

Urban (Downtown) Design Review Application Form

Use this application for any development, redevelopment, expansion, demolition, or exterior changes in downtown Winnipeg. Urban Design Review is required under Downtown Zoning By-law No. 100/2004, even if your project doesn't need a permit or other approval. This review helps make sure new buildings or site changes follow design guidelines and fit in the surrounding area.

If you are applying to demolish a building, you must include a plan. It must show what will happen to the site after demolition, and when it will be redeveloped.

Plans of development

Type of document Explanations & notes Should reference the proposed development application to the context. It is important to consider why you are taking a particular photo. What is it that you are trying to illustrate? In the case of a signage application for example, if the photos are taken perpendicular to the building face, the photo can be enlarged to a known scale (such as ¼" = 1') if an architectural building elevation is not available. The sign can then be overlaid on the photo to create a composite image. If the photos are taken at an angle to the building face, the photo cannot be scaled properly and the resulting images are usually distorted. Applicant is discouraged from submitting perspective renderings too. Typical photos required Colour photographs • Primary street frontage Secondary street frontages Adjacent property (what impact will your application have on the adjacent properties) **Note:** When photos and building elevations are provided, the applications can usually be expedited since site visits are not as likely to be required for the staff to properly assess the application in every applicant's interest, and therefore can spend more time on the front end of the process.
