CITY OF WINNIPEG CONSTRUCTION NOTICE

TO: RESIDENTS AND BUSINESSES OF SPRINGFIELD ROAD
RE: 2021 LOCAL STREET RENEWAL PROGRAM
SPRINGFIELD ROAD FROM – BRIAN STREET TO 130m WEST OF ROTHESAY STREET

Please be advised the Springfield Road street renewal project is scheduled to begin on the week of May 25, 2021

Construction start: Week of May 25, 2021
Duration: Approximately 6-8 weeks, weather permitting

During construction, traffic will be limited to one direction. Work will start on the westbound lane, with westbound travel closed and eastbound permitted. Once work is complete on that side, we will begin on the eastbound lane with eastbound travel closed and westbound permitted. All on-street parking will be prohibited. Pedestrian access to all business and residences will be maintained. During some portions of the work, you may temporarily lose access to your private approach; however, the contractor will contact you a minimum of 24 hours in advance.

Work will include installation of new catch pits and catch basins, adjustment of existing catch basins and manholes, milling of existing asphalt overlay, concrete pavement repairs, replacement of missing and damaged curbs, renewal of curb ramps, localized sidewalk repairs, boulevard restoration, and placement of an asphalt overlay.

Additionally, we will be installing traffic calming measures on Springfield Road between Graduate Path and Raleigh Street to address speeding concerns, as traffic data shows operating speeds on Springfield Road are close to 60 km/h.

- Two types of traffic calming measures are being installed to help bring operating speeds in line with the 50 km/h speed limit:
  - Curb extensions are being installed on the south side of Springfield Road between Graduate Path and Brian Street, and on the north side of Springfield Road between Brian Street and Rothesay Street.
    - Curb extensions narrow the roadway, causing motorists to slow down. When installed at intersections, curb extensions also reduce pedestrian crossing distance and improve pedestrian visibility.
  - Lateral shifts are also being installed on Springfield Road, which are a new type of traffic calming measure for Winnipeg.
    - A lateral shift creates a ‘jog’ in what would be a straight roadway, causing motorists to slow while diverting from a straight path. Two lateral shifts will be installed on Springfield Road; one east of Rothesay Street, and the second east of Brian Street.

- As a result of the lateral shifts, on-street parking will be permanently moved to the side opposite its current location at the lateral shifts.
  - Parking will be permitted on the north side between Henderson Highway and the lateral shift east of Rothesay Street, will switch to the south side between the lateral shifts, and return to the north side between Brian Street and Rothesay Street.

May 25, 2021

During construction, garbage and Recycling will continue to be picked up at the regular time and location. The Contractor will relocate bins and replace them following collection if required.

Please contact us with any accessibility needs or questions about the project at 204-986-3249.

We appreciate your patience during construction and look forward to completion of the Springfield Road street renewal project.

Sincerely,

Erik Hansen, C.E.T.
