CITY OF WINNIPEG CONSTRUCTION NOTICE

TO: Resident/Business on Corydon Avenue

RE: 2019-2023 Stafford/Taylor/Corydon Pavement Renewals – Tender 1 2020-2021

Please be advised that the reconstruction of sections of Corydon Avenue will begin in **May 11th, 2020**.

Corydon Avenue - Thurso Street to Stafford Street

Construction start: May 11, 2020

Duration: Roadworks to be completed by October 2020

Impacted streets and intersections: Corydon Avenue from Stafford Street to Thurso Street

Corydon Avenue – Eastbound Lanes Waterloo Street to Oxford Street

Construction start: May 11, 2020

Duration: Roadworks to be completed by September 2020

Impacted streets and intersections: Corydon Avenue Eastbound from Waterloo St to Oxford St

Upcoming Water Main Construction – Between Harrow Street and Stafford Street

Construction start: May 11, 2020

Duration: Approximately 3-4 weeks

Impacted streets and intersections: Corydon Ave and Harrow St Intersection and Corydon Ave and Stafford St Intersection

The work in the sections of Corydon Ave as listed above will involve the reconstruction of the existing roadways, sidewalks, private approaches, streetlights, traffic signal lights, a section of watermain renewal and some drainage infrastructure.

Within the two work zones, on-street parking will be removed, and traffic will be restricted to one lane in each direction and at times Corydon from Thurso St to Stafford St will be reduced to one lane in one direction. On eastbound Corydon Ave between Waterloo St and Oxford St, two-way traffic will be maintained on Corydon Ave in the westbound lanes. Side streets and public lanes south of Corydon Ave in this section will be closed to through traffic but will be accessible from Fleet St. Waverley St between Corydon Ave and Fleet St will be temporarily signed as a two-way street during construction.

On Corydon Ave between Thurso St and Stafford St the work will be completed in multiple stages which will require several traffic control configurations. Closure of side streets and approaches will be required at different times during construction; however, we will make every effort to minimize impacts to traffic and pedestrians. Closures of private approaches will be discussed with the affected business/resident prior to.

Pedestrian access to residences and businesses will be maintained throughout construction and Transit service will be maintained. Existing Transit stops may be temporarily relocated or closed on a case by case basis depending on current construction activities in the immediate vicinity.

Anyone with accessibility concerns, special access requirements or if you have any other questions regarding this construction, please contact the Public Works Department's consultant for the work, Derek Wiebe, C.E.T. with Stantec Consulting by phone at (204) 292-6415 or by email at Derek.Wiebe@Stantec.com.

[May 3, 2020]

We understand that now is a time of much uncertainty but want to assure you we are proceeding on the assumption that construction will continue amid the COVID-19 pandemic.

As restrictions around COVID-19 continue to evolve, we will continue to use alternate means of communication as necessary to ensure that any discussions we are unable to have in-person still occur. If you anticipate being away from your business and/or mailbox for an extended period of time, please contact us with an alternative address, phone number, and email at which we can reach you, leading up to and during construction.

Additionally, as the health and safety of both the public and our staff and contractors is paramount, we will be modifying our work plan as required, as per Manitoba Health recommendations for the industry.

Water service during construction – On Corydon Avenue between Harrow Street and Stafford Street

We may have to provide you with a temporary water service from time to time, by connecting an overland hose to your outside tap or within your building. To attach this hose, we will need to enter your property.

If we cannot provide a temporary water service, we will coordinate with you and try to schedule any interruption so it will be the least disruptive.

We will also have to shut off your water service for a short time on a few occasions and will try to give you 24 hours' notice. If you are a business, we will do everything we can to schedule this outside of your regular business hours.

We may have to shut off your water without notice. If this happens, we will restore your service as quickly as possible, usually within four to six hours.

Even though we disinfect the new water main once it is installed, you may find that the water tastes a little different and is cloudy. This is common after water main work. The water will return to normal within a few days. You can use the water and there is no need to take special precautions.

For more information on drinking water quality, visit our website at Winnipeg.ca/waterquality

We appreciate your patience during construction and look forward to a completed project this fall.

Sincerely,

Scott Suderman, P.Eng
