Reader's Guide

This **Reader's Guide** is intended to provide the reader with a basic understanding of the supplement to the 2026 adopted budget, developed from the budgeting process, as well as briefly describe the document's content and layout.

The **Supplement to the 2026 Adopted Budget** provides summary and detailed information on capital projects and financing for the capital program, and additional information for the operating budget, set out in the following sections:

- ❖ The **Capital Project Summary** provides a listing of capital projects for 2026 through to 2031, highlighting related financing sources.
- ❖ The **Capital Project Detail** section gives additional information about each project in the budget, including project descriptions, current year's budget and five-year forecast, cash flow projections, net impact on the operating budget, and previous budget authorizations, if applicable. The capital estimate and service area are identified, as well as the link to OurWinnipeg and the Strategic Priorities Action Plan to ensure all capital projects align with city objectives.
- ❖ The **Appendices** provide additional context information in support of the budget documents.

Capital Project Summary

2026 Adopted Capital Budget and 2027 to 2031 Five-Year Forecast

Notes:

1. In the attached Capital Project Summary, tax supported capital projects are financed by cash to capital unless other funding is disclosed for the project.
2. Unallocated Province of Manitoba Strategic Infrastructure Funding has not been included in the capital budget. Funding will be reflected in future years as projects are identified.

Capital Project Detail

2026 Adopted Capital Budget and 2027 to 2031 Five-Year Forecast

Notes:

1. Capital Budget amounts are estimates only and are subject to materials management policy (e.g. tenders, bids, and contract awards including Public Private Partnership Proposals).
2. The Public Service uses a cost estimate classification determined using AACE International Recommended Practices for capital budget estimates – see Appendix C.
3. Included in the capital project authorizations are corporate and departmental overhead amounts (FTE related costs, administrative costs, etc.). Consistent with asset management principles, specific recoveries are included in the capital project business case/basis of estimate. Actual expenses may vary from budget depending on in-year circumstances.
4. Included in the capital budget authorizations, for Public Works only, are amounts for Strategic Municipal Infrastructure Research (SMIR), not to exceed 0.5% of tax-supported infrastructure preservation capital budgets, as approved by Council on April 30, 2003. Infrastructure is defined as permanent physical systems of a community, including roadways, utilities, water, sewage, buildings and parks. SMIR funding is essential to undertake research that will optimize life cycle costs and innovate to provide the best value for construction and preservation of Public Works infrastructure.
5. Capital projects could be aligned to multiple *OurWinnipeg* goals; however, the most relevant goal is noted on individual projects. *OurWinnipeg* is the guiding development plan for the City.
6. Capital projects are also aligned to the Strategic Priorities Action Plan (SPAP). SPAP outlines Council's key priorities and actions.

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

Projects within the program will not proceed until a class 3 estimate is obtained.

** N/A as this is a rolling program.

The Pedestrian and Cycling Program supports the delivery of the City's long-term vision to maximize transportation options by ensuring the accessibility, comfort, and safety of walking and cycling in Winnipeg.

Budget is used for the construction of new pedestrian and cycling facilities, facilities enhancements, studies, and support for public education, awareness and promotions of walking and cycling. The budget may be utilized for the purchase of land to facilitate the delivery of new and enhanced facilities as required. Funding is also used to support public engagement and design studies in advance of planned road renewals.

The Director of Public Works may be required to reallocate funds within the Pedestrian and Cycling Program based on financing requirements.

Grants and land lease payments paid from the program are not subject to City overheads.

On July 15, 2015, Council approved the Winnipeg Pedestrian and Cycling Strategies (PCS) with the following motion: All costs included in the Pedestrian and Cycling Strategies are estimates, no budget allocation is included with the approval of the Pedestrian and Cycling Strategies document, and all projects and project costs relating to the Pedestrian and Cycling Strategies document will be considered by City Council through the annual budget process. Pedestrian and Cycling Action Plans will be presented to the Standing Policy Committee for information on a yearly basis to provide status updates on previous and current projects.

On July 13, 2016, Council approved the recommendation of the Standing Policy Committee on Infrastructure Renewal and Public Works: That all projects related to the Pedestrian and Cycling Strategies document be submitted to the Standing Policy Committee on Infrastructure Renewal and Public Works for recommendation to Council.

On April 20, 2021, the Standing Policy Committee on Infrastructure Renewal and Public Works passed a motion that every September the Public Service shall provide the standing committee with the next year's proposed work plan for the Pedestrian and Cycling Strategies document, highlighting any changes from the current five-year forecast.

Any surplus funds will automatically be transferred to the following year's Pedestrian and Cycling Program Budget. On December 15, 2021, Council directed that any surplus funds from Active Transportation (AT) infrastructure identified as part of the report described in Recommendation 2.J. of the 2022 budget be transferred and dedicated to the following year's AT capital program.

On December 15, 2021, Council directed (as per 2022 Adopted Capital Budget recommendation 2L) the Public Service to:

i. Include active transportation facilities in all road renewals and rehabilitations that have been included in the 2022 Preliminary Capital Budget and 2023 to 2027 Five-Year Forecast, if facilities in those locations have been identified within the Winnipeg Pedestrian and Cycling Strategies.

PUBLIC WORKS - GENERAL CAPITAL FUND

Pedestrian and Cycling Program (continued):

ii. That in the event the road project and the active transportation facilities exceed the delegated authorities of the public service, or the project cannot be built as contemplated in the Winnipeg Pedestrian and Cycling Strategies, the Public Service be directed to report back to the appropriate Committee of Council on their recommendation to construct the facilities as prescribed, with a request for additional spending authorities, or recommend an alternate plan to restore the connectivity of the active transportation strategies network.

iii. Update the Winnipeg Pedestrian and Cycling Strategies in conjunction with the next update of the Transportation Master Plan to ensure that future roads investments requiring AT will be reviewed and analyzed prior to making road investments.

The Pedestrian and Cycling Program supports the following program areas:

Sidewalks Regional and Non-Regional - Various Locations

Includes construction of new sidewalks where none presently exist and where provision is warranted. The prioritization of locations will be guided by the update to the Pedestrian and Cycling Strategies, approved by Council on June 26, 2025 as part of the Transportation Master Plan 2050. These sidewalk construction projects may be combined with nearby road renewal contracts where feasible, while others may become standalone projects or a package of sidewalk projects.

Bicycle Corridors

Development of new bicycle facilities on the Bicycle Network as prioritized in the Pedestrian and Cycling Strategies. Provides support to complete gaps in the Bicycle Network. Supports the supply and installation of permanent and temporary bicycle parking through an annual Bicycle Parking Grant program. Provides additional funding to support the development of Neighbourhood Greenways during local street renewal projects. Considers support for a pedestrian and cycling monitoring strategy. Supports the replacement of pre-cast curbs on existing routes, as required.

Development of Neighbourhood Greenways - bike routes introduced on neighbourhood streets with low vehicle speeds and volumes that may include a range of treatments to slow down traffic and reduce traffic volumes to improve safety for walking, biking and driving.

Recreational Walkways and Bicycle Paths

Construction of new recreational walkways and off-street bicycle path facilities where no walkway or cycle facility presently exists, and where the provision of such a facility is warranted.

Public Education, Awareness and Promotion

Support educational programming, public safety and awareness in support of walking and cycling. Supports the promotion of new and existing pedestrian and cycling facilities including a walking and cycling communications strategy. Considers support for a City-wide wayfinding system.

Partnership Grant Program

The Public Education, Awareness and Promotion partnership grant program provides a funding opportunity for not-for-profit / community based industry partners who promote cycling and active transportation in Winnipeg. Grant applications are submitted, assessed and approved annually.

*** Funding will support external consulting and/or up to two internal temporary full-time project management staff (2.0 full-time equivalents) to undertake contract administration, design work and public engagement activities related to active transportation construction projects, both stand-alone and as part of future street renewal projects.

The Director of Public Works be authorized to prioritize other pedestrian and cycling projects based on opportunities that arise if extra funding is available due to program projects being completed below estimates and/or funded through other capital programs. All additional works will be communicated through the annual pedestrian and cycling updates.

See Appendix H for details on Active Transportation project funding in the 2026 capital budget - 6-year total of \$112.841 million.

The estimated useful life of assets within this program ranges from five to 75 years dependent upon the asset class under consideration.

On January 29, 2025, Council authorized a first charge of up to \$2.286 million for 2026 projects in 2025 or prior to the adoption of the 2026 capital budget to facilitate their timely delivery, including Maryland St/Sherbrook St Upgrade to Protected Bike Lanes and Northwest Hydro Corridor Phase 2 Construction.

On December 17, 2025, Council authorized first charges in the amount of \$3.2 million for the 2027 Lagimodiere Twin Overpasses Rehabilitation Multi-use Paths in 2026 or prior to the adoption of the 2027 capital budget to facilitate timely delivery of the project.

Funding of \$6.830 million in 2026 includes previously approved funding - see Appendix D.

25-30 locations per year to be identified for repair or replacement of vehicle detection equipment	Transportation Planning and Traffic Management	4	250	250	250	258	266	274	1,548
Total			250	250	250	258	266	274	1,548

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

Projects within the program will not proceed until a class 3 estimate is obtained.

This is an annual program which includes city-wide repair and replacement of vehicle detection in order to maintain proper (designed) operation of signalized intersections. Damaged vehicle detection loops or radar are replaced with modern radar vehicle detection technology.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Class Estimate: See table below

Strategic Priority Action Plan Theme: A Green and Growing City with Sustainable Renewal of Infrastructure

SPAP Action Item: 4.9 Increase coordination to address speeding, traffic calming, properly designed streets, and modern road and sidewalk engineering

Project description (in priority order)	Service	2026 Class Est	2026	2027	2028	2029	2030	2031	Total
LED display replacements	Transportation Planning and Traffic Management	N/A**	250	250	250	250	250	250	1,500
Traffic signals bases replacements	Transportation Planning and Traffic Management	N/A**	1,250	1,250	1,250	1,295	1,341	1,389	7,775
Total			1,500	1,500	1,500	1,545	1,591	1,639	9,275

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

This program is to replace traffic signal bases in poor condition and LED bulbs at end of useful life. Traffic signal bases provide the structural foundation for traffic signal poles and cabinets and are crucial for the safe construction and operation of traffic signals. In total, approximately 500 high-risk bases must be replaced. Additionally, LED bulbs that provide for signal illumination are aging and fading, and many require replacement.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

** N/A as this is a rolling program.

Camera network expansion	Transportation Planning and Traffic Management					290	386	380	1,056
Total			200	200	200	496	598	598	2,292

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

Projects within the program will not proceed until a class 3 estimate is obtained.

Funding for this program will provide for the renewal of Traffic Management Centre (TMC) equipment which has reached the end of its useful life, including the renewal of modems for both TMC cameras and traffic signal controllers as part of supporting the full range of TMC services.

Beginning in 2029, this program will further support the expansion of the camera network by 10 cameras each year with a goal to achieve full coverage of the regional street network by 2034. An additional \$33,000 in annual operating costs starting in 2030, will be required each year to support licensing, data contracts and camera installation.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Strategic Priority Action Plan Theme: A Green and Growing City with Sustainable Renewal of Infrastructure

SPAP Action Item: 4.3 Accelerate implementation of the Pedestrian and Cycling Strategy

Project description (in priority order)	Service	2026 Class Est	2026	2027	2028	2029	2030	2031	Total
Lighting improvements	Transportation Planning and Traffic Management	5	1,000		200	200		400	1,800
Total			1,000	-	200	200	-	400	1,800

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

Projects within the program will not proceed until a class 3 estimate is obtained.

This program funds the addition and/or renewal of lighting, with focus on multi-use paths with inadequate or no lighting as well as underlit locations on arterial and collector streets. The program improves safety by increasing visibility at intersections, pedestrian crossings, and along roads and also increases the sense of comfort and personal security along pathways. It encourages the use of active transportation (AT) as a mode of choice by making it a more acceptable and safe option for people who are hesitant to use active modes when it is dark.

Funding in 2026 (\$1.0 million) will support the replacement of approximately 159 end-of-life old style decorative heritage poles with new heritage-style poles along Main Street between Rupert & Portage and Portage Avenue between Main & St Mary in the downtown area. This funding includes previously approved amounts - see Appendix D.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

To be identified**	Transportation Planning and Traffic Management	5	2,328	654	1,128	1,133	1,126	1,042	7,411
Total			5,068	6,154	7,458	8,628	8,886	9,152	45,346

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

Projects within the program will not proceed until a class 3 estimate is obtained.

Funding in 2026 includes \$2.134 million re-budgeted amounts from prior year authorizations. See Appendix D.

** Locations are submitted to Standing Policy Committee on Public Works for approval prior to construction.

** Includes funding in 2026 and beyond to support up to two temporary full-time project coordinators (2.0 full-time equivalents) to undertake contract administration and design work related to road safety improvement projects, both stand-alone and as part of future street renewal projects.

Strategic Priority Action Plan Theme: A Green and Growing City with Sustainable Renewal of Infrastructure

SPAP Action Item: 4.9 Increase coordination to address speeding, traffic calming, properly designed streets, and modern road and sidewalk engineering

This investment funds corridor studies to determine required improvements needed on the Strategic Road Network (SRN). The SRN, as identified in the Transportation Master Plan 2050, is a select set of regional corridors in Winnipeg that have been designated to prioritize the safe and efficient regional movement of vehicles and goods. Funding in 2026 supports the development of a Class 3 estimate to determine and prioritize the specific corridors to be studied.

The investment provides for the renewal of the sand and winter salt storage facilities at 1220 Pacific Ave and 1539 Waverley St. The renewal aims to meet target levels of service, reduce risks, and enhance operational efficiency by constructing fabric super structures with steel tube truss frames. The work would maintain the City's compliance with applicable federal and provincial legislation regarding the storage and use of snow and ice control products.

Funding will support the construction of a four-lane divided roadway between Waverley Street and Frontier Trail, as identified in the Waverley West Area Structure Plan (WWASP). To complete the Bison Drive Extension, a reconfiguration of the Bison and Waverley intersection is also required. Funding of \$900,000 was approved in 2025 from the Regional Street Renewal Program to support the development of a Class 3 estimate for an intersection design which aims to maintain or improve the performance for the critical movements at this intersection.

	2026	2027	2028	2029	2030	2031
Class Estimate		5	5			
Authorization (\$000's)						
Detailed Design & Construction		5,000	8,000			

The full Route 90 Improvements project includes three main components – bridge rehabilitation and road renewal, road widening and capacity improvements, and sewer upgrades and drainage improvements. This is an approximate eight-year project with a total funding requirement of \$613.9 million plus debt financing, assuming the project is authorized by 2027.

Funding allocated in 2027 (\$5.0 million) and 2028 (\$8.0 million) allows planning for the bridge rehabilitation portion of the project to move forward while the remaining funding sources for the full project are determined.

Funding in 2026 for land acquisition needs related to the project resides within a separate program: Land Acquisition for Trade Corridors.

For the full project to proceed, funding from other levels of government will likely be required. Based on the current Class 3 estimate of \$613.9 million and considering ineligible expenditures, it is estimated that funding from the other two levels of government under a typical tri-party cost sharing agreement would be approximately \$175 million each, leaving the remaining \$263.9 million (before construction period interest) to be funded by the City.

Projects within the program will not proceed until a class 3 estimate is obtained.

Any surplus funds will automatically be transferred to the following year's Regional and Local Street Renewal Program Budget.

PUBLIC WORKS - GENERAL CAPITAL FUND

Regional and Local Street Renewal (continued):

On May 14, 2008, Council concurred in the recommendation that a policy be adopted to incorporate Active Transportation (AT) facilities into any reconstruction or rehabilitation required on any infrastructure identified as an Active Transportation facility in the Proposed Active Transportation Network. On July 15, 2015, Council adopted the Pedestrian and Cycling Strategies as the long range pedestrian and cycling transportation policy for the City of Winnipeg. Depending on the proposed street renewal treatment and the planning and priority status of the proposed sidewalk or pedestrian and/or cycling facility, the Regional and Local Street Renewal program may include new sidewalks or implement the intention of the Winnipeg Pedestrian and Cycling Strategies.

On December 15, 2021, Council directed that any surplus funds from Active Transportation infrastructure identified as part of the report described in Recommendation 2.J. of the 2022 adopted budget be transferred and dedicated to the following years' AT capital program.

On July 13, 2023, Council adopted the Proposed Funding Strategy for Multimodal Roadway and Bridge Infrastructure which approved funding of tree preservation and replacements as part of local street renewal projects. This can include tree protection, tree removal, tree replacement, the addition of modular suspended pavement systems, and any other work within the limits of street renewals to protect, maintain or improve the urban canopy.

A separate two percent property tax increase dedicated to regional and local road renewals is planned for 2028 to 2031. In 2026 and 2027, the one percent and two percent property tax increase will be dedicated to tax supported operations, respectively. The 2027 roads capital program will be funded by the Provincial Strategic Infrastructure Funding.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Regional Street Renewal Program

The Regional Street Renewal program includes the renewal and reconstruction of the City's regional streets, sidewalks and recreational walkways/paths, as well as incorporating pedestrian and cycling facilities on regional street renewal projects where identified in the Winnipeg Pedestrian and Cycling Strategies. The program also funds the condition rating of regional streets. The purpose of this program is to maintain the level of service, structural integrity, and rideability of the transportation infrastructure network.

All Regional Street Renewal projects have a warranty period after substantial completion and/or in-service date for which costs may be incurred by the City. The Director of Public Works is authorized to establish projects to a maximum of \$100,000 each to charge costs associated with warranty work should the related Regional Streets project be closed. The capital budget for the new project will be allocated from other surpluses within the program.

Any new projects using surplus funds in the 2026 Regional Street Renewal Program shall be approved by the Standing Policy Committee on Public Works.

A Regional Street Renewal Reserve (RSRR) was established in 2014 to increase investment in regional streets. On March 20, 2019, Council approved a change to the RSRR to include repair, renewal, and replacement of bridges.

Use of the Regional Street Renewal Reserve for purposes other than regional street, sidewalk or bridge renewals requires approval of 2/3 of City Council.

On January 29, 2025, Council authorized a first charge of up to \$60.730 million for 2026 regional streets in 2025 or prior to the adoption of the 2026 capital budget to facilitate timely delivery of the projects. Refer to Attachment 1 of the 2025 Budget Council Recommendations for specific locations (also noted on page 74).

On December 17, 2025, Council authorized first charges in the amount of \$58.435 million for 2027 regional streets in 2026 or prior to the adoption of the 2027 capital budget to facilitate timely delivery of the projects. Refer to page 74 for details.

Funding includes \$5.6 million in 2026 and \$1.109 million in 2028 rebudgeted from previously authorized capital projects - see Appendix D.

Local Street Renewal Program

Local Streets are all non-regional streets including residential streets, collector streets, industrial streets, and park streets. The Local Street Renewal program includes the renewal and reconstruction of the City's local streets, sidewalks, and alleys, as well as constructing new sidewalks on local street renewal projects where identified in the Winnipeg Pedestrian and Cycling Strategies or where the terms for New Non-Regional Sidewalks under the Pedestrian and Cycling Program are met. The program also funds the condition rating of streets, sidewalks, alleys and recreation walkways/paths. The purpose of this program is to maintain the level of service, structural integrity, and rideability of the transportation infrastructure network.

On November 20, 2013, Council amended the Local Improvement process by creating a pilot program for six years (2014-2019) whereby the City of Winnipeg will finance asphalt paving of granular lanes as local improvements to the maximum of 50% of the cost of the improvement; and approved that the \$1 million Granular Lane Fund be used as a funding source for the City's share of the amended Local Improvement Program. On July 19th, 2018, Council approved a six-year extension to this program (2020-2024). On December 15, 2021, Council extended the program to 2027. The approval of the annual budget will extend the program to the five-year capital forecast. A portion of the Granular Lane Improvement Program includes funding dedicated to the lane pulvimixing program: \$1.0 million (2026 - 2031).

PUBLIC WORKS - GENERAL CAPITAL FUND

Regional and Local Street Renewal (continued):

All Local Street Renewal projects have a warranty period after substantial completion and/or in-service date for which costs may be incurred by the City. The Director of Public Works is authorized to establish projects to a maximum of \$100,000 each to charge costs associated with warranty work should the related Local Streets project be closed. The capital budget for the new project will be allocated from other surpluses within the program.

Any new projects using surplus funds in the 2026 Local Street Renewal Program shall be approved by the Standing Policy Committee on Public Works.

A Local Street Renewal Reserve (LSRR) was established in 2013 to increase investment in local streets, lanes and sidewalks. On March 20, 2019, Council approved a change to the LSRR to include the repair, renewal, and replacement of bridges.

Use of the Local Street Renewal Reserve for purposes other than local streets, alleys, sidewalk or bridge renewals requires approval of 2/3 of City Council.

As per recommendations B.1 and B.2 of the Road Construction Working Group Report, approved by Council on September 26, 2019, specific local streets are included in the program details. See next pages for program details.

On January 29, 2025, Council authorized a first charge of up to \$2.0 million for 2026 local streets in 2025 or prior to the adoption of the 2026 capital budget to facilitate timely delivery of the projects. Refer to Attachment 1 of the 2025 Budget Council Recommendations.

Annual program to carry out reactive and emergency repairs, preventative maintenance, improvements, major repairs, minor rehabilitation or replacement of existing bridges, overpasses, underpasses, culverts and related bridge infrastructure, ensuring continued and continuous service of these facilities to the maximum practical extent.

On March 20, 2019, Council approved a change to the Local Street Renewal and Regional Street Renewal reserves to include the repair, renewal, and/or replacement of bridges as an eligible expense to be funded from these reserves.

On January 29, 2025, Council authorized a first charge of up to \$3.9 million for 2026 projects in 2025, or prior to the adoption of the 2026 capital budget, to facilitate their timely delivery.

On December 17, 2025, Council authorized a first charge of up to \$3.279 million for 2027 projects in 2026, or prior to the adoption of the 2027 capital budget, to facilitate their timely delivery.

Class Estimate	5		3	3	3	
Authorization (\$000's)						
Detailed Design & Construction	8,000		2,000	14,709	17,144	

The project will rehabilitate the existing two lane Louise Bridge to improve condition, increase vertical clearance (to 4.15 m), and strengthen the bridge. The existing Louise Bridge is in poor condition due to age-related deterioration. It requires annual closures for reactive repairs and requires significant work to remain operational. Funding in 2026 will support more immediate needs to stabilize two river piers in the winter of 2025/2026.

The major benefit of constructing this project includes maintaining current levels of service related to bridge capacity, safety, and condition, ensuring reliable movement of people, goods, and services. Significant risks associated with constructing this project include potential cost escalation due to market bidders limited availability, construction schedule delays related to weather or supply chain constraints. Significant risk of not constructing or deferring the project is the inability to maintain the essential level of service, which could result in accelerated deterioration of the existing structure, increased maintenance costs, reduced safety and reliability, and potential closures impacting mobility.

A rehabilitation of the existing bridge would provide a minimum 30 years of additional service life until an expanded bridge is required to complete the remainder of the Eastern Rapid Transit Corridor under the Rapid Transit Priority 4 investments.

On March 20, 2019, Council approved a change to the Local Street Renewal and Regional Street Renewal reserves to include the repair, renewal, and/or replacement of bridges as an eligible expense to be funded from these reserves.

Project will not proceed until a class 3 estimate is obtained.

PUBLIC WORKS - GENERAL CAPITAL FUND

Osborne Street Underpass (continued):

The scope of work for this project is to examine cost effective functional design alternatives for an active transportation grade separation, in the vicinity of the existing Osborne Street Underpass, to address a gap in the Active Transportation Network to cross the Canadian National Railway mainline. In addition, functional design will be undertaken to review rehabilitation of the existing Osborne underpass to address deficiencies in land drainage, vertical clearance, pavement condition, and traffic operations through the Osborne/Pembina/Corydon/Donald intersection. Detailed design is anticipated to commence in 2030.

Project will not proceed to construction until a class 3 or better estimate is obtained.

PUBLIC WORKS - GENERAL CAPITAL FUND

Lagimodiere Twin Overpasses Rehabilitation (Concordia Avenue and CPR Keewatin) (continued):

This project includes major rehabilitation of the Lagimodiere Twin Overpasses over Concordia Avenue and the Canadian Pacific Railway (CPR) Keewatin rail lines. Construction will take place over a two-year period from 2026 to 2027. The remainder of the funding resides within the Regional Street Renewal Program in 2026 to support associated roadworks. The major benefit of constructing this project includes maintaining current levels of service related to bridge capacity and condition. Significant risks associated with constructing this project include project delays related to railway coordination. Significant risk of not constructing or deferring the project is the inability to maintain essential level of service. The rehabilitated structure will provide an additional 50 years of service life.

On January 29, 2025, Council authorized a first charge of up to \$20 million for 2026 preliminary design work in 2025 or prior to the adoption of the 2026 capital budget to facilitate timely delivery.

On December 17, 2025, Council authorized a first charge of up to \$15.742 million in 2026 or prior to the adoption of the 2027 capital budget to facilitate timely project delivery.

This project will rehabilitate the existing bridge deck on the Lagimodiere Boulevard at CN Reddit Bridge to maintain its current level of service. The rehabilitation will optimally extend the bridge deck's service life an additional 50 years, requiring only preventative maintenance for the foreseeable future.

Strategic Priority Action Plan Theme: A Green and Growing City with Sustainable Renewal of Infrastructure

SPAP Action Item: 4.9 Increase coordination to address speeding, traffic calming, properly designed streets, and modern road and sidewalk engineering

This project will replace the aging and deteriorated crossing structure over Bunn's Creek as part of the Henderson Highway North Improvements project identified within the Regional Street Renewal Program.

The major benefits of constructing this project include maintaining current levels of service for pavement and culvert condition while supporting the safe and efficient movement of people, goods, and services.

Significant risks associated with constructing this project include potential cost escalation due to limited contractor availability and market conditions, as well as construction delays due to weather, supply chain constraints, or unforeseen site conditions.

Significant risks of not constructing or deferring the project include continued roadway deterioration, reduced safety and service levels, increased maintenance costs, and a higher risk of culvert failure that could require emergency repairs and result in extended lane closures.

PUBLIC WORKS - GENERAL CAPITAL FUND

Project Name: **Omand Park Pedestrian Bridge Rehabilitation**

Standing Policy: Public Works
Committee:

Department: Public Works
Project: 1805000727
Service: Active Transportation

Incremental Full Time Equivalent Positions	-	-	-	-	-	-

Class Estimate: 5

Strategic Priority Action Plan Theme: A Green and Growing City with Sustainable Renewal of Infrastructure

SPAP Action Item: 4.3 Accelerate implementation of the Pedestrian and Cycling Strategy

This project will replace the existing low-lying Omand Park Pedestrian Bridge and approach pathways. The Omand Park pedestrian bridge over Omand's Creek is in poor condition due to age-related deterioration, and is frequently closed due to flooding. Adjacent pathways are steep and do not meet accessibility guidelines. The new bridge is to be designed for a 75+ years service life and will be approximately 2.8 meters higher than the current bridge. The adjoining pathways will be designed to meet current accessibility standards.

Additional funding of \$418,000 for preliminary design is budgeted within the Waterway Crossings and Grade Separations Program in 2026.

The Disraeli Bridges and Overpass Facility was procured using a public-private partnership (P3) approach and the facility opened on November 19, 2012.

The City will make on-going lease payments to Plenary Roads Winnipeg (PRW) extending until 2042. These payments are required under a 30-year contract with PRW and cover the remaining capital cost of the facility as well as the maintenance of the facility.

There are significant provisions in the contract to ensure the City's specifications are met and the facility is returned to the City in good condition at the end of the contract. Costs associated with monitoring this contract, including the salary recovery of the Senior Project Review/P3 Specialist and other P3 costs are also included in this budget. Non-performance deductions may occur where the City's specifications are not met.

A portion of the payment to PRW represents an annual amount dedicated to the maintenance of the facility, including long-term rehabilitative costs. This amount is adjusted for changes to the Consumer Price Index on an annual basis.

PUBLIC WORKS - GENERAL CAPITAL FUND

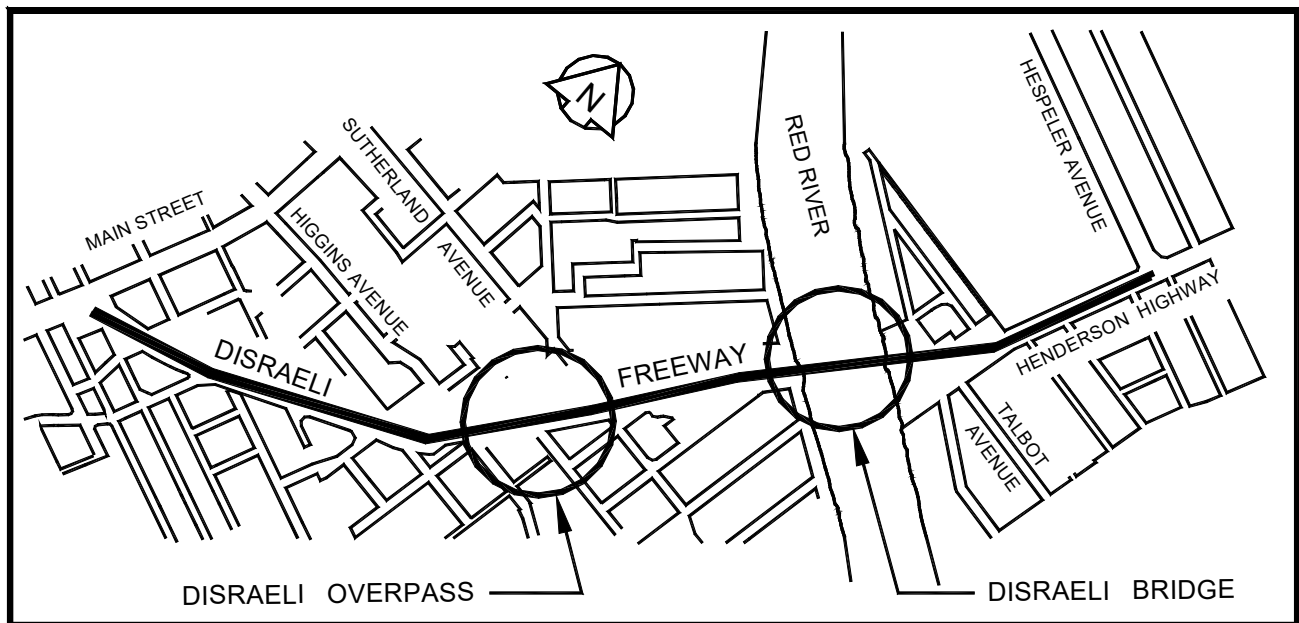

Disraeli Bridge and Overpass Facility (continued):

A portion of the project (\$75 million) was financed by \$25 million in external debt, with the balance being financed internally. The Public Service issued \$25 million in external debt at an interest rate of 3.759% over a repayment term of 40 years. Debt servicing represents interest and principal repayment of external debt and internal financing.

The above annual estimates relate to the maintenance phase of the project and include the authorization for the lease payments and debt servicing related to the facility.

In accordance with Bylaw 8164/2002 where the City's capital budget has not been adopted before January 1 of the year to which the budget is applicable, the Chief Administrative Officer is authorized, before the adoption of the capital budget, to approve expenditures not exceeding 30% of the amount the City of Winnipeg is contractually obligated to pay annually in respect of Public-Private Partnerships, as a first charge against the General Capital Fund.

As financing and administration costs are implicit in the lease payments, this project is exempt from the Corporate Administration and Interest charges.

PUBLIC WORKS - GENERAL CAPITAL FUND

Asset Management System (continued):

The asset management program in the Public Works Department is centered on the application of quality management principles to the operation, maintenance, and renewal of infrastructure. A primary objective is the development and implementation of methodologies to preserve the infrastructure and to identify the funding necessary for the long-term preservation of the assets to support service delivery.

An objective of the asset management program is to extend this systematic structural quality management approach to all the infrastructure under the Public Works Department responsibility. Funds are required to implement new or maintain existing asset management programs.

Funds may be used to support seasonal temporary positions (up to 2.0 full-time equivalents) to undertake infrastructure inventory data collection, analysis and reporting, and/or support IT staff augmentation costs associated with inventory software configuration.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

PUBLIC WORKS - GENERAL CAPITAL FUND

Parkland Naturalization and Restoration Program (continued):

This program will support the implementation of restoration and naturalization projects within parks to address gaps in service, particularly in geographic areas of higher poverty, and in accordance with the Greenspace, Natural Corridors and Biodiversity Plan (pending) and Natural Areas Asset Management Plan (to be developed).

Naturalization is the process of restoring disturbed areas to include more native plant life and terrain, improving the natural functioning of these lands. Depending upon the location, this can include native trees (saplings), prairie grasses, wildflowers, shrubs, etc.

Funds may be used to hire seasonal temporary positions (up to 2.0 full-time equivalents) to support the implementation of various naturalization and restoration projects.

The estimated useful life of assets within this program ranges from one to 100 years dependent upon the natural asset under consideration.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

** N/A as this is a rolling program.

Strategic Priority Action Plan Theme: A Livable Safe Healthy Happy City

SPAP Action Item: 3.5 Increase funding to local and regional parks based on the optimal stage in infrastructure lifecycles

Program is focused on playground restorations, including play equipment and safety surface replacements, along with associated amenity and pathway improvements to enhance accessibility, and other park and recreation enhancements. It is generally delivered by the Planning, Property and Development Department on behalf of the Parks and Open Space Division of the Public Works Department.

Funding is to be allocated annually as follows:

- Approximately \$300,000 each year dedicated to address general playground and amenity safety concerns as they arise city-wide.
- Remaining funding to be divided equally between each of the fifteen electoral wards.
- Any grants paid from the program require Council approval; upon approval grants will not be subject to City overheads.

The Director of Public Works may be required to reallocate ward budgets on approval of the ward councilors.

Strategic Priority Action Plan Theme: A Livable Safe Healthy Happy City

SPAP Action Item: 3.5 Increase funding to local and regional parks based on the optimal stage in infrastructure lifecycles

These capital dollars represent the City's ongoing commitment to Assiniboine Park building repairs, upgrades and park improvements.

The first year of funding for this capital grant was 2010 with \$5.123 million provided each year from 2010 to 2019 and \$5.1 million in 2021. The redetermination process for the grant was last completed in 2020 and funding has been included at \$5.9 million from 2026 - 2027, \$5.4 million annually thereafter.

Additional funding of \$2.0 million in each of 2025, 2026 and 2027 will support replacement of the Animal Hospital that is required for the Zoo's accreditation. This represents the City's 30% contribution to the project.

The capital grant authorized through this capital budget is currently under redetermination to confirm future requirements for 2026 onward.

The release of capital funds is subject to annual explanation and submission from Assiniboine Park Conservancy of projected cash flow needs, to the Public Service.

As this is a capital grant program, it is exempt from interest and administrative overhead capital charges.

The estimated useful life of assets within this program ranges from five to 75 years dependent upon the asset class under consideration.

* N/A - No amounts have been included in the "Previous Budgets" due to this commitment's on-going nature.

Total			11,061	9,202	9,600	9,888	10,185	10,485	60,421

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

Projects within the program will not proceed until a class 3 estimate is obtained.

This program supports sustainable urban forest management practices in alignment with the service targets established in the Winnipeg Urban Forest Strategy.

The program will further support consultation and external services including studies, policy development, plans, and other related action items established in the Winnipeg Urban Forest Strategy, as required.

Funding in 2026 includes seasonal temporary positions (up to 12 full-time equivalents).

The funding from Natural Resources Canada of \$2.603 million relates to the cost-sharing agreement and ancillary agreement between the Federal Government and the City of Winnipeg for the Two Billion Trees grant program.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

** N/A as this is a rolling program.

COMMUNITY SERVICES - GENERAL CAPITAL FUND

Library Facility Safety, Security and Accessibility Improvements Program (continued):

This capital program addresses workplace and public health, safety, security, and accessibility issues. Library facility amenities must be refurbished to meet public health and safety standards, regulations, and to meet the needs of the public.

Capital funding is required to address three areas:

1. Safety/security issues need to be addressed in many libraries including installing and upgrading closed circuit television system video monitoring technology, and other building upgrades as required to ensure that libraries remain safe and welcoming to the community and to deter vandalism and graffiti.
2. Universal design / accessibility issues, both physical and customer-service related, need to be addressed including upgrading lighting, adding exterior ramps, upgrading public and staff washrooms, improving wayfinding signage, and installing life-safety apparatus to meet the needs of persons with disabilities. Also includes signage needs on the exterior and interiors of library facilities, including electronic signs, for promotion of services and programs that are required to make libraries more visible to the community.
3. Health related items such as hygienic or ergonomic furniture, Automated External Defibrillators (AEDs) and sanitary water bottle filling stations.

The expected life of library AEDs, security and CCTV equipment is 10 years or less.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Strategic Priority Action Plan Theme: The Downtown

SPAP Action Item: 1.4 Expand access to existing facilities and programming for recreation, library, community gathering, and 24/7 safe spaces, especially downtown.

This project supports safety improvements at the Millennium Library. Upgrades on multiple floors to railings and the staircase will be prioritized with the remaining budget to be used for the lobby, that may include refinements to the flow of traffic and security viewing/control to enhance safety for both users and staff. These improvements are designed to support a secure and welcoming environment, aligned with the Library Services' commitment to community well-being and lifelong learning.

COMMUNITY SERVICES - GENERAL CAPITAL FUND

St. Boniface Outdoor Aquatic Facility (continued):

The St. Boniface Outdoor Aquatic Facility project involves the design and construction of a new destination outdoor pool that will be physically accessible and include contemporary pool features such as a beach entry, slides, spray features, shaded seating areas, diving board(s), pool change/washroom and mechanical systems building. The project will also include any associated park redevelopment needed to accommodate the outdoor pool.

In 2024, the City (Ward Councilor and Public Service) identified six possible park locations for the St. Boniface Outdoor Aquatic Facility and launched a public engagement process in fall 2024 for community input. Three of the locations were prioritized for further study including an assessment of potential capital costs. A recommended location will be brought forward for Council's consideration in 2026. The new outdoor pool is anticipated to cost approximately \$20 million but an updated Class 5 estimate will be developed based on the site selected and the initial concept.

The previously approved capital funding of \$2.247 million will support preliminary design to obtain a class 3 estimate for the project and provide an initial City contribution towards detailed design and construction. However, project construction is subject to leveraging other governmental or third party funding. Construction will not proceed until the project is fully funded.

An incremental increase to operating budget will be required but cannot be estimated at this time. Additional funds will be included / requested when the design advances and operating costs can be determined.

The expected life of an outdoor pool is 35 years.

Project will not proceed until a class 3 estimate is obtained.

Strategic Priority Action Plan Theme: A Livable Safe Healthy Happy City

SPAP Action Item: 3.6 Increase funding to implement the Winnipeg Recreation Strategy

Between 2025-2029, this capital program will construct nine new spray pads to address service gaps and replace and/or decommission 16 wading pools. A second round of spray pad development (and subsequent wading pool decommissioning) will begin in 2031 with the sites to be determined in future years but prior to 2030. Selected locations will be in alignment with the levels of service defined in the Council adopted Wading Pool Rationalization & Spray Pad Reinvestment Strategy that forms part of the Winnipeg Recreation Strategy. Spray pads are intended to serve a two kilometer (km) catchment area. However, if the spray pad is serving a geographic area of higher poverty the catchment area is one km.

Recommendations on implementation considered the decision-making parameters identified in the two strategies noted above. For spray pad investments, considerations include: opportunities to improve service and address an existing service gap; co-location at multi-use sites to have supportive amenities such as washrooms and parking; supports a geographic area of higher poverty; provides an opportunity to consolidate older wading pools within the target level of service catchment; and supports existing community plans or initiatives. Considerations related to decommissioning wading pools are: asset age and condition; notable design or functional challenges; low

COMMUNITY SERVICES - GENERAL CAPITAL FUND

Spray Pad Investment Program (continued):

utilization rates; proximity to existing (or planned) alternate wading pools/spray pads within the target level of service catchment; and opportunities for investment in alternate recreation/park amenities.

When wading pools and the associated wading pool buildings are decommissioned and removed, the area will be backfilled and sodded.

The expected life of a spray pad is 25 years.

The program will support one temporary full-time equivalent position that is required to coordinate and advance the projects within the program.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Implementation Plan:

Wherever feasible, the implementation approach is to complete construction of the spray pad prior to decommissioning the identified wading pools. There are a few exceptions where other considerations (in one instance other community plans/initiatives) have resulted in a slightly different timeline.

Spray Pad Investment	Design Started	Spray Pad In Service	Wading Pools To Be Decommissioned	Year

New spray pad site(s) to be determined by 2030	2031	2033	Existing wading pools to be decommissioned will be determined by 2030 once the site of new spray pad(s) are selected	2032

Construction will not commence until a Class 3 estimate is obtained.

Upon completion of approved projects, any unspent budget will be reallocated to other projects within the program based on need at that time.

The project lists and timing are subject to change due to operational requirements, identification of technical limitations or regulatory requirements that make implementation unfeasible, and unexpected urgent needs.

Class Estimate: 4

Strategic Priority Action Plan Theme: A Livable Safe Healthy Happy City

SPAP Action Item: 3.6 Increase funding to implement the Winnipeg Recreation Strategy

Project construction will not proceed until a class 3 estimate is obtained and the project is fully funded.

The project involves the development of a new Bonavista Recreation and Leisure Centre to serve established and new neighbourhoods in southeast Winnipeg. An approximately 11 acre parcel of parkland has been acquired in the Bonavista neighbourhood (on Warde Avenue) for development of the facility and other outdoor recreation and parks purposes.

The 2024 capital budget included \$250,000 to complete a feasibility study, with a public engagement process, and to obtain a class 4 cost estimate for the facility. This work was completed in 2025 and identified an opportunity to develop the new centre in two phases: Phase 1 is an initial smaller base building with multi-purpose programming space and associated site works that could be followed by phase 2 which would be a future gymnasium addition. The Class 4 cost estimate for the first phase of the project is estimated at \$13 million but will be further refined through preliminary design.

Design of the base building will begin in 2026 utilizing approximately \$1.0 million of the current available budget of \$5.0 million approved in 2025 and 2026. However, additional funding will be required to allow construction of the base building to proceed. Available grant/funding opportunities will be pursued in order to advance the project. As noted above, project construction is subject to completion of a Class 3 estimate (or better) and the project being fully funded.

Incremental operating costs for the facility assume that it will be operated as a Community Centre and have been calculated using the Universal Funding Formula for City of Winnipeg Community Centres.

The expected life of recreation buildings is 50 years.

An indoor aquatic facility is planned as a future component of the South Winnipeg Recreation Campus (SWRC) in order to provide an integrated, multi-use, multi-generational regional recreation facility that meets the needs of growing communities in southwest Winnipeg. The SWRC is intended to serve a catchment area of four to six kilometers that will be home to more than 120,000 residents.

Funding in 2026 is for preliminary design to obtain a class 3 estimate for construction of the indoor aquatic addition which is planned to consist of lap and leisure pools along with affiliated mechanical/filtration systems, change rooms, administrative and program spaces, and site development. The current class 5 total estimated project cost is \$58.5 million. The total estimated project cost will be refined and updated upon completion of the preliminary design and class 3 estimate.

Incremental operating costs cannot be estimated at this time and will be included when known.

The project is subject to leveraging other governmental or third party funding. Project construction will not proceed until a class 3 estimate is obtained and the project is fully funded.

Detailed Design & Construction	2,000					

Project construction will not proceed until a class 3 estimate is obtained and the project is fully funded.

In the 2016 Capital Budget, Council approved \$100,000 for a feasibility study to explore the need, design options, and costs of a potential renovation and expansion of the Tyndall Park Community Centre to provide additional space to address the community centre's programming needs, expanded catchment area, and accessibility requirements. The feasibility study completed in 2019 recommended a facility addition consisting of a gymnasium and multi-purpose room. Public engagement completed in early 2020 confirmed support for the proposed concept.

The current class 5 total estimated project cost exceeds \$10 million but the estimate requires updating due to substantial changes in market conditions and new regulatory requirements including the January 2024 adoption of the 2020 National Building Code.

Capital funding of \$500,000 in 2026 will support preliminary design to obtain a class 3 estimate for the expansion and related site works. The remaining funding in 2026 is allocated for detailed design and construction but is subject to leveraging other governmental funding that would allow construction to proceed.

COMMUNITY SERVICES - GENERAL CAPITAL FUND

Tyndall Park Community Centre - Gymnasium Expansion (continued):

An incremental increase to the Universal Funding Formula operating grant will be required but cannot be estimated at this time. Additional funds will be included / requested when the design advances and operating costs can be determined.

The total estimated project cost will be refined and updated upon completion of the preliminary design and class 3 estimate. Additional funding will be required in future years to advance detailed design and construction of the facility. As noted above, construction of the project will not proceed until a class 3 estimate (or better) is obtained and the project is fully funded.

The expected life of recreation buildings is 50 years.

COMMUNITY SERVICES - GENERAL CAPITAL FUND

East of the Red Recreation Plex (continued):

The 2023 Capital Budget included \$2 million to complete preliminary design and obtain a class 3 cost estimate for the project. Preliminary design and a public engagement process was completed in 2025. The East of the Red Recreation Plex (ERRP) is proposed as a City-owned-and-operated, regional, multi-use, multi-generational recreation facility. The facility consists of an aquatic facility, two gymnasiums, multi-purpose room and activity spaces, community kitchen, indoor track, movement studios, accessible change rooms and fitness space, all designed to be attached to the recently constructed Transcona Library located at 1 Transcona Boulevard. Additionally, through the preliminary design process, a child care centre (to be operated by a third-party provider) was also included in the design of the facility which will be advanced as a zero-carbon building.

The following next steps are preliminary and are subject to change and confirmation of sufficient funding:

2025 Q4 - Capital budget submission for detailed design and construction submitted for Council consideration, subject to the approval of a funding contribution agreement with other levels of government.

2026 Q4 - Capital project fully approved/funded. This step assumes a one-year process to negotiate a funding contribution agreement with other levels of government.

2027 Q1 - Detailed design services awarded/commence (approx. 12 months duration)

2028 Q1 - Detailed design complete, class 1 cost estimate established

2028 Q2 - Construction contract tender

2028 Q3 - Construction contract award/start of work (approx. 24 months duration)

2030 Q3 - ERRP commissioning and facility opening

Capital funding in 2026 and 2027 provides initial funding toward the City's contribution for an infrastructure funding agreement that would allow detailed design and construction of the project to proceed.

The expected life of recreation buildings is 50 years.

Incremental operating costs cannot be estimated at this time and will be included when known.

The project is subject to leveraging other governmental or third party funding.

SPAP Action Item: 3.6 Increase funding to implement the Winnipeg Recreation Strategy

	2026	2027	2028	2029	2030	2031
Class Estimate		3/5				
Authorization (\$000's)						
Preliminary Design		523				
Detailed Design & Construction		1,100				

Project construction will not proceed until the project is fully funded.

The cost of the project is currently estimated at a class 5 level as \$9 million. Capital funding in the amount of \$523,000 in 2027 is requested for the preliminary design of the outdoor pool to obtain a Class 3 cost estimate. The total estimated project cost will be refined and updated upon completion of the preliminary design and class 3 estimate. Additional funding will be required in future years to advance detailed design and construction of the facility.

Capital funding in 2027 also includes \$1.1 million as initial funding toward the City's contribution for design and construction. However, project construction is subject to leveraging other governmental or third party funding. Construction will not proceed until the project is fully funded.

The existing outdoor pool at this site is in poor condition and lacks the capacity to adequately serve the needs of the community. The pool is located in a geographic area of higher poverty and it does not meet current accessibility standards nor provide adequate play value and amenities. The new pool will include contemporary pool features such as an accessible pool access ramp, slides, spray features, shaded seating areas, diving board(s), a new pool change/washroom and mechanical system building.

The expected life of an outdoor pool is 35 years.

Incremental operating costs cannot be estimated at this time and will be included when known.

Fort Rouge Leisure Centre and Osborne Library are part of a multi-use facility that also includes Sam Southern Arena. Located in a geographic area of higher poverty, the facility is well-used with high utilization rates and is an important community asset. However, the building has a number of functional limitations and accessibility challenges including the lack of elevator access to the second floor programming spaces. There is also a need to address safety and security concerns while ensuring the facility remains a welcoming community space.

The feasibility study will assess redevelopment opportunities for the building and surrounding site. Public engagement will be included as part of the planning process. The final study will include a preferred concept with a Class 4 cost estimate.

Project construction will not proceed until a class 3 estimate is obtained and the project is fully funded.

SPAP Action Item: 3.6 Increase funding to implement the Winnipeg Recreation Strategy

St. James Civic Centre is over 50 years old and phased capital projects to renew and upgrade the facility have been occurring for the last few years. Capital investment is required to renovate the existing pool change rooms and to construct a universal change room addition attached to the west side of the St James Civic Centre. Concerns about the size and limited level of accessibility of the pool change rooms has been increasing. The current change room configuration does not have sufficient space to create universal change rooms so an addition is required.

Preliminary design of the addition has already been completed. Detailed design will begin in 2029 with construction estimated to start in 2031.

Net operating impacts include an additional \$37,000, beginning in 2031, to support the increased operating costs for utilities, cleaning, and other accommodation costs.

Project construction will not proceed until the project is fully funded.

The expected life of recreation buildings is 50 years.

Fort Garry Lions Outdoor Pool is located at the intersection of Pembina Highway and McGillivray Blvd. It is the most southern outdoor pool owned by the City. It provides outdoor aquatic opportunities to residents living in nearby neighbourhoods including areas of higher poverty along Pembina Highway. Originally constructed in 1960, the pool is reaching the end of its useful life and in poor condition with limited accessibility.

Funding in 2030 will support a feasibility study and Class 4 cost estimate for the redevelopment of the outdoor pool, wading pool, and supporting site amenities. The feasibility study will look at options to redevelop the pool and site to create a larger destination pool that is fully accessible and increases the play and leisure value for all ages.

Project construction will not proceed until the project is fully funded.

Strategic Priority Action Plan Theme: A Livable Safe Healthy Happy City

SPAP Action Item: 3.6 Increase funding to implement the Winnipeg Recreation Strategy

Located in an area of higher poverty, the Freight House Recreation Centre building was built in 1903, is in very poor condition and is oddly configured, with many different stakeholders and programs segmented throughout the building. The feasibility study will help determine the current condition of the facility and potential options for reconfiguring and/or redeveloping on the site. The study will include engaging with stakeholders and the public to determine a collective vision for the building and site that will better serve the community now and in the future. Future operating and capital requirements at a Class 4 level will be determined through the options analysis of the feasibility study.

Project construction will not proceed until the project is fully funded.

SPAP Action Item: 3.6 Increase funding to implement the Winnipeg Recreation Strategy

Pan Am Pool is a major competitive aquatic sports venue that supports international, national, and provincial competitive events. It attracts residents from across Winnipeg due to its unique and specialized amenities. However, the facility is more than 50 years old, struggles to meet usage demands, is becoming increasingly obsolete and unable to meet the service requirements. Many of its building components are also reaching end-of-life. Further study and lifecycle analysis is needed to determine the most cost-effective approach to maintain this city-wide service while minimizing risk.

The redevelopment study will involve working with interested stakeholder organizations to explore options for the redevelopment or replacement of Pan Am Pool including the potential of different partnership arrangements. The project will assess the limitations and opportunities of the current location and facility to develop a feasibility assessment and business case for the redevelopment or replacement of Pan Am Pool that considers current and future service needs, facility lifecycle needs, different development approaches, alternate locations, possible operating models and costs, along with Class 5 estimates of capital costs and financing opportunities.

Project construction will not proceed until the project is fully funded.

Strategic Priority Action Plan Theme: A Livable Safe Healthy Happy City

SPAP Action Item: 3.6 Increase funding to implement the Winnipeg Recreation Strategy

The Community Centre Renovation Grant Program (CCRGP), approved in February 2012, is to provide up to \$2.00 million in dedicated funding to renovation projects for City-owned, board-run community centres in order to maintain and/or improve community centre infrastructure. The program is open to all General Council of Winnipeg Community Centres (GCWCC) in Winnipeg, is subject to an application process and project evaluation completed by a joint committee of GCWCC and the City, with maximum City contributions to each project of \$100,000 per project, subject to the grant program criteria.

Annually, up to \$965,000 is funded by the Land Operating Reserve. Transfers from the Land Operating Reserve (not to exceed \$1.2 million in aggregate) to the General Revenue Fund (\$235,000 for GCWCC programming grant) and General Capital Fund (\$965,000 for this CCRGP) are to be equal to 15% of the aggregate of gross land sales and the City's proportionate share of land sales derived from government business partnerships for the fiscal year two years prior to the budget year under consideration (e.g. transfer amounts for the 2024 budget year are based on 15% of the aggregate of actual gross land sales and the City's proportionate share of land sales derived from government business partnerships from 2022).

If actual gross land sales and the City's proportionate share of land sales derived from government business partnerships are less than the amount to achieve the maximum \$1.2 million aggregate amount (i.e. \$235,000 programming grant + \$965,000 for the CCRGP) for this program, the transfer to the General Revenue Fund of up to \$235,000 is made first with the residual balance, if any, transferred to the General Capital Fund for the CCRGP.

The program includes one temporary full-time equivalent position in the Community Services department to help coordinate and advance the CCRGP projects and is recovered through the program.

The expected life of recreation buildings is 50 years.

As this is a capital grant program, it is exempt from interest and administrative overhead capital charges.

Strategic Priority Action Plan Theme: A Livable Safe Healthy Happy City

SPAP Action Item: 3.7 Restore the community incentive grant program

The Community Incentive Grant Program (CIGP), established by Council on March 6, 1985, was designed to encourage non-profit community recreation and sport organizations to undertake capital projects which would result in long-term benefits to the community at large in terms of improved service and facilities.

Community Committees are the delegated authority to allocate CIGP funding.

The total funding is allocated equally to each Community Committee/ward, net of operating expenses for one permanent full-time equivalent position that is required to coordinate, administer, and support new and existing projects in the program.

In 2027, a maximum total of \$51,000 is available for the St. Boniface Ward due to \$23,000 being realigned to the St. Boniface Outdoor Aquatic Facility project. The remaining CIGP budget in 2027 will be allocated equally to the remaining 14 wards.

The 2028 to 2031 allocation for the St. Boniface Ward has been realigned to the St. Boniface Outdoor Aquatic Facility project. The CIGP budget in years 2028 to 2031 will be allocated equally to the remaining 14 wards.

As this is a capital grant program, it is exempt from interest and administrative overhead capital charges.

* N/A - No amounts have been included in the "Previous Budgets" due to this commitment's on-going nature.

On July 18, 2007, Council approved the award of a public private partnership (P3) contract for the development and operation of the East District Police Station based on a 30-year lease term. Occupancy date was in September 2008.

The above annual cash flow estimates include the authorization for the lease payments to be incurred and charged to the project in the General Capital Fund. They include technical maintenance, but not utility and other operating maintenance expenses.

As financing and administration costs are implicit in the lease payments, this capital project is exempt from the administration and short-term financing charge.

On March 22, 2016, Council authorized a first charge of up to 30% of the annual lease payments prior to the adoption of the annual capital budget, in the event the capital budget is adopted after December 31, in order to facilitate payments on the P3 contract.

In accordance with Bylaw 8164/2002, where the City's capital budget has not been adopted before January 1 of the year to which the budget is applicable, the Chief Administrative Officer is authorized, before the adoption of the capital budget, to approve expenditures not exceeding 30% of the amount the City of Winnipeg is contractually obligated to pay annually in respect of Public-Private Partnerships, as a first charge against the General Capital Fund.

The terms of the lease agreement between the City of Winnipeg and Huntingdon Real Estate Investment Trust ("HREIT") for the development and operation of the East District Police Station included a leasehold improvement allowance of \$825,000 to be provided in years seven (7), fourteen (14) and twenty-one (21) of the initial lease term. The commencement date of the lease agreement was September 15, 2008, and, as such, the first leasehold improvement allowance was due and payable during the one-year period from September 15, 2015.

In 2014, HREIT was acquired by Slate Management Corporation ("Slate") and, in accordance with the terms of the lease agreement, Slate remitted to the City in 2015/16 an \$825,000 leasehold improvement allowance, the first of three. In September 2022, Slate remitted the second \$825,000 leasehold improvement allowance, which is the financing source for this capital program budget. The Municipal Accommodations Division (Assets and Project Management Department), in close consultation with the Winnipeg Police Service, is responsible for delivery of the leasehold improvements work.

The work to which this funding will be allocated is prioritized according to the results of the building's condition assessment by Municipal Accommodations and Winnipeg Police Service staff. Note that the allowance is restricted to leasehold improvements as defined in the lease. Monies cannot be directed towards structural or infrastructure items, which fall under the landlord's responsibility.

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

Information received from the members of the public calling 9-1-1 is communicated to field responders (police, fire, and paramedic) via the City of Winnipeg's radio system. For this reason, the City of Winnipeg Public Safety services (WPS and Winnipeg Fire Paramedic Service (WFPS)) rely on P25 compliant radios to provide a mission-critical link between members in the field and 9-1-1 Communication Centre for real-time exchange of information and effective coordination of emergency response. The P25 system and equipment are required to maintain the safety of the residents of the City of Winnipeg. In addition, the P25 radios provide officer safety protection and are relied upon in all manner of events, including dangerous and violent incidents.

This program supports hardware renewals including the radios, mobiles, consoles, consolettes and infrastructure.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

WINNIPEG POLICE SERVICE - GENERAL CAPITAL FUND

Public Safety Answering Point Equipment Program (continued):

This program is directly related to the Federal regulations governing Public Safety Answering Point (PSAP) providers.

The purpose of this program is to:

- Maintain and update operating systems, providing sufficient and robust functionality and security for the 9-1-1 system.
- Support cybersecurity best practices in a 9-1-1 communications centre settings.
- Allow for call handling system upgrades as they become available.
- Implement functionality on the call handling platform, including additional data flows from multimedia sources.

The goal is to provide the city's residents with a more effective emergency response that can scale and match their dynamic set of needs for years to come by:

- Reducing Emergency Responder arrival times to events – due to better situational awareness of events going on within the city
- Improving response times for non-emergency calls.

On December 17, 2025, Council authorized a first charge of up to \$571,000 in 2026 or prior to the adoption of the 2027 capital budget to facilitate the timely delivery of the 911 Software Renewal.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

With this capital funding the Winnipeg Fire Paramedic Service seeks to maximize the efficiency of the station network. This is achieved through relocations, replacements, and major enhancements to stations that help reduce costs but maintain the desired level of response.

This project will consolidate the Silver Heights (#19, 320 Whytefold Rd.) and Portage Avenue stations (#36, 2490 Portage Ave.) on the existing city property. The consolidated station will maintain service capability and coverage of both areas.

The new consolidated station will be the relocated modular station from Waverley West. The modular station will stay in place until it is replaced with a permanent one in 2034.

2027:

A Silver Heights site will be finalized based on existing City owned land in the CentrePort area. The site will be developed to receive the modular station.

2028:

The Modular Station in Waverley West will be disassembled and moved to the new site in CentrePort. Crews will move in, and the two old stations will be decommissioned.

The former Modular Station site will be restored to its former condition.

On March 20, 2020, Council received as information the Winnipeg Fire Paramedic Master Plan. On January 28, 2021, Council referred the recommendations outlined in Appendix 2 of the Master Plan to the 2022 Budget process. This project is part of the recommendations in this Plan.

Total			975	1,034	947	1,093	1,133	1,366	6,548

Projects within the program will not proceed until a class 3 estimate is obtained.

These capital funds support an ongoing program of repair and structural maintenance to ensure station asset lives are maximized, thereby ensuring the service has an operable station network from which emergency response vehicles can be deployed across the whole city to meet required response times.

FIRE PARAMEDIC SERVICE - GENERAL CAPITAL FUND

Station Capital Maintenance (continued):

Priorities for 2026-2031 include but are not limited to:

- Roofing
- Concrete repairs to station forecourts as required
- Heating, ventilation, and air conditioning repairs, and electrical upgrade
- Back-up power solutions
- Hazardous material abatement and interior renovations

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

From 2025 on, the use of station assets for purposes related to paramedic operations will be financially supported through lease payments funded as part of the new Emergency Medical Services contract with Shared Health.

Total			3,914	1,745	1,380	1,826	1,197	1,175	11,237

This capital program supports the on-going replacement of emergency response equipment that is nearing the end of its useful operating life. The replacement timing is set to ensure continuity of front-line emergency operation while maximizing the operating life of the equipment and ensuring value for money.

FIRE PARAMEDIC SERVICE - GENERAL CAPITAL FUND

Equipment Obsolescence (continued):

The Fire Paramedic Service needs to replace the following specialized equipment in a cyclical process as it nears the end of its operating life. Funding for this equipment is provided by both the City of Winnipeg and Shared Health. The following list identifies the equipment and the funding source:

Priorities for 2026-2031 include but are not limited to:

City of Winnipeg funded assets:

- Replacement of specialty fire and rescue equipment
- Replacement of fire and rescue equipment and mechanical services equipment
- 911 communications centre equipment and radios
- Mobile data devices such as rugged mobile tablets

Shared Health funded assets:

- Replacement of emergency medical equipment
- P25 Radios and equipment
- Renewal of emergency call handling equipment
- Mobile data devices such as rugged mobile tablets

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

** The City of Winnipeg will take out debt on behalf of Shared Health for this project. Shared Health will pay the interest and principal on this debt over a five-year period.

*** Shared Health has confirmed up to \$2 million of its baseline funding to cover the funding effects of the capital program each year. The cost of this project in each year draws from this funding amount.

The Canadian Radio-television and Telecommunications Commission (CRTC) Next Generation 9-1-1 (NG9-1-1) standards require upgrades to call handling systems to ensure 9-1-1 data can be appropriately managed. These changes better respond to the needs of the public, and ensure support regardless of the device they are calling on or the way they wish to communicate. It also requires primary and back-up Public Safety Answering Points (PSAP) centres have physical and electronic security measures in place. These funds will be used to improve the 9-1-1 back-up centre to meet national standards, and to upgrade 9-1-1 communication systems and processes to meet the new NG9-1-1 standards.

Strategic Priority Action Plan Theme:None

Emergency Vehicle Pre-emption (EVP) takes advantage of the City investment in centralized traffic signal control to provide intelligent traffic signalization for emergency vehicles. This increases priority for approaching emergency vehicles to enable the clearance of the junctions along their route and allowing safer and more rapid progression through to the emergency incident.

EVP was identified as a crucial addition to facilitate the station optimization program in meeting station reductions while maintaining response capability and coverage.

Winnipeg Traffic Management Centre and the Winnipeg Fire Paramedic Service (WFPS) 911 Communication Centre completed a trial of pre-emptive system on selected intersections in 2024. The trial supported the case for EVP at most intersections.

Full implementation will start in 2026 and be completed in two years.

Traffic pre-emption control units will be added to most signaled control intersections and custom configured for local intersection conditions by traffic signals engineers. All WFPS vehicles will have pre-emption systems installed.

This project includes three temporary capital funded full-time equivalent signal engineering positions to support implementation of the system.

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

The program objective is the functional and aesthetic improvements and required upgrades to public spaces and streetscapes in the Downtown and Exchange District National Heritage Site. The funds enhance accessibility, safety, comfort and urban design quality of pedestrian environments and fulfill the commitment to the "Downtown First" philosophy. The Downtown Winnipeg Urban Design Guidelines provide the guiding principles to support design and enhance the livability of Winnipeg's Downtown urban environment.

PLANNING PROPERTY AND DEVELOPMENT - GENERAL CAPITAL FUND

Downtown Enhancement Program (continued):

The program supports and develops ongoing opportunities for future Public / Private development and redevelopment partnerships and projects such as Old Market Square, Broadway, Millennium Library Park, Bonnycastle Park and the Assiniboine River Walk. Projects have traditionally relied on and/or leveraged other partnership opportunities and have supported private redevelopments.

These public open space and streetscape improvements are over and above and exclusive of work assumed by the Public Works, Transit, and Water and Waste Departments who are responsible for existing infrastructure such as curbs, street and sidewalk repairs, street trees, planters, boulevards, required maintenance, and accessibility standards.

Planned use of 2026 budget funding includes, but is not limited to:

- Continue the work being done on Broadway to improve the streetscaping which includes seating in the median. It also includes, continuation of the work extending the Fitness Trail boundaries at Stephen Juba Park.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

PLANNING PROPERTY AND DEVELOPMENT - GENERAL CAPITAL FUND

Business Improvement Zones, Image Routes and Neighbourhood Main Streets (continued):

The City of Winnipeg reinvests in partnered projects in Business Improvement Zone (BIZ) districts and Neighbourhood Main Streets. These areas have their own distinct character with their own style of mixed-use, walkable business districts that serve as the cores of their neighbourhoods. These funds provide the opportunity for the residents and business owners to work in partnership with the City, BIZs, private sector, not-for-profit, other funding agencies, and other government bodies. This capital fund gives the incentive for the BIZ groups to go out and match dollars from sources other than the City. This capital fund, through partnerships, assists in stimulating community revitalization.

This enhancement program takes the form of decorative medians, pedestrian lighting, banner poles, special entry nodes, special pavement treatments, character signage, plants, trees and site furnishings, to ensure the renewal and sustainment of the infrastructure that creates a sense of place and destination in and along Business Improvement Zones and on Image Routes.

Projects in 2026 to 2031 are adjusted based upon community readiness and partnership opportunities.

These organizations utilize grants received from the City to leverage additional funding to undertake projects. Any one of the fourteen (14) Business Improvement Zones may be considered and reviewed for the Streetscape Enhancement Capital Grant funding. Specific allocations to BIZ groups will be subject to Council approval by way of a separate report in early year of capital funding being allocated. Project funding will be delivered as a grant to each BIZ group through legally executed grant agreements.

As this funds capital grants within this program, it is exempt from interest and administrative overhead capital charges.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The City of Winnipeg is legally obligated through the approved Development Agreement Parameters to provide payback on older Developer Agreements based on the approved 48/52 split on the development of park costs. The funding formula is that the City of Winnipeg contributes 52% to the park development costs. Additionally, recognizing the need to do work concurrently beyond the basic requirements of the Development Agreement, these funds will cover 100% of the cost of the provision of basic amenities that are more cost-effective and practical to install at the time of initial development (such as pathways, lighting, site furnishings, tree planting), particularly for linear park developments.

Applications from some of the outstanding (older) agreements are now being received due to the ongoing build out.

Calculations are based on industry consultation and the actual reviewed costs of works as they are completed each calendar year. Capital requirements are updated on an ongoing basis to reflect industry build out and Development Agreement amendments.

* N/A - No amounts have been included in the "Previous Budgets" due to this commitment's on-going nature.

Strategic Priority Action Plan Theme: None

Project description (in priority order)	Service	2026 Class Est	2026	2027	2028	2029	2030	2031	Total
New roads - Brookside and/or Transcona Cemetery	Cemeteries	3	500						500
New beams - Brookside Cemetery	Cemeteries	3	184						184
To be determined	Cemeteries			100	166		170	204	640
Total			684	100	166	-	170	204	1,324

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

In 2025, work commenced on a significant expansion project at Brookside Cemetery, which included the construction of a new road. A portion of the 2026 capital budget amount of \$684,000 will be used to complete this expansion work, which will include the installation of new beam foundations, as well as landscaping work/planting new trees. This will ensure that the Cemeteries Branch can continue to meet community demand for interments at Brookside Cemetery. A portion of the funding will also be used construct additional new roadways at Brookside and/or Transcona Cemetery. Robust sales and limited investment in new infrastructure has necessitated the need for new roadway investment, which will open up large areas of land for interments. These revenue-generating products/services will contribute to the Cemetery Service's goal of reaching financial self-sustainability.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Strategic Priority Action Plan Theme: None

Project description (in priority order)	Service	2026 Class Est	2026	2027	2028	2029	2030	2031	Total
New Pedestal Niches - all cemeteries	Cemeteries	3	121						121
New columbaria - all cemeteries	Cemeteries			179		258	116	186	739
To be determined	Cemeteries			124	326		100	109	659
Total			121	303	326	258	216	295	1,519

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

Funding is needed for the purchase and installation of columbaria and other cremation interment options within the Garden of Remembrance at each of Brookside, St. Vital and Transcona Cemeteries. The Cemeteries Business Plan (2021) found that this is the product type with the greatest projected growth trajectory, with anticipated annual sales expected to grow to nearly 100 units units by 2045. Investment is needed in order to ensure that the Cemeteries Branch can continue to meet community demand. These revenue-generating products/services will contribute to the Cemetery Service's goal of reaching financial self-sustainability.

The 2026 capital budget amount of \$121,000 will be used to expand pedestal niche capacity at Brookside, St. Vital and Transcona Cemeteries. These small, two unit structures are a popular above ground, cremation interment option and are in limited supply at all three cemeteries. This investment should provide several years of new capacity and will generate ongoing revenue for the Branch.

Strategic Priority Action Plan Theme: The Downtown

SPAP Action Item: 1.1 Accelerate completion of the downtown secondary plan (CentrePlan) taking into consideration:

The project will fund a one-time grant of \$200,000 to CentreVenture Development Corporation to support activation of Graham Avenue including event planning and infrastructure, installation and maintenance of physical items on the street, retail recruitment and retention, and ongoing support for the overarching Graham Vision:

- Event organization and streamlining permitting processes
- Provision of a permanent power source and other permanent fixtures on the street
- Decorative lighting, art installations, greenery, and infrastructure for winter activities
- Business support, as outlined in CentreVenture's retail retention strategy

Potential programming could include such things as pop-up dining/patios, farmers' markets, ice carving, street hockey, etc.

PLANNING PROPERTY AND DEVELOPMENT - GENERAL CAPITAL FUND

CentrePlan 2050 - Infrastructure (continued):

Note: Additional funding that aligns with the design philosophies of Centreplan 2050 – Infrastructure located on other capital budget project sheets includes funding from:

- “Regional and Local Street Renewal – Regional Street Renewals (Downtown Streets)” for the reconstruction and rehabilitation of Edmonton Street – Broadway to Portage Ave
- “Regional and Local Street Renewal – Regional Street Renewals (Market Lands Streets)” specific streets/limits identified are as follows:
 - Alexander Av - Princess St to Main St
 - King St - William Av to Higgins Av
 - James Av - King St to Main St
 - Princess St - William Av to Higgins Av
 - William Av - King St to Adelaide St
- “Downtown Enhancement Program” for streetscaping across Downtown.
- “Regional Street Renewal Program - Tree Preservation and Replacements” for additional street tree planting in Downtown.

As this is a capital grant program, it is exempt from interest and administrative overhead capital charges.

ASSETS AND PROJECT MANAGEMENT - MUNICIPAL ACCOMMODATIONS

Health/Life Safety/Emergency Systems Refurbishment/City-wide Accessibility (continued):

Capital Program to fund investments ensuring health/life safety requirements and the highest-and-best use investments associated with preserving continued facility operations that arise annually. Specifically, this program encompasses planned or emergency refurbishment, replacement, repair and maintenance upgrade projects for fire and life safety (e.g., emergency lighting), heating, ventilation, air conditioning, electrical, plumbing, building envelope, structural requirements, emergency power generation, and uninterrupted power systems. Funding is also allocated for critical systems including building automation and climate control, security, access control, and closed caption television systems. This program also ensures adherence to regulatory compliance upgrades, asbestos and other hazardous material remediation, and asset condition assessments. Finally, this program addresses physical accessibility issues such as lighting, signage, and public entranceways.

Planned Works for the 2026: expenditures in 2026 for items with a Class 4 or 5 estimate (i.e. Winnipeg Police Service headquarters level one slab repairs and evidence control unit upgrade, HVAC repairs and refurbishment at 1057 Logan Avenue) include expenditures for consultant/engineering studies necessary to obtain a Class 3 or better estimate.

This program includes 3 temporary capital funded full-time equivalents at an estimated cost of \$367,000 in 2026.

Funding in 2026 includes \$500,000 rebudgeted from previously authorized capital projects - see Appendix D.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

** N/A as this is a rolling program.

Strategic Priority Action Plan Theme: None

The Building Emission Reduction Strategy (BERS) is the City's roadmap to lowering greenhouse gas (GHG) emissions in City-owned buildings.

Buildings are a major source of GHG emissions for the City of Winnipeg. In 2022, energy use in City-owned buildings represented over 34 percent of total energy use in Winnipeg. City-owned buildings also contributed 21 percent of Winnipeg's GHG emissions.

The City of Winnipeg has set a goal to achieve net-zero emissions in buildings by 2050. To meet this target, substantial emissions reductions are needed. The strategy focuses on Asset Management, Operational Adjustments, and Monitoring and Feedback. These initiatives aim to reduce energy consumption, lower operational costs, and decrease greenhouse gas emissions.

Priority 1 planned works for 2026 include implementing or upgrading Building Management Systems (Metasys) and SkySpark analytics across the City-owned buildings listed in the below table. These systems will deliver real-time data and insights to optimize building performance.

Specialized shelving and equipment for Archives Building	Heritage Conservation			200					200
Total				200	-	-	-	-	200

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

The City Clerk's Department, Archives and Records Control Branch, supports records and information management City-wide, manages access and privacy responsibilities for the City, and operates the City of Winnipeg Archives and the Corporate Records Centre. The Corporate Records Centre at 1450 Mountain Avenue allows for the ability to increase storage capacity for records scheduled for retention under the Records Management By-law 123/2020 ("the by-law"), utilize specialized shelving solutions to better accommodate variable sized box transfers from departments, and realize operational efficiencies. Archival storage and public access/research services continue to be delivered out of a leased facility at 50 Myrtle.

Ongoing development of the Corporate Records Centre is essential to meet the City's records management requirements. Cost-effective storage and inventory management services enable departments to better manage records in accordance with the by-law, regulatory requirements, and the administrative standard, resulting in an increase in routine transfers of records out of expensive operational space to the more cost-effective Corporate Records Centre.

CITY CLERKS - GENERAL CAPITAL FUND

Corporate Records Centre (continued):

This program ensures that the Corporate Records Centre can continue to meet the demand for storage of records scheduled under the by-law. Costs will include installation of additional specialized shelving solutions and the purchase of equipment to manage the growing inventory to ensure that City records are protected as required by law, and can be accessed and retrieved in an effective manner.

Development of the Corporate Records Centre supports the City's commitment to increased transparency and better response times to requests through access legislation.

The expected life of the asset is five years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Maintenance and replacement of audio / video equipment	Council Services			150				175	325
Total				150	-	-	-	175	325

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

The City Clerks Department facilitates meetings of Council, Committees and the Board of Revision online via YouTube and Zoom. The department provides live streaming, live television broadcast, recording and providing various audio / video capabilities in six separate meeting areas, including the Council Chamber and the Board of Revision meeting rooms. These facilities are used for 300+ meetings of Council and its committees, and to facilitate the hearing of up to 5,000 appeals annually.

The equipment used to facilitate these meetings is used daily. Equipment includes automated cameras, microphones, speakers, amplifiers, digital recorders, live streaming equipment, closed captioning converters and digital storage. In addition to the wear and tear this equipment sustains due to its daily use, this technology changes rapidly and needs to be regularly replaced. This program ensures that the department can continue to meet its legislated requirements of allowing participation in Council and Committee meetings by communication devices (i.e. Zoom) as well as the broadcasting and livestreaming of the meetings.

CITY CLERKS - GENERAL CAPITAL FUND

Audio / Video Equipment Replacement (continued):

The department also regularly provides audio/video services for numerous City of Winnipeg events including openings, announcements, and flag raisings, where audio equipment, and other technology is required. Equipment used for protocol events including speakers, amplifiers, pool sound, etc. is often used outdoors and is required to be moved from event to event. As such, the equipment is subject to wear and tear and does require regular maintenance and replacement to ensure 100% operational ability and reliability.

The expected life of the asset is five years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The City of Winnipeg purchased its first automated voting machine system in 1994. In 2010, that system was replaced with the current automated voting machine system. The system, which includes both software and hardware for 230 voting machines, offers accessibility options for advance voting as well as detailed results by voting subdivision. Although the City Clerk's Department expects to continue to utilize these voting machines for the 2026 General Election, they will need to be replaced prior to the 2030 General Election.

This will replace the current system and be ready with a new system for the 2030 General Election.

This program will fund councilor-directed projects for investments in neighbourhood projects. Funding in each year will be divided equally between each of the fifteen wards.

Subject to Council approval, ward-specific capital projects that would normally fall under the City Capital Budget may also be designated for Communities Fund capital expenditures, especially where these expenditures would secure funding from additional partners, provided any expenditures or awards are made in compliance with criteria and rules of the Community Incentive Grant Program (CIGP) or Parks and Recreation Enhancement Program (PREP) criteria, as applicable.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Strategic Priority Action Plan Theme: The Downtown

SPAP Action Item: 1.6 Develop a city-wide housing strategy and action plan including in downtown

On September 26, 2024, Council approved grants totaling up to \$16.1 million to True North Real Estate Development Limited to support a redevelopment of public space at Portage Place Mall. This funding will support construction of a new road that will extend Edmonton Street north of Portage Avenue to the Promenade located behind the mall as well as streetscaping and other upgrades to nearby streets (\$7.5 million). It will also support construction of a new skywalk, upgrades to existing skywalks, lighting and security features within the development (\$6.5 million), and construction of a community drop-in space located within the development (\$2.1 million). In addition to these funds, Council also approved up to \$10 million from the Housing Accelerator Fund from 2025 to 2026 and an estimated \$13.6 million of municipal Tax Increment Financing over 25 years for this project.

\$4 million of Previous Budgets funded by 2024 Province of Manitoba Strategic Infrastructure Funding.

Funding includes \$1.05 million rebudgeted from 2023 Recreation and Library Facility Investment Strategy Program - see Appendix D.

The business case requests funding to upgrade the City's Information Technology (IT) infrastructure by updating server storage, network infrastructure, and data centers. This funding is crucial to ensure continuous performance, reliability, and alignment with technological advancements. Regular updates will maintain system integrity, enhance security, and improve productivity across all City departments. These investments are essential to prevent technological obsolescence and support the City's evolving needs. It will keep our city technologically current, enhancing system integrity and cybersecurity—a critical concern today—and improving productivity. The funding will also facilitate the development of a modern network infrastructure that is ready for future integration with cloud services, colocation data centers, and Infrastructure as a Service (IaaS) providers.

This program may include a total of four temporary capital funded full-time equivalent for City-wide Network Product Evergreen.

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

The Digital Customer Experience program aims to improve citizen engagement at the City of Winnipeg by providing enhanced access to information and services. Through funding projects, innovative practices will be implemented across departments to improve accessibility and service delivery, boosting resident satisfaction and confidence in City services and operations. The program seeks to enhance the City's existing digital customer platforms, such as Verint, MyUtility, and Lawyer Gateway, consolidating access into a unified online channel. This platform will cater to various external users, including citizens, lawyers, landlords, and utility customers, providing expanded features and functionalities. The City envisions investing in competitive, scalable, and robust information technologies that provide instantaneous customer information. These future-oriented solutions will equip City employees with up-to-date tools, enable field employees to access and update data on mobile devices.

This program may include a total of one temporary capital funded full-time equivalent positions for the Citizen Portal.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Strategic Priority Action Plan Theme: None

Project description (in priority order)	Service	2026 Class Est	2026	2027	2028	2029	2030	2031	Total
Projects to meet regulatory directives, maintain existing application functionality, and automate processes.	Assessment, Taxation and Corporate	3	350	245	300	300			1,195
Total			350	245	300	300	-	-	1,195

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

The program focuses on projects designed to meet regulatory directives, maintain application functionality, and streamline processes through automation in the Assessment and Taxation Department (ATD). Many of ATD's applications are outdated and need updates to ensure efficiency and regulatory compliance. These applications manage assessments for over 240,000 properties valued at \$104 billion, generating substantial municipal revenue annually. For example, MANTA, the primary taxation system, handles property and business tax billing, collections, penalties, and accounts receivable. Due to the scale of these tasks, automated and accurate processes are crucial. However, current taxation processes necessitate year-round Information Technology (IT) involvement to facilitate billing and collection activities, which is one of the many benefits this program of projects aims to generate.

The initiatives in this program may include a maximum of two temporary capital funded full-time equivalent positions.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

INNOVATION & TECHNOLOGY - GENERAL CAPITAL FUND

Community Services Library Technology Upgrade and Replacement Program (continued):

The Winnipeg Library Service supports the digital economy and fosters digital literacy by making public access computers available to all customers. Capital funds are required to upgrade and replace access computers and support new innovative and efficient technology applications in libraries to address the changing needs of customers and move towards consistent service levels in all facilities by:

- increasing the number of public access computers system-wide;
- upgrading and replacing aging public access computers, monitors and peripheral devices;
- upgrading self-checkout technology and the provision of additional smart lockers;
- refreshing IdeaMILL technology to ensure the makerspace has access to current technology;
- expanding and enhancing information services through technological innovation and digitalization projects.

Capital funding is required for this technological initiative which allow the Community Services Department (CmS) to upgrade and introduce new cutting-edge technologies. Projects under this program will integrate advanced technologies aimed at fostering efficiencies, enhance service quality, accountability and responsiveness within CmS operations. These projects will yield public service enhancements marked by increased convenience, efficiency and cost-effectiveness.

Securing funding for this initiative is essential for sustaining the life cycle replacement schedules of hardware and software components. Additionally, these projects will further enhance accessibility health and safety measures within public facilities.

This program includes one temporary capital funded full-time equivalent.

INNOVATION & TECHNOLOGY - GENERAL CAPITAL FUND

Planning, Property and Development Desktop Evergreen Program (continued):

This initiative entails an ongoing Information Technology (IT) hardware replacement program, emphasizing the transition from desktop computers to laptops. Its key objectives are to supply modern IT hardware, including laptops and docking stations, which support contemporary web standards and security protocols. The program aims to enhance organizational efficiency, ensure system stability for seamless end-user support, and promote the adoption of a modern hybrid work model. Central to this initiative is the aim to extend the lifespan and effectiveness of the City's hardware investments, thereby enhancing system functionality, bolstering security measures, and ensuring compatibility with current web technologies. By fostering a shift towards laptops, the initiative seeks to improve usability, user experience, and mitigate security risks and compatibility issues across Planning, Property and Development. The program anticipates that maintaining and enhancing technological infrastructure will catalyze organizational improvements, fostering efficiency and reliability. Funding for reliable and secure IT assets will enable continual upgrades and maintenance, enhance information accessibility and streamline workflows, ultimately improving service delivery.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

This program includes two temporary capital funded full-time equivalents.

INNOVATION & TECHNOLOGY - GENERAL CAPITAL FUND

Project Name: **Geospatial Information Systems Program**

Project description (in priority order)	Service	2026 Class Est	2026	2027	2028	2029	2030	2031	Total
Detailed analysis and assist implementation of Geospatial Information Systems (GIS) functionality critical to Water and Waste GIS usage.	Water	3	574	250	450	353	300	309	2,236
Total			574	250	450	353	300	309	2,236

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

The City of Winnipeg seeks to modernize its Geospatial Information System (GIS) to support efficient City operations. Currently our GIS, GeoMedia provided by Hexagon, is outdated and lacks the capabilities needed to meet the evolving demands of Public Works, Water and Waste, and Planning, Property and Development. With the impending contract expiration and a pressing need for advanced spatial analysis and real-time data integration, transitioning to a more technologically advanced GIS solution is recommended. A GIS that supports a wide range of data formats and facilitates interoperability with other systems and data sources is critical to the effective internal operation of the City of Winnipeg.

INNOVATION & TECHNOLOGY - GENERAL CAPITAL FUND

Information Management and Analytics Program (continued):

The City of Winnipeg recognizes the importance of digital platforms in delivering efficient services through data and Artificial Intelligence, improving customer experiences, optimizing processes, and ensuring regulatory compliance. However, current reliance on point-to-point connections leads to system inconsistencies and outdated information. To resolve these issues, several initiatives have been identified to enhance Information Technology (IT) capabilities at both the City and departmental levels.

This program will enhance data access, analytics, dashboarding, and reporting, enabling timely data reporting and insights for evidence-based decisions. Integrating Water and Waste Department (WWD) existing information systems will provide seamless information access, automate processes, and establish a single source of truth, essential for WWD to become a Utility of the Future and improve service levels.

The estimated life of the assets is 10 years.

*N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

INNOVATION & TECHNOLOGY - GENERAL CAPITAL FUND

Digital Records and Workflow Program (continued):

This program includes initiatives aimed at digitalizing, automating and streamlining the flow of digital information within the City of Winnipeg. Projects will focus on document management, version control, collaboration tools, and automation of repetitive tasks. The purpose of these initiatives is to provide staff with a centralized and integrated repository to organize and standardize document management and to improve operational efficiency and effectiveness. Currently there are service gaps with respect to capable records management capabilities, trusted and reliable management of documents, a persistent reliance on paper-based processes and document generation, and absence of standardized automated workflows.

The estimated life of this asset is 10 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

The City of Winnipeg recognizes the imperative to optimize its diverse asset portfolio, spanning linear, vertical, waste collection, laboratory equipment, and mobile assets, to bolster productivity, reduce costs, minimize downtime, and enhance long-term asset performance. Asset management entails two core components: asset oversight, focusing on maximizing asset value and performance through technology-driven data gathering and analysis for robust management planning, and work management, which involves operational activities to maintain assets in alignment with service level agreements (SLAs). Various initiatives have been identified with a brief description of each at high level.

Collectively, these projects represent a strategic investment in operational excellence, innovation, and stakeholder value delivery, positioning the organization for sustainable growth, competitive advantage, and long-term success in a dynamic business landscape.

This program may include a maximum of one temporary capital funded full-time equivalent.

INNOVATION & TECHNOLOGY - GENERAL CAPITAL FUND

Public Safety Systems Program (continued):

The Public Safety Systems Initiative is a critical step forward for the City of Winnipeg in optimizing emergency response services. The proposal to incorporate this Information Technology (IT) Equipment Obsolescence initiative alongside the transition to Next Generation 911 (NG911) technology into the IT investment plan directly tackles the issue of outdated emergency response systems and constrained emergency infrastructure. By acknowledging the challenges posed by aging equipment and traditional emergency response systems, the Fire Paramedic Service demonstrates a proactive approach to improving public safety. Upgrading to Next Generation 911 technology not only enables the integration of modern communication methods and multimedia data, but also enhances the overall responsiveness of emergency services. This transition requires significant upfront investment in infrastructure upgrades and technology integration but results in enhanced public safety. The initiative aligns with the evolving needs of the community and establishes a new benchmark for emergency services. This proactive approach not only enhances operational efficiency but also addresses potential risks and challenges encountered by both responders and the public.

This program may include a maximum of 0.5 temporary capital funded full-time equivalent.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

** Shared Health has confirmed up to \$2 million of its baseline funding to cover the funding effects of the capital program each year. The cost of this project in each year draws from this funding amount.

Strategic Priority Action Plan Theme: None

To adapt to the rapid technological advancements and the growing complexity of City management, implementing a Digital Operations Platform (DOP) has become essential. This shift aims to ensure efficiency, transparency, and sustainability in City operations. This program is to propose a strategic plan to enhance the City's operational efficiency through three targeted Information Technology (IT) investments. First, the City requires an investment to modernize current Enterprise Resource Planning (ERP) solutions, mainly PeopleSoft, to a modern DOP. Second, until a proper DOP is fully implemented, the PeopleSoft solution requires continuous investment to maintain its reliability and sustainability. Third, funding is required for projects targeted at improving operational processes that aren't typically addressed by a modern DOP; such as a comprehensive project management solution and a solution focused at managing fiscal planning and monitoring.

On December 17, 2025, Council authorized a first charge in the amount of \$1.835 million in 2026 or prior to the adoption of the 2027 Capital Budget to facilitate timely delivery of the Citywide ERP Sustainability project.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

This program may include a total of 11 temporary capital funded full-time equivalents: 4 for Citywide Project Management System Implementation in 2030 and 7 for Citywide Enterprise Resource Planning System Modernization in 2029.

Strategic Priority Action Plan Theme: A City that Works for Residents through Improved Customer Service

SPAP Action Item: 5.5 Review the Local Improvement Program for gravel backlanes

Project description (in priority order)	Service	2026 Class Est	2026	2027	2028	2029	2030	2031	Total
To be determined***	Roadway Construction and Maintenance	N/A **	1,000	1,000	1,000	1,000	1,000	1,000	6,000
Total			1,000	1,000	1,000	1,000	1,000	1,000	6,000

Individual projects and project budgets are approved by Council via by-law, based on successful local improvement petitions from residents undertaken during the year. Projects within the program will not proceed until a class 3 budget is obtained.

Local Improvement capital projects are those which are financed partly by a direct levy on the properties benefited. The program is governed by Local Improvements By-law No. 98/72 and is subject to advertising and subsequent approval by the majority of ratepayers involved. The types of expenditure generally falling within this category are: paving of local streets and lanes; sidewalk and boulevard construction; installation of new watermains and sewers; ornamental street lighting and lane lighting. The expected life of the assets varies between 10 and 30 years depending on the type of local improvement.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

** N/A as this is a rolling program.

*** To be determined based on local improvements to be approved.

Transit's operations are housed at three primary locations - The Fort Rouge complex, North Main garage, and Brandon garage. The Fort Rouge and North Main facilities are approximately 40 and 80 years old, respectively, and are operating at capacity. The department funds the repair and maintenance of its infrastructure mainly through the operating budget; however, many of the structural, mechanical and electrical systems in the existing infrastructure are past their design and economic lives and capital funding is required to bring the infrastructure up to acceptable standards.

This multi-year capital program addresses the need for both larger and smaller scale projects within Transit's existing facilities, stops and stations. These projects are mainly required due to the age and condition of the assets.

Includes three temporary capital funded full-time equivalent Project Coordinator/Manager positions.

Funding includes \$1.364 million rebudgeted from 2023 Transit Building Replacement / Refurbishment (funded by \$1.201 million Canada Community - Building Fund, and \$163,000 Retained Earnings) - see Appendix D.

		Class Est							
Buses	Public Transit	3	100,908	20,365	26,183	26,016	29,171	33,801	236,444
Charging / hydrogen infrastructure	Public Transit			2,677					2,677
Total			100,908	23,042	26,183	26,016	29,171	33,801	239,121

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

This program is for the on-going purchase of Transit buses to replace those that have reached the end of their useful life. Costs include all outfitting associated with these purchases.

In 2026 this program will purchase zero emission buses plus the associated charging/fueling infrastructure. In 2027 to 2031 this program will purchase diesel buses. Future bus and infrastructure purchases are planned based on fleet requirements to meet the goals of the Winnipeg Transit Master Plan and climate goals.

	2026	2027	2028	2028	2030	2031
Forecasted Number of Zero Emission Buses Included in Budget and Forecast above **	51					
Forecasted Number of Diesel Buses Included in Budget and Forecast above **		13	16	16	18	29
Total	51	13	16	16	18	29

** The projection of the number of buses included in the budget is provided as an estimate only and is subject to change as the price per bus and model selected is based on a number of factors. These factors include the movement in the Statistics Canada Monthly Industrial Product Price Index which is influenced by the fluctuation in the Canadian currency and inflation, the timing of order placement in relation to the budget approval, operational requirements and changes to technology or product development. The total number of buses estimated in each year is reflective of the funding available and the planned fleet mix to be purchased.

Includes two temporary capital funded full-time equivalent (FTE) positions including one Coordinator Contracts and one Program Manager. In addition, all Transit Investing in Canada Infrastructure Program (ICIP) projects also share two temporary positions, a Program Manager and a Financial Analyst.

Estimated useful life - 18 years.

On December 17, 2025, Council authorized a first charge of up to \$23.042 million in 2026 or prior to the adoption of the 2027 capital budget.

On January 29, 2025, Council authorized a first charge of up to \$45.0 million in 2025 or prior to the adoption of the 2026 capital budget.

On April 29, 2021, Council approved this project be submitted for consideration to the Investing in Canada Infrastructure Program (ICIP) funding. Delivery of the project was contingent on receiving approval under this program. In November 2022, the City received notification that this project was approved for funding under the ICIP. ICIP includes the budgeted years 2021 to 2026.

Surplus funds will automatically be transferred to the following year's Transit Buses program budget.

Operating costs reflect the necessary added positions to maintain the zero-emission fleet respective of the unique requirements and skills needed for those buses. The estimated net amount of savings from the zero-emission program have been included in Transit's operating budget. These amounts have not yet been reviewed by Council and are subject to change during future budget processes.

Future operating budget impacts, following project completion, may need to be adjusted.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Strategic Priority Action Plan Theme: None

The Southwest Rapid Transitway (Stage 2) and Pembina Highway Underpass (SWRT) was approved by Council on June 25, 2014, using a Public Private Partnership (P3) approach and the transitway opened on April 12, 2020.

The City will make on-going lease payments to Plenary Roads Winnipeg Transitway LP (PRW) extending until 2049. These payments are required under a 30-year contract with PRW and cover the remaining capital cost of the Transitway as well as on-going maintenance.

There are significant provisions in the contract to ensure the City's specifications are met and the facility is returned to the City in good condition at the end of the contract. Costs associated with monitoring this contract, including the salary recovery of the Senior Project Review/P3 Specialist and other P3 costs are also included in this budget. Non-performance deductions may occur where the City's specifications are not met.

A portion of the payment to PRW represents an annual amount dedicated to the maintenance of the Transitway, including long-term rehabilitative costs. This amount is adjusted for changes to the Consumer Price Index on an annual basis.

TRANSIT - TRANSIT SYSTEM FUND

Southwest Rapid Transitway (Stage 2) and Pembina Highway Underpass (continued):

The above annual estimates relate to the maintenance phase of the project and include the authorization for the lease payments, debt servicing, and other charges related to the facility.

On March 22, 2016, Council authorized a first charge of up to 30% of the annual lease payments prior to the adoption of annual capital budget in the event the capital budget is adopted after December 31, in order to facilitate payments on the P3 contract.

In accordance with By-law 8164/2002 where the City's capital budget has not been adopted before January 1 of the year to which the budget is applicable, the Chief Administrative Officer is authorized, before the adoption of the capital budget, to approve expenditures not exceeding 30% of the amount the City of Winnipeg is contractually obligated to pay annually in respect of Public-Private Partnerships, as a first charge against the General Capital Fund.

On April 29, 2021, Council approved that effective January 1, 2024, the funding source for the Southwest Rapid Transitway (Stage 2) and Pembina Highway Underpass Payment Reserve be changed from 10 years of dedicated annual 0.33% property tax increase (2016 - 2025) to eight years (2016 - 2023).

As financing and administration costs are implicit in the lease payments, this project is exempt from the Corporate administration and interest charges.

TRANSIT - TRANSIT SYSTEM FUND

Primary Transit Network Infrastructure (continued):

The Primary Transit Network Infrastructure program will support the Winnipeg Transit Master Plan complete redesign of the transit network City-wide. In the proposed new transit network, several new routes will require dedicated bus loops, stations, mobility hubs, comfort stations for bus operators, and new traffic signals where buses/ riders will be turning onto or crossing major arterial streets. This program includes public engagement, communications, and marketing to ensure Winnipeg Transit customers and the broader public are aware and can provide input on the proposed changes and their impacts. The program also funds installation and removal of bus stop signs and other similar elements required to transition the City-wide transit network.

Projects within the program include \$2.615 million towards active transportation improvements that provide connectivity to transit routes and rapid transit stations.

Includes one temporary capital funded full-time equivalent Project Manager position. In addition, all Transit Investing in Canada Infrastructure Program (ICIP) projects share two temporary positions, a Program Manager and a Financial Analyst.

This program has been approved for funding under the Investing in Canada Infrastructure Program.

Future operating budget impacts, following project completion, may need to be adjusted.

On-going resources (1.50 full-time equivalent positions) related to this project was added in previous years' operating budget.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

This program will support the retro fit of wheelchair securements on existing buses purchased before 2021. Beginning in 2021, all new buses received are equipped with wheelchair securements that will meet the Accessible Transportation Standard Regulation included in the Accessibility for Manitobans Act (AMA) to provide a transportation system that is more inclusive for all Manitobans, regardless of abilities. The AMA is Provincial legislation which mandates accessibility regulations that are not elective and must be met.

This retrofit project, in addition to making the ride safer for all passengers including the most vulnerable, would allow customers to use both Winnipeg Transit Plus and conventional transit together to complete a trip. This approach is expected to provide more independence and flexibility for customers.

Includes four temporary capital funded full-time equivalent positions including one Project Manager/Coordinator, one Bus Exterior Repairer, one Mechanic Helper, and one Mechanic. In addition, all Transit Investing in Canada Infrastructure Program (ICIP) projects share two temporary positions, a Program Manager and a Financial Analyst.

TRANSIT - TRANSIT SYSTEM FUND

Wheelchair Securements Retro-fit (continued):

On January 29, 2025, Council authorized a first charge of up to \$4.125 million in 2025 or prior to the adoption of the 2026 capital budget.

Operating costs reflect incremental increase of 0.5 additional operating FTEs to maintain and service the new securements. This amount has not yet been reviewed by Council and is subject to change during future budget processes.

This project has been approved for funding under the Investing in Canada Infrastructure Program.

Future operating budget impacts, following project completion, may need to be adjusted.

The Shoal Lake Aqueduct (SLA), which has been in continuous service since 1919, delivers water to Winnipeg from Shoal Lake, a distance of 156 kilometers (97 miles).

Funds are for condition assessment and renewal work identified through on-going monitoring and inspection programs. A comprehensive multi-year condition assessment of the concrete aqueduct will begin in 2025 and will identify future rehabilitation needs. Other works identified to date include berm upgrades, underdrain systems, drainage siphons, select boathouses, overflow structures, bar screens, vent pipes, manholes, culverts, ditches, drainage siphons, and bridging structures as well as vegetation management.

The expected life of the assets is 40 years.

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

The Shoal Lake Aqueduct, which has been in continuous service since 1919, is the sole water supply infrastructure for the City of Winnipeg. The Shoal Lake Intake Structure is the transition headworks to receive water from Shoal Lake and to control the water flow into the aqueduct. Given the critical nature of the intake structure to the safe operation of the aqueduct and the City's water supply, a condition assessment was undertaken and identified a number of rehabilitation and replacement requirements. This included the replacement and refurbishment of various mechanical components that date back to the original construction, the replacement of the maintenance/communication facility, as well as renewals to the existing infrastructure. The recommended improvements will be completed in phases on a risk-based priority.

The expected life of the assets is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

The Branch I and II Aqueducts, along with the Branch Interconnection Aqueduct are specialized pipes which are unique in size, materials, construction techniques and failure modes. The Branch I Aqueduct was installed between 1914 to 1918 and the Branch II and Interconnection Aqueducts were installed between 1959 and 1963. All of these require specialized inspection, testing, and maintenance to preserve the asset.

Funds are for the condition assessment and renewal of the Branch Aqueducts, interconnection, and associated ancillaries.

The expected life of the assets is 40 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

A drinking water system infrastructure assessment is required under the Provincial Drinking Water Safety Act. The objective of the report is to carry out an onsite evaluation to identify, analyze, and mitigate any potential adverse health risks and environmental impacts associated with the water system in a "source to tap" methodology. This work will also determine whether the water system's source, facilities, equipment, and operations are effective in producing safe drinking water, and meet current regulations.

Infrastructure assessment reports are required every five years.

WATER AND WASTE - WATERWORKS SYSTEM FUND

Pumping Stations Reliability (continued):

The McPhillips, Hurst, and MacLean Regional Pumping Stations and the Deacon and Tache Booster Pumping Stations are used to distribute potable water throughout Winnipeg. Power quality benchmark testing has found that the electric motors used to distribute potable water from the McPhillips Regional Pumping Station are causing an unacceptable temporary voltage drop upon motor start-up. Preliminary design will be undertaken to determine the options available to limit voltage drop and may identify power quality requirements at other water pumping stations.

A pump asset condition assessment will also be undertaken to identify renewal requirements at the water pumping stations. A renewal prioritization schedule will be developed.

Class 3 estimates will be provided as part of detailed design in May 2026. Due to the critical nature of this work, construction will start immediately following detailed design.

The estimated life of these assets are from 40 to 60 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The Winnipeg Drinking Water Treatment Plant provides treated drinking water to the City of Winnipeg. The continued upkeep and maintenance of the Water Treatment Plant's assets is required to ensure a continuous supply of water. An asset refurbishment and replacement plan has been developed to address asset lifecycle issues at the Water Treatment Plant as they arise.

Condition assessment of the Water Treatment Plant assets is ongoing and the asset refurbishment and replacement program will address items as they are identified and prioritized.

The estimated life of a rehabilitated asset ranges from 20 to 80 years, depending on asset type, condition, and the rehabilitation method used.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Deacon Booster Pumping Station (DBPS) pump drive replacement	Water				2,169				2,169
Total					2,169				2,169

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

The City's Regional Water Distribution System consists of three regional pumping stations (MacLean, McPhillips and Hurst) and two booster pumping stations (Deacon Booster Pumping Station (DBPS) and Tache Booster Pumping Station). These pumping stations are critical infrastructure for the City and failure of any of the systems at these facilities has the potential to disrupt the City's residential, commercial, industrial, and fire protection water supplies. Renewals are required to ensure reliable operation.

The estimated life of the assets is 20 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

McPhillips reservoir rehabilitation	Water					1,198	9,917		11,115
Total						1,198	9,917		11,115

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

The McPhillips, Wilkes, and MacLean reservoirs provide storage to meet daily water demands. The McPhillips, Hurst, and MacLean pumping stations provide final pumping to deliver water. The pumping stations and reservoirs have been in service since the early 1960s. Renewals will ensure reliable operation of these facilities.

Condition assessments will identify future renewal needs and funding required.

The expected life of these assets is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Process wastewater from the Winnipeg Drinking Water Treatment Plant (WTP) is conveyed through a single force main from the WTP to the wastewater interceptor at Dugald Road. This force main has been identified as a single point of failure and is critical to the operation of the WTP. A full or partial blockage of the force main could impact the WTP's ability to produce drinking water for the City.

This project includes preliminary design, detailed design, contract administration, and construction to maintain the reliable operation of the WTP force main.

The expected life of the assets is 40 years.

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

Feeder mains are specialized large diameter pipes used to convey drinking water throughout the City. The majority of feeder mains were installed in the 1960s and require inspection, testing, and maintenance to preserve the asset. Funds are for condition assessment and rehabilitation work, including structural assessments, inspections, purchase of testing equipment, replacement of valves and related components, structural repairs, valve chamber rehabilitation, and restoration works.

Condition assessments of the feeder mains are ongoing and the feeder main condition assessment and rehabilitation program will address items as they are identified and prioritized.

The estimated life of a rehabilitated asset ranges from 20 to 80 years, depending on asset type, condition, and the rehabilitation method used.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The City's Water Services Division operates two buildings at 552 Plinguet Street. These buildings include a combination of vehicle and equipment parking, administration space, a stores facility, machine shops, and warehouse spaces. The ventilation systems within the two facilities do not meet current ventilation and gas code requirements, impacting the current usage. Upgrades are required to ensure these spaces are fit for intended usage and personnel occupancy and meet health and safety requirements.

The estimated life of the assets are 20 years.

The majority of the City's inventory of water meters are at end of life. This project will replace existing water meters with an advanced metering system to transmit water consumption data through remote meter reading. The new metering system will enable operational efficiencies and provide enhancements to customer service.

Funding in previous years was used to review current water meter operations and validate the best current replacement technology.

This project may include a maximum of 19 temporary capital funded full-time equivalents.

The estimated life of a water meter is 15 years.

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

Projects within the program will not proceed until a class 3 estimate is obtained.

This is a continuing program to renew deteriorating water main infrastructure. Funding is used for water main renewal, cathodic protection, valve and hydrant renewal, water system studies, assessments and replacement of problem water services within the City right-of-way, and hydraulic improvements for fire protection purposes. Funding is also used for integrated right-of-way renewal programs coordinated with the Public Works Department.

Funds will also be used to manage the water infrastructure asset register, asset management plans and ongoing operating costs associated with software licensing and maintenance have been included in the operating budget.

The expected remaining life of each rehabilitated water main ranges from 20 to 80 years, depending on the rehabilitation technology and the asset condition.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

** N/A - as this is a rolling program.

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

The Water and Waste Department's three sewage treatment plants use a Distributed Control System (DCS) with a Human Machine Interface (HMI) for process control. A network of specialized computers monitors thousands of sensors throughout the plants and controls the treatment processes by making calculations and adjustments prescribed by operators and process control analysts.

An Automation Master Plan was developed for the sewage treatment plants in 2012. The DCS system will be replaced with a Programmable Logic Controller (PLC) based system and a new HMI system will be installed at all three treatment plants. The replacement of the DCS and HMI systems at the North End and South End Sewage Treatment Plants are part of the major capital upgrade projects at these facilities.

This program will develop a plan to ensure operational reliability throughout the upgrades and in the long term once the upgrades are complete. The major components of this program include: maintaining the DCS and HMI systems until replacement, upgrading the inter-plant communication systems and network security components, and replacement of the West End Sewage Treatment Plant (WEWPC) DCS and HMI systems.

The expected life of the assets is 10 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Strategic Priority Action Plan Theme: None

A risk and criticality review of the City's three sewage treatment plants has been undertaken to assess the condition of assets and to develop a refurbishment and replacement plan for the next 25 years. The improvements identified will address process reliability, mechanical, electrical, structural components, building envelope, and safety at all three locations including any related works required such as environmental studies/assessments or decommissioning of assets. Operational efficiency improvements will also be identified and implemented in a coordinated fashion with the enhanced maintenance program.

Asset assessment and plan development are ongoing, which will continue to address items as identified. Class estimates for individual projects within this program will be revised to class 3 through preliminary engineering prior to construction.

This program includes one temporary capital funded full-time equivalent for the duration of the program.

The expected life of the structural components are 50 years and the expected life of the electrical and mechanical components are 25 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Strategic Priority Action Plan Theme: None

This project is for construction of improved screening and grit removal systems at the West End Sewage Treatment Plant (WEWPCC).

Primary sludge from the WEWPCC and South End Sewage Treatment Plant (SEWPCC) is hauled to the North End Sewage Treatment Plant (NEWPCC) for treatment and biosolids production. The new NEWPCC biosolids facility will require an upgrade at the WEWPCC for dewatering the primary sludge prior to hauling as grit causes equipment damage.

This project was originally included in the Asset Refurbishment and Replacement Program (ARRP). Previously approved budget from the ARRP was used for the Preliminary Design phase of this project in 2024.

Strategic Priority Action Plan Theme: None

A facilities plan for the South End Sewage Treatment Plant (SEWPCC) will review and describe existing processes and provide recommendations for future work to meet requirements of its Environment Act Licence and plan for future development in the catchment. Future work may include asset renewal, expansion for growth and future capacity, and modifications to the existing plant.

Recommendations will include Class 5 cost estimates.

Developing a facility plan that accommodates future growth will protect water quality and reduce the risk of licence violations.

The ponds at the West End Sewage Treatment Plant (WEWPCC) are former lagoons that provide ultraviolet disinfection, tertiary treatment, effluent cooling, and habitat to a variety of wildlife. The wildlife can influence the ponds and their behavior, impacting water quality before it is discharged to the Assiniboine river. This work will provide a solution to water quality impacts, minimizing the impact of wildlife behavior on the ponds. Examples of potential solutions include filtration, naturalization of the ponds, and/or additional disinfection.

Strategic Priority Action Plan Theme: None

The Province is seeking to reduce nutrient loadings to Lake Winnipeg to reduce the environmental impact. The Province has placed a reduced nutrient loading on the North End Sewage Treatment Plant (NEWPCC)'s operating licence; this includes new limits for phosphorous and nitrogen. The NEWPCC Upgrade: Nutrient Removal Facilities project will address the regulatory requirements and end of life equipment. The project includes an intermediate pumping station, biological nutrient removal reactors and associated fermenters, secondary clarifiers, waste activated sludge (WAS) thickeners, phosphorus release and recovery, and secondary effluent conduit. It also includes upgrades to the primary clarifiers, boilers, and hauled wastewater odour control system; and decommissioning of the existing high purity oxygen (HPO) reactors and secondary clarifiers.

The major benefits of constructing this project include: ensuring regulatory compliance, reducing the environmental impact our citizens have on the Red River and the downstream lakes and rivers, enabling growth and development within Winnipeg and the Metro Region, and maintaining essential level of service.

Significant risks associated with constructing this project include obtaining external funding agreements to limit impacts on rate payers, attracting market interest to stimulate healthy competition, maintenance of plant operations during construction and commissioning, connection and collaboration with other NEWPCC Upgrade projects, obtaining timely approvals, project delay and the current volatile global market.

This project may include a maximum of six capital funded full-time equivalent.

WATER AND WASTE - SEWAGE DISPOSAL SYSTEM FUND

NEWPCC Upgrade: Nutrient Removal Facilities (continued):

This project is conditional on securing additional funding of \$497 million from each of the Federal and Provincial Governments. Costs to the City may increase due to eligibility rules for the Federal and Provincial Government funding programs, new requirements related to the funding agreement, and/or changes to market conditions.

On February 28, 2019, Council approved the recommendation to split the planned NEWPCC Upgrade project into three distinct projects and execute them based on criticality and available funding.

The following table summarizes the three phases of the NEWPCC Upgrade Funding Sources (in \$millions):

NEWPCC Upgrade (in \$millions)	City of Winnipeg	Province of Manitoba	Government of Canada	Total Funding
NEWPCC Upgrade: Power Supply and Headworks Facilities	353	97	116	566
NEWPCC Upgrade: Biosolids Facilities	333	335	367	1,035
NEWPCC Upgrade: Nutrient Removal Facilities	576			576
Total	1,262	432	483	2,177

Remaining budget (\$497 million * 2 = \$994 million) for this project is not included in the table above. When Federal and Provincial funding included, the total for the three NEWPCC projects will be \$3.2 billion. On March 27, 2025, Council referred the NEWPCC Upgrade: Nutrient Removal Facilities to the 2026 budget process.

The expected life of the structural upgrades is 50 years, the expected life of the electrical and mechanical components is 25 years, and the expected life for technology assets is 10 years. This generational asset will be debt financed over 50 years.

WATER AND WASTE - SEWAGE DISPOSAL SYSTEM FUND

Total			1,700	1,100	905	-	-	-	3,705

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

As part of the Canadian Standards Association Occupational Health and Safety Program, a standard entitled CSA Z462, Workplace Electrical Safety Standard has been adopted within the new Canadian Electrical Code.

The program will implement the recommendations from the Arc Flash Study on a priority/risk basis in conjunction with other electrical upgrades at the Department's facilities. This work includes decreasing the potential arc flash energy at various distribution points, upgrading equipment to lower fault energies, procuring personal protective equipment, and providing training. This is for compliance to the arc flash requirements in the electrical code. The Arc Flash Study was initially completed in 2011 and must be updated every five years.

The expected life of the assets is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Strategic Priority Action Plan Theme: None

Currently in the City of Winnipeg's wastewater collection system, there are approximately 20 lift stations which have decommissioned comminutor chambers associated with them. Comminutor chambers formerly contained large shredding and grinding machines, used to reduce the size of the solids in the wastewater stream. This process was used to help protect downstream equipment. They are not necessary with today's pumps and the comminutor machinery was removed from the chambers long ago.

Two comminutor chambers remain that should be rehabilitated to minimize station damage and ensure safety for operational staff.

These stations currently have open sewage flowing through them. This creates high levels of hydrogen sulfide (H2S) and excessive moisture which have caused corrosion damage to electrical equipment, remote terminal unit (RTU) panels, motor control centers (MCC) and the electric motors. Installation of a closed pipe for the sewage flow will eliminate or reduce the levels of H2S in the stations. This will reduce the amount of corrosion on the equipment in these stations and will improve station reliability.

Estimate will be refined to Class 3 through detailed design in 2026. Project will not proceed until a class 3 estimate is obtained.

The expected life of this asset is 50 years.

WATER AND WASTE - SEWAGE DISPOSAL SYSTEM FUND

Lift Station Renewals (continued):

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

This is a program for mitigating hydraulic, structural, safety, odour and aesthetic problems, as well as for undertaking capacity assessments, for the 75 lift stations and associated force mains, gate chambers, and related works in the sewage collection system.

The estimated life of the assets is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Strategic Priority Action Plan Theme: None

The Combined Sewer Overflow (CSO) and Basement Flood Management Strategy projects will be driven by the CSO Master Plan, which was approved by the Province of Manitoba on November 13, 2019, developed to meet the requirements of Environment Act Licence No. 3042. The objectives of this multi-year program are to comply with the regulations to mitigate the impact of CSOs on the local water courses and improve basement flooding protection.

Funds budgeted for this program are for the Collection System SCADA Upgrade, real time control feasibility study, CSO Master Plan updates, rainfall monitoring, portable flow meter procurement, discharge water quality monitoring and district sewer separation in the following districts: Armstrong, Mission, Cockburn East, Ferry Road and Riverbend. This includes sewers, chambers, weirs, and other related works. Funds are budgeted for opportunistic projects that fall under the Master Plans objectives that have been developed after 2019 Master Plan was finalized.

This program includes a maximum of 4 temporary capital funded full-time equivalents.

Funding in 2026 includes \$20.0 million rebudgeted from capital budget authorized in 2023 and 2024 - see Appendix D.

Projects within the program will not proceed until a class 3 estimate is obtained.

The expected life of the sewers is 50 years, mechanical components is 25 years and Supervisory Control and Data Acquisition (SCADA) system is 10 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Authorization (\$000's)						
Detailed Design & Construction	2,783	23,715	31,546	23,044		

Currently, all sewage from the land in Winnipeg south of Abinojii Mikanah and west of the Red River, plus the communities of Lindenwoods and Whyte Ridge, flow to the South End Sewage Treatment Plant (SEWPCC). This flow crosses the Red River between the Fort Garry bridges; at this location the D'Arcy lift station raises the sewage to a sufficient height to allow it to flow by gravity under the Red River.

This crossing represents a single point of failure. If there is a failure of the lift station or the siphon, there is a substantial risk of basement flooding and/or overflows to the Red River. System redundancy is required to convey flows to the treatment plant in the event of a failure of either D'Arcy lift station or the associated siphons. Also, due to the high wet weather flows experienced at the D'Arcy lift station, the additional system capacity will reduce the risk of basement flooding and overflows to the river.

The Southwest Interceptor will provide an additional river crossing of the Red River. A conceptual study will be undertaken to review options and sizing. The project will be constructed in phases; the total cost of the project is estimated at \$90.438 million.

Operating costs are for additional operation and maintenance activities after the station goes in to service. These amounts have not been reviewed by Council and are subject to change during future budget processes.

The major benefits of constructing this project include enabling growth in southwest Winnipeg and maintaining essential level of service.

Significant risks associated with constructing this project include unknown ground conditions and construction of a river crossing.

Significant risks of not constructing the project or deferring the project include inability to accommodate future growth and inability to maintain essential level of service.

The expected life of this asset is 75 years.

Vacuum trucks are specifically designed trucks that periodically assist in cleaning underground sewers and catch basins. These vehicles then transport the solids/trash/debris material that has built up in sewers to Brady Road Resource Management Facility for disposal. In order to meet the liquid waste definition from the licence for Brady Road Resource Management Facility, Licence No 3081 R, the vacuum truck materials must meet specific criteria for disposal. This project includes a feasibility study (2023), interim solution (2024), and design and construction of a dedicated facility (2029) to dewater material from vacuum trucks prior to disposal.

This project will result in operation and maintenance costs that have yet to be defined through preliminary design. These amounts have not been reviewed by Council and are subject to change during future budget processes.

The estimated life of this asset will be determined during the feasibility study.

This is a program to replace and/or rehabilitate combined, wastewater, and land drainage sewer infrastructure that are no longer meeting level of service objectives. A portion of the funding will be used for condition assessment of sewer assets; sewers will be replaced or rehabilitated using appropriate technologies on a risk-based level of service basis. Funds will also be utilized to update the sewer asset register, asset management plans and ongoing operating costs associated with software licensing and maintenance have been included in the operating budget.

WATER AND WASTE - SEWAGE DISPOSAL SYSTEM FUND

Sewer Renewals (continued):

Funding will also be used for the assessment, repair and/or replacement, under certain conditions, of private wastewater sewer services within the public right-of-way under the Sewer By-Law, and for the development of wastewater and land drainage design standards.

The expected remaining life of each rehabilitated sewer ranges from 20 to 100 years, depending on the rehabilitation technology and the asset condition.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

** N/A as this is a rolling program.

WATER AND WASTE - SEWAGE DISPOSAL SYSTEM FUND

River Crossings Monitoring and Renewals (continued):

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

This program is for the condition assessment, renewal of the sewer river crossings, and for the installation of leak detection equipment on the existing waterway crossings.

The department has completed a risk assessment of all river crossings in order to determine a prioritization plan for ongoing condition assessment as well as to upgrade and replace any at-risk crossings as required by Environment Licences issued by the Province of Manitoba for the wastewater collection system in the City of Winnipeg.

*N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

WATER AND WASTE - SOLID WASTE DISPOSAL FUND

Brady Road Resource Management Facility - Cell Construction (continued):

Solid waste must be disposed of in engineered landfill cells under the conditions of the Environment Act Licence No. 3081 R. As the capacity of existing landfill cells is consumed, new cells and their supporting infrastructure must be designed and constructed. The funding identified provides for design, excavation, liners, leachate collection, associated surface and ground water management, access roads, and associated engineering work.

Operating costs are for roadway maintenance, snow clearing and ditch maintenance. These amounts have not been reviewed by Council and are subject to change during future budget processes.

The expected life of the assets is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Soil fabrication for Summit Landfill regulatory cover	Solid Waste Disposal	3	1,797	1,850	1,485				5,132
Total			1,797	1,850	1,485	-	-	-	5,132

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

This program is for all-season soil fabrication to comply with the Province's regulatory requirement to place a vegetative layer for landfill post-closure. The soil fabrication process uses residuals from City services; such as biosolids from wastewater treatment, street sweepings from winter road operations (sand and grit), and wood waste. This program also aligns with the Biosolids Master Plan (Provincial approval received March 2016), Winnipeg Comprehensive Urban Forest Strategy (adopted by Council December 2023), Brady Road Master Plan, Winnipeg Climate Action Plan (adopted by Council September 2018), Closed Landfills Disposition Study, and Leachate Treatment Study.

Fabricating soil is a lower-cost alternative to purchasing top soil and uses materials that would otherwise be landfilled. The fabricated soil is spread and seeded at the City landfills to establish the required vegetative layer. Operations include ongoing environmental and vegetative monitoring.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Strategic Priority Action Plan Theme: None

There is an obligation under the Province of Manitoba Environment Act Licence No. 3081 R for the Brady Road Resource Management Facility (BRRMF) to control odours leaving the landfill site. If the gas is not collected, objectionable odours may be experienced by the nearby neighbourhoods from the active filling area. Additionally, flammable gases will be released uncontrolled from the decomposing waste which may pose public health and safety risks. The Climate Change and Emissions Reductions Act requires the City to collect and destroy methane gas generated by the BRRMF, consistent with Provincial directives on greenhouse gas reduction and odour control.

Operating costs starting in 2028 are for additional operation and maintenance activities after expansion. These amounts have not been reviewed by Council and are subject to change during future budget processes.

The estimated life of the assets is 50 years.

The City of Winnipeg currently has 33 closed landfill sites. These sites require maintenance and ongoing assessment and monitoring to identify any potential risks to public safety or the environment. This is part of our Regulatory requirement under section (7.5) Post Closure Requirements for the Standards For Landfills in Manitoba, (2016).

The Closed Landfill Site Improvement program was initiated in 2016 as a response to the Landfill Disposition Study that prioritized projects to improve and upgrade closed landfill components, including the protective cap, leachate and landfill gas collection systems, and monitoring equipment.

Operating costs starting in 2028 are to account for materials, parts, and supplies associated with recommendations.

The expected life of the assets is 50 years.

The City of Winnipeg owns 33 closed landfills and one active landfill. Landfills require a sufficient buffer zone surrounding the site in order to monitor, drain and contain leachate, landfill gas, etc.

Land has been identified around several landfills that should be acquired to improve the City's long-term landfill management, to meet industry standard and reduce overall landfill risk.

Approved capital funds are required to negotiate the purchase of land as it becomes available.

Strategic Priority Action Plan Theme: A Green and Growing City with Sustainable Renewal of Infrastructure

SPAP Action Item: 4.8 Develop and implement a city-wide residential food waste collection (green cart) and processing program

On October 26, 2023, Council approved a project and authorized \$500,000 for professional consulting services to assist in the development of an organics (primarily residential food waste) processing services program (Green Cart Program). Budget totaling \$20.872 million is required for a Project Manager, consulting services, and cart procurement to implement the Green Cart Program. Consulting services will include technical engineering advice, oversight and quality assurance to help ensure that the design, construction and operation of the organics processing facility is in full compliance with project scope documents, operating protocols, contract terms, good construction and operating practices, and applicable environmental and regulatory compliance, construction and safety practices.

This project includes a maximum of one temporary capital funded full-time equivalent.

Operating costs starting in 2028 are for salaries, benefits, collection contract, and replacement carts/parts. These amounts have not been reviewed by Council and are subject to change during future budget processes.

WATER AND WASTE - LAND DRAINAGE UTILITY FUND

Flood Pumping Station Renewals (continued):

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

A 2007 report on the adequacy and operation of the City's regional flood pumping stations (FPS) identified station renewals required in the near and long term. These renewals improve overall station reliability during high river levels and rainfall events and may include changes to ventilation, electrical, mechanical, structural, or architectural components of the stations. A program to address high priority reliability items has been developed for implementation. All station renewals will include implementation of remote monitoring which is critical during flood and rainfall events.

The program includes the condition assessment of all flood pumping stations to establish rehabilitation priority and future funding requirements.

The expected life of the assets is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Total			-	600	-	-	600	-	1,200

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

The City maintains over 100 stormwater retention basins (SRBs) with the land drainage system. This program renews aging and deteriorated infrastructure along the public shorelines and infrastructure associated with the SRBs.

Projects within the program include: 6-11 Revetment (St. Norbert - Seine River: Dalhousie Dr at Pembina Hwy, south pond), 6-16 Revetment (Waverley West: Point West Dr at Bairdmore Blvd), 6-25 Revetment (Waverley West: south side of Falcon Ridge Dr), 3-10 Revetment (Old Kildonan: Amber Trail at Ambergate Dr), 4-6 Revetment (Transcona: Devonshire Dr W at Kildonan Meadow Dr), and 6-10 Revetment (St. Norbert - Seine River: Dalhousie Dr at Pembina Hwy, north pond).

The estimated life of the assets range from 15 to 50 years, depending on asset type, condition, and rehabilitation method used.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

An Outfall Condition Assessment was completed in 2019. This assessment prioritizes Winnipeg's outfall sites that require renewal, identifies potential renewal techniques for each outfall, and provides high level cost estimates for this work. The City will program and undertake risk-based work on a yearly basis to maximize use of funding for the renewal of sewer outfalls, repairs to piping and related appurtenances, and to improve riverbank stability issues. Funds are also included for condition assessments and re-inspections, as required.

The expected life of the assets is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

** N/A - as this is a rolling program.

Riverbend gate chamber renewal	Land Drainage and Flood Control				250	1,469			1,719
Total			2,977	-	250	1,469	-	-	4,696

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

All land drainage gate chambers have been upgraded to a protection level of 24.5 feet James Avenue. The current focus of this program is to renew existing gate chambers to maintain levels of service for flood control on both combined and separated sewer districts. Under high river level (flood) conditions, the river water backs up into the land drainage and combined sewer systems.

Funds are also provisioned for the renewal of sewer flap gates and associated structures to ensure that all systems are adequately protected from river water intrusion.

The expected life of the assets is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Class Estimate: Not applicable

Strategic Priority Action Plan Theme: None

The provision for development agreement paybacks is an allowance for the City to repay developers who bridge finance the installation of oversized underground infrastructure at the request of the City at a time when City capital funding is not provided. The policy framework for bridge financing the oversized services was defined in the Development Agreement Parameters, adopted by Council on July 17, 2002.

The expected life of the installed assets is over 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this commitment's on-going nature.

WATER AND WASTE - LAND DRAINAGE UTILITY FUND

Project Name: **Riverbank Stabilization - Physical Asset Protection**

Standing Policy: Water, Waste and Environment
 Committee:

Department: Water and Waste
 Project: 2083000126
 Service: Land Drainage and Flood Control
 OurWinnipeg: Environmental Resilience

Project list and timing is subject to change due to operational requirements and unexpected urgent needs.

Projects within the program will not proceed until a class 3 estimate is obtained.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

WATER AND WASTE - LAND DRAINAGE UTILITY FUND

Riverbank Stabilization - Physical Asset Protection (continued):

This program is intended to address riverbank erosion and slope instability risks to public riverbank lands, while also providing improved public access to these spaces. The riverbank improvements will typically include some form of erosion protection supplemented by stabilization works where warranted. The funds will be used for engineering design, contract administration, construction and land acquisition. The program will provide new or enhanced riverbank access such as upper-bank walk/bike paths and active transportation routes, mid and lower bank paths, viewing nodes, and river's-edge landings. Site restorations in project areas will (re)establish robust and diverse naturalized riparian habitats.

Prioritized riverbank improvement projects will protect existing and/or facilitate new public access to the river and riverbank areas. The Water and Waste Department maintains a Riverbank Asset Management System (RAMS) which includes characterizations of over 200 City-owned riverbank sites with risk-based evaluations taking into account the condition of the riverbank and current or anticipated impacts to existing and planned assets.

Projects will involve inter-departmental collaboration as they will take place on land and will accommodate and protect assets within the portfolios of both Public Works Department (paths, parks/park amenities, streets) and Water and Waste Department (primary line of defense, outfalls and river crossings). Subject to available funding, some riverbank improvements may be delivered within a project involving these types of assets.

This program funds capital improvement expenditures to infrastructure at Winnipeg Fleet Management Agency (WFMA) fuel sites. This program is also for refurbishment and/or improvements to various WFMA owned facilities and includes interior, accessibility, heating, ventilation, air conditioning, electrical, plumbing, parking lot, building envelope and structural improvements. This program is also for the purchase of various shop equipment and power tools. This includes safety upgrades, overhead cranes, hoists, oil system upgrades, rolling jacks, diagnostic equipment, hydraulic hose machines and various welding machines.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Strategic Priority Action Plan Theme: The Downtown

SPAP Action Item:1.4 Expand access to existing facilities and programming for recreation, library, community gathering, and 24/7 safe spaces, especially downtown

The Millennium Library Parkade requires capital repairs to be undertaken between 2026-2027 that, if left unattended, could cause an unplanned closure of the parkade. The primary elements being repaired are structural work on the P1 slab to address concrete deterioration, replacing lighting system controls that are obsolete.

On December 17, 2025, Council authorized a first charge of up to \$2.817 million in 2026 or prior to the adoption of the 2027 capital budget.

MBEA: Municipal By-Law Enforcement Act

This page intentionally left blank.

Basis of Budgeting

Service-Based Budget

The City reports budget information on a service-based basis (how much the service will cost and how the service is to be funded), regardless of which area or department delivers the service. The service-based budget is intended to provide more transparent reporting and a more direct link between budgets provided and the services delivered. As part of the budget document a more traditional, by department view is also provided (see Appendix 1 of the 2026 Budget and the Supplement to the 2026 Budget).

Balanced Operating Budget

The City of Winnipeg Charter requires that the City adopt a balanced operating budget for the current year (estimated expenditures for a fiscal year do not exceed the estimated revenues for the year). Council policy provides that year-end surplus be transferred to the Financial Stabilization Reserve. Any operating deficits arising in-year must be addressed in the next year's budget.

As per the [Multi-Year Budget Policy](#), the 2024 to 2027 tax supported operating budget were balanced in all four years.

Consolidation

The annual operating budget adopted by Council provides the spending authorization for each fund, and therefore the current year budget is adopted on a non-consolidated basis. That is, inter-fund transactions have not been eliminated in order to ensure full spending authority is provided. However, each year in the budget document, a consolidated budget is prepared for the current year which eliminates inter-fund transactions. This consolidated budget is then available each year-end to allow comparison and variance reporting to the annual financial statements, also prepared on a consolidated basis (see Appendix 7 of the 2026 Budget).

Expense and Revenue Recognition

The City of Winnipeg develops its operating budget for tax supported and utility operations on a modified accrual basis. The modified accrual basis of accounting records revenue when it is earned, measurable and available. Expenditures are recognized when the liability is incurred, except for certain expenses, for example, those associated with retirement allowances, accrued vacation, worker's compensation, compensated absences, and landfill liabilities which are budgeted on a cash basis. Debt servicing payments are budgeted for when due (depreciation of assets is not budgeted except for SOAs). Revenue from land sales is recorded in accordance with accounting principles used within the real estate industry. Other sources of revenue budgeted are based on previous year's actuals while also considering inflation.

The City uses the full accrual basis of accounting. Revenue is recorded as it is earned and measurable. Expenses are recognized as they are incurred and measurable based on receipt of goods and/or the legal obligation to pay. The City's financial statements are developed in accordance with generally accepted accounting principles for local governments, as recommended by Public Sector Accounting Board (PSAB).

Revenue

The City's sources of income are noted in the Glossary of Terms under "Revenue". The property tax rate is increasing by 3.5% in 2026 and 2027. Other governmental revenue is budgeted based on existing agreements or commitments. The fees and charges revenue is increasing by 2.5% in 2026 and 2027.

Appendix A

Fees and Charges

A Fees and Charges Schedule is published annually in accordance with the Fees and Charges By-Law (196/2008) to identify the current fees and charges administered by the City of Winnipeg and the authority under which they are administered. The Chief Financial Officer is authorized to increase annually any fee imposed by the City by an amount equal to or less than the rate of inflation. New fees or fee increases greater than inflation must be approved by Council unless specifically otherwise delegated. New fees or fee increases greater than inflation are included as part of the annual budget process.

On December 17, 2025, Council ratified all fees and charges as set out in Attachment 2 of the budget recommendations.

Salaries and Benefits

Of the total City's services expenditures, about half are made up of salaries and benefits. The City negotiates with bargaining units to establish the rates used to compensate City staff. Depending on the bargaining unit the position is associated with, rates used in the budget consist of either the rates in the settled collective agreements or an estimated rate for positions in a bargaining unit.

Debt and Debt Payments

The City may only incur debt for the purposes of capital expenditures. With the approval of the Provincial Minister of Finance, a borrowing by-law is passed by Council which authorizes borrowing for the capital budget.

Annual payments of principal and interest are budgeted in the City's operating budget as debt and finance charges. Depreciation of assets is not budgeted, except for Special Operating Agencies. Principal payments serve as the proxy for depreciation.

Reserves

Reserves are established by Council, as required for future financial commitments and are operated under the regulations and policies prescribed by provincial legislation or City by-laws as applicable. Budgets are prepared for reserve expenditures and revenues, and transfers to and from reserves are included in the tax-supported, utility, and capital budgets.

Capital Assets

Capital assets are generally defined as those with a cost exceeding \$100,000 (non-recurring capital projects and recurring/ongoing capital programs) with a minimum 10-year life. These assets are budgeted for in the capital budget and the financing costs are expensed in the operating budgets. Major equipment or automated systems development projects are also included in the capital budget although their useful life may be less than 10 years. Land acquisition and local improvements are considered capital works regardless of expected cost. Smaller asset purchases are expensed in the operating budgets.

Further information on developing the capital budget is disclosed in the "Budget Context and Overview" section of the 2026 Budget.

Capital Leases

Leases are classified as capital or operating leases. Leases which transfer substantially all of the benefits and risks incidental to ownership of property are accounted for as capital leases. All other leases are accounted for as operating leases and the related lease payments are charged to expense as incurred.

Major and Mega Capital Projects

On October 28, 2015, Council concurred in the recommendation of the Executive Policy Committee and adopted the following:

- That an adjustment to the dollar value for the definition of a Major Capital Project for reporting to the Standing Policy Committee on Finance be approved from \$10 million to \$20 million to reflect construction inflation since Council originally adopted the policy in 1999.
- That the threshold for Major Capital Project reporting to the Standing Policy Committee on Finance be automatically revised annually for construction inflation and disclosed in the Annual Capital Budget put forward to Council for adoption.
- That the adjusted dollar value for reporting to Standing Policy Committee on Finance be applied on a prospective basis. Projects currently reporting that are under the revised threshold will continue reporting until the project is completed.

On March 22, 2023, Council concurred in the recommendation of the Public Service and adopted that the threshold for Major Capital Projects be maintained at \$25 million for the 2023 Budget and as an ongoing process direct the Public Service to provide for Council consideration, at the start of each new multi-year budget cycle, a revised threshold, if required, to be utilized for that entire multi-year budget cycle. Projects currently reporting that are under the threshold will continue reporting until the project is completed.

On March 20, 2024, Council concurred in the recommendation of the Public Service and adopted that the threshold for Major Capital Projects be maintained at \$25 million for the 2024-2027 multi-year budget cycle.

Projects \$25 million or greater are required to form a Major Capital Projects Advisory Committee within 180 calendar days of project authorization and begin reporting financial status to the Standing Policy Committee on Finance and Economic Development (SPC FED). Reporting is to be done on a quarterly basis, unless otherwise directed by SPC FED, until the project is complete. The SPC FED Committee may, at its discretion, request projects below this threshold to report to the Committee.

Listing of Major Capital Projects previously approved and active for 2026:

- 1) South End Sewage Treatment Plant (SEWPCC) Upgrading and Expansion
- 2) Water Supervisory Control and Data Acquisition (SCADA) Upgrade and Expansion
- 3) South Winnipeg Recreation Campus Phase One – Recreation Centre
- 4) Transition to Zero Emission Buses
- 5) Transit North Garage Replacement
- 6) CentrePort South Regional Water and Wastewater Servicing – Phase 1A
- 7) Water Meter Renewals
- 8) Pembina Highway Overpass (Abinojii Mikanah) Rehabilitation
- 9) Ferry Road and Riverbend Combined Sewer Relief Works: Rutland Trunk Sewer
- 10) Lagimodiere Twin Overpass Rehabilitation (Concordia Avenue & CPR Keewatin)

On December 18, 2025, Council concurred in the recommendation of the Public Service and adopted a new governance framework for the City's Mega Projects, defined as those \$500 million and greater, requiring monthly enhanced reporting to the Executive Policy Committee (EPC). Effective February 2026 the following projects commence reporting under the new governance framework and no longer report to the Standing Policy Committee on Finance and Economic Development:

- 1) North End Sewage Treatment Plant (NEWPCC) Upgrade Projects: Power Supply and Headworks Facilities
- 2) North End Sewage Treatment Plant (NEWPCC) Upgrade Projects: Biosolids Facilities

Once Provincial and Federal governments' funding are confirmed, it is anticipated that NEWPCC Upgrade: Nutrient Removal Facilities project will also be reporting to EPC.

City of Winnipeg Cost Estimate Classification*

Cost Estimate Class	Project Definition	Project Definition/ Design % Complete	Accuracy of Cost Estimate
Class 5	Concept Screening, Rough Order of Magnitude Estimate	~1%	-50% to +100%
Class 4	Feasibility	~10%	-30% to +50%
Class 3	Preliminary Design (for Budget Authorization)	~30%	-20% to +30%
Class 2	Detailed Design in progress	~60%	-15% to +20%
Class 1	Detailed Design Documentation Complete, Pre-Tender Estimate	~99%	-10% to +15%

Class of Estimate Descriptions

- Class 5 Rough estimate prepared based on very limited information. Used to make an assessment of initial viability and for long range capital planning.
- Class 4 Estimates prepared based on limited information with some engineering work completed and preliminary scope determination.
- Class 3 Estimates based on completed preliminary design documentation. This Class 3 estimate will form the basis for budget authorization and set initial control estimate against which project deliverables will be measured (i.e. on budget).**
- Class 2 Estimates prepared in progressive detail from a Class 3 and are used to establish a contract value against which decisions can be made to revise the scope of the project and manage risk at a specific milestone in the design development.
- Class 1 Pre-tender estimates prepared based on completed detailed design documentation (i.e. drawings, plans, specifications, etc.) as well as complete project delivery plans.

* Determined using AACE International, Recommended Practices 17R-97, 18R-97, 56R-08, 97R-18 & 98R-18

Payments as a Percentage of Cash to Capital and Canada Community-Building Fund	32.23%	40.64%	37.51%	27.56%	28.78%	30.49%	26.09%

Notes:

- Public Private Partnership (P3) payments include annual service/financing payments and debt servicing payments.
- On December 15, 2009, Council directed that the annual lease/service payments and debt servicing costs for tax supported public private partnerships be funded annually up to a maximum of 30% of the cash to capital contribution and the Canada Community-Building Fund.
- On December 16, 2020, Council amended the P3 Policy to: If the funding of annual lease/service payments and debt servicing costs for tax supported public private partnerships exceeds 30% of cash to capital contribution and Canada Community-Building Fund, no additional tax supported public private partnerships can be entered into until funding of annual lease/service payments and debt servicing costs for tax supported public private partnerships is reduced to a level below 30% of cash to capital contribution and Canada Community-Building Fund.
- The "Southwest Rapid Transitway (Stage 2) and Pembina Highway Underpass" capital project was approved by Council on June 25, 2014. As this is a utility project, it does not impact this Public Private Partnership payments calculation.

--	--------	--------	--------	--------	--------	--------	---------

Note:

¹ The \$4 million variance in 2027 is due to surplus funding available in the reserve. The (\$3.95 million) variance in 2030 is due to deferring eligible projects to 2031. In 2031, the \$56.463 million total consists of the expected \$52.513 million funding level plus \$3.95 million deferred from 2030.

Notes:

1. The above listing identifies the funding in the 2025 adopted budget and amendments, the 2026 adopted budget, and the 2027 forecast. The table below provides a summary by funding sources included in the budget. There are no funding amounts included for 2028 to 2031.

Funding Sources (in thousands \$):	2025 Adopted Budget	2025 Amended Budget	2026 Adopted Budget	2027 Forecast
Investing in Canada Infrastructure Program (Provincial Government)	19,488	19,488	40,932	
Strategic Infrastructure Funding	43,612	43,612	18,168	93,900
Incremental Government of Manitoba Funding	6,000	6,000		
	69,100	69,100	59,100	93,900

2. The Provincial Strategic Infrastructure basket funding is projected at \$93.9 million per year.

Projects (in thousands \$):	2025 Adopted Budget	2025 Amended Budget	2026 Adopted Budget	2027 Forecast
Balance as per table above	69,100	69,100	59,100	93,900
NEWPCC Phase 2 Biosolids	30,800	30,800	34,800	
Less: Incremental Government of Manitoba Funding (Mollard Road)	(6,000)	(6,000)	-	-
Total City Budget	93,900	93,900	93,900	93,900
Projected Provincial Strategic Infrastructure basket funding	93,900	93,900	93,900	93,900
	-	-	-	-

3. Shared Health Capital Grant information is not included.

4. On February 26, 2026, Council approved an amendment to the 2025 Strategic Infrastructure Basket Funding Allocation to align with Provincial funding approvals.

Active Transportation Projects

(in thousands of \$)	2026	2027	2028	2029	2030	2031	Six-Year Total
Pedestrian and Cycling Program ⁴	12,237	6,660	6,978	7,810	8,044	8,286	50,015
Regional and Local Street Renewal ⁵							
Recreational Walkways and Bike Pathway Renewals	2,585	2,251	2,319	2,388	2,460	2,534	14,537
Regional Sidewalk and Curb Renewal	711	1,351	1,391	1,433	1,476	1,520	7,882
Sidewalk Renewals on Local Streets	3,278	4,502	4,637	4,776	4,919	5,067	27,179
Osborne Street Underpass			500		1,500		2,000
Elm Park Bridge Repairs			3,975				3,975
Omand Park Pedestrian Bridge Rehabilitation		211	1,346	2,254			3,811
Waterway Access Improvement Program	100	100	150	155	159	163	827
Primary Transit Network Infrastructure	2,615						2,615
TOTAL	\$ 21,526	\$ 15,075	\$ 21,296	\$ 18,816	\$ 18,558	\$ 17,570	\$ 112,841

Notes:

1. On May 14, 2008, Council concurred in the recommendation that a policy be adopted to incorporate Active Transportation (AT) facilities into any reconstruction or rehabilitation required on any infrastructure identified as an AT facility in the proposed active transportation network.
2. The six-year AT investments in the 2026 adopted capital budget and 2027 - 2031 forecast total **\$112.8 million, an increase of \$20.3 million over** the 2025 6-year total (\$92.5 million).
3. The amounts above identify the budget dollars dedicated to AT facilities within the 2026 adopted capital budget and five-year forecast. Funding for the AT work is included within the total funding for the projects/programs noted. There may be other AT projects that could not be estimated at time of printing.
4. Includes \$6.83 million rebudgeted from previously approved Pedestrian and Cycling Program projects.
5. Outside of sidewalks and recreational walkways & bike path renewals, additional active transportation related projects will be undertaken as part of regional and local street renewals within the Regional and Local Street Renewal Program. Further study is required prior to confirming cost estimates.

Summary of Principal and Interest Payments by Fund

(in \$000's)	2025		2026	
	<u>Principal</u>	<u>Interest</u>	<u>Principal</u>	<u>Interest</u>
Tax Supported				
Sinking Fund	8,327	23,677	8,515	24,547
Other terms	13,585	4,050	15,016	4,707
	21,912	27,727	23,531	29,254
Utilities and Special Operating Agencies				
Sinking Fund	16,150	25,209	17,744	28,080
Other terms	5,825	6,477	5,995	7,776
	21,975	31,686	23,739	35,856
Reserves				
Sinking Fund	1,680	3,762	1,792	4,106
Total	45,567	63,175	49,062	69,216

1) Sinking fund amounts represent the principal and interest due on 50-year, 40-year, and 30-year debt. Other term amounts are payments required on all other debt the City has incurred.

2) Interest and principal amounts for internal financing are excluded from this schedule.

3) Additional debt related information such as outstanding borrowing authorizations (including sinking fund and other debt), debt by fund, and significant policies are reported in the 2024 annual report. Refer to pages 84 to 86. Total City debt as at December 31, 2024, is around \$1.6 billion - see details below. The 2025 annual report is not yet available at the time of printing.

Service Based Budget Alignment to Strategic Plans

OurWinnipeg

OurWinnipeg 2045, adopted by Council on May 26, 2022, is Winnipeg's 25-year development plan and sets out:

- (a) the city's long-term plans and policies respecting
 - (i) its purposes,
 - (ii) its physical, social, environmental and economic objectives, and
 - (iii) sustainable land uses and development;
- (b) measures for implementing the plan; and
- (c) such other matters as the minister or council considers necessary or advisable

The vision for OurWinnipeg 2045 is to be a thriving, sustainable and resilient city, grounded in a strong commitment for human rights, that is welcoming and contributes to an equitable, and high quality of life for all. This table outlines which OurWinnipeg goals are aligned with service area goals.

Strategic Priorities Action Plan

During 2023, Council adopted a Strategic Priorities Action Plan which outlines key priorities and actions for the four-year Council term. Within the plan, Council identified 5 broad themes as strategically important. Under these 5 themes Council further identified 42 specific priority actions for focus and investment.

In addition to the 5 themes, some services have identified goals and budget priorities which are primarily focused on Corporate Support & Governance in supporting city operations as a whole rather than a specific theme. This table outlines which Strategic Priorities Action Plan themes service areas feel are advanced by currently identified goals and measures.

		Strategic Priorities Action Plan Themes					
		The Downtown	A Strong Economy	A Liveable Safe, Healthy, Happy City	A Green & Growing City with Sustainable Renewal of Infrastructure	A City that Works for Residents through Improved Customer Service	Corporate Support & Governance

Policies, Strategies and Plans

In addition to the policies noted in the Budget Context and Overview section of the 2026 Budget, the City of Winnipeg undertakes a number of strategic planning activities and has adopted a number of strategic plans and policies. Generally, strategic plans are used to:

- Set policy & direction
- Priorities & align resource allocation
- Educate and inform

Corporate Strategic Plan

The corporate strategic plan outlines key administrative directions, goals, and priorities for the City of Winnipeg public service. It establishes a roadmap for the public service to become more responsive to the needs of Council and residents.

Loan Guarantee Policy

On September 28, 2016, Council adopted a renewed Loan Guarantee policy to ensure that loan guarantees are only provided to organizations that assist the City in achieving its goals while minimizing the financial risk associated with the guarantee.

As of December 31, 2022, the City has unconditionally guaranteed the payment of principal and interest on capital improvement loans for several organizations. The City does not anticipate incurring future payments on these guarantees.

<https://www.winnipeg.ca/finance/files/LoanGuaranteePolicy.pdf>

Purchasing Policy

The Council Adopted Purchasing Policy provides governance of purchasing functions, including the delegation of authority related to procurement.

<http://winnipeg.ca/finance/findata/matmgt/policy/policy.pdf>

Appendix M

Social and Sustainable Procurement Practices

The City of Winnipeg has adopted a Social Procurement Framework and Sustainable Procurement Action Plan to amplify the positive impacts of its spending. Sustainable procurement embeds relevant sustainability considerations into the selection of goods and services, along with factors such as price, quality, service, and technical specifications. Sustainable procurement means getting best value for the City over the total life of a good or service, while seeking opportunities that add environmental, ethical, social, and Indigenous value.

<https://www.winnipeg.ca/building-development/doing-business-city/sustainable-procurement>

Debt Strategy

A Debt Strategy sets debt limits to establish a prudent level of debt to support the City’s capital infrastructure program while maintaining an appropriate credit rating, long-term financial flexibility and sustainability. The Debt Strategy is distinct from the City’s Debt Management Policy – see below for the purpose of the debt management policy.

Leading practices incorporate the following concepts into a debt strategy:

- Debt Capacity: the ability to sustain debt service costs over the long term.
- Affordability: the ability to pay debt service costs as well as life-cycle costs to maintain the asset.
- Flexibility: the ability to respond, in the short term, to emerging capital needs.

The City’s debt strategy includes a proposed limit, which will provide a framework for future decision-making with respect to new debt authorizations.

Financial Ratios (Debt) *	Where are we Now	Forecasted Peak	Recommended Limits
Measure of Sustainability:			
Net Debt as a percentage of revenue			
Total City, including other entities	57.3%	96.9%	100.0%

* As at December 31, 2024.

<https://legacy.winnipeg.ca/finance/files/debtstrategy.pdf>

Debt Management Policy

The City of Winnipeg (City) recognizes that the foundation of any well-managed debt program is a comprehensive debt policy. This Debt Management Policy:

- sets the parameters for issuing debt and managing outstanding debt;
- provides guidance to decision makers regarding the timing and purposes for which debt may be issued; and
- provides guidance on the types of debt and structural features that may be used. It does not set out a specific debt strategy or outline debt limits.

The policy summarizes the City’s legal authority, restrictions, and responsibilities relating to external debt, which flow from The City of Winnipeg Charter, and addresses other areas related to debt management.

https://legacy.winnipeg.ca/finance/files/approved_debt_management_policy.pdf

Investment Policy

The Investment Policy provides the City with an approved framework for managing investments.

The guiding principle of this Policy is to incorporate industry leading practices to ensure the safety of principal and liquidity of the investment portfolio

Safety of principal is the overriding consideration in investment decisions.

https://winnipeg.ca/finance/files/approved_investment_policy.pdf

Asset Management Policy

The Asset Management Policy is a comprehensive approach to managing the City's assets to meet well-defined levels of service at the lowest total cost of ownership within an acceptable level of risk in accordance with the Council adopted Asset Management Policy.

<http://winnipeg.ca/Infrastructure/pdfs/FI-011AssetManagementPolicy.pdf>

City Asset Management Plan

The City Asset Management Plan summarizes the inventory, overall replacement value, age, and condition of all the City's major asset groups and presents this information in a format that compares the data across various service areas. It also outlines the funding deficit and strategies associated with meeting level of service targets for existing and new infrastructure.

<https://www.winnipeg.ca/infrastructure/pdfs/City-Asset-Management-Plan-2018.pdf>

2026 Budget was prepared in accordance with City policies, strategic plans and procedures.

This page intentionally left blank.

Glossary of Terms

Accommodation Tax - A 6% levy on the purchase price of short-term continuous accommodation of 30 days or less consumed and paid for after May 31, 2008. Amounts are collected in the Destination Marketing Reserve.

Active Transportation (AT) - refers to any human-powered mode of transportation, which mainly includes walking, cycling and rolling. The Pedestrian and Cycling Strategies, adopted by Council on July 15, 2015, present the needs for both walking and cycling modes jointly but address the distinctly different needs of pedestrians and cyclists.

Administrative Buildings - Facilities or assets that do not contain or provide services to the public (i.e. facilities which are solely accessed by city staff and/or suppliers).

Advance Payments – Local Improvements account - see Future Services Account.

Affordable Housing – refers to (i) a dwelling unit where the cost of shelter, including rent and utilities, is a maximum of 30% before-tax household income. The household income is defined as 80% or less of the Area Median Household Income (AHMI) for the metropolitan area or rural region of the Municipality; (ii) a dwelling unit that charges rent at or below the median market rate and follows Manitoba's Program Income Limits for lower-moderate income households. Affordable Housing includes Social Housing.

Assessed Value - Value determined by estimating the market value of a property for a specific reference year. Taxes are levied on the basis of the assessed value of a property.

Assessment Roll - A document that records assessments that are made in respect to properties described in the document and includes a real property assessment roll, a personal property assessment roll, and a business assessment roll.

Asset Management - is an integrated business approach with the aim to minimize the lifecycle costs of owning, operating, and maintaining assets, at an acceptable level of risk, while continuously delivering established levels of service to the residents of Winnipeg. It includes the planning, design, construction, operation, and maintenance of infrastructure used to provide City services. By implementing asset management processes, infrastructure needs can be prioritized, while ensuring timely investments to minimize repair and rehabilitation costs, in order to maintain City assets.

Balanced Budget - The City of Winnipeg Charter enacted by the Manitoba Legislature defines an operating budget to be balanced when the estimated expenditures for a fiscal year do not exceed the estimated revenues for the year.

Basis of Accounting - The City of Winnipeg uses the full accrual basis of accounting. Revenue is recorded as it is earned and measurable. Expenses are recognized as they are incurred and measurable based upon receipt of goods or services and/or the creation of a legal obligation to pay. The City's financial statements are developed in accordance with generally accepted accounting principles for local governments, as recommended by Public Sector Accounting Board (PSAB).

Basis of Budgeting - The City of Winnipeg develops its operating budget for tax supported and utility operations on a modified accrual basis (see Modified Accrual Basis). Difference between the basis of budgeting and accounting include, for example, retirement allowances, vacation, workers compensation, compensated absences, contaminated sites, landfill liability and other accrued employee benefits which are budgeted on a cash basis.

Appendix N

Benchmark - A standard or reference point against which something is measured. The term is used in two different ways: in conjunction with setting long-term goals or targets for a broad range of societal and economic policies; and as a measure of effectiveness in comparing key aspects of an organization's performance with that of similar organizations.

Budget Cycle - A four-year budget cycle beginning with operating and capital budgets adopted by Council for the second fiscal year following a general election of members of Council as provided for in the Multi-Year Budget Policy.

Budget Process - Executive Policy Committee (EPC) of City Council is responsible for budget development. The budget is presented to City Council for consideration and adoption. Each year, both an operating and a capital budget are approved by City Council.

Both budgets contain multi-year views. The capital budget includes six years of budget information, including the current-year adopted budget and five forecast years. The operating budget contains four years of budget information.

Budget Working Group – The working group of Councillors with the functions outlined in the Multi-Year Budget Policy and consists of members of council appointed by the Mayor.

Building Safer Communities Fund (BSCF) - The purpose of the BSCF is to support the development of new or enhanced community-based initiatives that address gun and gang violence in Winnipeg. Investments are intended to support community organizations and municipal departments that focus on children, youth, and young adults (between the ages of 6-26) who are involved in (or at risk of joining) gangs, and to ultimately address conditions that may lead a young person to engage in gang activity in the first place.

Business Tax - This is a tax on businesses that occupy space within the City of Winnipeg. Taxes are calculated by applying the annual business tax rate as a percentage of the annual rental value (ARV) of the business premise. The annual rental value is determined by taking into account the rents paid by premises similar in size and location and includes the cost of services necessary for the comfortable use or occupancy of the premise.

Business Tax Adjustments / New Additions - Are taxes added to the taxation roll after tax bill update (TBU). These supplemental taxes are billed based on the change in the ARV for a given business. The Assessment and Taxation Department is allowed to issue supplemental tax bills for the current tax year and to January 1st of the prior year. For businesses, supplemental tax bills are normally prepared when businesses close, move or newly start up.

By-laws - Legislation enacted by City Council under the provisions of The City of Winnipeg Charter.

Canada Community-Building Fund (formerly Federal Gas Tax) Reserve - City Council, on January 25, 2006, authorized the establishment of the Federal Gas Tax Revenue Reserve Fund. The purpose of the reserve is to account for funds received from the Province under the Federal Gas Tax Funding Agreement.

On November 18, 2005, the Government of Canada and the Province entered into an agreement on the Transfer of Federal Gas Tax Revenue under the New Deal for Cities and Communities. Under this deal, the Province agreed to administer the funds on behalf of the Federal Government and to conditionally provide the funds to the City, subject to receipt of funding from the Federal Government. The funds are intended specifically for eligible projects such as: Public Transit; Water; Wastewater; Solid Waste; Community Energy Systems; and Active Transportation Infrastructure.

On March 24, 2006, the Province and the City signed the Gas Tax Funding Agreement. The agreement was effective as of April 1, 2005 and continues until March 31, 2015, or unless terminated earlier in accordance with section 10 of the agreement.

On July 16, 2014 City Council authorized that the purpose of the Federal Gas Tax Revenue Reserve be amended to include 18 project categories as listed in Schedule 1 of the most recent Manitoba-City of Winnipeg Municipal Gas Tax Agreement to administer the Canada-Manitoba Administrative Agreement on the Transfer of Federal Gas Tax Revenue. The list of eligible project categories includes local roads and bridges, broadband connectivity, public transit, drinking water, wastewater, solid waste, brownfield redevelopment, sport infrastructure, recreational infrastructure and cultural infrastructure.

On July 28, 2021, Province of Manitoba confirmed that the:

- (1) Federal Gas Tax Fund program had officially been renamed the Canada Community-Building Fund (CCBF); and
- (2) fire halls and fire station infrastructure are eligible investments under the new program and project expenditures for this investment category incurred as of April 1, 2021 will be considered eligible.

On February 27, 2025, Council authorized that the City enter into, execute and deliver a new Canada Community-Building Fund Agreement with the Government of Manitoba, as represented by the Minister of Consumer Protection and Government Services. The Canada Community-Building Fund agreements are structured to be 10 years in length. The prior agreement expired on March 31, 2024. The new agreement expires March 31, 2034. The list of eligible project categories was updated based on Appendix A of the new agreement as identified at the February 27, 2025 Council meeting which is functionally the same as the prior agreement.

The Director of Public Works is the fund manager.

Capital - Expenditures are considered capital when they have a cost of \$100,000 or more and a useful life of 10 years or longer. This includes individual non-recurring capital projects or ongoing programs investing in various capital assets. Minor maintenance projects should not be included in the capital budget even though the costs may exceed the dollar limit for capital works. Major equipment replacements with very large dollar values such as computer upgrades should be included in the capital budget even though their useful life may be less than 10 years.

Capital Budget - The annual plan of the capital projects to be undertaken by the City, together with the method of financing for each. In accordance with the City of Winnipeg Charter, a capital budget must be prepared and approved for the current year and the subsequent five years (forecast years). The capital budget is adopted on a project authorization basis, although cash flow estimates are provided for all projects. (See also Five-Year Capital Forecast).

Capital Projects / Capital Works - Capital improvements and other works are generally considered to be projects of a fixed nature and long life which provide new, additional or replacement of public facilities such as streets, water mains, sewers, public buildings, parks, playgrounds, recreational centres, land, etc. Major replacements such as asphalt resurfacing of streets, water main renewals, and sewer renewals could also be considered as capital works. Land acquisition and local improvements are considered to be capital works regardless of expected cost. Capital expenditures are typically acquisition, development or major renovations to assets where the benefit of the expenditure extends into the future.

- Capital Program is a collection of similar (like) projects and activities that are managed in a coordinated way to achieve an impact that is either greater or not available if they were managed individually. Programs are typically longer term or with no end date. Programs are often managed across functional units, are strategic in nature and the plan is often high level and evolving.

Appendix N

- Capital Project is a singular effort of defined duration, typically shorter than a program. A project has a unique purpose and produces a specific output/benefit. The project is specific, detailed and bounded with a defined start and end point.

Cash to Capital - is the cash value that the City invests into its Capital projects.

Charter - Refers to *The City of Winnipeg Charter*, S.M. 2002, c. 39.

Chief Administrative Officer - Individual appointed to the position pursuant to the City of Winnipeg Charter.

Chief Construction Officer - an officer of Council with reporting and accountability measures similar to those in place for other statutory officers of Council while acknowledging that this position is not statutory within the City of Winnipeg Charter.

Chief Financial Officer - is the Council-appointed statutory officer mandated by the City of Winnipeg Charter.

City (The) - Refers to the City of Winnipeg.

City Cemetery Reserve – (Brookside, St. Vital and Transcona Cemeteries) The terms of By-law No. 14725 of the former City of Winnipeg, passed on April 8, 1935, created a fund for the perpetual care and maintenance of Brookside Cemetery. Later on, By-law No. 1996/78, also created funds for the perpetual care and maintenance of St. Vital and Transcona Cemeteries.

Section 29 of By-law No. 5720/91 amending and restating By-law 1996/78, relating to Cemeteries, sets forth the purpose and use of the Perpetual Maintenance Funds.

These funds are for the purpose of creating, building up, and maintaining a perpetual maintenance fund for the care and maintenance of Brookside, St. Vital, and Transcona Cemeteries. Section 12 of By-law No. 130/2007 includes: “Each cemetery will have a separate Perpetual Maintenance Reserve Fund created with a sum equal to 25% of the purchase price of a lot, plot or cremated remains lot/plot, or a sum equal to 15% of a cremorial or niche purchase, or a sum equal to 10% of a scattering of cremated remains, set aside in the reserve, invested and applied to and for the perpetual care of the lot or plot or cremated remains lot/plot, cremorial, niche, scattering bed or ossuary area. Perpetual care includes general maintenance of lots, plots, cremated remains lots/plots, columbarium niches or the cemetery enclosure.

The City may, annually, subject to Council approval, utilize up to 75% of the yearly earnings from the relevant Perpetual Maintenance Reserve to undertake improvements or maintenance on the cemetery.

Effective January 1, 2024 Council approved the consolidation of the Transcona, Brookside and St. Vital Cemeteries (perpetual reserve) funds into one cemeteries reserve fund called “City Cemetery Reserve”.

The Director of Planning, Property and Development is the Fund Manager.

City of Winnipeg Charter (The) - Provincial legislation setting out the powers and responsibilities of the City of Winnipeg.

Class Estimates - The cost estimate classification system was developed in 2015 based on the AACE International Recommended Practices and is included in an appendix in the annual capital budget. The established benchmark is that a project should have a Class 3 estimate for budget authorization. Projects

that are not at a Class 3 should indicate in the detail sheet that a Class 3 estimate or better will be achieved prior to the start of construction. For programs, those projects identified in the year of budget approval should also be at a Class 3 and the narrative should indicate that. The Class 3 estimate should set the authorization budget.

Climate Action Reserve - A reserve fund established for the purpose of funding climate action initiatives in alignment with the City's strategic plans to meet the goal of net zero emissions. These initiatives will focus on studies, analysis and the development of policies, strategies and procedures relating to climate action.

The Director of Water and Waste will be the fund manager.

Committees - means the Standing Policy Committees of Council and the Winnipeg Police Board.

Commitment Reserve - On March 12, 1998, City Council approved the establishment of the Commitment Reserve Fund. The purpose of the fund is to allow departments to carry forward committed budget dollars to the succeeding year thereby eliminating the need to re-budget. Contributions to the reserve must be spent in the year following the transfer. However, contributions can be retained in the reserve beyond the following year only if approved by the fund manager; otherwise the unspent amount must be transferred to the Financial Stabilization Reserve Fund.

The Chief Financial Officer is the fund manager.

Computer, Critical Systems and Support Reserve - On March 22, 1995, City Council approved the establishment of the Computer Replacement Reserve Fund. As approved by Council in the 2019 Budget, the reserve was renamed to Computer, Critical Systems, and Support Reserve. The purpose of the reserve is to provide financing for the replacement, refurbishing, modifying, or upgrading of personal computer hardware and/or software and to stabilize expenditures, therefore smoothing the effect on the annual budget. Through direct contributions, users contribute an amount to the reserve for computer equipment based upon the latest actual purchase cost for that type of unit. Other contributions to the reserve would include investment income.

The Director of Innovation and Technology is the fund manager.

Community Safety Team - The Community Safety Team is dedicated to protecting public safety while supporting vulnerable residents in urgent need.

The team of Safety Officers are sworn Manitoba Peace Officers who work alongside Winnipeg emergency services, safety patrols, and social agencies. Safety Officers assist individuals experiencing homelessness, addictions, and mental health issues, providing on-scene support and connecting them to appropriate resources.

Consolidated Budget – includes the City of Winnipeg's operating budgets for tax supported, utility, special operating agency and reserve operations as well as a capital budget and governmental functions or entities, which have been determined to comprise a part of the aggregate City operations. The consolidated budget considers inter-fund transaction eliminations, tangible capital asset-based revenues and amortization, controlled entity operations and the accrual of unfunded expenses.

Consolidated Entities - The organizations included in the consolidated financial statements are as follows:

- Assiniboine Park Conservancy Inc.
- Winnipeg Arts Council Inc.

Appendix N

- CentreVenture Development Corporation
- The Convention Centre Corporation
- Winnipeg Public Library Board

Consumer Price Index (CPI) - A statistical description of annual price levels provided by Statistics Canada (Government of Canada). The index is used as a measure of the increase in the cost of living (i.e. economic inflation).

Contribution in Lieu of Land Dedication Reserve - On January 10, 1973, City Council adopted the policy that cash payments received by the City in lieu of land dedication for open space be deposited in a fund to the credit of each community. On January 17, 1979, City Council amended that policy to permit proceeds from the sale of surplus parks and recreation lands to be deposited to the Contributions in Lieu of Land Dedication Reserve Fund account of the respective community. On September 19, 1990, City Council adopted the recommendation that revenue would be apportioned amongst the communities on the basis of 75% to the account of the community in which the revenue was collected and 25% to be divided equally amongst all communities. This change was phased in over three years commencing in 1991. Expenses are limited to the acquisition or improvement of land for parks, recreation facilities, or open space.

The Director of Planning, Property and Development is the fund manager.

Debt Charges - The annual amount of principal and interest which must be paid each year through the operating budget. There are two forms of debenture structure. The Sinking Fund Debenture issue requires annual payments to be made to the Sinking Fund. These funds are then invested by the Sinking Fund for the retirement of the debenture issue on its maturity date. A serial issue requires annual payments of principal and interest in order that the debt is paid off in regular installments throughout the life of the issue.

Deficit - an excess of expenditure or liabilities over income or assets in a given period.

Department - The basic organizational unit of the City which is functionally unique in its delivery of services. In general, departments are managed by a Director.

Destination Marketing Reserve - On October 22, 2008, City Council approved the creation of the Destination Marketing Reserve Fund with an effective date of January 1, 2009. The purpose of the reserve is to support Economic Development Winnipeg Inc., The Convention Centre Corporation and special events including other organizations, projects and events that will encourage tourists to visit Winnipeg. The source of revenue for the reserve is a 6% accommodation tax.

The Chief Financial Officer is the fund manager.

Director - leads a City department or Special Operating Agency.

Dividend - A dividend is an interfund transfer from a City Utility or a Special Operating Agency (SOA) to the City tax-supported fund based on Council approved policy or available uncommitted funds or *operational surplus*.

Downtown Community Safety Partnership (DCSP) - is a non-profit organization dedicated to creating a safer and more welcoming downtown.

Economic Development Investment Reserve - The Economic Development Investment Reserve Fund was created by City Council on June 21, 2000. It is intended to fund City economic development incentives and investment projects. This reserve invests directly in particular projects rather than being a

funding mechanism for programs. The incremental portion of realty and business taxes generated by projects in which the fund has invested will be returned to the reserve until the original investment has been repaid.

The Director of Planning, Property and Development is the fund manager.

Effectiveness Measure - a performance measure intended to evaluate service delivery relative to service standards or the customer's needs and expectations.

Efficiency Measure - a performance measure comparing the resources used to the number of units of service provided or delivered (typically cost for a service or unit of service).

Electricity Tax - The electricity tax is legislated by Section 441 of the City of Winnipeg Charter. The rate charged is 2.5% for domestic consumption and 5% for commercial consumption, beyond the electricity used for space heating purposes, which is conclusively deemed to be 80% of the total consumption. For a "primarily electric heat" dwelling unit, 20% is taxable, 80% is exempt. If a dwelling unit is "primarily gas heat", then there is no exempt portion on the electrical side. The tax is calculated and levied by Manitoba Hydro and is remitted to the City of Winnipeg on a monthly basis.

Entertainment Funding Tax - The tax is 10% on cinema ticket prices of \$5.00 or more.

Entertainment Funding Tax Refundable - Goldeyes - The Winnipeg Goldeyes has a long-term arrangement expiring December 31, 2038 with respect to entertainment tax approved by Council. The full amount of entertainment tax remitted during the year is refunded back at the end of the season - conditional upon all aspects of an amateur access/community use agreement with the City being honored.

Entertainment Funding Tax Refundable - True North - True North Inc. has a long-term arrangement expiring in 2029 with respect to entertainment tax approved by Council. The full amount of entertainment tax remitted during the year is refunded back at the end of the season.

Entertainment Funding Tax Refundable - Winnipeg Football Club (WFC) - In a long-term agreement approved by Council, the entertainment tax revenue from the Winnipeg Football Club's football games or other events will be refunded back to the Winnipeg Football Club.

Environmental Projects Reserve - On December 17, 1993, City Council authorized the establishment of a River Quality Environmental Studies Reserve Fund for the purpose of providing funding for environmental projects to improve river quality. On January 24, 1996, City Council changed the name of this Reserve to the Environmental Projects Reserve Fund to more accurately reflect the nature of the projects reported in this reserve.

The reserve is financed through a monthly transfer from the Sewage Disposal System Fund based on the amount of water consumption billed. The reserve has funded ammonia, nitrification and combined sewer overflow ("CSO") studies. It now funds a portion of the wastewater collection and treatment system improvements as directed by the Province of Manitoba ("the Province"). This includes effluent disinfection, centrate treatment, biological nutrient removal, CSO mitigation infrastructure and biosolids.

River quality is under the jurisdiction of the Province and in 2003 the Clean Environment Commission ("CEC"), at the request of the Minister of Conservation, conducted public hearings to review and receive comments on the City's 50-year wastewater collection and treatment improvement program. At the conclusion, the CEC recommended that the City implement these improvements over a 25-year period, which was subsequently ordered by the Minister of Conservation on September 26, 2003.

Appendix N

On September 3, 2004, the Province issued Environment Act License No. 2669 for the West End Water Pollution Control Centre, which provided for the plan as directed by the Minister of Conservation. Certain provisions of this license were appealed by the City. Revised License No. 2669 E R R and No. 2684 R R R, for the North End Water Pollution Control Center, were issued on June 19, 2009, incorporating the City's requested changes. On March 3, 2006, a similar license (No. 2716) was issued for the South End Water Pollution Control Centre. Effective April 18, 2012, the South End Water Pollution Control Centre license (No. 2716RR) was revised in response to the Save Lake Winnipeg Act requirement. This reserve partially funds capital projects to bring the City in compliance with the license requirements. The Director of Water and Waste is the fund manager.

External Debt - Obligation resulting from the borrowing of money from sources other than City funds, primarily by the sale of debentures in public capital markets.

Federal Gas Tax Revenue Reserve – see **Canada Community-Building Fund Reserve**.

Fees and Charges Schedule - published annually in accordance with the Fees and Charges By-Law (196/2008) to identify the current fees and charges administered by the City of Winnipeg and the authority under which they are administered. http://www.winnipeg.ca/finance/documents_page.stm

Financial Management Plan (FMP) - The City's official public strategy for guiding the financial decision-making process. This document, adopted by Council on March 20, 2020, is the strategy for guiding financial decision making, meeting long-term obligations, and improving its economic position and financial stability. <http://www.winnipeg.ca/finance/files/fmp.pdf>

Financial Stabilization Reserve - The purpose of the Financial Stabilization Reserve Fund is to counteract the budgetary effect of fluctuations from year to year in property and business taxes and/or to fund deficits in the General Revenue Fund, which assist in the stabilization of the City's mill rate and/or property tax requirements.

Various structural changes have occurred over the years in this reserve.

On September 28, 2011, City Council adopted the combining of the Fiscal Stabilization Reserve and the Mill Rate Stabilization Reserve Funds into the Financial Stabilization Reserve Fund. All previous regulations for the two stabilization reserves were replaced with the following:

- Sources of funding for the reserve are: the excess of actual total taxes billed compared to budget; surpluses in the General Revenue Fund; unspent amounts in the Commitment Reserve Fund; and interest revenue.
- The reserve can be used to fund any shortfall of actual total taxes billed compared to budget; major unforeseen expenditures once the target level is exceeded and subject to rules noted below; General Revenue Fund year-end deficits and subject to rules noted below; and one-time expenditures once the target level has been reached.
- No transfers can be made to the General Revenue Fund to fund ongoing current operations.
- Funds above the 8% target may be used for major unforeseen expenditures and General Revenue Fund deficits. Accessing funding in any given year requires City Council approval if the required amount would reduce the reserve's balance below the 8% target.
- A replenishment plan shall be adopted by City Council if the Financial Stabilization Reserve Fund's equity is reduced below the 8% target of tax-supported expenditures.

On March 23, 2015, City Council adopted the 2015 Operating Budget which included a change in the target balance for the Financial Stabilization Reserve from 8% to a minimum of 6% of tax-supported expenditures.

On March 20, 2020 Council amended the purpose to allow transfers between the Financial Stabilization Reserve and the General Revenue Fund, subject to maintaining required annual minimum balanced in the Financial Stabilization reserve, in order to ensure that the tax supported operating budget is balanced.

On December 17, 2025, Council amended the terms as follows:

- i. amend funding sources to remove the excess of actual total taxes billed compared to budget, which shall remain in the General Revenue Fund;
- ii. amend fund uses to remove use for any shortfall of actual total taxes billed compared to budget.

The Chief Financial Officer is the fund manager.

Fiscal Year - The fiscal year of the City is the 12 months ending on December 31 each year.

Five-Year Capital Forecast - The long-term plan for capital expenditures to be incurred for the five years following the budget year. Section 284(2) of “The City of Winnipeg Charter” requires Council, in addition to the capital budget for the budget year, to include a capital program for five years. Only the current year’s budget is adopted, and the five-year capital forecast is approved as a forecast.

Frontage Levy - A charge to property owners through the property tax bill. Calculation of the frontage levy is based on the length of the boundaries (frontage) of the property that fronts or abuts any portion of a sewer main or water main. As set out in the City of Winnipeg Charter, these funds can be used for the upgrading, repair, replacement and maintenance of water and sewer mains, streets and sidewalks; installation, upgrading, repair, replacement and maintenance of lighting in streets and back lanes.

Fund Balance - Measures the net financial resources available to finance expenditures of future periods and is the difference between governmental fund assets and liabilities, also referred to as fund equity.

Full-Time Equivalent (FTE) - The total number of hours worked converted to the equivalent of full-time staff persons working a whole year.

Funding from Other Municipalities - Revenue generated from Service-Sharing Agreements for the provision of water and sewer services to neighbouring municipalities.

Future Services Account - A development agreement may require that the Developer pay for specific infrastructure items that are to be constructed, by the City and/or a third party, in the future, and which directly benefit the proposed subdivision. These works include roadways (both improved and nonimproved), sidewalks, boulevards and trees, traffic signals, street lights (both standard and ornamental), watermains, etc. The costs of the works are determined by the City and are then specified in the development agreement at the time that the agreement is to be executed by the Developer, or earlier. Such payments are credited to the Advance Payments – Local Improvements account (commonly referred to as the “future services” or “future works account”). The funds held in the future services account are intended to be used as a funding source primarily in a capital budget at the time the related infrastructure item(s) is to be constructed.

General Capital Fund - The accounting fund created to account for tax-supported capital transactions of The City of Winnipeg.

General Purpose Reserve - On March 15, 2000, City Council approved the establishment of the Pension Surplus Reserve Fund. The reserve was funded by the retroactive refund of pension contributions for 1998

Appendix N

and 1999. City Council also approved that the purpose of the reserve and further details including the use of these funds be subsequently determined by City Council.

On May 23, 2001, City Council approved the amalgamation of the Pension Stabilization Reserve and Pension Surplus Reserve Funds and the new fund be renamed the General Purpose Reserve Fund.

On June 25, 2014, City Council approved an amendment to the Councillors' Ward Allowance (CWA) Policy year end section 3.10, to include the following: "Unexpended funds from Councillor ward allowances may be carried over to the following year, at the discretion of the ward Councillor, up to a maximum of 10% of the total ward allocation, and on October 28, 2015 added that the CWA carry over funds be established as a permitted use in the General Purpose Reserve."

On December 16, 2020, Council approved that the terms and conditions of the General Purpose Reserve be amended to allow as a funding source any budget allocation approved by Council including external or internal funding sources. The Chief Financial Officer is the fund manager.

General Revenue Fund – The accounting fund created to account for tax-supported operations, which include but are not limited to services provided by the City such as police, fire, ambulance, library and street maintenance.

Government Finance Officers Association (GFOA) – a professional association representing public finance officials in the United States and Canada, founded in 1906 to improve public finance through planning, financing, and implementing government operations.

Government Grants - Payments from other levels of government for specific programming or payments for City purposes.

Grant - means money, goods, services or in-kind contributions provided to a recipient without consideration in return, other than recognition for the grant.

Grant (Annual) - Annual grants are payments to organizations which provide demonstrable cultural, social or economic benefit to the community and where the City does not receive any goods or services directly in return for the funds (with the exception of service purchase agreements) nor do they expect repayment or any other financial return. Eligibility and entitlement requirements are reviewed annually.

Grant (Long-Term) - A payment that is legally required to be made pursuant to the terms of a previously executed active agreement, or an expired agreement which the parties are still honoring until a new one can be made, or other legal obligation (e.g. Long-Term Agreements of the Grants/Payments Listing, tax or TIF grants).

Grant (Other programs) - are primarily grant programs where recipients are determined throughout the course of the year. With the exception of the per capita grants, the Director of the department responsible for each such grant program is delegated the authority to determine grant recipients.

Grant (In-kind contributions) - goods or services provided to a recipient for free or at a reduced rate.

Grant (Funding streams)

- Environmental / Green City - Funding under this stream may be approved for projects with a focus on climate resiliency, renewable energy, waste diversion, protecting and growing the urban forest;
- Recreation. Funding under this stream may be approved for projects that improve access to library and recreation services;

- Community Well-being. Funding under this stream may be approved for projects that promote safety and the well-being of residents, and services that are more available, accessible and affordable to those who need it most; and
- Arts and Culture. Funding under this stream may be approved for projects concerning the protection, preservation and promotion of the inherent value of the arts, cultural, built and natural heritage resources.

Heritage / Economic Development Property Tax Credit - The program's objective is to facilitate the conservation and continued use/viability of heritage buildings in Winnipeg by incenting the restoration or rehabilitation of existing buildings as well as projects that have economic benefit to the City.

Heritage Investment Reserve - The Heritage Investment Reserve Fund was created by City Council on June 21, 2000. It funds all City and City-sponsored heritage programs and acts as a revolving fund so that future funding of heritage programs can be sustained and thereby reduces the need to obtain additional funding. An important source of ongoing funding for the reserve will be incremental tax revenues from projects financed by the fund.

The Director of Planning, Property and Development is the fund manager.

Housing Accelerator Fund (HAF) Reserve - On January 29, 2025 Council approved the establishment of the Housing Accelerator Fund (HAF) Reserve.

On December 5, 2023, the Government of Canada, through the Canada Mortgage and Housing Corporation (CMHC), entered an agreement with the City of Winnipeg for \$122.4 million in funding from the Housing Accelerator Fund (HAF).

The primary objectives of the program are to create more supply of housing at an accelerated pace and enhance certainty in the approvals and building process, while also supporting the following priorities:

- Supporting the development of complete communities that are walkable, consisting of appropriate residential density and a diverse mix of land uses, providing access to a wide variety of amenities and services through public and active transportation
- Supporting the development of affordable, inclusive, equitable and diverse communities that encourage clear pathways to achieving greater socio-economic inclusion largely achieved through the equitable provision of housing across the entire housing spectrum
- Supporting the development of low-carbon and climate-resilient communities

The Chief Administrative Officer is the fund manager.

Housing Rehabilitation Investment Reserve (HRIR) - The Housing Rehabilitation Investment Reserve Fund was created by City Council on June 21, 2000. It was to fund City housing programs for which no funding was provided in operating budgets. It was intended that this reserve act as a revolving fund so that incremental tax revenues resulting from housing programs in which the reserve had invested would be returned to the reserve to finance future projects. The reserve continues to fund housing programs for which the funding is provided through an annual transfer from the General Revenue Fund.

The Chief Administrative Officer or designate is the fund manager.

In-Kind Contributions - see Grant (In-kind contributions).

Appendix N

Insect Control Reserve - On March 23, 2005, City Council approved the establishment of the Insect Control Reserve Fund. The purpose of the fund is to absorb unexpected costs for mosquito control in years where the City of Winnipeg experiences above average response levels. The reserve balance should not exceed \$3.0 million and the Chief Administrative Officer has the authority to over-expend to a maximum of \$3.0 million in the event of insufficient funds.

The Director of Public Works is the fund manager.

Insurance Reserve - In 1960, the Insurance Reserve Fund was established. The reserve was to be used for the purpose of replacing or repairing City properties and/or contents that had been damaged by fire or any other cause. In 1973, the use of the Insurance Reserve Fund also included the purpose of paying for any other losses that the City might incur in any part of its self-insurance program. Such uses would include third party liability claims, or property damage claims, including motor vehicles.

The Corporate Controller is the fund manager.

Internal Financing - An interim funding source from the available, short-term cash flow surpluses from various City sources such as the general capital fund and capital and special purpose reserves that can be used to fund capital projects. Council also approves an external borrowing authority for the internal financing amount in the capital budget to ensure that funds are available for the projects to proceed if short term cash surpluses become unavailable.

Investing in Canada Infrastructure Program - The governments of Canada and Manitoba are working together to make long-term infrastructure investments for the betterment of Manitoba and its communities through the Investing in Canada Infrastructure Program (ICIP). These investments will have benefits for people in communities across the province under four priority areas:

- Public transit;
- Green infrastructure;
- Community, culture, and recreation infrastructure; and
- Rural and northern communities.

Land Operating Reserve - City Council, on May 16, 1973, authorized the establishment of a Land Operating Reserve Fund to reduce the need for the issuance and sale of debentures in connection with the acquisition cost of properties for resale.

Disbursements from this reserve are limited to the acquisition cost of properties for resale, and any other expenses directly related to the acquisition, sale and improvement of disposable City properties. Use of the reserve's funds for any other purpose requires the authorization of City Council. This reserve is maintained by the proceeds from the sale of City-owned properties and interest earned.

In accordance with City Council directives, 5% of the gross sales revenue is allocated to the Historical Building Program, another 5% of gross sales revenue is allocated to the Enhanced Land Marketing Program to finance those activities necessary to facilitate the sale of surplus lands and 15% is allocated to the Community Centre Renovation Grant Program annually, subject to Council approval.

City Council, on July 19, 1999, adopted a policy that in order to sustain the business operations supported by the Reserve, equity be allowed to accumulate within the reserve sufficient to eliminate the inter-fund debt owing to the General Revenue Fund created in past years. Any surplus funds greater than the amount required for the purposes of the Land Operating Reserve Fund and meeting the annual budgeted transfer to the General Revenue Fund is to be transferred to the Commitment Reserve Fund.

The Director of Planning, Property and Development is the fund manager.

Landfill Rehabilitation Reserve - On December 17, 1993, City Council authorized the establishment of a Brady Landfill Site Rehabilitation Reserve Fund for the purpose of providing funding for the future development of the Brady Landfill Site. The reserve is financed through a monthly transfer from the Solid Waste Disposal Fund based on tonnages processed at the landfill.

Effective January 1, 2018 the Brady Landfill Site Rehabilitation Reserve was terminated and replaced with a new Landfill Rehabilitation Reserve in accordance with Section 289 of the City of Winnipeg Charter.

The purpose of the new reserve is to provide funding, over time, for closure and post-closure landfill needs including leachate management, environmental monitoring and site restoration costs for all active and closed landfills maintained under the responsibility of the City.

This reserve will continue to be funded through annual deposits from tipping fee revenue accounts of the Solid Waste Disposal Fund based on a portion of the tipping fee per tonne charged on garbage disposal, the current rate is \$1.00 per tonne of material landfilled.

The Director of Water and Waste is the fund manager.

Local Improvements - Local Improvement capital projects are those which are financed partly by a direct levy on the properties benefited (property owner's share) and partly by a mill rate levy over the city-at-large (City's share). The program is governed by Local Improvement By-Law No. 98/72 and is subject to advertising and subsequent approval by the majority of ratepayers involved. The type of expenditures generally falling within this category are: paving of local streets and lanes; sidewalk and boulevard construction; installation of new water mains and sewers; ornamental street lighting and lane lighting.

Local Street Renewal Reserve - The Local Street Renewal Reserve was established in 2013 to increase investment in local streets, lanes and sidewalks. Funds from this reserve will be used annually to fund the local street component of the Regional and Local Street Renewal program and the repair, renewal and/or replacement of bridges. Subject to annual Council approval, a separate property tax increase will fund this reserve each year to ensure a dedicated funding system for local streets. Use of the Local Street Renewal Reserve for purposes other than local streets, lanes, sidewalk, and bridge renewals requires approval of 2/3 of City Council.

The Director of Public Works is the fund manager.

Major Capital Projects - are projects that reach a specific minimum dollar threshold and above. \$25 million is the threshold for 2024 to 2027 Multi-year Budget. A listing of major capital projects is included in the Supplement to the Budget.

Mill & Fill Treatment - a preventative method to extend pavement life, improve ride-quality and drainage, and correct rutting. It is applicable to existing concrete streets with asphalt overlay in fair condition and includes planning (milling) of the existing asphalt surface, minimal curb/sidewalk/pavement repairs, minor adjustments of miscellaneous pavement appurtenances (inlets, maintenance hole covers, etc.), and placement of a new asphalt overlay.

Mill Rate - A mill rate is a term used to decide how taxes are set. A "mill" is equivalent to a one thousandth part. For the purposes of calculating property taxes, one mill represents \$1.00 of taxes for every \$1,000 of portioned assessment. The portioned assessment is the part of the total assessed value of a property that is subject to taxation.

Appendix N

Mill Rate Support - Mill rate support is the amount required to be funded directly by property owners through their property realty taxes.

Modified Accrual Basis - A hybrid of cash and accrual methods of accounting in which revenues are recognized when earned, measurable and available. Expenses are recognized when liability is incurred, except for certain expenses such as those associated with retirement allowances, vacation, workers compensation, compensated absences, contaminated sites, landfill liability and other accrued employee benefits which are budgeted on a cash basis. As well, debt servicing payments are budgeted for when due and depreciation of assets is not budgeted.

Multiple-Family Dwelling Tax Investment Reserve - On May 22, 2002, City Council approved the establishment of the Multi-Family Dwelling Tax Investment Reserve Fund. The reserve is designed to act as a bank that accumulates incremental taxes generated by approved multi-family dwelling construction/rehabilitation projects. When the incremental taxes for each project accumulates to the pre-approved amount, the balance is paid back to the applicant developer as a "Tax Incentive Grant".

The Director of Planning, Property and Development is the fund manager.

Municipal Benchmarking Network Canada (MBNC) - is a national benchmarking organization comprised of partner municipalities who identify, collect, analyze and report consistent and comparable data in municipal service areas. The information reported, and the partner network, promote sharing of best practices and strategies to support continuous improvement in the delivery of municipal services.
<http://mbncanada.ca/>

Multi-year Budget - The annual operating and capital budgets adopted by Council together with operating budget projections for an additional three years and capital budget forecast for an additional five years as required by the Multi-Year Budget Policy.

Municipal General Services Fee - The General Services Fee is revenue related to municipal services that are billed for Urban Reserves and these fees are in lieu of property taxes.

Natural Gas Tax - The natural gas tax is legislated in Section 441 of The City of Winnipeg Charter. The rate charged is 2.5% for domestic consumption and 5% for commercial consumption, beyond the natural gas used for space heating purposes. If the dwelling unit is "primarily gas heating", a baseload is calculated based on consumption in June, July, and August. Gas tax is then applied to the lesser of actual consumption or baseload. If the dwelling unit is "primarily electric heat" then this tax is applied to the full consumption. The tax is calculated and levied by Manitoba Hydro and is remitted to the City of Winnipeg on a monthly basis.

Neighbourhood Action Team (NAT) - Team of staff dedicated to addressing right-of-way maintenance and repairs in select high-needs areas. Members will liaise with elected officials, community members, and area stakeholders to identify problem locations, prioritize work, and collaboratively improve the communities' street-level infrastructure and appearance.

Net Taxes Added - Are taxes added to the taxation roll after tax bill update (TBU). These supplemental taxes are billed based on the change in the assessed value for a given property. The Assessment and Taxation Department is allowed to issue supplemental tax bills for the current tax year and to January 1st of the prior year.

Non-Profit Organization - means a club, society, association, or corporation that conducts business for the benefit of the general public without shareholders and without a profit motive. Any profit that is made is

used to further the goals or undertaking of the organization. Profits are not used by the individuals involved for their own personal financial gain.

Operating Budget - means the annual plan of city's services and programs with estimated revenues and expenditures associated with each.

Operating Expenditures - The cost to provide a product or service. This includes but not limited to the cost for personnel, materials, equipment and other consumables required for a department to function and provide services.

Other Commitments - Other capital investments that are not aligned with the definition of a Capital Project or Capital Program.

OurWinnipeg - The City's strategic 25-year development plan adopted by Council on May 26, 2022, is Winnipeg's 25-year development plan that under The City of Winnipeg Charter, section 224. It establishes goals of leadership and good governance, environmental resilience, economic prosperity, good health and well-being, social equity and city building. Section 235 of the City of Winnipeg Charter, not everything in OurWinnipeg has to be implemented but everything the City does must be consistent with it.

Pay-As-You-Go - A means of financing capital projects whereby the City pays for the projects from direct contributions from the current budget, from retained earnings, or from reserves established for capital purposes, rather than issuing external debt.

Payments in Lieu of Taxes - The federal and provincial governments, crown corporations, universities and City utilities do not have a legal obligation to pay property taxes; however, an amount equivalent to the taxes is paid to the General Revenue Fund for City services by way of a payment in lieu of taxes.

Pedestrian and Cycling Program - provides recommendations for infrastructure projects, programs and studies identified in the Pedestrian and Cycling Strategies. Projects may include: new sidewalks on regional and non-regional streets, new multi-use paths, new bicycle routes, crossing control improvements, public education, awareness and promotion and partnership grants. All recommended projects support the key directions of the Pedestrian and Cycling Strategies.

Performance Measurement - Performance measurement is the process of collecting, analyzing and/or reporting information regarding the performance of an organization, service, system or component.

Permit Reserve - On March 20, 2007, City Council approved the establishment of the Permit Reserve Fund. The purpose of the reserve is to mitigate revenue shortfalls and fund temporary staffing needs during busy periods through economic boom/bust cycles. The reserve is also meant to provide a source of funds for service and system improvements. The reserve is funded by the excess of permit revenue in the General Revenue Fund compared to budget in any given year. The balance in the reserve is capped at \$3.0 million and any surplus funds over and above the cap are to be transferred to the General Revenue Fund.

On March 22, 2011, City Council approved the cap be revised to \$2.0 million and any surplus funds above the cap be transferred to the General Revenue Fund, reported in the Planning, Property and Development Department.

The Director of Planning, Property and Development is the fund manager.

Perpetual Maintenance Funds – see City Cemetery Fund.

Appendix N

Property Tax Revenue - This is the money that the City bills the property owners in the City of Winnipeg to fund tax-supported expenditures. Property taxes are calculated by applying the municipal mill rate against the portioned assessment of your property. By definition, a mill is a one-thousandth part. For calculating taxes, one mill represents \$1.00 of taxes for every \$1,000.00 of portioned assessment.

Provision for Cost Variability (“Provision”) - is an inter-fund transfer from the Municipal Accommodations Fund (Fund 554) to the City tax-supported fund (Fund 001). It represents a portion of market rents charged by Municipal Accommodations to its accommodation customers; that portion being the variance between market rent rates charged and the cost to provide and reinvest in the accommodations.

Public-Private Partnership (PPP or P3) - is a contract between a public sector entity and a private sector entity that outlines the provision of assets and the delivery of services. Although this can include almost any type of infrastructure or service, some of the more common P3 projects include hospitals, bridges, highways, new types of technology and new government buildings. Across Canada, P3s have become an increasingly prominent procurement vehicle for governments.

Rapid Housing Initiative - The City of Winnipeg receives funding from the federal government under the Rapid Housing Initiative (RHI). The funding helps deliver affordable housing units in Winnipeg.

Regional Street Renewal Reserve - The Regional Street Renewal Reserve was established in 2014 to increase investment in regional streets and sidewalks. Funds from this reserve will be used annually to fund the regional street component of the Regional and Local Street program and the repair, renewal and/or replacement of bridges.

A separate property tax increase will fund this new reserve each year to ensure a dedicated funding system for regional streets. Use of the Regional Street Renewal Reserve for purposes other than regional streets, sidewalk, and bridge renewals requires approval of 2/3 of City Council.

The Director of Public Works is the fund manager.

Regulation Fees - Fees charged to users for regulated/controlled services typically where licenses and permits are required. Fines and penalties are also included in this revenue category for summary purposes.

Reserves - Represent amounts appropriated for designated requirements as established by Council. Part of best practices for fund accumulation to replace capital assets and to provide financial flexibility in times of budget shortfall. A listing of the reserve funds is noted below and a description for each one can be found in this glossary.

- Canada Community-Building Fund (formerly Federal Gas Tax) Reserve
- City Cemetery Reserve (formerly Perpetual Maintenance Funds)
- Climate Action Reserve
- Commitment Reserve
- Computer, Critical Systems and Support Reserve
- Contribution in Lieu of Land Dedication Reserve
- Destination Marketing Reserve
- Economic Development Investment Reserve
- Environmental Projects Reserve
- Financial Stabilization Reserve
- General Purpose Reserve
- Heritage Investment Reserve

- Housing Accelerator Fund Reserve
- Housing Rehabilitation Investment Reserve
- Insect Control Reserve
- Insurance Reserve
- Land Operating Reserve
- Landfill Rehabilitation Reserve
- Local Street Renewal Reserve
- Multiple-Family Dwelling Tax Investment Reserve
- Permit Reserve
- Regional Street Renewal Reserve
- Sewer System Rehabilitation Reserve
- Southwest Rapid Transit Corridor Reserve
- Solid Waste Asset Management Reserve
- Southwest Rapid Transitway (Stage 2) and Pembina Highway Underpass Payment Reserve
- Transit Bus Replacement Reserve
- Transit Infrastructure Reserve
- Transformative Reserve
- Waste Diversion Reserve
- Water Main Renewal Reserve
- Water Meter Renewal Reserve
- Workers Compensation Reserve

Residential Recycling - Revenue received from Multi Material Stewardship Manitoba (MMSM) on a percentage of cost basis to help fund the waste diversion program for the City.

Retained Earnings - Equity accounts that represent the accumulated surpluses from operations that are not for general distribution, but rather are used to fund capital projects, leverage debt, or are reinvested in service delivery.

Revenue - Sources of income to The City of Winnipeg. A listing of major sources of revenue is noted below and a description for each one can be found in this glossary.

- Accommodation Tax
- Business Tax
- Business Tax Adjustments / New Additions
- Electricity Tax
- Entertainment Funding Tax
- Entertainment Funding Tax Refundable – Goldeyes
- Entertainment Funding Tax Refundable – True North
- Entertainment Funding Tax Refundable – Winnipeg Football Club (WFC)
- Frontage Levy
- Government Grants
- Natural Gas Tax
- Net Taxes Added
- Payments in Lieu of Taxes
- Property Tax Revenue
- Regulation Fees

Appendix N

- Transit Service Fare Revenue
- Water Services Sales

Rolling Capital Program – A collection of projects where the work can be adjusted based on the funding available for the program. These projects are generally small in scope and do not require preliminary or detailed design studies. For these reasons, individual class estimates are not developed. Funding for these programs is usually ongoing and work is continuous from year to year.

Sale of Goods and Services - Revenue category of fees charged to users for services provided on a fee for service basis by the City for the convenience and quality of life for residents. Generally, the consumer can exercise choice on whether or not to consume the service. Examples include recreation and ambulance fees.

Sample Home - One story, single family home, 3 bedrooms, 1 ½ baths, approximately 1100 square feet.

Self-Supporting Utility - The Water and Waste Utilities do not receive subsidies from the mill rate or tax supported budget.

Service (Internal) - Those services which are offered internally to one or more organizational units within the corporation in support of public service delivery.

Service (Public) - An operational concept where something of value is provided to individual members of the public, or defined members of the public (client set) or the public collectively.

Service-Based Budget (SBB) - Displays budget information (how much the service will cost and how the service is to be funded) and performance measures for services provided, including all components regardless of which unit or department delivers the service. The service-based budget is intended to provide more transparent reporting and a more direct link between the budgets provided and the services delivered.

Service Goals - Goals are provided for each service in the service-based budget, and represent the desired high-level outcomes for that service area.

Service purchase agreement payment - A payment that is required to be made for the provision of services pursuant to a service purchase agreement, and was previously approved as a sole source under the Materials Management Policy, due to the fact that another organization/entity could not reasonably carry out the service or there is a special convenience factor in having a particular organization/entity provide the service to the City. The service being provided is usually for the care or maintenance of City property which the City would otherwise be legally required to carry out itself (e.g. BIZ zone cleanliness, snow clearing of City parking lots, clean up around Brady landfill).

Service-Sharing Agreements - see Funding from Other Municipalities.

Sewer Services Revenue - This revenue is generated when the sewer rate is applied to the amount of water used as measured by the water meter, since most of it ends up as sewage. This money is used to collect, transport and treat sewage so that it meets environmental requirements before it is released to the Red and Assiniboine Rivers.

Sewer System Rehabilitation Reserve - On May 27, 1992, City Council authorized the establishment of the Combined Sewer Renewal Reserve and the Wastewater Sewer Renewal Reserve Funds. These Reserves were established for the renewal and rehabilitation of combined sewers and wastewater sewers,

respectively, with funding provided from the frontage levy identified for this purpose in By-law 549/73 (amended by By-law 7138/97). The purpose of the reserves was to provide a consistent approach to financing infrastructure renewal and rehabilitate combined sewers and to renew and rehabilitate wastewater sewers (as defined by the Sewer Utility By-law 5058/88).

The annual frontage levy funding was allocated by City Council between the Combined Sewer Renewal Reserve and the Wastewater Sewer Renewal Reserve in accordance with the capital program requirements.

On January 30, 2002, City Council passed By-law No. 7958/2002 "Frontage Levy By-law" to include the repair and replacement of streets and sidewalks in residential areas.

On September 27, 2006, City Council approved the consolidation of the Combined Sewer Renewal Reserve and the Wastewater Sewer Renewal Reserve Funds into the Sewer System Rehabilitation Reserve Fund, which was effective on October 1, 2006.

On December 15, 2009, City Council authorized, by way of approval of the Capital Budget, that effective 2009, frontage levy revenue collected on property taxes would no longer fund the Sewer System Rehabilitation Reserve as of 2011. Therefore, the Sewer System Rehabilitation Reserve is fully funded through sewer rates transferred from the Sewer Disposal System Fund as well as interest earned on the reserve fund balance.

The Director of Water and Waste is the fund manager.

Shared Health - Shared Health leads the planning and coordinates the integration of patient-centered clinical and preventive health services across Manitoba. The organization also delivers specific province-wide health services and supports centralized administrative and business functions for Manitoba health organizations.

Short-term Rental Accommodations – or STRA means a dwelling unit which is rented in whole or in part for a period of less than 30 consecutive days in exchange for payment of money or other value.

Sinking Fund - A fund established by setting aside annual contributions or levies over a period of time to fund the repayment of long-term debt at maturity. The city administration manages the sinking fund contributions on sinking fund debentures.

Solid Waste Asset Management Reserve - On March 27, 2025, City Council authorized the establishment of a Solid Waste Asset Management Reserve. (SWAMR). The purpose of the SWAMR will be to fund the purchase or replacement of major capital assets for all Solid Waste services, including but not limited to garbage and recycling carts and bins, billing systems, operational equipment and infrastructure such as landfill gas expansions, cell construction and site improvements.

Future contributions to the reserve will, in part, fund planned capital spending to meet ongoing program needs. The maximum reserve balance will be approximately equal to the next five years cumulative projected funding requirements. Timing of capital project implementation or changes to licensing requirements may affect reserve contributions.

The Director of Water and Waste Department is the fund manager.

Solid Waste Services Revenue - The service consists of several primary sources of revenue including tipping fees, waste diversion user fees, waste management user fees, and residential recycling revenue (a definition of each can be found in this glossary).

Appendix N

Southwest Rapid Transit Corridor Reserve - On March 26, 2008, City Council approved that a Rapid Transit Infrastructure Reserve Fund be established, and that the purpose of the Reserve be to accumulate funds and subsequently to expend on future costs incurred on account of public transit infrastructure, including the construction of rapid transit corridors contemplated in the future.

On October 22, 2008, City Council approved that the purpose of the Rapid Transit Infrastructure Reserve be revised to accumulate funds and subsequently expend on costs incurred on account of public transit infrastructure, including the operation and construction of the rapid transit infrastructure, structures and facilities, development, and other related costs including bus purchases, technology, personnel, and land acquisition.

On January 29, 2013, City Council approved that effective January 1, 2014, the reserve be renamed the Southwest Rapid Transit Corridor - Stage 2 Reserve. In addition the purpose has been revised to: a) accumulate capital funds and subsequently expend such funds on future costs incurred on account of public transit infrastructure, and more specifically, the construction of the Southwest Rapid Transit Corridor - Stage 2, and the purchase of vehicles associated with Stage 2, contemplated in the future; b) contribute to the proposed Jubilee Rapid Transit Station if net proceeds of the disposition of the subject City property are insufficient to cover the City's share, as approved by City Council on October 24, 2012; c) pay for any residual land acquisition settlements for the Southwest Rapid Transit Corridor - Stage 1 project; and d) pay for the ongoing replacement of the 10 buses purchased for the Southwest Rapid Transit Corridor Stage 1 project.

On March 23, 2015, City Council approved that the reserve be renamed the Southwest Rapid Transit Corridor Reserve.

This reserve was closed effective in the 2024 Budget.

The Director of Transit is the fund manager.

Southwest Rapid Transitway (Stage 2) and Pembina Highway Underpass Payment Reserve - On March 23, 2015 Council approved the establishment of the Southwest Rapid Transitway (Stage 2) and Pembina Highway Underpass Payment Reserve for the purpose of setting aside funding for the P3 annual service / financing payments commencing in 2019 for the Southwest Rapid Transitway (Stage 2) and Pembina Highway Underpass capital project.

The funding source from the City was originally approved as dedicated property tax revenue transferred from the General Revenue Fund, a one-time fare increase in 2016 and an annual grant from the Province. Subsequently, the one-time fare increase was removed and the Province has advised the annual grant will not be provided. A 2/3 vote of Council is required in order for the use of funds to be other than those stipulated.

The Director of Transit is the fund manager.

Special Operating Agency (SOA) - A special unit of an organization which can operate within or outside the existing city department structure in the delivery of its service(s). It is granted more direct responsibility for results and increased management flexibility needed to attain new levels of service delivery. The authority for SOAs is provided by the City of Winnipeg Charter Section 215.

Standing Committees - Sub-committees of City Council delegated certain powers and duties to facilitate the administration of their assigned City departments which report through them to the Executive Policy Committee and City Council. They also provide a forum for public input and receive recommendations from

Community Committees related to their respective responsibilities. Areas of responsibility are Finance and Economic Development; Public Works; Property and Development; Community Services; and Water, Waste and Environment.

Strategic Priorities Action Plan (SPAP) – A four-year plan that aligns with both the four-year Council term as well as the forthcoming four-year budget cycle. A key principle of the strategic planning process was to allow all members of Council equal opportunity to participate in the development of the SPAP. Council and the Public Service used the strategic planning process to build trust, achieve common understanding, discuss opportunities and challenges, and build consensus on key priority actions to be undertaken over the duration of the four-year Council term. The SPAP identifies five key priority themes and 42 priority actions across the five themes which are:

- The Downtown;
- A Strong Economy;
- A Liveable, Safe, Healthy, Happy City;
- A Green and Growing City with Sustainable Renewal of Infrastructure; and
- A City that Works for Residents through Improved Customer Service.

Strategy - Those steps taken in support of public and internal service goals.

Surplus - an excess of income or assets over expenditure or liabilities in a given period, typically a financial year.

Target - An identified goal that a service area is trying to achieve. In the context of departmental performance measurement, identified targets are levels of service which directly or indirectly indicate progress towards identified departmental goals.

Tax Penalty Interest - This revenue is generated from property and business tax accounts that are in arrears. Tax penalties are applied to tax accounts in arrears in accordance with the Tax Penalty By-law 5796/91 and the Tax Sale Penalty By-law 8157/2002.

Tax-Supported Services - Goods and services supplied by the City whose costs are supported, in whole or in part, by funds received through property tax revenues.

Tipping Fees - This revenue is generated from charging a per tonne rate to residential and commercial garbage delivered to the City landfills.

Transfers - Refers to transfers to and from reserves, departments, and/or funds.

Transfer to Capital - The mill rate supported funding source for capital projects. The transfer to capital amount is sourced from the general revenue (mill rate supported) fund and moved to the general capital fund to finance the City's capital priorities.

Transformative Reserve - On January 27, 2022, City Council approved the establishment of the Transformative Reserve Fund that is separate and distinct from the current Land Operating Reserve and is to be funded from the sale of surplus golf courses or the sale of Surplus Leased Buildings. The Transformative Reserve Fund is a special purpose reserve intended to support investments that transform the delivery of services and reduce the City's infrastructure deficit with a focus on recreation, public green space as well as preservation, protection and enhancement of Winnipeg's tree canopy. The Transformative Reserve Fund is intended to target significant greenspace or natural habitat acquisition opportunities.

Appendix N

The Director of Planning, Property and Development is the fund manager.

Transit Bus Replacement Reserve - On December 15, 1994, City Council approved the establishment of the Transit Bus Replacement Reserve Fund. The purpose of the reserve is to provide financing for the replacement or refurbishment of transit buses in a scheduled and pragmatic manner. Contributions to this reserve will be based on a budgeted appropriation from the Transit Department plus proceeds from the disposal of bus equipment and insurance claims on bus equipment written off. Upon the Transit Department making the outlay to replace or refurbish buses, this reserve will contribute towards that purchase.

The Director of Transit is the fund manager.

Transit Infrastructure Reserve - On April 29, 2021 Council approved the establishment of the Transit Infrastructure Reserve for the purpose of funding the annual debt and financing costs incurred for the replacement of the North Garage capital project. Effective January 1, 2028, this reserve will be funded through dedicated property tax revenue transferred from the General Revenue Fund; as well as transfers from other Transit reserves.

The purpose of this reserve will be to fund the annual debt and financing costs for the replacement of the North Garage as a priority, and any remaining funding available will be used to fund transit infrastructure such as bus rolling stock and related charging infrastructure, land acquisitions and other associated costs.

The Director of Transit is the fund manager.

Transit Plus - a service of Winnipeg's public transit system that provides door-to-door transportation for people who are unable to regularly use the City's fixed route transit system because they are legally blind or have significantly impaired mobility. Winnipeg Transit Plus registrants use a variety of mobility aides including scooters, canes, walkers, and both manual and motorized wheelchairs.

Transit Service Fare Revenue - The revenue generated when the type or class of fare is applied to the applicable rider. There are different rates based on time period (i.e. single ride, weekly, monthly, etc.), method (i.e. cash or e-card) and whether rider qualifies for a student, reduced or regular fare.

User Fees/Charges - The payment of a fee for direct receipt of a public service by the party who benefits from the service.

Utility - A utility or public utility provides funding and maintains the infrastructure for and provides a rate-based service that is consumed by the public such as water, wastewater, waste disposal, and public transportation.

Vacancy Management - Estimated savings derived from delaying the filling of vacant positions which were budgeted for.

Vehicles for Hire (VFH) - The Vehicles for Hire By-law No. 129/2017 was approved by Council on December 13, 2017 and came into effect on February 28, 2018. Regulatory responsibility legally transferred from the provincial government to municipalities pursuant to the requirements of Bill 30 – The Local Vehicles for Hire Act, which will dissolve the existing Taxicab Board, the Taxicab Act and associated regulations, and transition oversight and regulation of the vehicle for hire industry to the City of Winnipeg effective February 28, 2018.

Waste Management User Fee - This revenue is generated to fund new programs that provide residents with more ways to reduce, reuse and recycle. The fee is charged on a daily basis according to dwelling units and appears on the water bill.

Waste Diversion Reserve – On October 19, 2011, City Council authorized the establishment of Waste Diversion Reserve for the purpose of providing funding for waste diversion programs. The Reserve is financed by surplus funds collected through the Waste Diversion fee.

On March 27, 2025, City Council approved that Waste Diversion Reserve be phased out. The existing Council approval and established waste diversion programs will draw down the balance of the reserve and future programs will be funded from the Solid Waste Asset Management Reserve.

The Director of Water and Waste is the fund manager.

Water Service Sales Revenue - This revenue is generated when the water rate is applied to the amount of water used, as measured by the water meter. This covers the cost of bringing water from Shoal Lake to the consumer, including operating and maintaining the aqueduct, pumping stations, reservoirs, and distribution system.

Water Main Renewal Reserve - On February 18, 1981, City Council established this reserve fund for the purpose of financing the renewal of watermains. It was initially created by the transfer from the Waterworks System and funded through a frontage levy. Since 2009, the source of funding for the Water Main Renewal Reserve is water rates.

The Director of Water and Waste is the fund manager.

Water Meter Renewal Reserve - On January 30, 2020, City Council authorized the establishment of the Water Meter Renewal Reserve to fund a program for the replacement and renewal of water meters with advanced meters. The reserve is funded by customers through the Daily Basic Charge.

The Director of Water and Waste is the fund manager.

Winnipeg Police Board - The Winnipeg Police Board provides civilian governance and oversight of the Winnipeg Police Service to improve transparency and accountability in policing. It is made up of seven civilian members. Five members are appointed by Winnipeg City Council and two are appointed by the Province of Manitoba. It receives its authority from Manitoba's Police Services Act (2009) and a City of Winnipeg By-Law (148/2012).

Winnipeg WAV - On January 21, 2022, the Vehicle for Hire (VFH) office awarded the contract to begin the process for creating the Winnipeg WAV (wheelchair accessible vehicle) Accessible Centralized Dispatch system. The Winnipeg WAV is a pilot project to address improvements to accessible on-demand service, in line with the needs of both residents and the industry.

The goals of this pilot project are to:

- Ensure a comparable level of service for those who use accessible or standard vehicles for hire;
- Improve safety of passengers;
- Provide incentives to drivers and owners of accessible vehicles;
- improved tracking of accessible trips and wait times, in order to continue to reduce wait times.

Winnipeg WAV was launched in May 2022.

Appendix N

WINNpass – the WINNpass program provides eligible individuals or families the opportunity to purchase full-fare transit passes/fares at a reduced rate.

Workers Compensation Reserve - Under the terms of By-law No. 9802 of the former City of Winnipeg, provision was made for the establishment of a Workers Compensation Reserve Fund. On January 1, 1972, as a result of the amalgamation of the City of Winnipeg with former area municipalities, The Workers Compensation Reserve Fund was established in accordance with Section 338 of the former City of Winnipeg Act.

The City administers its workers compensation program on a self-insured basis. In lieu of paying premiums to the Workers Compensation Board of Manitoba, the City pays actual costs incurred plus an administration charge. Departments are charged actual costs as well as surcharges related to financing fatality pensions and upgrades of benefits. The net result is that costs and surcharges are transferred to/from the Workers Compensation Reserve Fund. The Workers Compensation Reserve Fund serves to counteract any budgetary fluctuation from year to year that would result from a work related incident of major proportions.

On April 29, 2015, Council approved an amendment to the purpose of the Workers Compensation Reserve

- 1) To include Permanent Partial Impairment awards for occupational disease claims and
- 2) That pension surplus/deficit from Workers Compensation Board be accounted for in the Workers Compensation Reserve.

The Corporate Controller is the fund manager.
