Stage 2: Munroe Avenue Pavement Renewal – June 2021 to September 2021
Munroe Ave will be fully reconstructed between Henderson Hwy and Watt St. The reconstruction will include drainage infrastructure improvements; concrete pavement reconstruction; sidewalk reconstruction; private approach renewals; geometric improvements of the Munroe Avenue/Watt Street intersection; street lighting improvements; and traffic signal upgrades.

Stage 2 Traffic and Access Management
- Construction will proceed one lane at a time, allowing one lane of eastbound traffic to be maintained for the duration of the project from Henderson Hwy to Watt St.
- Parking will not be permitted on Munroe Ave.
- Access to Brazier St will be limited.
- Access to Roch St will be maintained as much as possible.
- Access to alleys will not be maintained.
- Access to private approaches from Munroe Ave will be interrupted during construction and accommodations will be made to minimize the impact of closures as much as possible.
- Sidewalks will be maintained on one side of the street at all times.

General notes
- Garbage and recycling collection will continue to be picked up at regular times and locations.
- If you are a business with access, delivery or loading requirements that we have not been made aware of, please contact us to discuss your needs.
- We also ask those with any accessibility concerns, special events, known underground appurtenances, such as sprinklers or lighting cables within 6m of the Watt St curb line, or questions or concerns regarding construction to contact Kelly Groff at 204-259-1527 or Kelly.Groff@wsp.com.

Additional information on this Regional Renewal project is available online at winnipeg.ca/publicworks/construction/projects/MunroeWattJohnson.stm

We appreciate your patience during construction and look forward to a new Munroe Avenue in 2021.

Sincerely,
WSP Canada Inc.

Kelly Groff, P.Eng.
Project Engineer
