement for CCBF. The 2024/25 up to 2028/2029 city funding allocation had been provided.

The Director of Public Works is the fund manager.

Capital - Expenditures are considered capital when they have a cost of \$100,000 or more and a useful life of 10 years or longer. This includes individual non-recurring capital projects or ongoing programs investing in various capital assets. Minor maintenance projects should not be included in the capital budget even though the costs may exceed the dollar limit for capital works. Major equipment replacements with very large dollar values such as computer upgrades should be included in the capital budget even though their useful life may be less than 10 years.

Capital Budget - The annual plan of the capital projects to be undertaken by the City, together with the method of financing for each. In accordance with the City of Winnipeg Charter, a capital budget must be prepared and approved for the current year and the subsequent five years (forecast years). The capital budget is adopted on a project authorization basis, although cash flow estimates are provided for all projects. (See also Five-Year Capital Forecast).

Capital Projects / Capital Works - Capital improvements and other works are generally considered to be projects of a fixed nature and long life which provide new, additional or replacement of public facilities such as streets, water mains, sewers, public buildings, parks, playgrounds, recreational centres, land, etc. Major replacements such as asphalt resurfacing of streets, water main renewals, and sewer renewals could also be considered as capital works. Land acquisition and local improvements are considered to be capital works regardless of expected cost. Capital expenditures are typically acquisition, development or major renovations to assets where the benefit of the expenditure extends into the future.

- Capital Program is a collection of similar (like) projects and activities that are managed in a coordinated way to achieve an impact that is either greater or not available if they were managed individually. Programs are typically longer term or with no end date. Programs are often managed across functional units, are strategic in nature and the plan is often high level and evolving.
- Capital Project is a singular effort of defined duration, typically shorter than a program. A project has a unique purpose and produces a specific output/benefit. The project is specific, detailed and bounded with a defined start and end point.

Cash to Capital - is the cash value that the City invests into its Capital projects.

Appendix O

Charter - Refers to *The City of Winnipeg Charter*, S.M. 2002, c. 39.

Chief Administrative Officer - Individual appointed to the position pursuant to the City of Winnipeg Charter.

Chief Construction Officer - an officer of Council with reporting and accountability measures similar to those in place for other statutory officers of Council while acknowledging that this position is not statutory within the City of Winnipeg Charter.

Chief Financial Officer - is the Council-appointed statutory officer mandated by the City of Winnipeg Charter.

City (The) - Refers to the City of Winnipeg.

City Cemetery Reserve – (Brookside, St. Vital and Transcona Cemeteries) The terms of By-law No. 14725 of the former City of Winnipeg, passed on April 8, 1935, created a fund for the perpetual care and maintenance of Brookside Cemetery. Later on, By-law No. 1996/78, also created funds for the perpetual care and maintenance of St. Vital and Transcona Cemeteries.

Section 29 of By-law No. 5720/91 amending and restating By-law 1996/78, relating to Cemeteries, sets forth the purpose and use of the Perpetual Maintenance Funds.

These funds are for the purpose of creating, building up, and maintaining a perpetual maintenance fund for the care and maintenance of Brookside, St. Vital, and Transcona Cemeteries. Section 12 of By-law No. 130/2007 includes: “Each cemetery will have a separate Perpetual Maintenance Reserve Fund created with a sum equal to 25% of the purchase price of a lot, plot or cremated remains lot/plot, or a sum equal to 15% of a cremorial or niche purchase, or a sum equal to 10% of a scattering of cremated remains, set aside in the reserve, invested and applied to and for the perpetual care of the lot or plot or cremated remains lot/plot, cremorial, niche, scattering bed or ossuary area. Perpetual care includes general maintenance of lots, plots, cremated remains lots/plots, columbarium niches or the cemetery enclosure.

The City may, annually, subject to Council approval, utilize up to 75% of the yearly earnings from the relevant Perpetual Maintenance Reserve to undertake improvements or maintenance on the cemetery.

Effective January 1, 2024 Council approved the consolidation of the Transcona, Brookside and St. Vital Cemeteries (perpetual reserve) funds into one cemeteries reserve fund called “City Cemetery Reserve”.

The Director of Planning, Property and Development is the Fund Manager.

City of Winnipeg Charter (The) - Provincial legislation setting out the powers and responsibilities of the City of Winnipeg.

Class Estimates - The cost estimate classification system was developed in 2015 based on the AACE International Recommended Practices and is included in an appendix in the annual capital budget. The established benchmark is that a project should have a Class 3 estimate for budget authorization. Projects that are not at a Class 3 should indicate in the detail sheet that a Class 3 estimate or better will be achieved prior to the start of construction. For programs, those projects identified in the year of budget approval should also be at a Class 3 and the narrative should indicate that. The Class 3 estimate should set the authorization budget.

Climate Action Reserve - A reserve fund established for the purpose of funding climate action initiatives in alignment with the City's strategic plans to meet the goal of net zero emissions. These initiatives will focus on studies, analysis and the development of policies, strategies and procedures relating to climate action.

The Director of Water and Waste will be the fund manager.

Committees - means the Standing Policy Committees of Council and the Winnipeg Police Board.

Commitment Reserve - On March 12, 1998, City Council approved the establishment of the Commitment Reserve Fund. The purpose of the fund is to allow departments to carry forward committed budget dollars to the succeeding year thereby eliminating the need to re-budget. Contributions to the reserve must be spent in the year following the transfer. However, contributions can be retained in the reserve beyond the following year only if approved by the fund manager; otherwise the unspent amount must be transferred to the Financial Stabilization Reserve Fund.

The Chief Financial Officer is the fund manager.

Computer, Critical Systems and Support Reserve - On March 22, 1995, City Council approved the establishment of the Computer Replacement Reserve Fund. As approved by Council in the 2019 Budget, the reserve was renamed to Computer, Critical Systems, and Support Reserve. The purpose of the reserve is to provide financing for the replacement, refurbishing, modifying, or upgrading of personal computer hardware and/or software and to stabilize expenditures, therefore smoothing the effect on the annual budget. Through direct contributions, users contribute an amount to the reserve for computer equipment based upon the latest actual purchase cost for that type of unit. Other contributions to the reserve would include investment income.

The Director of Innovation and Technology is the fund manager.

Community Safety Team - The Community Safety Team is dedicated to protecting public safety while supporting vulnerable residents in urgent need.

The team of Safety Officers are sworn Manitoba Peace Officers who work alongside Winnipeg emergency services, safety patrols, and social agencies. Safety Officers assist individuals experiencing homelessness, addictions, and mental health issues, providing on-scene support and connecting them to appropriate resources.

Consolidated Budget – includes the City of Winnipeg's operating budgets for tax supported, utility, special operating agency and reserve operations as well as a capital budget and governmental functions or entities, which have been determined to comprise a part of the aggregate City operations. The consolidated budget considers inter-fund transaction eliminations, tangible capital asset-based revenues and amortization, controlled entity operations and the accrual of unfunded expenses.

Consolidated Entities - The organizations included in the consolidated financial statements are as follows:

- Assiniboine Park Conservancy Inc.
- CentreVenture Development Corporation
- The Convention Centre Corporation
- Winnipeg Arts Council Inc.
- Winnipeg Public Library Board

Appendix O

Consumer Price Index (CPI) - A statistical description of annual price levels provided by Statistics Canada (Government of Canada). The index is used as a measure of the increase in the cost of living (i.e. economic inflation).

Contribution in Lieu of Land Dedication Reserve - On January 10, 1973, City Council adopted the policy that cash payments received by the City in lieu of land dedication for open space be deposited in a fund to the credit of each community. On January 17, 1979, City Council amended that policy to permit proceeds from the sale of surplus parks and recreation lands to be deposited to the Contributions in Lieu of Land Dedication Reserve Fund account of the respective community. On September 19, 1990, City Council adopted the recommendation that revenue would be apportioned amongst the communities on the basis of 75% to the account of the community in which the revenue was collected and 25% to be divided equally amongst all communities. This change was phased in over three years commencing in 1991. Expenses are limited to the acquisition or improvement of land for parks, recreation facilities, or open space.

The Director of Planning, Property and Development is the fund manager.

Debt Charges - The annual amount of principal and interest which must be paid each year through the operating budget. There are two forms of debenture structure. The Sinking Fund Debenture issue requires annual payments to be made to the Sinking Fund. These funds are then invested by the Sinking Fund for the retirement of the debenture issue on its maturity date. A serial issue requires annual payments of principal and interest in order that the debt is paid off in regular installments throughout the life of the issue.

Department - The basic organizational unit of the City which is functionally unique in its delivery of services. In general, departments are managed by a Director.

Destination Marketing Reserve - On October 22, 2008, City Council approved the creation of the Destination Marketing Reserve Fund with an effective date of January 1, 2009. The purpose of the reserve is to support Economic Development Winnipeg Inc., The Convention Centre Corporation and special events including other organizations, projects and events that will encourage tourists to visit Winnipeg. The source of revenue for the reserve is a 6% accommodation tax.

The Chief Financial Officer is the fund manager.

Director - leads a City department or Special Operating Agency.

Dividend - A dividend is an interfund transfer from a City Utility or a Special Operating Agency (SOA) to the City tax-supported fund based on Council approved policy or available uncommitted funds or operational surplus.

Economic Development Investment Reserve - The Economic Development Investment Reserve Fund was created by City Council on June 21, 2000. It is intended to fund City economic development incentives and investment projects. This reserve invests directly in particular projects rather than being a funding mechanism for programs. The incremental portion of realty and business taxes generated by projects in which the fund has invested will be returned to the reserve until the original investment has been repaid.

The Director of Planning, Property and Development is the fund manager.

Effectiveness Measure - a performance measure intended to evaluate service delivery relative to service standards or the customer's needs and expectations.

Efficiency Measure - a performance measure comparing the resources used to the number of units of service provided or delivered (typically cost for a service or unit of service).

Electricity Tax - The electricity tax is legislated by Section 441 of the City of Winnipeg Charter. The rate charged is 2.5% for domestic consumption and 5% for commercial consumption, beyond the electricity used for space heating purposes, which is conclusively deemed to be 80% of the total consumption. For a "primarily electric heat" dwelling unit, 20% is taxable, 80% is exempt. If a dwelling unit is "primarily gas heat", then there is no exempt portion on the electrical side. The tax is calculated and levied by Manitoba Hydro and is remitted to the City of Winnipeg on a monthly basis.

Entertainment Funding Tax - The tax is 10% on cinema ticket prices of \$5.00 or more.

Entertainment Funding Tax Refundable - Goldeyes - The Winnipeg Goldeyes has a long-term arrangement expiring December 31, 2038 with respect to entertainment tax approved by Council. The full amount of entertainment tax remitted during the year is refunded back at the end of the season - conditional upon all aspects of an amateur access/community use agreement with the City being honored.

Entertainment Funding Tax Refundable - True North - True North Inc. has a long-term arrangement expiring in 2029 with respect to entertainment tax approved by Council. The full amount of entertainment tax remitted during the year is refunded back at the end of the season.

Entertainment Funding Tax Refundable - Winnipeg Football Club (WFC) - In a long-term agreement approved by Council, the entertainment tax revenue from the Winnipeg Football Club's football games or other events will be refunded back to the Winnipeg Football Club.

Environmental Projects Reserve - On December 17, 1993, City Council authorized the establishment of a River Quality Environmental Studies Reserve Fund for the purpose of providing funding for environmental projects to improve river quality. On January 24, 1996, City Council changed the name of this Reserve to the Environmental Projects Reserve Fund to more accurately reflect the nature of the projects reported in this reserve.

The reserve is financed through a monthly transfer from the Sewage Disposal System Fund based on the amount of water consumption billed. The reserve has funded ammonia, nitrification and combined sewer overflow ("CSO") studies. It now funds a portion of the wastewater collection and treatment system improvements as directed by the Province of Manitoba ("the Province"). This includes effluent disinfection, centrate treatment, biological nutrient removal, CSO mitigation infrastructure and biosolids.

River quality is under the jurisdiction of the Province and in 2003 the Clean Environment Commission ("CEC"), at the request of the Minister of Conservation, conducted public hearings to review and receive comments on the City's 50-year wastewater collection and treatment improvement program. At the conclusion, the CEC recommended that the City implement these improvements over a 25-year period, which was subsequently ordered by the Minister of Conservation on September 26, 2003.

On September 3, 2004, the Province issued Environment Act License No. 2669 for the West End Water Pollution Control Centre, which provided for the plan as directed by the Minister of Conservation. Certain provisions of this license were appealed by the City. Revised License No. 2669 E R R and No. 2684 R R R, for the North End Water Pollution Control Center, were issued on June 19, 2009, incorporating the City's requested changes. On March 3, 2006, a similar license (No. 2716) was issued for the South End Water Pollution Control Centre. Effective April 18, 2012, the South End Water Pollution Control Centre license (No. 2716RR) was revised in response to the Save Lake Winnipeg Act requirement. This reserve partially funds capital projects to bring the City in compliance with the license requirements.

Appendix O

The Director of Water and Waste is the fund manager.

External Debt - Obligation resulting from the borrowing of money from sources other than City funds, primarily by the sale of debentures in public capital markets.

Federal Gas Tax Revenue Reserve – see **Canada Community-Building Fund Reserve**.

Fees and Charges Schedule - published annually in accordance with the Fees and Charges By-Law (196/2008) to identify the current fees and charges administered by the City of Winnipeg and the authority under which they are administered. http://www.winnipeg.ca/finance/documents_page.stm

Financial Management Plan (FMP) - The City's official public strategy for guiding the financial decision-making process. This document, adopted by Council on March 20, 2020, is the strategy for guiding financial decision making, meeting long-term obligations, and improving its economic position and financial stability. <http://www.winnipeg.ca/finance/files/fmp.pdf>

Financial Stabilization Reserve - The purpose of the Financial Stabilization Reserve Fund is to counteract the budgetary effect of fluctuations from year to year in property and business taxes and/or to fund deficits in the General Revenue Fund, which assist in the stabilization of the City's mill rate and/or property tax requirements.

Various structural changes have occurred over the years in this reserve.

On September 28, 2011, City Council adopted the combining of the Fiscal Stabilization Reserve and the Mill Rate Stabilization Reserve Funds into the Financial Stabilization Reserve Fund. All previous regulations for the two stabilization reserves were replaced with the following:

- Sources of funding for the reserve are: the excess of actual total taxes billed compared to budget; surpluses in the General Revenue Fund; unspent amounts in the Commitment Reserve Fund; and interest revenue.
- The reserve can be used to fund any shortfall of actual total taxes billed compared to budget; major unforeseen expenditures once the target level is exceeded and subject to rules noted below; General Revenue Fund year-end deficits and subject to rules noted below; and one-time expenditures once the target level has been reached.
- No transfers can be made to the General Revenue Fund to fund ongoing current operations.
- Funds above the 8% target may be used for major unforeseen expenditures and General Revenue Fund deficits. Accessing funding in any given year requires City Council approval if the required amount would reduce the reserve's balance below the 8% target.
- A replenishment plan shall be adopted by City Council if the Financial Stabilization Reserve Fund's equity is reduced below the 8% target of tax-supported expenditures.

On March 23, 2015, City Council adopted the 2015 Operating Budget which included a change in the target balance for the Financial Stabilization Reserve from 8% to a minimum of 6% of tax-supported expenditures.

On March 20, 2020 Council amended the purpose to allow transfers between the Financial Stabilization Reserve and the General Revenue Fund, subject to maintaining required annual minimum balanced in the Financial Stabilization reserve, in order to ensure that the tax supported operating budget is balanced.

The Chief Financial Officer is the fund manager.

Fiscal Year - The fiscal year of the City is the 12 months ending on December 31 each year.

Five-Year Capital Forecast - The long-term plan for capital expenditures to be incurred for the five years following the budget year. Section 284(2) of “The City of Winnipeg Charter” requires Council, in addition to the capital budget for the budget year, to include a capital program for five years. Only the current year’s budget is adopted, and the five-year capital forecast is approved as a forecast.

Frontage Levy - A charge to property owners through the property tax bill. Calculation of the frontage levy is based on the length of the boundaries (frontage) of the property that fronts or abuts any portion of a sewer main or water main. As set out in the City of Winnipeg Charter, these funds can be used for the upgrading, repair, replacement and maintenance of water and sewer mains, streets and sidewalks; installation, upgrading, repair, replacement and maintenance of lighting in streets and back lanes.

Fund Balance - Measures the net financial resources available to finance expenditures of future periods and is the difference between governmental fund assets and liabilities, also referred to as fund equity.

Full-Time Equivalent (FTE) - The total number of hours worked converted to the equivalent of full-time staff persons working a whole year.

Funding from Other Municipalities - Revenue generated from Service-Sharing Agreements for the provision of water and sewer services to neighbouring municipalities.

Future Services Account - A development agreement may require that the Developer pay for specific infrastructure items that are to be constructed, by the City and/or a third party, in the future, and which directly benefit the proposed subdivision. These works include roadways (both improved and nonimproved), sidewalks, boulevards and trees, traffic signals, street lights (both standard and ornamental), watermains, etc. The costs of the works are determined by the City and are then specified in the development agreement at the time that the agreement is to be executed by the Developer, or earlier. Such payments are credited to the Advance Payments – Local Improvements account (commonly referred to as the “future services” or “future works account”). The funds held in the future services account are intended to be used as a funding source primarily in a capital budget at the time the related infrastructure item(s) is to be constructed.

General Capital Fund - The accounting fund created to account for tax-supported capital transactions of The City of Winnipeg.

General Purpose Reserve - On March 15, 2000, City Council approved the establishment of the Pension Surplus Reserve Fund. The reserve was funded by the retroactive refund of pension contributions for 1998 and 1999. City Council also approved that the purpose of the reserve and further details including the use of these funds be subsequently determined by City Council.

On May 23, 2001, City Council approved the amalgamation of the Pension Stabilization Reserve and Pension Surplus Reserve Funds and the new fund be renamed the General Purpose Reserve Fund.

On June 25, 2014, City Council approved an amendment to the Councillors' Ward Allowance (CWA) Policy year end section 3.10, to include the following: “Unexpended funds from Councillor ward allowances may be carried over to the following year, at the discretion of the ward Councillor, up to a maximum of 10% of the total ward allocation, and on October 28, 2015 added that the CWA carry over funds be established as a permitted use in the General Purpose Reserve.”

On December 16, 2020, Council approved that the terms and conditions of the General Purpose Reserve be amended to allow as a funding source any budget allocation approved by Council including external or internal funding sources. The Chief Financial Officer is the fund manager.

Appendix O

General Revenue Fund – The accounting fund created to account for tax-supported operations, which include but are not limited to services provided by the City such as police, fire, ambulance, library and street maintenance.

Government Grants - Payments from other levels of government for specific programming or payments for City purposes.

Grant - means money, goods, services or in-kind contributions provided to a recipient without consideration in return, other than recognition for the grant.

Grant (Annual) - Annual grants are payments to organizations which provide demonstrable cultural, social or economic benefit to the community and where the City does not receive any goods or services directly in return for the funds (with the exception of service purchase agreements) nor do they expect repayment or any other financial return. Eligibility and entitlement requirements are reviewed annually.

Grant (Long-Term) - A payment that is legally required to be made pursuant to the terms of a previously executed active agreement, or an expired agreement which the parties are still honoring until a new one can be made, or other legal obligation (e.g. Long-Term Agreements of the Grants/Payments Listing, tax or TIF grants).

Grant (Other programs) - are primarily grant programs where recipients are determined throughout the course of the year. With the exception of the per capita grants, the Director of the department responsible for each such grant program is delegated the authority to determine grant recipients.

Grant (In-kind contributions) - goods or services provided to a recipient for free or at a reduced rate.

Grant (Funding streams)

- Environmental / Green City - Funding under this stream may be approved for projects with a focus on climate resiliency, renewable energy, waste diversion, protecting and growing the urban forest;
- Recreation. Funding under this stream may be approved for projects that improve access to library and recreation services;
- Community Well-being. Funding under this stream may be approved for projects that promote safety and the well-being of residents, and services that are more available, accessible and affordable to those who need it most; and
- Arts and Culture. Funding under this stream may be approved for projects concerning the protection, preservation and promotion of the inherent value of the arts, cultural, built and natural heritage resources.

Heritage / Economic Development Property Tax Credit - The program's objective is to facilitate the conservation and continued use/viability of heritage buildings in Winnipeg by incenting the restoration or rehabilitation of existing buildings as well as projects that have economic benefit to the City.

Heritage Investment Reserve - The Heritage Investment Reserve Fund was created by City Council on June 21, 2000. It funds all City and City-sponsored heritage programs and acts as a revolving fund so that future funding of heritage programs can be sustained and thereby reduces the need to obtain additional funding. An important source of ongoing funding for the reserve will be incremental tax revenues from projects financed by the fund.

The Director of Planning, Property and Development is the fund manager.

Housing Accelerator Fund (HAF) Reserve - On January 29, 2025, Council approved the establishment of the Housing Accelerator Fund (HAF) Reserve.

On December 5, 2023, the Government of Canada, through the Canada Mortgage and Housing Corporation (CMHC), entered an agreement with the City of Winnipeg for \$122.4 million in funding from the Housing Accelerator Fund (HAF).

The primary objectives of the program are to create more supply of housing at an accelerated pace and enhance certainty in the approvals and building process, while also supporting the following priorities:

- Supporting the development of complete communities that are walkable, consisting of appropriate residential density and a diverse mix of land uses, providing access to a wide variety of amenities and services through public and active transportation
- Supporting the development of affordable, inclusive, equitable and diverse communities that encourage clear pathways to achieving greater socio-economic inclusion largely achieved through the equitable provision of housing across the entire housing spectrum
- Supporting the development of low-carbon and climate-resilient communities

The Chief Administrative Officer is the fund manager.

Housing Rehabilitation Investment Reserve (HRIR) - The Housing Rehabilitation Investment Reserve Fund was created by City Council on June 21, 2000. It was to fund City housing programs for which no funding was provided in operating budgets. It was intended that this reserve act as a revolving fund so that incremental tax revenues resulting from housing programs in which the reserve had invested would be returned to the reserve to finance future projects. The reserve continues to fund housing programs for which the funding is provided through an annual transfer from the General Revenue Fund.

The Director of Planning, Property and Development is the fund manager.

In-Kind Contributions - see Grant (In-kind contributions).

Insect Control Reserve - On March 23, 2005, City Council approved the establishment of the Insect Control Reserve Fund. The purpose of the fund is to absorb unexpected costs for mosquito control in years where the City of Winnipeg experiences above average response levels. The reserve balance should not exceed \$3.0 million and the Chief Administrative Officer has the authority to over-expend to a maximum of \$3.0 million in the event of insufficient funds.

The Director of Public Works is the fund manager.

Insurance Reserve - In 1960, the Insurance Reserve Fund was established. The reserve was to be used for the purpose of replacing or repairing City properties and/or contents that had been damaged by fire or any other cause. In 1973, the use of the Insurance Reserve Fund also included the purpose of paying for any other losses that the City might incur in any part of its self-insurance program. Such uses would include third party liability claims, or property damage claims, including motor vehicles.

The Corporate Controller is the fund manager.

Internal Financing - An interim funding source from the available, short-term cash flow surpluses from various City sources such as the general capital fund and capital and special purpose reserves that can be used to fund capital projects. Council also approves an external borrowing authority for the internal financing amount in the capital budget to ensure that funds are available for the projects to proceed if short term cash surpluses become unavailable.

Appendix O

Investing in Canada Infrastructure Program - The governments of Canada and Manitoba are working together to make long-term infrastructure investments for the betterment of Manitoba and its communities through the Investing in Canada Infrastructure Program (ICIP). These investments will have benefits for people in communities across the province under four priority areas:

- Public transit;
- Green infrastructure;
- Community, culture, and recreation infrastructure; and
- Rural and northern communities.

Land Operating Reserve - City Council, on May 16, 1973, authorized the establishment of a Land Operating Reserve Fund to reduce the need for the issuance and sale of debentures in connection with the acquisition cost of properties for resale.

Disbursements from this reserve are limited to the acquisition cost of properties for resale, and any other expenses directly related to the acquisition, sale and improvement of disposable City properties. Use of the reserve's funds for any other purpose requires the authorization of City Council. This reserve is maintained by the proceeds from the sale of City-owned properties and interest earned.

In accordance with City Council directives, 5% of the gross sales revenue is allocated to the Historical Building Program, another 5% of gross sales revenue is allocated to the Enhanced Land Marketing Program to finance those activities necessary to facilitate the sale of surplus lands and 15% is allocated to the Community Centre Renovation Grant Program annually, subject to Council approval.

City Council, on July 19, 1999, adopted a policy that in order to sustain the business operations supported by the Reserve, equity be allowed to accumulate within the reserve sufficient to eliminate the inter-fund debt owing to the General Revenue Fund created in past years. Any surplus funds greater than the amount required for the purposes of the Land Operating Reserve Fund and meeting the annual budgeted transfer to the General Revenue Fund is to be transferred to the Commitment Reserve Fund.

The Director of Planning, Property and Development is the fund manager.

Landfill Rehabilitation Reserve - On December 17, 1993, City Council authorized the establishment of a Brady Landfill Site Rehabilitation Reserve Fund for the purpose of providing funding for the future development of the Brady Landfill Site. The reserve is financed through a monthly transfer from the Solid Waste Disposal Fund based on tonnages processed at the landfill.

Effective January 1, 2018 the Brady Landfill Site Rehabilitation Reserve was terminated and replaced with a new Landfill Rehabilitation Reserve in accordance with Section 289 of the City of Winnipeg Charter.

The purpose of the new reserve is to provide funding, over time, for closure and post-closure landfill needs including leachate management, environmental monitoring and site restoration costs for all active and closed landfills maintained under the responsibility of the City.

This reserve will continue to be funded through annual deposits from tipping fee revenue accounts of the Solid Waste Disposal Fund based on a portion of the tipping fee per tonne charged on garbage disposal, the current rate is \$1.00 per tonne of material landfilled.

The Director of Water and Waste is the fund manager.

Local Improvements - Local Improvement capital projects are those which are financed partly by a direct levy on the properties benefited (property owner's share) and partly by a mill rate levy over the city-at-large (City's share). The program is governed by Local Improvement By-Law No. 98/72 and is subject to

advertising and subsequent approval by the majority of ratepayers involved. The type of expenditures generally falling within this category are: paving of local streets and lanes; sidewalk and boulevard construction; installation of new water mains and sewers; ornamental street lighting and lane lighting.

Local Street Renewal Reserve - The Local Street Renewal Reserve was established in 2013 to increase investment in local streets, lanes and sidewalks. Funds from this reserve will be used annually to fund the local street component of the Regional and Local Street Renewal program and the repair, renewal and/or replacement of bridges. Subject to annual Council approval, a separate property tax increase will fund this reserve each year to ensure a dedicated funding system for local streets. Use of the Local Street Renewal Reserve for purposes other than local streets, lanes, sidewalk, and bridge renewals requires approval of 2/3 of City Council.

The Director of Public Works is the fund manager.

Major Capital Projects - are projects that reach a specific minimum dollar threshold and above. \$25 million is the threshold for 2024 to 2027 Multi-year Budget. A listing of major capital projects is included in the Supplement to the Budget.

Mill Rate - A mill rate is a term used to decide how taxes are set. A "mill" is equivalent to a one thousandth part. For the purposes of calculating property taxes, one mill represents \$1.00 of taxes for every \$1,000 of portioned assessment. The portioned assessment is the part of the total assessed value of a property that is subject to taxation.

Mill Rate Support - Mill rate support is the amount required to be funded directly by property owners through their property realty taxes.

Modified Accrual Basis - A hybrid of cash and accrual methods of accounting in which revenues are recognized when earned, measurable and available. Expenses are recognized when liability is incurred, except for certain expenses such as those associated with retirement allowances, vacation, workers compensation, compensated absences, contaminated sites, landfill liability and other accrued employee benefits which are budgeted on a cash basis. As well, debt servicing payments are budgeted for when due and depreciation of assets is not budgeted.

Multiple-Family Dwelling Tax Investment Reserve - On May 22, 2002, City Council approved the establishment of the Multi-Family Dwelling Tax Investment Reserve Fund. The reserve is designed to act as a bank that accumulates incremental taxes generated by approved multi-family dwelling construction/rehabilitation projects. When the incremental taxes for each project accumulates to the pre-approved amount, the balance is paid back to the applicant developer as a "Tax Incentive Grant".

The Director of Planning, Property and Development is the fund manager.

Municipal Benchmarking Network Canada (MBNC) - is a national benchmarking organization comprised of partner municipalities who identify, collect, analyze and report consistent and comparable data in municipal service areas. The information reported, and the partner network, promote sharing of best practices and strategies to support continuous improvement in the delivery of municipal services.
<http://mbncanada.ca/>

Multi-year Budget - The annual operating and capital budgets adopted by Council together with operating budget projections for an additional three years and capital budget forecast for an additional five years as required by the Multi-Year Budget Policy.

Appendix O

Municipal General Services Fee - The General Services Fee is revenue related to municipal services that are billed for Urban Reserves and these fees are in lieu of property taxes.

Natural Gas Tax - The natural gas tax is legislated in Section 441 of The City of Winnipeg Charter. The rate charged is 2.5% for domestic consumption and 5% for commercial consumption, beyond the natural gas used for space heating purposes. If the dwelling unit is “primarily gas heating”, a baseload is calculated based on consumption in June, July, and August. Gas tax is then applied to the lesser of actual consumption or baseload. If the dwelling unit is “primarily electric heat” then this tax is applied to the full consumption. The tax is calculated and levied by Manitoba Hydro and is remitted to the City of Winnipeg on a monthly basis.

Neighbourhood Action Team (NAT) - Team of staff dedicated to addressing right-of-way maintenance and repairs in select high-needs areas. Members will liaise with elected officials, community members, and area stakeholders to identify problem locations, prioritize work, and collaboratively improve the communities’ street-level infrastructure and appearance.

Net Taxes Added - Are taxes added to the taxation roll after tax bill update (TBU). These supplemental taxes are billed based on the change in the assessed value for a given property. The Assessment and Taxation Department is allowed to issue supplemental tax bills for the current tax year and to January 1st of the prior year.

Non-Profit Organization - means a club, society, association, or corporation that conducts business for the benefit of the general public without shareholders and without a profit motive. Any profit that is made is used to further the goals or undertaking of the organization. Profits are not used by the individuals involved for their own personal financial gain.

Operating Budget - means the annual plan of city’s services and programs with estimated revenues and expenditures associated with each.

Operating Expenditures - The cost to provide a product or service. This includes but not limited to the cost for personnel, materials, equipment and other consumables required for a department to function and provide services.

Other Commitments - Other capital investments that are not aligned with the definition of a Capital Project or Capital Program.

OurWinnipeg - The City’s strategic 25-year development plan adopted by Council on May 26, 2022, is Winnipeg’s 25-year development plan that under The City of Winnipeg Charter, section 224. It establishes goals of leadership and good governance, environmental resilience, economic prosperity, good health and well-being, social equity and city building. Section 235 of the City of Winnipeg Charter, not everything in OurWinnipeg has to be implemented but everything the City does must be consistent with it.

Pay-As-You-Go - A means of financing capital projects whereby the City pays for the projects from direct contributions from the current budget, from retained earnings, or from reserves established for capital purposes, rather than issuing external debt.

Payments in Lieu of Taxes - The federal and provincial governments, crown corporations, universities and City utilities do not have a legal obligation to pay property taxes; however, an amount equivalent to the taxes is paid to the General Revenue Fund for City services by way of a payment in lieu of taxes.

Pedestrian and Cycling Program - provides recommendations for infrastructure projects, programs and studies identified in the Pedestrian and Cycling Strategies. Projects may include: new sidewalks on regional and non-regional streets, new multi-use paths, new bicycle routes, crossing control improvements, public education, awareness and promotion and partnership grants. All recommended projects support the key directions of the Pedestrian and Cycling Strategies.

Performance Measurement - Performance measurement is the process of collecting, analyzing and/or reporting information regarding the performance of an organization, service, system or component.

Permit Reserve - On March 20, 2007, City Council approved the establishment of the Permit Reserve Fund. The purpose of the reserve is to mitigate revenue shortfalls and fund temporary staffing needs during busy periods through economic boom/bust cycles. The reserve is also meant to provide a source of funds for service and system improvements. The reserve is funded by the excess of permit revenue in the General Revenue Fund compared to budget in any given year. The balance in the reserve is capped at \$3.0 million and any surplus funds over and above the cap are to be transferred to the General Revenue Fund.

On March 22, 2011, City Council approved the cap be revised to \$2.0 million and any surplus funds above the cap be transferred to the General Revenue Fund, reported in the Planning, Property and Development Department.

The Director of Planning, Property and Development is the fund manager.

Perpetual Maintenance Funds – see City Cemetery Fund.

Property Tax Revenue - This is the money that the City bills the property owners in the City of Winnipeg to fund tax-supported expenditures. Property taxes are calculated by applying the municipal mill rate against the portioned assessment of your property. By definition, a mill is a one-thousandth part. For calculating taxes, one mill represents \$1.00 of taxes for every \$1,000.00 of portioned assessment.

Provision for Cost Variability (“Provision”) - is an inter-fund transfer from the Municipal Accommodations Fund (Fund 554) to the City tax-supported fund (Fund 001). It represents a portion of market rents charged by Municipal Accommodations to its accommodation customers; that portion being the variance between market rent rates charged and the cost to provide and reinvest in the accommodations.

Public-Private Partnership (PPP or P3) - is a contract between a public sector entity and a private sector entity that outlines the provision of assets and the delivery of services. Although this can include almost any type of infrastructure or service, some of the more common P3 projects include hospitals, bridges, highways, new types of technology and new government buildings. Across Canada, P3s have become an increasingly prominent procurement vehicle for governments.

Rapid Housing Initiative - The City of Winnipeg receives funding from the federal government under the Rapid Housing Initiative (RHI). The funding helps deliver affordable housing units in Winnipeg.

Regional Street Renewal Reserve - The Regional Street Renewal Reserve was established in 2014 to increase investment in regional streets and sidewalks. Funds from this reserve will be used annually to fund the regional street component of the Regional and Local Street program and the repair, renewal and/or replacement of bridges.

Appendix O

A separate property tax increase will fund this new reserve each year to ensure a dedicated funding system for regional streets. Use of the Regional Street Renewal Reserve for purposes other than regional streets, sidewalk, and bridge renewals requires approval of 2/3 of City Council.

The Director of Public Works is the fund manager.

Regulation Fees - Fees charged to users for regulated/controlled services typically where licenses and permits are required. Fines and penalties are also included in this revenue category for summary purposes.

Reserves - Represent amounts appropriated for designated requirements as established by Council. Part of best practices for fund accumulation to replace capital assets and to provide financial flexibility in times of budget shortfall. A listing of the reserve funds is noted below and a description for each one can be found in this glossary.

- Canada Community-Building Fund (formerly Federal Gas Tax) Reserve
- City Cemetery Reserve (formerly Perpetual Maintenance Funds)
- Climate Action Reserve
- Commitment Reserve
- Computer, Critical Systems and Support Reserve
- Contribution in Lieu of Land Dedication Reserve
- Destination Marketing Reserve
- Economic Development Investment Reserve
- Environmental Projects Reserve
- Financial Stabilization Reserve
- General Purpose Reserve
- Heritage Investment Reserve
- Housing Accelerator Fund Reserve
- Housing Rehabilitation Investment Reserve
- Insect Control Reserve
- Insurance Reserve
- Land Operating Reserve
- Landfill Rehabilitation Reserve
- Local Street Renewal Reserve
- Multi-Family Dwelling Tax Investment Reserve
- Permit Reserve
- Regional Street Renewal Reserve
- Sewer System Rehabilitation Reserve
- Southwest Rapid Transit Corridor Reserve
- Southwest Rapid Transitway (Stage 2) and Pembina Highway Underpass Payment Reserve
- Transit Bus Replacement Reserve
- Transit Infrastructure Reserve
- Transformative Reserve
- Waste Diversion Reserve
- Water Main Renewal Reserve
- Water Meter Renewal Reserve
- Workers Compensation Reserve

Residential Recycling - Revenue received from Multi Material Stewardship Manitoba (MMSM) on a percentage of cost basis to help fund the waste diversion program for the City.

Retained Earnings - Equity accounts that represent the accumulated surpluses from operations that are not for general distribution, but rather are used to fund capital projects, leverage debt, or are reinvested in service delivery.

Revenue - Sources of income to The City of Winnipeg. A listing of major sources of revenue is noted below and a description for each one can be found in this glossary.

- Accommodation Tax
- Business Tax
- Business Tax Adjustments / New Additions
- Electricity Tax
- Entertainment Funding Tax
- Entertainment Funding Tax Refundable – Goldeyes
- Entertainment Funding Tax Refundable – True North
- Entertainment Funding Tax Refundable – Winnipeg Football Club (WFC)
- Frontage Levy
- Government Grants
- Natural Gas Tax
- Net Taxes Added
- Payments in Lieu of Taxes
- Property Tax Revenue
- Regulation Fees
- Sales of Goods and Services
- Sewer Services
- Solid Waste Disposal Services
- Tax Penalty Interest
- Transfers
- Transit Service Fare Revenue
- Water Services Sales

Rolling Capital Program – A collection of projects where the work can be adjusted based on the funding available for the program. These projects are generally small in scope and do not require preliminary or detailed design studies. For these reasons, individual class estimates are not developed. Funding for these programs is usually ongoing and work is continuous from year to year.

Sale of Goods and Services - Revenue category of fees charged to users for services provided on a fee for service basis by the City for the convenience and quality of life for residents. Generally, the consumer can exercise choice on whether or not to consume the service. Examples include recreation and ambulance fees.

Self-Supporting Utility - The Water and Waste Utilities do not receive subsidies from the mill rate or tax supported budget.

Service (Internal) - Those services which are offered internally to one or more organizational units within the corporation in support of public service delivery.

Service (Public) - An operational concept where something of value is provided to individual members of the public, or defined members of the public (client set) or the public collectively.

Service-Based Budget (SBB) - Displays budget information (how much the service will cost and how the service is to be funded) and performance measures for services provided, including all components regardless of which unit or department delivers the service. The service-based budget is intended to

Appendix O

provide more transparent reporting and a more direct link between the budgets provided and the services delivered.

Service Goals - Goals are provided for each service in the service-based budget, and represent the desired high-level outcomes for that service area.

Service purchase agreement payment - A payment that is required to be made for the provision of services pursuant to a service purchase agreement, and was previously approved as a sole source under the Materials Management Policy, due to the fact that another organization/entity could not reasonably carry out the service or there is a special convenience factor in having a particular organization/entity provide the service to the City. The service being provided is usually for the care or maintenance of City property which the City would otherwise be legally required to carry out itself (e.g. BIZ maintenance of City parking pay stations, snow clearing of City parking lots, clean up around Brady landfill).

Service-Sharing Agreements - see Funding from Other Municipalities.

Sewer Services Revenue - This revenue is generated when the sewer rate is applied to the amount of water used as measured by the water meter, since most of it ends up as sewage. This money is used to collect, transport and treat sewage so that it meets environmental requirements before it is released to the Red and Assiniboine Rivers.

Sewer System Rehabilitation Reserve - On May 27, 1992, City Council authorized the establishment of the Combined Sewer Renewal Reserve and the Wastewater Sewer Renewal Reserve Funds. These Reserves were established for the renewal and rehabilitation of combined sewers and wastewater sewers, respectively, with funding provided from the frontage levy identified for this purpose in By-law 549/73 (amended by By-law 7138/97). The purpose of the reserves was to provide a consistent approach to financing infrastructure renewal and rehabilitate combined sewers and to renew and rehabilitate wastewater sewers (as defined by the Sewer Utility By-law 5058/88).

The annual frontage levy funding was allocated by City Council between the Combined Sewer Renewal Reserve and the Wastewater Sewer Renewal Reserve in accordance with the capital program requirements.

On January 30, 2002, City Council passed By-law No. 7958/2002 "Frontage Levy By-law" to include the repair and replacement of streets and sidewalks in residential areas.

On September 27, 2006, City Council approved the consolidation of the Combined Sewer Renewal Reserve and the Wastewater Sewer Renewal Reserve Funds into the Sewer System Rehabilitation Reserve Fund, which was effective on October 1, 2006.

On December 15, 2009, City Council authorized, by way of approval of the Capital Budget, that effective 2009, frontage levy revenue collected on property taxes would no longer fund the Sewer System Rehabilitation Reserve as of 2011. Therefore, the Sewer System Rehabilitation Reserve is fully funded through sewer rates transferred from the Sewer Disposal System Fund as well as interest earned on the reserve fund balance.

The Director of Water and Waste is the fund manager.

Shared Health - Shared Health leads the planning and coordinates the integration of patient-centered clinical and preventive health services across Manitoba. The organization also delivers specific province-wide health services and supports centralized administrative and business functions for Manitoba health organizations.

Short-term Rental Accommodations – or STRA means a dwelling unit which is rented in whole or in part for a period of less than 30 consecutive days in exchange for payment of money or other value.

Sinking Fund - A fund established by setting aside annual contributions or levies over a period of time to fund the repayment of long-term debt at maturity. The city administration manages the sinking fund contributions on sinking fund debentures.

Solid Waste Disposal Services Revenue - The service consists of several primary sources of revenue including tipping fees, waste diversion user fees and residential recycling revenue (a definition of each can be found in this glossary).

Southwest Rapid Transit Corridor Reserve - On March 26, 2008, City Council approved that a Rapid Transit Infrastructure Reserve Fund be established, and that the purpose of the Reserve be to accumulate funds and subsequently to expend on future costs incurred on account of public transit infrastructure, including the construction of rapid transit corridors contemplated in the future.

On October 22, 2008, City Council approved that the purpose of the Rapid Transit Infrastructure Reserve be revised to accumulate funds and subsequently expend on costs incurred on account of public transit infrastructure, including the operation and construction of the rapid transit infrastructure, structures and facilities, development, and other related costs including bus purchases, technology, personnel, and land acquisition.

On January 29, 2013, City Council approved that effective January 1, 2014, the reserve be renamed the Southwest Rapid Transit Corridor - Stage 2 Reserve. In addition the purpose has been revised to: a) accumulate capital funds and subsequently expend such funds on future costs incurred on account of public transit infrastructure, and more specifically, the construction of the Southwest Rapid Transit Corridor - Stage 2, and the purchase of vehicles associated with Stage 2, contemplated in the future; b) contribute to the proposed Jubilee Rapid Transit Station if net proceeds of the disposition of the subject City property are insufficient to cover the City's share, as approved by City Council on October 24, 2012; c) pay for any residual land acquisition settlements for the Southwest Rapid Transit Corridor - Stage 1 project; and d) pay for the ongoing replacement of the 10 buses purchased for the Southwest Rapid Transit Corridor Stage 1 project.

On March 23, 2015 City Council approved that the reserve be renamed the Southwest Rapid Transit Corridor Reserve.

This reserve will be closed effective 2024 Budget.

The Director of Transit is the fund manager.

Southwest Rapid Transitway (Stage 2) and Pembina Highway Underpass Payment Reserve - On March 23, 2015 Council approved the establishment of the Southwest Rapid Transitway (Stage 2) and Pembina Highway Underpass Payment Reserve for the purpose of setting aside funding for the P3 annual service / financing payments commencing in 2019 for the Southwest Rapid Transitway (Stage 2) and Pembina Highway Underpass capital project.

The funding source from the City was originally approved as dedicated property tax revenue transferred from the General Revenue Fund, a one-time fare increase in 2016 and an annual grant from the Province. Subsequently, the one-time fare increase was removed and the Province has advised the annual grant will not be provided. A 2/3 vote of Council is required in order for the use of funds to be other than those stipulated.

Appendix O

The Director of Transit is the fund manager.

Special Operating Agency (SOA) - A special unit of an organization which can operate within or outside the existing city department structure in the delivery of its service(s). It is granted more direct responsibility for results and increased management flexibility needed to attain new levels of service delivery. The authority for SOAs is provided by the City of Winnipeg Charter Section 215.

Standing Committees - Sub-committees of City Council delegated certain powers and duties to facilitate the administration of their assigned City departments which report through them to the Executive Policy Committee and City Council. They also provide a forum for public input and receive recommendations from Community Committees related to their respective responsibilities. Areas of responsibility are Finance and Economic Development; Public Works; Property and Development; Community Services; and Water, Waste and Environment.

Strategic Priorities Action Plan (SPAP) – A four-year plan that aligns with both the four-year Council term as well as the forthcoming four-year budget cycle. A key principle of the strategic planning process was to allow all members of Council equal opportunity to participate in the development of the SPAP. Council and the Public Service used the strategic planning process to build trust, achieve common understanding, discuss opportunities and challenges, and build consensus on key priority actions to be undertaken over the duration of the four-year Council term. The SPAP identifies five key priority themes and 42 priority actions across the five themes which are:

- The Downtown;
- A Strong Economy;
- A Liveable, Safe, Healthy, Happy City;
- A Green and Growing City with Sustainable Renewal of Infrastructure; and
- A City that Works for Residents through Improved Customer Service.

Strategy - Those steps taken in support of public and internal service goals.

Target - An identified goal that a service area is trying to achieve. In the context of departmental performance measurement, identified targets are levels of service which directly or indirectly indicate progress towards identified departmental goals.

Tax Penalty Interest - This revenue is generated from property and business tax accounts that are in arrears. Tax penalties are applied to tax accounts in arrears in accordance with the Tax Penalty By-law 5796/91 and the Tax Sale Penalty By-law 8157/2002.

Tax-Supported Services - Goods and services supplied by the City whose costs are supported, in whole or in part, by funds received through property tax revenues.

Tipping Fees - This revenue is generated from charging a per tonne rate to residential and commercial garbage delivered to the City landfills.

Transfers - Refers to transfers to and from reserves, departments, and/or funds.

Transfer to Capital - The mill rate supported funding source for capital projects. The transfer to capital amount is sourced from the general revenue (mill rate supported) fund and moved to the general capital fund to finance the City's capital priorities.

Transformative Reserve - On January 27, 2022, City Council approved the establishment of the Transformative Reserve Fund that is separate and distinct from the current Land Operating Reserve and is to be funded from the sale of surplus golf courses or the sale of Surplus Leased Buildings. The Transformative Reserve Fund is a special purpose reserve intended to support investments that transform the delivery of services and reduce the City's infrastructure deficit with a focus on recreation, public green space as well as preservation, protection and enhancement of Winnipeg's tree canopy. The Transformative Reserve Fund is intended to target significant greenspace or natural habitat acquisition opportunities.

The Director of Planning, Property and Development is the fund manager.

Transit Bus Replacement Reserve - On December 15, 1994, City Council approved the establishment of the Transit Bus Replacement Reserve Fund. The purpose of the reserve is to provide financing for the replacement or refurbishment of transit buses in a scheduled and pragmatic manner. Contributions to this reserve will be based on a budgeted appropriation from the Transit Department plus proceeds from the disposal of bus equipment and insurance claims on bus equipment written off. Upon the Transit Department making the outlay to replace or refurbish buses, this reserve will contribute towards that purchase.

The Director of Transit is the fund manager.

Transit Infrastructure Reserve - On April 29, 2021 Council approved the establishment of the Transit Infrastructure Reserve for the purpose of funding the annual debt and financing costs incurred for the replacement of the North Garage capital project. Effective January 1, 2028, this reserve will be funded through dedicated property tax revenue transferred from the General Revenue Fund; as well as transfers from other Transit reserves.

The purpose of this reserve will be to fund the annual debt and financing costs for the replacement of the North Garage as a priority, and any remaining funding available will be used to fund transit infrastructure such as bus rolling stock and related charging infrastructure, land acquisitions and other associated costs.

The Director of Transit is the fund manager.

Transit Plus - a service of Winnipeg's public transit system that provides door-to-door transportation for people who are unable to regularly use the City's fixed route transit system because they are legally blind or have significantly impaired mobility. Winnipeg Transit Plus registrants use a variety of mobility aides including scooters, canes, walkers, and both manual and motorized wheelchairs.

Transit Service Fare Revenue - The revenue generated when the type or class of fare is applied to the applicable rider. There are different rates based on time period (i.e. single ride, weekly, monthly, etc.), method (i.e. cash or e-card) and whether rider qualifies for a student, reduced or regular fare.

User Fees/Charges - The payment of a fee for direct receipt of a public service by the party who benefits from the service.

Utility - A utility or public utility provides funding and maintains the infrastructure for and provides a rate-based service that is consumed by the public such as water, wastewater, waste disposal, and public transportation.

Vacancy Management - Estimated savings derived from delaying the filling of vacant positions which were budgeted for.

Appendix O

Vehicles for Hire (VFH) - The Vehicles for Hire By-law No. 129/2017 was approved by Council on December 13, 2017 and came into effect on February 28, 2018. Regulatory responsibility legally transferred from the provincial government to municipalities pursuant to the requirements of Bill 30 – The Local Vehicles for Hire Act, which will dissolve the existing Taxicab Board, the Taxicab Act and associated regulations, and transition oversight and regulation of the vehicle for hire industry to the City of Winnipeg effective February 28, 2018.

Waste Diversion User Fee - This revenue is generated to fund new programs that provide residents with more ways to reduce, reuse and recycle. The fee is charged on a daily basis according to dwelling units and appears on the water bill.

Waste Diversion Reserve - On October 19, 2011, City Council approved the establishment of the Waste Diversion Reserve Fund for the purpose of funding waste diversion programs and projects. The reserve is to be funded by surplus monies collected through the waste diversion services user fee. The first transfer to the reserve occurred in 2013.

The Director of Water and Waste is the fund manager.

Water Service Sales Revenue - This revenue is generated when the water rate is applied to the amount of water used, as measured by the water meter. This covers the cost of bringing water from Shoal Lake to the consumer, including operating and maintaining the aqueduct, pumping stations, reservoirs, and distribution system.

Water Main Renewal Reserve - On February 18, 1981, City Council established this reserve fund for the purpose of financing the renewal of watermain. It was initially created by the transfer from the Waterworks System and funded through a frontage levy. Since 2009, the source of funding for the Water Main Renewal Reserve is water rates.

The Director of Water and Waste is the fund manager.

Water Meter Renewal Reserve - On January 30, 2020, City Council authorized the establishment of the Water Meter Renewal Reserve to fund a program for the replacement and renewal of water meters with advanced meters. The reserve is funded by customers through the Daily Basic Charge.

The Director of Water and Waste is the fund manager.

Winnipeg Police Board - The Winnipeg Police Board provides civilian governance and oversight of the Winnipeg Police Service to improve transparency and accountability in policing. It is made up of seven civilian members. Five members are appointed by Winnipeg City Council and two are appointed by the Province of Manitoba. It receives its authority from Manitoba's Police Services Act (2009) and a City of Winnipeg By-Law (148/2012).

Winnipeg WAV - On January 21, 2022, the Vehicle for Hire (VFH) office awarded the contract to begin the process for creating the Winnipeg WAV (wheelchair accessible vehicle) Accessible Centralized Dispatch system. The Winnipeg WAV is a pilot project to address improvements to accessible on-demand service, in line with the needs of both residents and the industry.

The goals of this pilot project are to:

- Ensure a comparable level of service for those who use accessible or standard vehicles for hire;
- Improve safety of passengers;
- Provide incentives to drivers and owners of accessible vehicles;

- improved tracking of accessible trips and wait times, in order to continue to reduce wait times. Winnipeg WAV was launched in May 2022.

WINNpass – the WINNpass program provides eligible individuals or families the opportunity to purchase full-fare transit passes/fares at a reduced rate.

Workers Compensation Reserve - Under the terms of By-law No. 9802 of the former City of Winnipeg, provision was made for the establishment of a Workers Compensation Reserve Fund. On January 1, 1972, as a result of the amalgamation of the City of Winnipeg with former area municipalities, The Workers Compensation Reserve Fund was established in accordance with Section 338 of the former City of Winnipeg Act.

The City administers its workers compensation program on a self-insured basis. In lieu of paying premiums to the Workers Compensation Board of Manitoba, the City pays actual costs incurred plus an administration charge. Departments are charged actual costs as well as surcharges related to financing fatality pensions and upgrades of benefits. The net result is that costs and surcharges are transferred to/from the Workers Compensation Reserve Fund. The Workers Compensation Reserve Fund serves to counteract any budgetary fluctuation from year to year that would result from a work related incident of major proportions.

On April 29, 2015, Council approved an amendment to the purpose of the Workers Compensation Reserve

- 1) To include Permanent Partial Impairment awards for occupational disease claims and
- 2) That pension surplus/deficit from Workers Compensation Board be accounted for in the Workers Compensation Reserve.

The Corporate Controller is the fund manager.
