Reader's Guide

This **Reader's Guide** is intended to provide the reader with a basic understanding of the supplement to the 2023 preliminary budget, developed from the budgeting process, as well as briefly describe the document's content and layout.

The **Supplement to the 2023 Preliminary Budget** provides summary and detailed information on capital projects and financing for the capital program, and additional information for the operating budget, set out in the following sections:

- ❖ The **Capital Project Summary** provides a listing of capital projects for 2023 through to 2028, highlighting related financing sources.
- ❖ The **Capital Project Detail** section gives additional information about each project in the budget, including project descriptions, current year's budget and five-year forecast, cash flow projections, net impact on the operating budget, and previous budget authorizations, if applicable. The capital estimate and service area are identified, as well as the link to OurWinnipeg to ensure all capital projects align with city objectives.
- ❖ The **Listing of Grants / Payments** section provides information on grants in the operating, capital, and reserves budgets. The operating grants/payments are separated in to four categories (annual, long-term, other programs and value in kind)
- ❖ The **Appendices** provide additional context information in support of the budget documents.

Capital Project Summary

2023 Preliminary Capital Budget and 2024 to 2028 Five-Year Forecast

Note:

In the attached Capital Project Summary, tax supported capital projects are financed by cash to capital unless other funding is disclosed for the project.

Capital Project Detail

2023 Preliminary Capital Budget and 2024 to 2028 Five-Year Forecast

Notes:

1. Capital Budget amounts are estimates only and are subject to materials management policy (e.g. tenders, bids, and contract awards including Public Private Partnership Proposals).
2. The Public Service uses a cost estimate classification determined using AACE International Recommended Practices for capital budget estimates – see Appendix 2.
3. Included in the capital project authorizations are corporate and departmental overhead amounts (FTE related costs, administrative costs, etc.). Consistent with asset management principles, specific recoveries are included in the capital project business case/basis of estimate. Actual expenses may vary from budget depending on in-year circumstances.
4. Included in the capital budget authorizations, for Public Works only, are amounts for Strategic Municipal Infrastructure Research (SMIR), not to exceed 0.5% of tax-supported infrastructure preservation capital budgets, as approved by Council on April 30, 2003. Infrastructure is defined as permanent physical systems of a community, including roadways, utilities, water, sewage, buildings and parks. SMIR funding is essential to undertake research that will optimize life cycle costs and innovate to provide the best value for construction and preservation of Public Works infrastructure.
5. Capital projects could be aligned to multiple *OurWinnipeg* goals; however, the most relevant goal is noted on individual projects. *OurWinnipeg* is the guiding development plan for the City.

Class Estimate: Not applicable, as this is a program

Projects in 2023 will not proceed to construction until a class 3 estimate is obtained.

Budget is used for the construction of new pedestrian and cycling facilities, facilities enhancements, studies, and support for public education, awareness and promotions of walking and cycling. The budget may be utilized for the purchase of land to facilitate the delivery of new and enhanced facilities as required. Funding is also used to support public engagement and design studies in advance of planned road renewals.

The Pedestrian and Cycling Program supports the delivery of the City's long-term vision to maximize transportation options by ensuring the accessibility, comfort, and safety of walking and cycling in Winnipeg.

The Director of Public Works may be required to reallocate funds within the Pedestrian and Cycling Program based on financing requirements.

On July 15, 2015, Council approved the Winnipeg Pedestrian and Cycling Strategies (PCS) with the following motion: All costs included in the Pedestrian and Cycling Strategies are estimates, no budget allocation is included with the approval of the Pedestrian and Cycling Strategies document, and all projects and project costs relating to the Pedestrian and Cycling Strategies document will be considered by City Council through the annual budget process. Pedestrian and Cycling Action Plans will be presented to the Standing Policy Committee for information on a yearly basis to provide status updates on previous and current projects.

Pedestrian and Cycling Program (continued):

On July 13, 2016, Council approved the recommendation of the Standing Policy Committee on Infrastructure Renewal and Public Works: That all projects related to the Pedestrian and Cycling Strategies document be submitted to the Standing Policy Committee on Infrastructure Renewal and Public Works for recommendation to Council.

On April 20, 2021, the Standing Policy Committee on Infrastructure Renewal and Public Works passed a motion that every September the Public Service shall provide the standing committee with the next year's proposed work plan for the Pedestrian and Cycling Strategies document, highlighting any changes from the current five-year forecast.

Any surplus funds will automatically be transferred to the following year's Pedestrian and Cycling Program Budget. On December 15, 2021, Council directed that any surplus funds from Active Transportation (AT) infrastructure identified as part of the report described in Recommendation 2.J. of the 2022 budget be transferred and dedicated to the following year's AT capital program.

On December 15, 2021, Council directed (as per 2022 Adopted Capital Budget recommendation 2L) the Public Service to:

- i. Include active transportation facilities in all road renewals and rehabilitations that have been included in the 2022 Preliminary Capital Budget and 2023 to 2027 Five-Year Forecast, if facilities in those locations have been identified within the Winnipeg Pedestrian and Cycling Strategies.
- ii. That in the event the road project and the active transportation facilities exceed the delegated authorities of the public service, or the project cannot be built as contemplated in the Winnipeg Pedestrian and Cycling Strategies, the Public Service be directed to report back to the appropriate Committee of Council on their recommendation to construct the facilities as prescribed, with a request for additional spending authorities, or recommend an alternate plan to restore the connectivity of the active transportation strategies network.
- iii. Update the Winnipeg Pedestrian and Cycling Strategies in conjunction with the next update of the Transportation Master Plan to ensure that future roads investments requiring AT will be reviewed and analyzed prior to making road investments.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The Pedestrian and Cycling Program supports the following program areas:

Sidewalks Regional and Non-Regional - Various Locations

Includes construction of new sidewalks on regional streets where none presently exist and where provision is warranted. Provides additional funding to support pedestrian crossings improvements and/or crossing upgrades on regional streets. The prioritization of future locations will be guided by the Pedestrian and Cycling Strategies, which is currently being updated as part of the Transportation Master Plan 2050 process. Upon its completion, the priority sidewalk locations will be identified through the annual Pedestrian and Cycling Program update or the annual capital budget process.

Includes construction of new sidewalks on non-regional streets that must meet at least one of the following:

- connect existing sidewalks to a significant destination business/public facility/senior facility, etc.
- is located within 1.5 km of a school and has been identified by a Neighbourhood Based Consultation process (for example a School Travel Plan or Neighbourhood Area Plan);
- is required to connect pedestrians to a bus stop, where the property owners fronting the proposed sidewalk are not considered to be the main or a major benefiter from the new sidewalk, and likely would not support the sidewalk as a Local Improvement.

Bicycle Corridors

Development of new bicycle facilities on the Bicycle Network as prioritized in the Pedestrian and Cycling Strategies. Provides support to complete gaps in the Bicycle Network. Supports the supply and installation of permanent and temporary bicycle parking through an annual Bicycle Parking Grant program. Provides additional funding to support the development of Neighbourhood Greenways during local street renewal projects. Considers support for a pedestrian and cycling monitoring strategy. Supports the replacement of pre-cast curbs on existing routes, as required.

Development of Neighbourhood Greenways - bike routes introduced on neighbourhood streets with low vehicle speeds and volumes that may include a range of treatments to slow down traffic and reduce traffic volumes to improve safety for walking, biking and driving.

Recreational Walkways and Bicycle Paths

Construction of new recreational walkways and off-street bicycle path facilities where no walkway or cycle facility presently exists, and where the provision of such a facility is warranted.

Public Education, Awareness and Promotion

Support educational programming, public safety and awareness in support of walking and cycling. Supports the promotion of new and existing pedestrian and cycling facilities including a walking and cycling communications strategy. Considers support for a City-wide wayfinding system.

PUBLIC WORKS - GENERAL CAPITAL FUND

Pedestrian and Cycling Program (continued):

Partnership Grant Program

The Public Education, Awareness and Promotion grant program provides a funding opportunity for not-for-profit / community based industry partners who promote cycling and active transportation in Winnipeg. Grant applications are submitted, assessed and approved annually.

Funding will be used to replace portable traffic study equipment that is nearing end-of-life including:

- Automated midblock counters; and
- Video collection units for manual traffic studies.

With the adoption of the 2023 Capital Budget, Council authorizes a first charge in the amount of \$162,000 in 2023 or prior to the adoption of the 2024 capital budget to facilitate timely equipment replacement.

Updating information that affects the recommendations in the Transportation Master Plan is necessary to account for temporal changes in land use and transportation needs. This is also required to meet the needs of OurWinnipeg and Complete Communities.

A comprehensive revision commenced in 2019.

Beyond the Transportation Master Plan, follow-up and related projects in 2023-2026 are anticipated to include:

- Winnipeg Truck Data and Model Development (2023)
- Winnipeg Areas Travel Study (WATS) Update (2024 and 2025)
- Winnipeg Microscopic Transportation Model (Downtown and Norwood Bridge/St. Mary's/Marion) (2026)

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Traffic signal bases provide the structural foundation for traffic signal poles and cabinets. As a result, they are crucial for the safe construction and operation of traffic signals. This program is to replace traffic signal bases in poor condition. In total, 502 high-risk bases must be replaced over 10 years (50 per year). This represents 7% of the bases in the City.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Funds will support the development of post-preliminary design work for priority major capital transportation infrastructure projects to address priority transportation network improvements. The post-preliminary design work may include value for money assessments for evaluating alternative project delivery methods which may include traditional design/bid/build, design/build, public private partnership, and/or construction management delivery methods.

Project selection will be determined through the investment prioritization process in keeping with asset management best practices.

Work will not commence until a class 3 estimate is obtained.

PUBLIC WORKS - GENERAL CAPITAL FUND

Regional and Local Street Renewal (continued):

Any surplus funds will automatically be transferred to the following year's Regional and Local Street Renewal Program Budget.

Funding includes \$3.94 million rebudgeted from previously approved capital program budget - see Appendix 4.

On May 14, 2008, Council concurred in the recommendation that a policy be adopted to incorporate Active Transportation facilities into any reconstruction or rehabilitation required on any infrastructure identified as an Active Transportation facility in the Proposed Active Transportation Network. On July 15, 2015, Council adopted the Pedestrian and Cycling Strategies as the long range pedestrian and cycling transportation policy for the City of Winnipeg. Depending on the proposed street renewal treatment and the planning and priority status of the proposed sidewalk or pedestrian and/or cycling facility, the Regional and Local Street Renewal program may include new sidewalks or implement the intention of the Winnipeg Pedestrian and Cycling Strategies.

On December 15, 2021, Council directed that any surplus funds from Active Transportation (AT) infrastructure identified as part of the report described in Recommendation 2.J. of the 2022 adopted budget be transferred and dedicated to the following years' AT capital program.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Regional Street Renewal Program

The Regional Street Renewal program includes the renewal and reconstruction of the City's regional streets, sidewalks and recreational walkways/paths, as well as incorporating pedestrian and cycling facilities on regional street renewal projects where identified in the Winnipeg Pedestrian and Cycling Strategies. The program also funds the condition rating of regional streets. The purpose of this program is to maintain the level of service, structural integrity, and rideability of the transportation infrastructure network.

All Regional Street Renewal projects have a warranty period after substantial completion and/or in-service date for which costs may be incurred by the City. The Director of Public Works is authorized to establish projects to a maximum of \$100,000 each to charge costs associated with warranty work should the related Regional Streets project be closed. The capital budget for the new project will be allocated from other surpluses within the program.

Any new projects using surplus funds in the 2023 Regional Street Renewal Program shall be approved by the Standing Policy Committee on Public Works.

A Regional Street Renewal Reserve (RSRR) was established in 2014 to increase investment in regional streets. On March 20, 2019, Council approved a change to the RSRR to include repair, renewal, and replacement of bridges. A separate 1% property tax increase planned until 2022 and 0.3% thereafter, will continually fund this reserve each year to ensure a dedicated funding stream for regional streets.

Use of the Regional Street Renewal Reserve for purposes other than regional street, sidewalk or bridge renewals requires approval of 2/3 of City Council.

On March 22, 2018, the City received approval in principle from the Province and on September 4, 2018, received approval in principle from the Federal Government indicating the federal and provincial contributions towards the Accelerated Regional Renewals Application will be in the order of \$100 million from each over 5 years (2019 to 2023).

On March 29, 2019, the City of Winnipeg and the Province of Manitoba executed the "Accelerated Regional Street Renewal Contribution Agreement", and on September 23, 2019, the City of Winnipeg and Canada executed the "Agreement for the City of Winnipeg Accelerated Regional Street Renewal Project". These agreements commit all parties to the funding arrangements as indicated in the Accelerated Regional Streets Renewal Program section of the Regional and Local Streets Program herein.

On December 15, 2021, Council authorized first charges in the amount of:

- \$37.4 million on 2023 accelerated streets in 2022 or prior to the adoption of the 2023 capital budget to facilitate timely delivery of all 2023 accelerated regional street projects.
- \$31.6 million on 2023 non-accelerated streets in 2022 or prior to the adoption of the 2023 capital budget to facilitate timely delivery of the projects.

Refer to Attachment 1 of the 2022 Budget Volume 2 - Council Recommendations for specific locations.

With adoption of the 2023 Capital Budget, Council authorizes first charges in the amount of \$48.1 million for 2024 non-accelerated streets in 2023 or prior to the adoption of the 2024 capital budget to facilitate timely delivery of the projects. Refer to Attachment 1 of the 2023 Budget Volume 2 - Council Recommendations for specific locations.

Regional and Local Street Renewal (continued):

Local Street Renewal Program

Local Streets are all non-regional streets including residential streets, collector streets, industrial streets, and park streets. The Local Street Renewal program includes the renewal and reconstruction of the City's local streets, sidewalks, and alleys, as well as constructing new sidewalks on local street renewal projects where identified in the Winnipeg Pedestrian and Cycling Strategies or where the terms for New Non-Regional Sidewalks under the Pedestrian and Cycling Program are met. The program also funds the condition rating of streets, sidewalks, alleys and recreation walkways/paths. The purpose of this program is to maintain the level of service, structural integrity, and rideability of the transportation infrastructure network.

On November 20, 2013, Council amended the Local Improvement process by creating a pilot program for six years (2014-2019) whereby the City of Winnipeg will finance asphalt paving of granular lanes as local improvements to the maximum of 50% of the cost of the improvement; and approved that the \$1 million Granular Lane Fund be used as a funding source for the City's share of the amended Local Improvement Program. On July 19th, 2018, the City of Winnipeg City Council approved a six year extension to this program (2020-2024). On December 15, 2021, Council extended the program to 2027. The approval of the annual budget will extend the program to the five-year capital forecast. The Granular Lane Improvement Program's annual \$1.35 million includes \$350,000 per year that is dedicated to the lane pulvmixing program.

On July 9, 2019, the City received notification from the Province of Manitoba of a one-time top-up transfer of \$44.09 million in Federal Gas Tax (Canada Community-Building Fund) funds. \$22.5 million will be allocated to 2019 projects, as approved by Council April 25, 2019. \$20 million will be allocated to Local Street Renewals in 2020 and \$1.59 million will be allocated to the Pedestrian and Cycling Program in 2020. During the 2020 budget process federal gas tax funding (Canada Community-Building Fund) was replaced with external debt to allow for reallocation to other capital projects. The City will borrow \$20.0 million in 2020 to offset this reallocation and the Local Street Renewal Reserve will pay principal and interest charges on this new debt.

All Local Street Renewal projects have a warranty period after substantial completion and/or in-service date for which costs may be incurred by the City. The Director of Public Works is authorized to establish projects to a maximum of \$100,000 each to charge costs associated with warranty work should the related Local Streets project be closed. The capital budget for the new project will be allocated from other surpluses within the program.

Any new projects using surplus funds in the 2023 Local Street Renewal Program shall be approved by the Standing Policy Committee on Public Works.

A Local Street Renewal Reserve (LSRR) was established in 2013 to increase investment in local streets, lanes and sidewalks. On March 20, 2019, Council approved a change to the LSRR to include the repair, renewal, and replacement of bridges. A separate 1% property tax increase planned until 2022 and 1.7% thereafter, will continually fund this reserve each year to ensure a dedicated funding stream for local streets.

Use of the Local Street Renewal Reserve for purposes other than local streets, alleys, sidewalk or bridge renewals requires approval of 2/3 of City Council.

On December 15, 2021, Council authorized first charges in the amount of \$7.5 million on 2023 local street renewal projects in 2022 or prior to the adoption of the 2023 capital budget to facilitate timely delivery of the projects.

As per recommendations B.1 and B.2 of the Road Construction Working Group Report, approved by Council on September 26, 2019, specific local streets are included in the program details. See next pages for program details.

Class Estimate: Not applicable, as this is a program

Annual program to carry out preventative maintenance, major repairs, improvements or replacement to existing bridges, overpasses, underpasses, culverts and related bridge infrastructure, ensuring continued and continuous services of these facilities to the maximum practical extent.

On March 20, 2019, Council approved a change to the Local Street Renewal and Regional Street Renewal reserves to include the repair, renewal, and/or replacement of bridges as an eligible expense to be funded from these reserves.

Funding of \$16,500,000 included in 2028 will be allocated to a major bridge renewal at either Arlington Overpass, Louise Bridge, or the St. James Bridge. Ongoing studies are anticipated to be completed in 2023 to support the prioritization of these projects.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The overpass on Pembina Highway over Bishop Grandin requires bridge deck rehabilitation, including reconstruction of the exit loop ramps. The timeline for feasibility, preliminary design, and detailed design and construction is noted in the class estimate table above.

Note that construction of a pedestrian-cycling overpass over Pembina Highway, connecting legs of the Bishop Grandin Greenway, is not included in the project scope.

The rehabilitated structure will provide an additional 50 years of service life and the new pedestrian overpass structure will provide a service life of 75 years.

On March 20, 2019, Council approved a change to the Local Street Renewal and Regional Street Renewal reserves to include the repair, renewal, and/or replacement of bridges as an eligible expense to be funded from these reserves.

The scope of work for this project is to examine cost effective functional design alternatives for an active transportation grade separation, in the vicinity of the existing Osborne Street Underpass, to address a gap in the Active Transportation Network to cross the Canadian National Railway mainline. In addition, functional design will be undertaken to review rehabilitation of the existing Osborne underpass to address deficiencies in land drainage, vertical clearance, pavement condition, and traffic operations through the Osborne/Pembina/Corydon/Donald intersection. Detailed design is anticipated to commence in 2028

Authorization (\$000's)						
Detailed Design & Construction	15,600	23,200				

The St. Vital Bridge (Red River) connecting Osborne Street to Dunkirk Drive will require bridge deck rehabilitation, including marginal widening, to better accommodate pedestrian and cycling requirements. The timeline for detailed design and construction is noted in the class estimate table above. Construction is expected to be staged over a two-year period from 2023 to 2024. The major benefit of constructing this project includes maintaining required service levels related to bridge condition, roadside safety and accessibility requirements. Significant risks associated with constructing this project include project delays due to seasonal river access. Significant risks of not constructing or deferring the project include inability to maintain quality level of service. The rehabilitated structure will provide an additional 50 years of service life.

\$10.7 million in roadworks renewals is forecasted within the Regional and Local Street Renewal Program in 2024.

On June 23, 2022, Council authorized a first charge of up to \$15.6 million in 2022 or prior to the adoption of the 2023 capital budget to allow award of contracts to ensure a timely delivery for the project.

PUBLIC WORKS - GENERAL CAPITAL FUND

St. Vital Bridge Rehabilitation (continued):

With the adoption of the 2023 Capital Budget, Council authorizes a first charge on the 2024 budget in the amount of \$23.2 million in 2023 or prior to the adoption of the 2024 capital budget to facilitate timely delivery of the project.

This project includes major rehabilitation of the Lagimodiere Twin Overpasses over Concordia Avenue and the Canadian Pacific Railway (CPR) Keewatin rail lines. Improvements to traffic capacity and roadside safety will be determined as part of a preliminary design study. The timeline for preliminary design and detailed design and construction is noted in the class estimate table above. Construction is forecasted to take place over a two-year period from 2026 to 2027 with a total project class 5 estimate of \$39.7 million. The major benefit of constructing this project includes maintaining current levels of service related to bridge capacity and condition. Significant risks associated with constructing this project include project delays related to railway coordination. Significant risks of not constructing or deferring the project include inability to maintain quality level of service. The rehabilitated structure will provide an additional 50 years of service life.

Construction will not commence until a class 3 estimate is obtained.

Class Estimate: 3

This project consists of a feasibility study to undertake a rehabilitation of the Arlington Street Overpass over the Canadian Pacific Railway (CP) Yards in 2023. In 2018, a preliminary design for a new bridge was completed that was to improve the level of service for all modes of traffic. The project is on the City's unfunded project list with no indication of when the replacement will be funded. The bridge is currently nearing the end of its service life and requires higher than normal maintenance. The feasibility study aims to define what is required for rehabilitation to provide a minimum 25 years of additional reliable service life until either a new bridge can be budgeted or improvements to other routes crossing the CP Yards can occur. Rehabilitation will not improve the level of service that was expected for the replacement bridge but some minor improvements may be achievable.

Class Estimate: Not applicable

The Disraeli Bridges and Overpass Facility was procured using a P3 approach and the facility opened on November 19, 2012.

The City will make on-going lease payments to Plenary Roads Winnipeg (PRW) extending until 2042. These payments are required under a 30-year contract with PRW and cover the remaining capital cost of the facility as well as the maintenance of the facility.

There are significant provisions in the contract to ensure the City's performance specifications are met and the facility is returned to the City in good condition at the end of the contract. Costs associated with monitoring this contract, including the salary recovery of the Senior Project Review/P3 Specialist and other P3 costs related to land titles registration are also included in this budget. Payments to PRW are performance based and are reduced where the City's performance specifications are not met.

A portion of the payment to PRW represents an annual amount dedicated to the maintenance of the facility, including long-term rehabilitative costs. This amount is adjusted for changes to the Consumer Price Index on an annual basis.

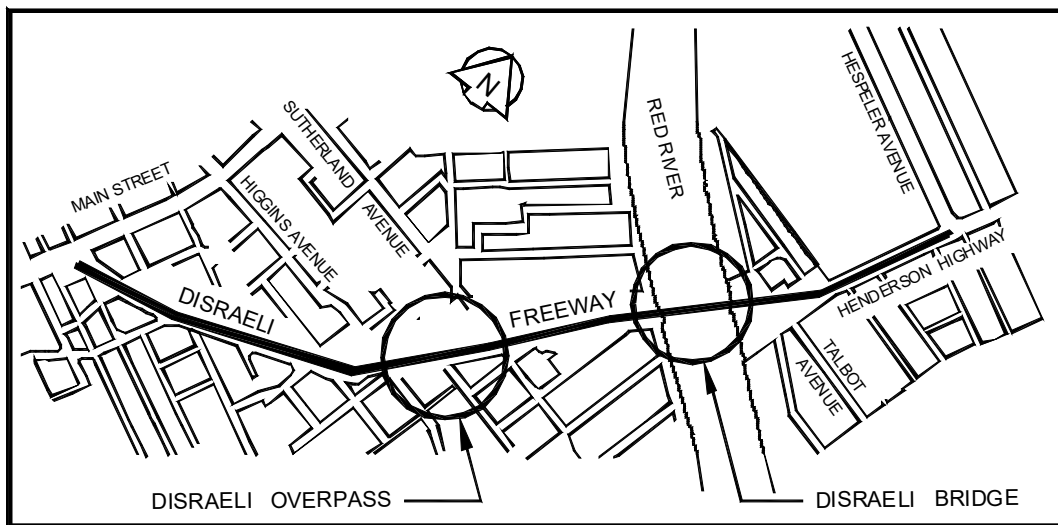

A portion of the project (\$75 million) was financed by \$25 million in external debt, with the balance being financed internally. The Public Service issued \$25 million in external debt at an interest rate of 3.759% over a repayment term of 40 years. Debt servicing represents interest and principal repayment of external debt and internal financing.

Disraeli Bridge and Overpass Facility (continued):

The above annual estimates relate to the maintenance phase of the project and include the authorization for the lease payments and debt servicing related to the facility.

In accordance with Bylaw 8164/2002 where the City's capital budget has not been adopted before January 1 of the year to which the budget is applicable, the Chief Administrative Officer is authorized, before the adoption of the capital budget, to approve expenditures not exceeding 30% of the amount the City of Winnipeg is contractually obligated to pay annually in respect of Public-Private Partnerships, as a first charge against the General Capital Fund.

As financing and administration costs are implicit in the lease payments, this project is exempt from the Corporate Administration and Interest charges.

The asset management program in the Public Works Department is centered on the application of quality management principles to the operation, maintenance, and renewal of infrastructure. A primary objective is the development and implementation of methodologies to preserve the infrastructure and to identify the funding necessary for the long-term preservation of the assets.

An objective of the asset management program is to extend this systematic structural quality management approach to all the infrastructure under the Public Works Department responsibility. Funds are required to implement new or maintain existing asset management programs.

This program will support the design, installation and renewal of park signage to promote a consistent signage, wayfinding, and mapping identity across the parks system, including:

- entrance signage;
- trail and major amenity identification; and
- universally accessible routes and amenities identification.

Furthermore, it will fund the renewal, planning, design, construction and installation of interpretive signage to support the provision of environmental education opportunities and experiences in parks.

This program will improve the accessibility and safety at existing and new waterway access points along the Red, Assiniboine and Seine rivers to permit year-round access. Specific improvements include, but are not limited to:

- installation of new, or improvements to existing, viewing platforms, stairs, launches, docks and gangway systems; and
- improvements to pathways and trails connecting to, from and between waterway access points, including supportive amenities such as lighting and park furniture.

Funds in 2028 (\$300,000) will be allocated to the hiring of a consultant to conduct a city-wide waterway access study, including comprehensive public engagement.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Program is focused on playground restorations, including play equipment and safety surface replacements, along with associated amenity and pathway improvements to enhance accessibility, and other park and recreation enhancements. It is generally delivered by the Planning, Property and Development Department on behalf of the Parks and Open Space Division of the Public Works Department.

Funding is to be allocated annually as follows:

- Approximately \$300,000 each year dedicated to address general playground and amenity safety concerns as they arise city-wide.
- Remaining funding to be divided equally between each of the fifteen electoral wards.
- Any grants paid through the program require Council approval and will not be subject to City overheads.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

This program supports sustainable urban forest management practices, and may include the following types of works prioritized by need:

- Tree pruning, removals and replacements
- Management of Dutch Elm Disease (DED)
- Emerald Ash Borer Beetle (EAB) response
- Installation of tree vaults and silva cells along major routes (coordinate with street and sidewalk renewals where possible)
- Inventory along City boulevards, plazas, and parks

Funding in 2023 includes:

- Seasonal temporary Forestry Technical Assistant positions (2.1 full-time equivalents)
- \$1.449 million dedicated to tree replacement on major routes

PUBLIC WORKS - GENERAL CAPITAL FUND

Urban Forest Renewal Program (continued):

The funding from Natural Resources Canada of \$7.188 million is conditional upon the successful negotiation and approval of the cost-sharing agreement and ancillary agreement between the Federal Government and the City of Winnipeg for the Two Billion Trees grant program.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Class Estimate: Not applicable, as this is a program

This funding is distinct from one-time funding announced for ongoing security reviews or work launched in early 2023 in consultation with Millennium Library staff. Further capital investment to address additional security needs may be forthcoming in 2023 through budget amendments, pending recommendations from that site review.

2023 capital funding will be used primarily for a feasibility assessment to re-design and renovate the Millennium Library lobby area.

Capital funding in 2024 - 2028 is required to address three areas:

1. Safety issues need to be addressed in many libraries (including upgrading lighting, installing and upgrading closed circuit television video monitoring technology, exterior improvements, and other building upgrades) as required, to ensure that libraries remain safe and welcoming to the community and deter vandalism and graffiti.
2. Address physical and customer service accessibility issues (including upgrading and installing washrooms, change rooms, specialty change rooms, signage, public entranceways and installing life safety apparatus) to meet the needs of the public.
3. Signage needs on the exterior and interiors of library facilities (including electronic signs, for promotion of services and programs) are required to make libraries more visible to the community.

Each year a portion of the funds will be utilized for projects within library facilities based upon established priorities.

Funding includes \$200,000 rebudgeted from 2019 adopted capital programs - see Appendix 4.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

This capital program is required to support small renovations and replacement of interior infrastructure (e.g. workstations, public work space, furniture, shelving and children's literacy areas) at libraries. Renovations and interior infrastructure replacement is required in order to ensure that library branches are safe, functional, accessible and part of a welcoming environment for library users that meets defined customer levels of service.

Projects may include but are not limited to:

1. Sir William Stevenson Library - Interior Renovation and New Universal Toilet Room
2. Munroe Library – Lighting Upgrade
3. Various Libraries – Furniture and fixtures to replace damaged items

Included in 2024 is \$351,000 rebudgeted from the adopted 2019 capital programs - see Appendix 4.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The Winnipeg Library Service supports the digital economy and fosters digital literacy by making public access computers available to all customers. Capital funds are required to upgrade and replace public access computers and support new innovative and efficient technology applications in libraries to address the changing needs of customers and move towards consistent service levels in all facilities by:

- increasing the number of public access computers system wide;
- upgrading and replacing aging public access computers, monitors and peripheral devices;
- upgrading self-checkout technology and the provision of additional Smartlockers;
- refreshing IdeaMILL technology to ensure the makerspace has access to current technology;
- expanding and enhancing information services through technological innovation and digitalization projects.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

A new community library is planned as an addition to the South Winnipeg Recreation Campus (SWRC) building, providing an integrated, multi-purpose recreation, leisure and library destination for an estimated population of 120,000. Funding in 2026 includes \$500,000 for preliminary design to obtain a class 3 estimate for the library addition and \$1.0 million for site development work related to the overall recreation site including athletic fields, pathways and park amenities. The total class 5 estimated project cost of \$12.5 million will be re-confirmed and updated through current work on phase one of the SWRC project.

Incremental operating costs cannot be estimated at this time and will be included when known.

Construction will not commence until a class 3 estimate is obtained.

Class Estimate: Not applicable, as this is a program

This capital program addresses workplace and public safety, health, and accessibility issues.

Recreation and aquatic facility amenities must be refurbished to meet public health and safety standards, regulations, and to enhance facilities to meet the needs of the public. Capital funding is required to address three areas:

1. Safety issues need to be addressed including upgrading lighting, installing and upgrading closed circuit television video monitoring technology, automated external defibrillator replacements at facilities and other building upgrades as required to ensure that facilities remain safe and welcoming to the community.
2. Address physical and customer service accessibility issues including washrooms, change rooms, specialty change rooms, kitchens, signage, public entranceways and installing life safety apparatus to meet accessibility needs.
3. Upgrades and replacements to facility signage including electronic signs for promotion of services and programs.

Each year a portion of the funds will be utilized for projects within the City's aquatic facilities and recreation centres based upon established priorities.

Funding includes \$171,000 rebudgeted from 2019 adopted capital programs - see Appendix 4.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Capital funding is required to replace cardio and strength based fitness equipment, on a rotating cycle, at the City's multi-use recreation and aquatic facilities, to continue to meet the program needs of patrons and to minimize safety issues that could arise from aging fitness equipment. Life cycle renewal of fitness equipment is a key part of the department's asset management plan in order to maintain customer levels of service.

Funding includes \$197,000 rebudgeted from 2019 adopted capital programs - see Appendix 4.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Class Estimate: Not applicable, as this is a program

All recommended projects are generally based on class 5 estimates with appropriate contingencies for that scale of design.

On March 20, 2020, Council directed the Public Service to report back within 180 days on a new three-year recreation and library facility investment strategy of up to \$50 million, starting in 2021, to be funded from the City's anticipated annual strategic infrastructure allocation from the Province of Manitoba. To date the Province has confirmed the 2021 and 2022 funding allocation; 2023 confirmation is pending.

On November 26, 2020, Council approved the Recreation and Library Facility Investment Strategy with a program of projects and investments across the indoor pool, outdoor pool, arena, recreation centre, community centre and library portfolios that renew and redevelop facilities to improve and maintain service throughout the city.

This program includes a maximum of 1 temporary full-time equivalent beginning in 2021 through 2023 to provide overall project coordination and support.

COMMUNITY SERVICES - GENERAL CAPITAL FUND

Recreation and Library Facility Investment Strategy (continued):

Project budgets above are notional and may be adjusted within the overall program as design and project scoping proceeds. Upon completion of approved projects, any unspent budget will be reallocated to other projects within the program based on need at that time.

For each approved project, up to 10% of the allocated budget be approved as a first call in the preceding budget year to facilitate project planning and design.

On November 26, 2020, Council directed that unallocated funds in the amount of \$7.0 million be allocated to the Land Dedication Reserve Fund, to be distributed equally amongst each of the 15 electoral wards over three years and that the use of the funds be subject to the terms and conditions of the Land Dedication Reserve Fund policy.

On December 16, 2020, Council authorized a first charge of up to \$300,000 in 2021 or prior to the adoption of the 2022 capital budget for the Recreation and Library Facility Investment Strategy - Land Dedication Reserve Fund allocation.

On December 15, 2021, Council authorized a first charge of up to \$600,000 in 2022 or prior to the adoption of the 2023 capital budget for the Recreation and Library Facility Investment Strategy - Land Dedication Reserve Fund allocation.

On May 26, 2022, Council approved a reallocation of \$8 million from arena funding, previously identified in the adopted 2022 Recreation and Library Facility Investment Strategy capital project to funding for the repair and maintenance, as determined by the Public Service, of the following arenas as well as a community centre arena in each ward in which there is not a City arena, with each receiving at a minimum \$100,000.

- A. Bertrand
- B. Billy Mosienko
- C. Century
- D. Charles A. Barbour
- E. Eric Coy
- F. Maginot
- G. Charlie Gardiner
- H. River East
- I. Sam Southern
- J. Sargent Park
- K. St. James Civic Centre
- L. Terry Sawchuck
- M. West Kildonan
- N. St. Vital
- O. Allard

Construction will not proceed on any individual project until a class 3 estimate is obtained.

The \$300,000 grant authorized by Council on December 15, 2021, will be flowed to the General Council of Winnipeg Community Centres in 2022 as a grant through a funding agreement.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Class Estimate: 5

Capital funding is required to develop a regional recreation and aquatic facility that would include a leisure pool, lane swim tank, indoor track, fitness areas, gymnasium and multi-purpose rooms attached to Transcona Library at 1 Transcona Blvd.

The existing Transcona Kinsmen Centennial Indoor Pool and other facilities in the area are near the end of their service life and are in need of significant investment or replacement. These buildings also do not currently meet accessibility standards and service expectations. The proposed new facility would provide a state of the art, energy-efficient public amenity, while allowing for the decommissioning of existing, aging assets. In addition, northeast Winnipeg has experienced significant growth and currently lacks adequate City-owned recreation and leisure programming. The proposed facility will provide the multi-purpose and gymnasium space to meet these service needs.

Funding in 2023 is for preliminary design to develop a class 3 cost estimate to further inform capital budget requirements. Project construction will not proceed until a class 3 estimate is obtained.

Incremental operating costs cannot be estimated at this time and will be included when known.

The City is experiencing significant population growth in the southeast region, including new neighbourhoods of Sage Creek and Bonavista, as well as established areas of Island Lakes and Royalwood. Service requirements include the need for multi-purpose recreation space, gymnasium space, and a library to serve this growing community. The General Council of Winnipeg Community Centres Plan 2025 also identified the need to build a new recreation facility somewhere in the south-east corner of the city to accommodate the residential expansion associated with these same areas. Through the Neighbourhood Area Structure Plan for Precinct 'K', an approximately 11 acre site in the Bonavista neighbourhood has been acquired by the City, which could be a potential site for the recreation/ community centre. A site for the library has yet to be determined.

Funding in 2026 is for a feasibility study for the building of a new community centre in the future; a market analysis to confirm future development options; and costs for public and stakeholder engagement to confirm project scope and priorities.

Incremental operating costs for both the community centre and library cannot be estimated at this time and will be included when known.

Class Estimate: 5

Capital funding in the amount of \$1.623 million in 2027 is required for preliminary design to obtain class 3 estimates for the replacement of Freight House Outdoor Pool. Total capital cost is currently estimated in the \$5 million to \$6 million range, and the potential to partner with other levels of government is anticipated.

The existing outdoor pool at this site is in poor condition, does not meet current accessibility standards nor provide adequate play value and amenities to serve this community experiencing higher levels of poverty. The new pool will include contemporary pool features such as an accessible pool access ramp, slides, spray features, shaded seating areas, diving board(s) and a new pool change/washroom and mechanical system building.

Project construction will not proceed until a class 3 estimate is obtained.

Incremental operating costs cannot be estimated at this time and will be included when known.

Capital funding is required for technological initiatives, which allow Community Services to upgrade existing information technology systems and introduce new/innovative technologies. The projects will incorporate technology that will allow increased efficiencies and reliability, and improve service delivery by being more responsive to customers. The funding will be used for hardware, software, and consulting services.

Projects may include, but are not limited to:

1. Facility Utilization Data Collection System for various sites including libraries, indoor and outdoor pools.
3. Continuation of the advertising program, which includes the implementation of digital displays signage at Community Services facilities.
4. Electronic reader outdoor signage for multi-use recreation and aquatic facilities.
5. Charging Stations for several indoor pool and recreation facilities.
6. Miscellaneous upgrades including the purchasing and installation of projectors, mobile software, etc.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Class Estimate: Not applicable

The Community Centre Renovation Grant Program (CCRGP), approved in February 2012, is to provide up to \$965,000 in dedicated funding to renovation projects for City-owned, board-run community centres in order to maintain and/or improve community centre infrastructure. On March 20, 2019, Council approved an increase to the program with an annual transfer of \$1.035 million from 2019 up to 2023 from the Financial Stabilization Reserve. The program is open to all General Council of Winnipeg Community Centres (GCWCC) in Winnipeg, is subject to an application process with two intake periods per year, project evaluation completed by a joint committee of GCWCC and the City, with maximum City contributions to each project of \$100,000 per project, subject to the grant program criteria.

Annually, up to \$965,000 is funded by the Land Operating Reserve. Transfers from the Land Operating Reserve (not to exceed \$1.2 million in aggregate) to the General Revenue Fund (\$235,000 for GCWCC programming grant) and General Capital Fund (\$965,000 for this CCRGP) are to be equal to 15% of the aggregate of gross land sales and the City's proportionate share of land sales derived from government business partnerships for the fiscal year two years prior to the budget year under consideration (e.g. transfer amounts for the 2023 budget year are based on 15% of the aggregate of actual gross land sales and the City's proportionate share of land sales derived from government business partnerships from 2021).

If actual gross land sales and the City's proportionate share of land sales derived from government business partnerships are less than the amount to achieve the maximum \$1.2 million aggregate amount (i.e. \$235,000 programming grant + \$965,000 for the CCRGP) for this program, the transfer to the General Revenue Fund of up to \$235,000 is made first with the residual balance, if any, transferred to the General Capital Fund for the CCRGP.

Operating expenses for 1 temporary full-time equivalent, beginning in 2020 through to 2023, are required to administer the expanded program and will be fully recovered through the CCRGP capital.

As this is a capital grant program, it is exempt from interest and administrative overhead capital charges.

* N/A - No amounts have been included in the "Previous Budgets" due to this commitment's on-going nature.

These capital dollars represent the City's ongoing commitment to Assiniboine Park building repairs, upgrades and park improvements.

The first year of funding for this capital grant was 2010 with \$5.123 million provided each year from 2010 to 2019 and \$5.1 million in 2021. The redetermination process for the grant was completed in 2020 and funding has been included at \$5.4 million from 2023 - 2028.

The capital grant authorized through this capital budget is subject to redetermination in 2024.

The release of capital funds is subject to annual explanation and submission from APC of projected cash flow needs, to the Public Service.

Funding includes \$627,000 rebudgeted from 2019 adopted capital programs - see Appendix 4.

As this is a capital grant program, it is exempt from interest and administrative overhead capital charges.

* N/A - No amounts have been included in the "Previous Budgets" due to this commitment's on-going nature.

On July 18, 2007, Council approved the award of a public private partnership (P3) contract for the development and operation of the East District Police Station based on a 30-year lease term. Occupancy date was in September 2008.

The above annual cash flow estimates include the authorization for the lease payments to be incurred and charged to the project in the General Capital Fund. They include technical maintenance, but not utility and other operating maintenance expenses.

As financing and administration costs are implicit in the lease payments, this capital project is exempt from the administration and short-term financing charge.

On March 22, 2016, Council authorized a first charge of up to 30% of the annual lease payments prior to the adoption of the annual capital budget, in the event the capital budget is adopted after December 31, in order to facilitate payments on the P3 contract.

In accordance with Bylaw 8164/2002, where the City's capital budget has not been adopted before January 1 of the year to which the budget is applicable, the Chief Administrative Officer is authorized, before the adoption of the capital budget, to approve expenditures not exceeding 30% of the amount the City of Winnipeg is contractually obligated to pay annually in respect of Public-Private Partnerships, as a first charge against the General Capital Fund.

The terms of the lease agreement between the City of Winnipeg and Huntingdon Real Estate Investment Trust ("HREIT") for the development and operation of the East District Police Station included a leasehold improvement allowance of \$825,000.00 to be provided in years seven (7), fourteen (14) and twenty-one (21) of the initial lease term. The commencement date of the lease agreement was September 15, 2008 and, as such, the first leasehold improvement allowance was due and payable during the one-year period from September 15, 2015

In 2014, HREIT was acquired by Slate Management Corporation ("Slate") and in accordance with the terms of the lease agreement, Slate remitted to the City in 2015/16 an \$825,000 leasehold improvement allowance, the first of three. In September 2022, Slate remitted the second \$825,000 leasehold improvement allowance, which is the financing source for this capital program budget. The Municipal Accommodations Division (Assets and Project Management Department), in close consultation with the Winnipeg Police Service, is responsible for delivery of the leasehold improvements work.

The work to which this funding will be allocated is to be determined pending a review in 2023 of the building's condition by Municipal Accommodations and Winnipeg Police Service staff. Note that the allowance is restricted to leasehold improvements as defined in the Lease. Monies cannot be directed towards structural or infrastructure items, which fall under the Landlord's responsibility.

This project is directly related to the Federal regulations governing PSAP (Public Safety Answering Point) providers.

This project will replace the two-way mobile radios with a reliable P25 (Project 25) two-way mobile radio capable of meeting the needs of the Winnipeg Police Service with a longer life span than the current two-way mobile radio, as the current radio will have reached the manufacturer's planned end of life. As the two-way radio system is the Winnipeg Police Service's mission critical voice communication system, it is imperative that end of life equipment be replaced for life safety of the members and the community.

This project is directly related to the Federal regulations governing Public Safety Answering Point (PSAP) providers.

The Winnipeg Police Service 9-1-1 Communications Centre currently uses a hosted computer telephone integration software platform for 9-1-1 and Police non-emergency call handling for the City of Winnipeg.

To maintain the integrity and functionality of the call handling equipment, this system requires the use of proprietary or certified computer hardware.

When the computer hardware becomes out of date and/or obsolete, appropriate security measures cannot be implemented. Further, the operating system requires computer hardware that can support upgrades to the latest versions. This cannot be done on obsolete equipment, causing vulnerabilities and security concerns to the 9-1-1 platform.

The call handling software, currently Motorola Vesta, cannot be deployed to its full potential with version or functionality upgrades on non-supported or out of date computer hardware. With the implementation of Next Generation 9-1-1 (moving 9-1-1 call flow to an Internet Protocol platform) anticipated in this five-year timeframe, there will be an increase in data flow on the call handling equipment. This includes the ability for text, pictures and videos on the 9-1-1 network. The 9-1-1 Communications Centre will require up-to-date, secure equipment to handle the 9-1-1 data flow for the City of Winnipeg.

Implementing this project will:

- Maintain and update operating systems, providing sufficient and robust functionality and security.
- Support cybersecurity best practice in a 9-1-1 communications centre setting.
- Allow for call handling system upgrades as they become available.
- Implement functionality on the call handling platform, including additional data flows from multimedia sources.

The Winnipeg Police Service will implement an end-to-end solution to effectively record, manage and analyze all of the relevant data streams coming into the 9-1-1- call centre. This includes analyzing location services data, picture, video, caller audio, emergency responder radio audio, and more.

Implementing this project will:

- Reduce Emergency Responder arrival times to events – due to better situational awareness of events going on within the city
- Improve response times for non-emergency calls.

This will increase emergency services operations level of service as well as the service level provided to Winnipeg citizens. The City will have a heightened level of awareness into what sort of service is being requested and subsequently provided to its citizens. The goal is to provide the city's residents with a more effective emergency response that can scale and match their dynamic set of needs for years to come.

This project is directly related to the Federal regulations governing PSAP (Public Safety Answering Point) providers.

Winnipeg Police Service Communications Centre has been the PSAP for Winnipeg since 1959. Call takers handle approximately 1,350 calls per day from the public, which includes both 9-1-1 emergency and non-emergency calls.

9-1-1 software renewals will provide reliable support for the latest telephony and 9-1-1 systems with provisions for both video/texting and other technological advancements. Project scope will include upgrades to the public safety grade internet protocol network. The system will be renewed on a five-year cycle.

Connected Officer Program is an innovative technology initiative that has been shown to improve efficiency and effectiveness for front-line law enforcement officers and improved service delivery for citizens. The long-term vision of the project is to transition to a service delivery model that involves mobile devices connected through technology. Funding will support the acquisition and renewal of hardware that will be distributed to officers. The hardware will be renewed on a 5-year cycle.

The mobile computing technology in Winnipeg Police Service (WPS) vehicles must be evergreened every five years due to the obsolescence of this equipment and the harsh environment to which they are subjected. Currently 235 vehicles require mobile computing devices plus a small contingency for spare devices. This includes the evergreening of laptops/tablets and keyboards, docks, modems, antennae, mounting equipment and associated cabling necessary to maintain connectivity with WPS public safety systems. Ergonomically placed computing devices in vehicles are critical for prevention of injuries to police officers.

This project is estimated in US dollars and converted to Canadian currency.

The current .40 caliber duty pistols require replacement. Police agencies and military across North America have already, or are in process of, transitioning to 9 millimeter (mm) pistols. Reduced demand for .40 caliber ammunition has resulted in reduced supply with a projected increase in cost, therefore creating an operational increase to the Service. 9 mm pistols are easier to shoot with greater accuracy with the same effectiveness at a lower operational cost.

With this capital funding the Winnipeg Fire Paramedic Service (WFPS) seeks to maximize the efficiency of the station network. This is achieved through relocations, replacements, and major enhancements to stations that help reduce costs but maintain the desired level of response.

This project will enable the WFPS to build a new station in Waverley West to service city growth and address response time issues. This station will be staffed with reallocated resources (staff and apparatus) from the St. Boniface Industrial Park and Windsor Park consolidation.

Site finalization in 2023 will provide a class 3 cost estimate prior to construction in 2024.

The site for the new station will be co-located with the Waverley Recreation Complex. Station planning will start once the recreational complex has completed the land use plan.

Funding in 2024 includes \$300,000 for the installation of a geothermal heating ventilation and air conditioning solution. The Department will seek funding from available 3rd party funding programs to cover the costs of this installation.

FIRE PARAMEDIC SERVICE - GENERAL CAPITAL FUND

Facility Optimization - Waverley West Station (continued):

2023:

- Land use plan
- Preliminary design
- Detailed design and contract administration conditional to approval of the final budget

2024:

- Begin construction

2025:

- Complete construction

On March 20, 2020, Council received as information the Winnipeg Fire Paramedic Master Plan. On January 28, 2021, Council referred the recommendations outlined in Appendix 2 of the Master Plan to the 2022 Budget process. This project is part of the recommendations in this Plan.

With this capital funding the Winnipeg Fire Paramedic Service seeks to maximize the efficiency of the station network. This is achieved through relocations, replacements, and major enhancements to stations that help reduce costs but maintain the desired level of response.

This project will consolidate the Silver Heights (#19, 320 Whytewold Rd.) and Portage Avenue stations (#36, 2490 Portage Ave.) on the existing Whytewold Road property. The consolidated station will maintain service capability and coverage of both areas. The new station will also house a relocated ladder truck from St. James (#20, 525 Banting Dr.). The sale of land from the Portage Avenue station will be used to offset costs via the Land Operating Reserve.

Detail design review and land use survey is being undertaken in 2027 to update the project to a class 3 cost estimate prior to construction.

FIRE PARAMEDIC SERVICE - GENERAL CAPITAL FUND

Facility Optimization - Silver Heights Fire Paramedic Station Consolidation (continued):

2027:

- Update existing station design drawings.

2028:

- Finalized detailed designs and begin construction.

2029:

- Complete construction.

On March 20, 2020, Council received the Winnipeg Fire Paramedic Master Plan as information.

On January 28, 2021, Council referred the recommendations outlined in Appendix 1 of the master plan to the 2022 budget process. This project is part of those recommendations.

This capital program supports the ongoing replacement of emergency response equipment that is nearing the end of its useful operating life. The replacement timing is set to ensure continuity of front line emergency operations while maximizing the operating life of the equipment and ensuring value for money.

The Fire Paramedic Service needs to replace the following specialized equipment in a cyclical process as it nears the end of its operating life. Funding for this equipment is provided by both the City of Winnipeg and Shared Health. The following list identifies the equipment and the funding source:

Priorities for 2023-2028 include but are not limited to:

City of Winnipeg funded assets:

2023 - 2025:

- Replacement of specialty fire and rescue equipment.
- Replacement of emergency mechanical services equipment.

2026 - 2028:

- Replacement of fire and rescue equipment;
- P25 Radios and equipment

FIRE PARAMEDIC SERVICE - GENERAL CAPITAL FUND

Equipment Obsolescence (continued):

Shared Health funded assets:

2023 - 2025:

- Replacement of emergency medical equipment.

2026 - 2028:

- Replacement of emergency medical equipment.
- P25 Radios and equipment
- Renewal of emergency call handling equipment.
- Replacement of other radio equipment

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

** Shared Health has confirmed up to \$2 million of its baseline funding to cover the funding effects of the capital program each year. The cost of this project in each year draws from this funding amount.

*** The City of Winnipeg will take out debt on behalf of Shared Health for this project. Shared Health will pay the interest and principal on this debt over an eight-year period.

These capital funds support an ongoing program of repair and structural maintenance to ensure station asset lives are maximized, thereby ensuring the service has an operable station network from which emergency response vehicles can be deployed across the whole city to meet required response times.

Priorities for 2023-2028 include, but are not limited to:

- Heating, ventilation, and air conditioning repairs and electrical upgrades to station 4,150 Osborne St.
- Concrete repairs to station forecourts, as required
- Swipe card installation and to improve security at 14 stations

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Emergency Vehicle Pre-emption (EVP) takes advantage of the City investment in centralized traffic signal control to provide intelligent traffic signalization for emergency vehicles. This increases priority for approaching emergency vehicles to enable the clearance of the junctions along their route and allowing safer and more rapid progression through to the emergency incident.

EVP was identified as a crucial addition to facilitate the station optimization program in meeting station reductions while maintaining response capability and coverage.

Winnipeg Traffic Management Centre and the Winnipeg Fire Paramedic Service 911 Communication Centre will trial pre-emptive software on selective intersections.

In 2022 capital funding was provided to Winnipeg Fire Paramedic Service to maximize the efficiency of the station network in the St. Boniface Industrial Area and Windsor Park area through relocations, replacements, and major enhancements to stations that help reduce costs but maintain the desired level of response.

In 2024 the consolidation of the St. Boniface Industrial Area station (#9, 864 Marion St.) and Windsor Park station (#15, 1083 Autumnwood Dr.) will be complete. The new consolidated station will service both the industrial area and Windsor Park area currently served by the two existing stations and house all existing staff and apparatus. This station will also house a relocated ambulance from the Fort Rouge station (#30, 524 Osborne St.).

2024:

- Decommission Marion station (#9) for resale.

The Land Operating Reserve funding amount shown above is based on the assessed value and represents the timing of disposition of the Marion St. Station.

The Winnipeg Fire Paramedic Academy is located at 2546 McPhillips St. The space is used for classroom training as well as external practical fire training. Due to substantial development in the Leila North and West Kildonan Industrial park there are concerns about the inconvenience live burn exercises will cause neighbouring properties.

These funds would go towards moving the outdoor live-burn training area from within the city to a location with more space to disperse smoke. This will address air quality concerns, while not jeopardizing the ability of the Winnipeg Fire Paramedic Service to train members.

Site development costs will include services, surfacing work, and installation of a pre-fabricated structure for shelter and as a classroom.

Class Estimate: Not applicable, as this is a program

This is an on-going office automation program. Its primary goals are to deliver cost-effective solutions that provide convenient customer service to citizens and to improve organizational efficiencies. These goals can be achieved through expansion of online services, office/ workflow automation, re-engineering of legacy systems, electronic documents management, and systems integration (e.g. database synchronization) between Planning, Property and Development's applications and those of other departments.

It is anticipated that maintaining and improving a solid technological framework can provide the basis for organizational improvements that increase efficiency and reliability. In order to improve service delivery, the goal is to make information more accessible, streamline workflows, and reduce any duplication of efforts. It can also be argued that some initiatives such as electronic document submissions are not only citizen-friendly but environmentally responsible as well.

A general program of ongoing system improvement is suggested and is seen as reasonable to ensure the continued longevity and viability of the City's investment in office automation.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The program objective is the functional and aesthetic improvements and required upgrades to public spaces and streetscapes in the Downtown and Exchange District National Heritage Site. The funds enhance accessibility, safety, comfort and urban design quality of pedestrian environments and fulfill the commitment to the "Downtown First" philosophy. The Downtown Winnipeg Urban Design Guidelines provide the guiding principles to support design and enhance the livability of Winnipeg's Downtown urban environment.

The program supports and develops ongoing opportunities for future Public / Private development and redevelopment partnerships and projects such as Old Market Square, Broadway, Hydro Tower, Millennium Library Park, Bonnycastle Park and the Assiniboine River Walk. Projects have traditionally relied on and/or leveraged other partnership opportunities and have supported private redevelopments.

These public open space and streetscape improvements are over and above and exclusive of work assumed by the Public Works, Transit, and Water and Waste Departments who are responsible for existing infrastructure such as curbs, street and sidewalk repairs, street trees, planters, boulevards, required maintenance, and accessibility standards.

PLANNING PROPERTY AND DEVELOPMENT - GENERAL CAPITAL FUND

Downtown Enhancement Program (continued):

Priorities in 2023 - 2028 include, but are not limited to:

- Support Downtown Recovery Strategy
- Broadway Shoal Lake Fountain Initiative
- Air Canada Park
- Old Market Square
- Downtown and Exchange District Pedestrian Facilities Enhancements
- East Exchange Interpretative Strategies
- Chinatown
- Public Art Integration
- Halo SHED (Sports, Hospitality and Entertainment District) developments including: 266 Graham Avenue, Garry Street, Smith Street, Edmonton Street and St. Mary Avenue
- Alexander Docks
- Supporting Exchange and Downtown BIZ placemaking initiatives
- Streetscaping support for larger scoped Public Works initiatives
- Broadway pedestrian enhancements

The City of Winnipeg reinvests in partnered projects in Business Improvement Zone (BIZ) districts and Neighbourhood Main Streets. These areas have their own distinct character with their own style of mixed-use, walkable business districts that serve as the cores of their neighbourhoods. These funds provide the opportunity for the residents and business owners to work in partnership with the City, BIZs, private sector, not-for-profit, other funding agencies, and other government bodies. This capital fund gives the incentive for the BIZ groups to go out and match dollars from sources other than the City. This capital fund, through partnerships, assists in stimulating community revitalization.

This enhancement program takes the form of decorative medians, pedestrian lighting, banner poles, special entry nodes, special pavement treatments, character signage, plants, trees and site furnishings, to ensure the renewal and sustainment of the infrastructure that creates a sense of place and destination in and along Business Improvement Zones and on Image Routes.

Projects in 2023 to 2028 are adjusted based upon community readiness and partnership opportunities.

These organizations utilize grants received from the City to leverage additional funding to undertake projects. Any one of the sixteen (16) Business Improvement Zones may be considered and reviewed for the Streetscape Enhancement Capital Grant funding in 2023. Specific allocations to BIZ groups will be subject to Council approval of a separate report in early 2023. Project funding will be delivered as a grant to each BIZ group through legally executed grant agreements.

As this funds capital grants within this program, it is exempt from interest and administrative overhead capital charges.

On September 24, 2003, Council approved in principle the Public Art Policy of the Mayor's Task Force on Public Art in Winnipeg and directed that the Chief Administrative Officer work in conjunction with Winnipeg Arts Council to develop the necessary procedures for implementing the direction of the policy, including but not limited to those areas relating to governance and funding. Council adopted a Public Art Policy on October 27, 2004.

The Winnipeg Arts Council, as the City of Winnipeg's implementation partner, submits for approval annually, a plan for the works to be undertaken.

This program is exempt from administrative overhead charges.

The City of Winnipeg is legally obligated through the approved Development Agreement Parameters to provide payback on older Developer Agreements based on the approved 48/52 split on the development of park costs. The funding formula is that the City of Winnipeg contributes 52% to the park development costs. Additionally, recognizing the need to do work concurrently beyond the basic requirements of the Development Agreement, these funds will cover provision of basic amenities that are more cost-effective and practical to install at the time of initial development (such as pathways, lighting, site furnishings, tree planting), particularly for linear park developments.

Applications from some of the outstanding (older) agreements are now being received due to the ongoing build out.

Calculations are based on industry consultation and the actual reviewed costs of works as they are completed each calendar year. Capital requirements are updated on an ongoing basis to reflect industry build out and Development Agreement amendments.

Capital Program to fund investments ensuring health/life safety requirements and the highest-and-best use investments associated with preserving continued facility operations that arise annually. Specifically, this program encompasses planned or emergency refurbishment, replacement, repair and maintenance upgrade projects for fire and life safety (e.g., emergency lighting), heating, ventilation, air conditioning, electrical, plumbing, building envelope, structural requirements, emergency power generation, and uninterrupted power systems. Funding is also allocated for critical systems including building automation and climate control, security, access control, and closed caption television systems. This program also ensures adherence to regulatory compliance upgrades, asbestos and other hazardous material remediation, and asset condition assessments. Finally, this program addresses physical accessibility issues such as lighting, signage, and public entranceways. Funding from the Province of Manitoba's Strategic Infrastructure Basket will be used to purchase and install a pool accessibility lift and the custom design and fabrication of a bariatric ladder at Elmwood - Kildonan pool.

ASSETS AND PROJECT MANAGEMENT - MUNICIPAL ACCOMMODATIONS

Health/Life Safety/Emergency Systems Refurbishment/City-Wide Accessibility (continued):

Funding includes rebudgeted amounts totalling \$1.997 million from previously approved capital programs / projects - see Appendix 4.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

This funding is for 185 Carlton Street to 375 York Avenue (North & South Walkway) - Weather Protected Walkway Refurbishment. The two existing weather protected walkways over Carlton Street were constructed in 1974 in support of the development of the Winnipeg Convention Centre. The existing concrete cladding panels are in poor condition and exhibit varying degrees of cracking, delamination and spalling. The existing windows are original to the structure and have exceeded their intended service life. Emergency cladding stabilization was completed in 2016 in order to delay the need for full replacement of the cladding. Replacement of the cladding on the two weather protected walkways is now required to maintain the existing level of service.

Funding includes rebudgeted amounts totalling \$2.322 million from the adopted 2020 capital project - see Appendix 4.

This funding is for condition evaluation of all Concourse building infrastructure, for upgrades and repairs to extend the useful life of the Portage & Main Underground Concourse for approximately 5 to 10 years, for an Environmental Site Assessment to identify asbestos containing materials not included in the City's asbestos inventory and other hazardous materials that may be present in the Concourse. This funding is also to be used for a feasibility study to determine options and provide Class 3 cost estimates for aesthetic and functional upgrading of the entire Concourse to be consistent with upgrades proposed or already completed by the adjacent land owners, and the condition evaluation of all lifting devices (escalators and barrier free lifts) owned and maintained by the City.

Funding includes rebudgeted amounts totalling \$707,000 from the adopted 2018 capital program - see Appendix 4.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The City Clerk's Department, Archives and Records Control Branch, supports records and information management City-wide, manages access and privacy responsibilities for the City, and operates the City of Winnipeg Archives and the Corporate Records Centre. The move to the new Corporate Records Centre at 1450 Mountain Avenue has enabled the branch to increase storage capacity for records scheduled for retention under the records management by-law, utilize specialized shelving solutions to better accommodate variable sized box transfers from departments, and realize operational efficiencies. Archival storage and public access/research services continue to be delivered out of a leased facility at 50 Myrtle.

Ongoing development of the Corporate Records Centre is essential to meet the City's records management requirements. Cost-effective storage and inventory management services enable departments to better manage records in accordance with the Records Management By-law 86/2010 ("by-law"), regulatory requirements, and the administrative standard, resulting in an increase in routine transfers of records out of expensive operational space to the more cost-effective Corporate Records Centre.

This project will ensure that the Corporate Records Centre continues to meet demand for storage of records scheduled under the by-law. Costs will include installation of additional specialized shelving solutions and the purchase of equipment to manage the growing inventory to ensure that City records are protected as required by law, and can be accessed and retrieved in an effective manner.

A further capital project will be established at the five-year mark from this project. Development of the Corporate Records Centre supports the City's commitment to increased transparency and better response times to requests through access legislation.

In accordance with the Department's statutory responsibility to compile a List of Electors and convene elections, every four years the department ensures the renewal of equipment and systems used in election processes.

As some of the systems are only used every four years, they require either extensive renovations or complete rewrites to allow them to function with changed systems, networks, and databases. Systems which need to be upgraded / revitalized for the 2026 election include the List of Electors system, Geographic Information System mapping, election night reporting systems and web sites, especially those utilizing the Internet for increased security and more effective communication with candidates, media, and the public.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The City Clerk's Department provides live streaming, live television broadcast, recording and providing various audio / video capabilities in six separate meeting areas, including the Council Chamber. In 2020, in response to social distancing regulations put in place to mitigate the spread of COVID-19, the department also began to facilitate meetings of Council, Committees and the Board of Revision online via the Zoom platform in the Council Chamber, the Committee meeting rooms and the Board of Revision meeting rooms. These facilities are used for 300+ meetings of Council and its committees, and for up to 5,000 appeal hearings each year.

The equipment used to facilitate these meeting is used virtually every day. Equipment includes automated cameras, microphones, speakers, amplifiers, digital recorders, live streaming boxes, closed captioning converters, digital storage, and television broadcast stations. Much of the equipment currently used was purchased in 2017 and typically has a five-year life span, but is already showing its age as some temporary upgrades had to be made in 2020 to accommodate conducting meetings via Zoom. A more permanent solution will require additional upgrades to ensure the various feeds can be accessed by newer technology.

The department also undertakes over 200 protocol events annually including openings, announcements, and flag raisings, where audio and other pool sound, and other technology is required. Equipment used for protocol events including speakers, amplifiers, pool sound, etc. is often used outdoors and is required to be moved from event to event. As such, the equipment is subject to wear and tear and does require regular maintenance and replacement to ensure 100% operational ability and reliability.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Renovations at 380 William Avenue will create a space that meets the programming needs of today's City of Winnipeg Archives, including the legislated and fiduciary requirements for the long-term storage and preservation of archival records.

The scope of work will include creating a new climate-controlled vault; renovating existing areas to create multi-purpose space, offices and meeting areas, as well as citizen focused research and workshop areas; improved shipping/receiving functions; numerous Building Code / Life Safety upgrades including the addition of new sprinklers throughout the facility and mechanical and electrical upgrades.

The renovations will enable the framework outlined in "A Reconciliation Framework for Canadian Archives", allowing the City to advance reconciliation efforts through governance, operations and organizational culture changes including fair representation, professional practice and relationship building.

Funds in 2023 are to advance the design and update the construction class to Class 3 prior to construction in 2024.

The Department is expected to seek out any available 3rd party funding for this project. If any funding application is successful, the project budget should be adjusted accordingly subject to Council approval. Project construction will not proceed until a class 3 estimate is obtained. This project will be managed by Municipal Accommodations.

INNOVATION & TECHNOLOGY - GENERAL CAPITAL FUND

Class Estimate: Not applicable, as this is a program

The Innovation Program will enable the City to create innovative ideas, utilize innovative technologies and approaches to improve existing systems, tools, and processes to primarily reduce costs or increase revenue, improve service levels, and add new capabilities. This will enable the Director of Innovation & Technology to fulfill the mandate of driving innovation for the City of Winnipeg to be smarter, more efficient, and more effective in meeting the needs of a growing city.

Winnipeg currently operates below optimum service levels in many areas. Adequate resource levels are often cited for the gap between what should be delivered and what is delivered for both external, citizen centric services as well as internal, administrative services. Prior to 2019, consideration of innovation to explore alternative technologies, ideas, processes and build new capabilities to bridge the gap has been limited. Winnipeg is filling its resourcing gap with innovation capability and outcomes that offer a return on investment.

Projects within the Innovation Program will be selected and delivered to build and reinforce a culture of innovation and provide the City with tangible outcomes. Transforming how services are delivered, or changing the service levels that a service can provide will be the focus. These projects will be delivered with a balanced approach that blends Innovation Engineering methods with the City's project management principles. Projects undertaken as part of the Innovation Program will produce expected benefits of operational efficiency gains, cost avoidance, citizen impact, revenue increase and cost decreases.

INNOVATION & TECHNOLOGY - GENERAL CAPITAL FUND

Innovation Program (continued):

The portfolio of innovation investments may include, but not be limited to:

- Innovation Technology Pilots will encompass pilot and trial projects that focus on the applications of novel technologies or novel applications of commodity technologies to business problems with an emphasis on identifying small projects that answer questions and test hypotheses to better inform future incrementally larger trials.
- Innovation Business Process Enhancement will look at the application of business modelling techniques to existing business processes that are currently a significant bottleneck or hindrance. This will focus less on technology and more on addressing the human and organizational business process elements and how those can be optimized for cost savings through appropriate analysis and application of Innovation Engineering methodology.
- Innovation Prototyping represents a collection of small projects aimed at testing concepts in a fail-fast-fail-cheap mindset. If efficiency gains are proven, they will often be the precursor to projects started in the other areas. These small initiatives will aim to gather information about the viability of an idea, technology, or approach in order to ensure that follow-up project decisions are made with demonstrated value.

The 2024 program may include a maximum of 2 temporary capital funded full-time equivalents.

The program budget is available for the Director of Innovation & Technology to make allocations to projects as deemed necessary. Executive Policy Committee is updated on the progress of this program annually.

Funding includes rebudgeted amounts totalling \$258,000 from the previously approved capital program - see Appendix 4.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The City runs its on-premise information technology infrastructure in two data centres that address the business requirements of a wide variety of critical business functions (311, PeopleSoft, Property Assessment, Taxation, Permitting, Parking Enforcement, Public Facing Internet, etc.). The data centre infrastructure has a finite lifespan and needs to be replaced (evergreened) on a periodic basis to ensure its continued operation and support of the business functions. There are also requirements to expand the capacity of this infrastructure to support the growing requirements of the organization.

As more business functions migrate to the cloud, there is less requirement for on-premise data centres and they become less financially viable compared to contracting for external data centre services. External data centre services can also provide a higher level of resiliency to support the critical business functions of the City compared to what can be achieved affordably on-premise. This program will migrate the current on-premise workload to an externally supported data centre and to the Cloud, with current data centres retired by 2026. The program will also sustain the external data centre subscription charges until they are established within approved operating budgets.

This program may include 3 temporary capital funded full-time equivalent.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Organizational Support Services depend on modern industry technologies for the delivery of their City-wide supports. As business needs continue to grow and change, so does the need for enhancement to existing systems, or entirely new systems to support these changes.

The Intake Program will provide a way for initiatives, which have been estimated to cost under \$100,000, to secure capital funding. This ability will improve the digital dexterity of the organization and better position the City of Winnipeg for a sustainable future. Projects within the program will be prioritized based on highest positive citizen impact, business value, return on investment projection, and cross organizational use.

Funding of \$254,000 in 2023 will be used to fund an Investment Planning Automation to assist with asset management within the City.

Operating costs are for support and maintenance. These amounts have not yet been reviewed by Council and are subject to change during future budget processes.

This program may include 1 temporary capital funded full-time equivalent.

Funding includes rebudgeted amounts totalling \$601,000 from the previously approved capital program - see Appendix 4.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Upgrade Microsoft Office Productivity Software to a supported version so critical security updates are received from Microsoft. Without security updates, the software cannot be used due to the organizational risk of security attacks to the rest of the City computing environment. Continued upgrading of Microsoft Office Productivity Software to avoid loss of use of Microsoft Office and widespread business impact.

Upgrade to be achieved by transitioning from purchasing Microsoft Office Productivity Software to subscribing for the required functionality through Microsoft Office 365.

Funding includes rebudgeted amounts totalling \$371,000 from the previously approved capital program - see Appendix 4.

This project may include 2 temporary capital funded full-time equivalent.

Implementation of a Citizen Portal to reduce 311 calls, improve citizen visibility into the progress of their requests, enable taxpayers to complete and submit forms online such as for TIPP (Tax Instalment Payment Plan) registration (thereby eliminating manual rekeying of data), and gradual replacement of Assessment and Taxation mailouts, with email notification. The project will also create a single portal that can be used for all City of Winnipeg online forms for citizen services and can integrate to existing applications and generate workflow, thereby reducing the need for custom development and improving the public perception of City of Winnipeg efficiency and effectiveness.

Funding includes rebudgeted amounts totalling \$1.0 million from the adopted 2018, 2019 and 2020 Innovation Program - see Appendix 4.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The City is committed to renewing its Call Center application investments on an ongoing basis to take advantage of new functionality and remain current with suppliers' support. Additional funding is required to upgrade software solutions responsible for supporting the 311 Call Centre.

311 Renewal Project is a regular investment in the application and technology required for 311 Contact Centre. This investment ensures 311 is able to take advantage of new functionality and remain up to date in the support applications.

This project may include a maximum of one (1) temporary capital funded full-time equivalent.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The funding is for system upgrades and rehabilitation to key assessment and taxation systems that interface with the two main Computer Aided Mass Appraisal and Manta systems. There are approximately 40 subsystems that interface directly to these systems and funding is required to ensure that they continue to work effectively and efficiently with upgraded platforms and operating systems.

The initiatives in this program may include a maximum of 3 temporary, capital funded full-time equivalent positions in 2024 and future years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Detailed Design & Construction	2,031	7,929				

Computer Aided Mass Appraisal System (CAMA) is an automated system used by the Assessment and Taxation Department for maintaining property data and valuing all real and business properties within the City of Winnipeg for the purpose of ensuring equitable taxation.

The City of Winnipeg has a legal obligation to create and deliver an annual assessment roll to the City Clerks Department. The legislation further requires that the Assessment and Taxation Department revalue all property through general assessments every 2 years. Updates to ownership records, property characteristics and new value are added to the roll on an ongoing basis.

A replacement system is required to ensure vendor support, system security, compatibility with vendor underpinning technologies, and flexibility to adapt to legislative changes to ensure mass appraisal can be calculated accurately and in a timely manner.

Preliminary design will develop the detailed requirements of the system as well as write the Request for Proposal for the system replacement. Detailed design and construction will implement the replacement system. Implementation will not begin until a class 3 estimate is obtained.

Consultation work of \$700,000 was previously funded by the Assessment Automation capital budgets from 2019-2022.

This project may include a maximum of 7 temporary, capital funded full-time equivalent positions in 2023 and future years.

Operating costs in 2028 are for increases in vendor costs. This amount has not been reviewed by Council and is subject to change during future budget processes.

Local Improvement capital projects are those which are financed partly by a direct levy on the properties benefited. The program is governed by Local Improvements By-law No. 98/72 and is subject to advertising and subsequent approval by the majority of ratepayers involved. The types of expenditure generally falling within this category are: paving of local streets and lanes; sidewalk and boulevard construction; installation of new watermain and sewers; ornamental street lighting and lane lighting.

The Transit Information Technology Program mainly provides technology upgrades to systems that support interaction between Transit operations and the public for improved technology throughout the department.

Transit also uses this program to implement innovative practices throughout the department to improve efficiency. Equipment related to achieving this innovation may be funded through this program.

Includes 2 Analyst Programmer full-time equivalent (FTE) positions for ongoing technology upgrades and 3 FTEs related to the redevelopment of Transit's Maintenance Management Information System (MMIS) including 1 Project Coordinator, 1 Information Specialist, and 1 Analyst Programmer.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Class Estimate: Not applicable, as this is a program

Surplus funds will automatically be transferred to the following year's Transit Building Replacement/Refurbishment program budget.

Transit's operations are housed at three primary locations - The Fort Rouge complex, North Main garage, and Brandon garage. The Fort Rouge and North Main facilities are approximately 40 and 80 years old, respectively, and are operating at capacity. The department funds the repair and maintenance of its infrastructure mainly through the operating budget; however, many of the structural, mechanical and electrical systems in the existing infrastructure are past their design and economic lives and capital funding is required to bring the infrastructure up to acceptable standards.

This multi-year capital program addresses the need for both larger and smaller scale projects within Transit's existing facilities, stops and stations. These projects are mainly required due to the age and condition of the assets. Projects may include, but are not limited to domestic water line replacement, fire alarm system upgrades, tunnel water proofing, and emergency lighting upgrades.

Includes 2 temporary capital funded full-time equivalent Project Coordinator/Manager positions.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Surplus funds will automatically be transferred to the following year's Transit Roof Replacement and Ventilation Upgrade project budget.

Transit's Fort Rouge Garage at 421 Osborne Street includes two major buildings that total approximately 480,000 square feet in area. The buildings were constructed in 1969 and 1978 and house over 70% of Transit's bus inventory.

The Fort Rouge campus storage, maintenance, and administration facilities require replacement of the existing ventilation systems (which includes makeup air units and exhaust fans) in response to a regulatory change in allowable levels of airborne nitrogen dioxide (NO2) in diesel exhaust, age, inefficiency of equipment, and pressure imbalances throughout the buildings. Work over the next several years will focus on ventilation upgrades. Projects may include, but are not limited Phases 2 through 4 in the Repair Garage including the High Bay Centre area, High Bay East, Stores and Low Bay.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Class Estimate: Not applicable, as this is a program

Surplus funds will automatically be transferred to the following year's Transition to Zero Emission Buses program budget.

This multi-year project is for the transition from diesel buses to electric battery and/or hydrogen fuel cell buses. The transition begins with a Pilot Project and the purchase of electric buses plus charging infrastructure to identify the appropriate technology and infrastructure to support a transition to a zero-emission bus fleet.

TRANSIT - TRANSIT SYSTEM FUND

Transition to Zero Emission Buses (continued):

As part of the transition plan, the project also includes the purchase of diesel buses for the replacement of buses that have reached the end of their useful life. Costs include all outfitting costs associated with these purchases.

	2023	2024	2025	2026	2027	2028
Forecasted Number of Zero Emission Buses Included in Budget and Forecast above **		18	18	53	20	22
Forecasted Number of Diesel Buses Included in Budget and Forecast above **	30	15	15	15		
Total	30	33	33	68	20	22

Includes 2 temporary capital funded full-time equivalent (FTE) positions including 1 Coordinator Contracts, 1 Project Manager, and a shared temporary Program Manager for the Investing in Canada Infrastructure Program (ICIP) projects.

Estimated useful life - 18 years.

With the adoption of the 2023 Capital Budget, Council authorizes a first charge of up to \$31.0 million in 2023 or prior to the adoption of the 2024 capital budget.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

** The projection of the number of buses included in the budget is provided as an estimate only and is subject to change as the price per bus and model selected is based on a number of factors. These factors include the movement in the Statistics Canada Monthly Industrial Product Price Index which is influenced by the fluctuation in the Canadian currency and inflation, the timing of order placement in relation to the budget approval, operational requirements and changes to technology or product development.

On April 29, 2021, Council approved this project be submitted for consideration to the Investing in Canada Infrastructure Program (ICIP) funding. Delivery of the project was contingent on receiving approval under this program. In November 2022, the City received notification that this project was approved for funding under the ICIP.

Operating costs reflect the estimated net amount of savings in diesel fuel and maintenance, offset by added costs from incremental salaries, maintenance and other expenses needed to support the new zero emission fleet. This project will require 5.3 additional operating full-time equivalents to maintain the new infrastructure. These amounts have not yet been reviewed by Council and are subject to change during future budget processes.

Future operating budget impacts, following project completion, may need to be adjusted.

Class Estimate: Not applicable

The Southwest Rapid Transitway (Stage 2) and Pembina Highway Underpass (SWRT) was approved by Council on June 25, 2014, using a Public Private Partnership (P3) approach and the transitway opened on April 12, 2020.

The City will make on-going lease payments to Plenary Roads Winnipeg Transitway LP (PRW) extending until 2049. These payments are required under a 30-year contract with PRW and cover the remaining capital cost of the Transitway as well as on-going maintenance.

There are significant provisions in the contract to ensure the City's specifications are met and the facility is returned to the City in good condition at the end of the contract. Costs associated with monitoring this contract, including the salary recovery of the Senior Project Review/P3 Specialist and other P3 costs are also included in this budget. Non-performance deductions may occur where the City's specifications are not met.

A portion of the payment to PRW represents an annual amount dedicated to the maintenance of the Transitway, including long-term rehabilitative costs. This amount is adjusted for changes to the Consumer Price Index on an annual basis.

TRANSIT - TRANSIT SYSTEM FUND

Southwest Rapid Transitway (Stage 2) and Pembina Highway Underpass (continued):

The above annual estimates relate to the maintenance phase of the project and include the authorization for the lease payments, debt servicing, and other charges related to the facility.

On March 22, 2016, Council authorized a first charge of up to 30% of the annual lease payments prior to the adoption of annual capital budget in the event the capital budget is adopted after December 31, in order to facilitate payments on the P3 contract.

In accordance with By-law 8164/2002 where the City's capital budget has not been adopted before January 1 of the year to which the budget is applicable, the Chief Administrative Officer is authorized, before the adoption of the capital budget, to approve expenditures not exceeding 30% of the amount the City of Winnipeg is contractually obligated to pay annually in respect of Public-Private Partnerships, as a first charge against the General Capital Fund.

On April 29, 2021, Council approved that effective January 1, 2024, the funding source for the Southwest Rapid Transitway (Stage 2) and Pembina Highway Underpass Payment Reserve be changed from 10 years of dedicated annual 0.33% property tax increase (2016 - 2025) to eight years (2016 - 2023).

As financing and administration costs are implicit in the lease payments, this project is exempt from the Corporate Administration and interest charges.

This project will see the replacement of existing bus radio hardware, equipment, and Intelligent Transportation Systems (ITS). The project will include replacement of radios on the entire Transit fleet currently approaching the end of useful life.

Includes 10 temporary capital funded full-time equivalent (FTE) positions - 7 of these are for system development and testing (including 1 Business Analyst, 1 Researcher, 1 Project Manager, 3 Software Developers, and 1 ITS Tester), and 3 FTEs for installation (including 2 Radio Installer and 1 ITS Installer) and a shared temporary Program Manager for the Investing in Canada Infrastructure Program (ICIP) projects.

This project has been approved for funding under the Investing in Canada Infrastructure Program (ICIP).

With the adoption of the 2023 Capital Budget, Council authorizes a first charge of up to \$1.013 million in 2023 or prior to the adoption of the 2024 capital budget.

Operating costs reflect incremental increase of P25 Radios Opex (operating expenditures) and fiber optic connection charges, plus salaries to support the new system partially offset by existing budgeted amounts for radio maintenance. This project will require 4.2 additional operating FTEs to maintain the new infrastructure. These amounts have not yet been reviewed by Council and are subject to change during future budget processes.

Future operating budget impacts, following project completion, may need to be adjusted.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The proposed project will see the replacement of Winnipeg Transit's existing North Garage, currently located at 1520 Main Street, to a new location. The project includes the development of an energy efficient bus storage and maintenance facility with increased bus capacity, designed to facilitate the transition to a zero-emission bus fleet.

TRANSIT - TRANSIT SYSTEM FUND

North Garage Replacement (continued):

Debt and finance charges will be funded from the Transit Infrastructure Reserve and are not shown in the Net Operating Impact table above.

Includes 1 temporary capital funded full-time equivalent (FTE) Project Manager/Project Delivery Office Manager position and a shared temporary Program Manager for the Investing in Canada Infrastructure Program (ICIP) projects.

Major benefits of replacing the North Garage include:

- Support the transition to a zero-emission bus fleet
- Maintain essential level of service
- Improve bus storage capacity
- Improve health and safety of staff

Significant risks of constructing the project:

- Acquisition of land
- Resource availability
- Change in market conditions
- Funding agreement approvals/delays

Significant risks of not constructing or deferring the project:

- Inability to meet new / updated building regulations
- Inability to maintain essential level of service
- Inability to accommodate future growth

On April 29, 2021, Council approved this project be submitted for consideration to the Investing in Canada Infrastructure Program (ICIP) funding. Delivery of the project was contingent on receiving approval under this program. In December 2022, the City received notification that this project was approved for funding under the ICIP.

A class 3 estimate will be achieved prior to construction beginning.

Standard corporate and departmental administrative charges have not been applied to this major capital project.

Operating costs reflect the estimated incremental amounts for the new garage including utilities, building maintenance, and salaries. These amounts have not yet been reviewed by Council and are subject to change during future budget processes. This project will require 28.5 additional operating FTEs to maintain the new infrastructure.

Future operating budget impacts, following project completion, may need to be adjusted.

This program will support the Winnipeg Transit Master Plan complete redesign of the transit network city-wide. In the proposed new transit network, several new routes will require dedicated bus loops, stations, mobility hubs, comfort stations for bus operators, and new traffic signals where buses/ riders will be turning onto or crossing major arterial streets. This project also includes public engagement, communications, and marketing to ensure Winnipeg Transit customers and the broader public are aware and can provide input on the proposed changes and their impacts. This project also funds installation and removal of bus stop signs and other similar elements required to transition the city-wide transit network.

This program also includes \$2.4 million towards active transportation project improvements that provide connectivity to transit routes and rapid transit stations and may include phase two of the Northwest Hydro Corridor Active Transportation Project.

Includes 1 temporary capital funded full-time equivalent Project Manager position and a shared temporary Program Manager for the Investing in Canada Infrastructure Program projects.

This project has been approved for funding under the Investing in Canada Infrastructure Program.

Future operating budget impacts, following project completion, may need to be adjusted.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The Winnipeg Transit Master Plan has identified and prioritized the future rapid transit corridors that will support a 25-year vision for Winnipeg Transit. This preliminary design will define the project scope, alignment and a design that will support a class 3 estimate for the proposed downtown corridors.

Includes 1 temporary capital funded full-time equivalent Project Manager position and a shared temporary Program Manager for the Investing in Canada Infrastructure Program projects.

This project has been approved for funding under the Investing in Canada Infrastructure Program.

This program will support the retro fit of wheelchair securements on existing buses purchased before 2021.

Beginning in 2021 all new buses received will be equipped with wheelchair securements that will meet the Accessibility for Manitobans Act (AMA) regulations. The AMA is proposed provincial legislation which mandates accessibility regulations that are not elective and must be met. The transportation regulations themselves are currently in development, and are expected to be issued soon.

This retrofit project, in addition to making the ride safer for all passengers including the most vulnerable, would allow customers to use both Winnipeg Transit Plus and conventional transit together to complete a trip. This approach is expected to provide more independence and flexibility for customers.

Includes 3 temporary capital funded full-time equivalent positions including 1 Bus Exterior Repairer, 1 General Helper, 1 Mechanic, and a shared temporary Program Manager for the Investing in Canada Infrastructure Program projects.

This project has been approved for funding under the Investing in Canada Infrastructure Program.

Incremental operating costs cannot be estimated at this time and will be included when known.

This project will facilitate the transition of between 22% to 30% of the Transit Plus service currently provided by contractors to being provided by in-house resources and includes, but is not limited to, the purchase of vehicles and outfitting, software system changes/licences, plant and equipment tooling and other set up and transition costs. This capital budget does not include funding for the provision of long-term storage for the vehicles.

On December 15, 2021, Council authorized a first charge in the amount of \$9.25 million in 2022 or prior to the adoption of the 2023 capital budget.

Includes 2 temporary capital funded full-time equivalent positions including 1 Systems Analyst and 1 Project Manager.

The operating costs reflect the estimated incremental amounts of providing 30% of the Transit Plus service using in-house resources including salaries and benefits, on-going training and fleet costs including fuel, maintenance and insurance. Costs are partially offset by savings in contractor costs. As the transition date, scope of change and implementation plan are as yet unknown, the operating costs and FTE requirements are preliminary estimates only. Future capital and operating budget impacts will need to be adjusted. The operating costs have not yet been reviewed by Council and are subject to change during future budget processes.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The Shoal Lake Aqueduct, which has been in continuous service since 1919, delivers water to Winnipeg from Shoal Lake, a distance of 156 kilometers (97 miles).

Funds are for condition assessment and rehabilitation work identified through on-going monitoring and inspection programs. Work identified to date includes rehabilitation of the aqueduct pipe, berm, and underdrain system, rehabilitation of the drainage siphons crossing under the aqueduct, vegetation management, and the rehabilitation/replacement of select boathouses, overflow structures, bar screens, stop logs, vent pipes, manholes, culverts, ditches, bridging structures and railway crossings signals.

The expected life of the assets is 40 years.

Individual projects within this program will be revised to class 3 estimates through preliminary engineering prior to construction.

Funding in 2023 includes \$1.0 million rebudgeted from capital budget authorized in 2018 and 2021 - see Appendix 4.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The Shoal Lake Aqueduct, which has been in continuous service since 1919, is the sole water supply infrastructure for the City. The Shoal Lake Intake Structure is the transition headworks to receive water from Shoal Lake and to control the water flow into the aqueduct. Given the critical nature of the intake structure and its associated venturi structure to the safe operation of the aqueduct and the City's water supply, a condition assessment was undertaken in 2012 and identified a number of rehabilitation and replacement requirements. This included the replacement and refurbishment of various mechanical components that date back to the original construction, upgrades to the mussel control system, as well as upgrades and improvements to the existing infrastructure. The recommended improvements will be completed in phases according to priority.

Individual projects within this program will be revised to class 3 estimates through preliminary engineering prior to construction.

The expected life of the assets is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The Branch I and II Aqueducts, along with the Branch Interconnection Aqueduct are specialized pipes which are unique in size, materials, construction techniques and failure modes. The Branch I Aqueduct was installed between 1914 to 1918 and the Branch II and Interconnection Aqueducts were installed between 1959 and 1963. All of these require specialized inspection, testing, and maintenance to preserve the asset.

Funds are for the condition assessment and rehabilitation of the Branch and Interconnection Aqueducts along with their associated ancillaries.

Individual projects within this program will be revised to class 3 estimates through preliminary engineering prior to construction.

The expected life of the assets is 40 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The Tache Booster Pumping Station, on the Branch 1 Aqueduct, was constructed in 1950 in order to develop the full capacity of the aqueduct. A study in 2017 identified a number of required upgrades to the pumping station and the aqueduct surge tower adjacent to the station. The work includes upgrading the station's electrical, heating and ventilation systems, upgrading the foundation and roof structures, and upgrading and reconfiguring the valve and piping system between the pumping station and the surge tower. Also, aesthetic, security fencing, and landscaping upgrades to the site and facilities will be undertaken to integrate with the proposed residential redevelopment of the surrounding area.

The expected life of the structural upgrades are 50 years and the expected life of the electrical and mechanical components are 25 years.

WATER AND WASTE - WATERWORKS SYSTEM FUND

The Drinking Water Quality Strategy Project, completed in 2012, has determined that chlorination at the existing pumping stations should continue in order to maintain a chlorine residual in the distribution system. The existing chlorination system uses chlorine gas, which is a hazardous chemical.

Funds are for the design and installation of a new chlorine system or for the existing system to be upgraded in order to reduce risks.

Detailed design work will provide a class 3 estimate prior to construction.

Annual operating costs of \$30,000 starting in 2026 are for additional monthly maintenance inspections and increased natural gas and electricity for ventilation of chlorine environments when occupied, and have been included in the operating budget.

The expected life of these assets is 25 years.

A drinking water system infrastructure assessment is required under the Provincial Drinking Water Safety Act. The objective of the report is to carry out an onsite evaluation to identify, analyze, and mitigate any potential adverse health risks and environmental impacts associated with the water system in a "source to tap" methodology. This work will also determine whether the water system's source, facilities, equipment, and operations are effective in producing safe drinking water, and meet current regulations.

Infrastructure assessment reports are required on a five-year reporting frequency.

The Deacon Reservoir is used to supplement the City's water supply when the daily demand exceeds the capacity of the Shoal Lake Aqueduct and to provide water during Shoal Lake Aqueduct shutdowns. A topographic survey of the top of the reservoir dikes found some top of dike elevations that were substantially lower than design elevations. Geotechnical testing was completed and found that the dike fill remains well compacted and consolidation of the soils below the dikes is ongoing but is slowing over time. Based on existing water demands and the operational strategy of the reservoir, consolidation will continue to be monitored through dike surveys and any dike raises will be deferred until water demands increase.

Preliminary design work will provide a class 3 estimate prior to construction.

The expected life of this asset is 50 years.

Detailed Design & Construction	550	2,150				

The in-town pumping stations supply 100% of the City's daily water use. Accurate flow measurement of water leaving the pumping stations is critical to the operation of the water distribution system. Due to age and lack of hardware support, the accuracy of the existing meters is not within an acceptable range.

Funds are to replace the meters and provide a means of secondary measurement.

The expected life of this asset is 25 years.

Programmable Logic Controllers (PLCs) are specialized hardware with customized software that provide local control of systems and processes at the Winnipeg Drinking Water Treatment Plant. The PLCs currently in use at the Winnipeg Drinking Water Treatment Plant have reached industry standard for replacement and are in the process of being discontinued by their manufacturer. To ensure a continuous supply of water to the City of Winnipeg, the PLCs will need to be replaced. Communication hardware associated with the PLCs is nearing end of life and will need to be replaced.

The expected service life of the PLCs is 10 years but will depend on technical advancement in the process automation field.

The Winnipeg Drinking Water Treatment Plant provides treated drinking water to the City of Winnipeg. The continued upkeep and maintenance of the Winnipeg Drinking Water Treatment Plant's assets is required to ensure a continuous supply of water. An asset refurbishment and replacement plan has been developed to address asset lifecycle issues at the water treatment plant as they arise.

Condition assessment of the water treatment plant assets is ongoing and the asset refurbishment and replacement program will address items as they are identified and prioritized.

Individual projects within this program will be revised to class 3 estimates through preliminary engineering prior to construction.

The estimated life of a rehabilitated asset ranges from 20 to 80 years, depending on asset type, condition, and the rehabilitation method used.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The Greater Winnipeg Water District (GWWD) Railway line, which parallels the Shoal Lake Aqueduct from Winnipeg to Shoal Lake, provides access for maintenance of the Aqueduct along its entire length. It also allows for delivery of vital goods and services to the Shoal Lake Aqueduct Intake Facility and the Winnipeg Drinking Water Treatment Plant that protect the quality and safety of the City's water supply. Capital upgrades are required to the railway and associated appurtenances in order to ensure its continued reliable operation.

The expected life of this asset is 50 years.

Maintaining the condition and performance of electrical equipment is vital to the safe and continuous supply, treatment, and distribution of drinking water for the City of Winnipeg. Electrical inspections will be undertaken in a phased approach at the City's various water facilities to test and assess the condition and performance of critical electrical equipment. Extensive repairs or upgrades that are identified in the inspections will be subject to future capital requests.

Power quality monitoring at the Winnipeg Drinking Water Treatment Plant has also identified the need for a comprehensive grounding study for the facility and items that could lead to equipment issues. An investigation and recommendations for mitigation strategies will be undertaken.

Additional funds may be required in future years to implement the recommendations of this inspection and study.

The expected life of the assets is 40 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Filtered water produced by the Winnipeg Drinking Water Treatment Plant undergoes final treatment by ultraviolet (UV) light at the Deacon Booster Pumping Station before being delivered to the City's water distribution system. The UV light disinfection system is an integral part of the treatment process to remove pathogens. A 2016 assessment report recommended upgrades based on current research to optimize the efficiency of system components that have reached end of life to continue maintaining effective UV light disinfection.

The expected life of this asset is 20 years.

The City's Regional Water Distribution System consists of three regional pumping stations (MacLean, McPhillips, and Hurst) and two booster pumping stations (Deacon Booster Pumping Station and Tache Booster Pumping Station). These pumping stations are critical infrastructure for the City and failure of any of the systems at these facilities has the potential to disrupt the City's residential, commercial, industrial, and fire protection water supplies.

The MacLean, McPhillips, Hurst, and Deacon Booster pumping stations require cooling upgrades to ensure continued operation.

The estimated life of the assets is 20 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

This project includes the detailed design and construction of a water feeder main extension, a new sewer lift station and force main connection to the Inkster Interceptor, as well as land acquisition and administrative costs.

Work will be separated into phases to provide servicing for the area as development occurs. Included in this project is a temporary full-time equivalent (FTE) Senior Project Manager position for the duration of the project. The position will be funded through capital, 75% from the Sewage Disposal System Fund, 25% from the Waterworks System Fund.

Total funding in 2023 includes \$20.0 million funded by the Manitoba Strategic Infrastructure Funding and an additional \$20.0 million related to the Federal Government's share of the project. The Province of Manitoba has committed to pay this funding if the Federal Government does not confirm their share. This project is conditional on the approval of the Provincial budget in 2023.

All funding for this project is split 25% to Waterworks System Fund and 75% to Sewage Disposal System Fund.

Forecasted operating costs include general inspections, equipment removal and overhaul, minor repairs to electrical/process mechanical/mechanical/structural. These amounts have not yet been reviewed by Council and are subject to change during future budget processes.

The expected life of the assets is 75 years.

Feeder mains are specialized large diameter pipes used to convey drinking water throughout the City. The majority of feeder mains were installed in the 1960s and require inspection, testing, and maintenance to preserve the asset. Funds are for condition assessment and rehabilitation work, including structural assessments, inspections, purchase of testing equipment, replacement of valves and related components, structural repairs, valve chamber rehabilitation, and restoration works.

Condition assessments of the feeder mains are ongoing and the feeder main condition assessment and rehabilitation program will address items as they are identified and prioritized.

The estimated life of a rehabilitated asset ranges from 20 to 80 years, depending on asset type, condition, and the rehabilitation method used.

Individual projects within this program will be revised to class 3 estimates through preliminary engineering prior to construction.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The majority of the City's inventory of water meters are at end of life. Funding in previous years will be used to review current water meter technology, validate the best replacement technology, and develop a plan and class 3 estimate for implementation of a multi-year direct-read water meter replacement program.

Implementation of the water meter renewal project is forecast to be funded by the Water Meter Renewal Reserve fund starting in 2025. On January 30, 2020, Council authorized the establishment of the Water Meter Renewal Reserve. The reserve will accumulate funds for replacement and renewal of aging water meters and an advanced meter system.

This project may include a maximum of 1 temporary capital funded full-time equivalents.

The estimated life of a water meter is 15 years.

This is a continuing program to replace and/or rehabilitate deteriorating water main infrastructure. Funding is used for water main replacement, cathodic protection, valve and hydrant replacement/rehabilitation, correction of dead end mains, upgrading of substandard mains, water system studies, assessments, development of design standards and replacement of problem water services within the City right-of-way, and hydraulic improvements for fire protection purposes. Funding is also used for integrated right-of-way renewal programs coordinated with the Public Works Department.

The expected remaining life of each rehabilitated water main ranges from 20 to 80 years, depending on the rehabilitation technology and the asset condition.

Funds will also be utilized to manage the water infrastructure asset register, and ongoing operating costs associated with software licensing and maintenance have been included in the operating budget.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Customer Care and Billing (CCB) is used to manage customer accounts and collections for Water, Wastewater and Solid Waste services. Work Order and Asset Management (WAM) is used in the delivery of Water and Wastewater services for work planning, management, infrastructure preventative maintenance and renewal programs. Both CCB and WAM require ongoing product updates to ensure these systems can support the day-to-day operations within the Water and Waste Department.

This program will maintain the CCB and WAM systems to meet current and future business requirements resulting from functional, technical, and business continuity changes.

This project may include a maximum of 2 temporary capital funded full-time equivalents (FTEs) shared between Waterworks System and Sewage Disposal funds.

Funding in 2023 includes \$1.5 million rebudgeted from capital budget authorized in 2018, 2019 and 2020 - see Appendix 4.

The estimated life of the assets is 10 years.

Funding and FTEs for this program are split between the Waterworks System Fund and the Sewage Disposal System Fund.

*N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Class Estimate: Not applicable, as this is a program

This program will integrate various applications and data sources at the Water and Waste Department to be able to connect information across systems and to obtain a single source of truth. This will expand service delivery capabilities, improve access to and sharing of data and information, and enable new applications and technologies to provide superior utility service to customers.

Funding in 2023 includes \$250,000 rebudgeted from capital budget authorized in 2020 - see Appendix 4.

The estimated life of the assets is 10 years.

*N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

WATER AND WASTE - WATERWORKS SYSTEM FUND

Class Estimate: Not applicable, as this is a program

This program will develop and implement technology solutions that can be leveraged by plant and field employees to perform their work more effectively and efficiently, and provide timely information to the public and 311. This will increase productivity by reducing manual effort, improve accessibility to information, improve accuracy and quality of information, reduce time to record and retrieve information, improve communication, and improve customer service and experience.

Funding in 2023 includes \$1.2 million rebudgeted from capital budget authorized in 2020 and 2021 - see Appendix 4.

The estimated life of the assets is 10 years.

*N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The former sludge drying beds in West St. Paul are no longer being used for storage. Decommissioning the sludge drying beds is a condition of closing the Environment Act Licence 1089 E RR. This work will develop a class 3 estimate for a decommissioning plan and identify options for future use.

Additional funds may be required in future years to implement the recommendations of this plan.

Class Estimate: Not applicable, as this is a program

The Water and Waste Department's three sewage treatment plants utilize a Distributed Control System (DCS) with a Human Machine Interface (HMI) for process control. It is an intricate network of specialized computers that monitor thousands of sensors throughout the plants and controls the treatment processes by making calculations and adjustments prescribed by operators and process control analysts.

An Automation Master Plan was developed for the sewage treatment plants in 2012. The DCS system will be replaced with a Programmable Logic Controller (PLC) based system and a new HMI system will be installed at all three treatment plants. The replacement of the DCS and HMI systems at the North End and South End Sewage Treatment Plants are part of the major capital upgrade projects at these facilities.

This program will develop a plan to ensure operational reliability throughout the upgrades and in the long term once the upgrades are complete. The major components of this program include: maintaining the DCS and HMI systems until replacement, upgrading the inter-plant communication systems and network security components, and replacement of the West End Sewage Treatment Plant DCS and HMI systems.

Funding in 2023 includes \$750,000 rebudgeted from capital budget authorized in 2018 - see Appendix 4. An additional \$750,000 from 2018 authorized capital budget was returned to Retained Earnings for redistribution in 2025.

The class estimate will be refined to a class 3 prior to undertaking upgrades.

The expected life of the assets is 10 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

A risk and criticality review of the City's three sewage treatment plants has been undertaken to assess the condition of assets and to develop a refurbishment and replacement plan for the next 25 years. The improvements identified will address process reliability, mechanical, electrical, structural components, building envelope, and safety at all three locations including any related works required such as environmental studies/assessments or decommissioning of assets. Operational efficiency improvements will also be identified and implemented in a coordinated fashion with the enhanced maintenance program.

Asset assessment and plan development are ongoing, which will continue to address items as identified. Class estimates for individual projects within this program will be revised to class 3 through preliminary engineering prior to construction.

The expected life of the structural components are 50 years and the expected life of the electrical and mechanical components are 25 years.

On January 26, 2023, Council authorized a first charge of up to \$2.0 million prior to the adoption of the 2023 capital budget to allow for the award of contracts to ensure timely delivery of projects in this program.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The Province is seeking to reduce nutrient loadings to Lake Winnipeg to reduce the associated algae blooms. The Province has placed a reduced nutrient loading on the North End Water Pollution Control Centre (NEWPCC)'s operating licence; this includes new limits for phosphorous and nitrogen. The NEWPCC Upgrade: Nutrient Removal Facilities project will address the regulatory requirements and end of life equipment. The project includes an intermediate pumping station, biological nutrient removal reactors and clarifiers, upgrades to the ultraviolet disinfection system and wet weather treatment system.

On January 26, 2023, Council approved the NEWPCC Upgrade - Nutrient Removal Facilities project as a 2022 capital project with a class 3 estimate of \$3.0 million in 2022 and \$15.0 million in 2023.

The initial \$18.0 million will be used to update the preliminary design and cost estimate, determine the appropriate procurement methodology and commence procurement of the project. The remainder of the project funding is currently unfunded. Any budget increases resulting from the initial phase of work will be referred to the budget process.

The major benefits of constructing this project include ensuring regulatory compliance and maintaining essential level of service.

Significant risks associated with constructing this project include funding agreement approvals, project delay and the current volatile global market.

Significant risks of not constructing the project or deferring the project include inability to meet new regulations and inability to maintain essential level of service.

Approval of funding for the remaining works is conditional subject to securing Federal and Provincial Funding.

The expected life of the structural upgrades is 50 years, the expected life of the electrical and mechanical components is 25 years, and the expected life for technology assets is 10 years.

As part of the Canadian Standards Association Occupational Health and Safety Program, a standard entitled CSA Z462, Workplace Electrical Safety Standard has been adopted within the new Canadian Electrical Code.

The program will implement the recommendations from the Arc Flash Study on a priority/risk basis in conjunction with other electrical upgrades at the Department's facilities. This work includes decreasing the potential arc flash energy at various distribution points, upgrading equipment to lower fault energies, procuring personal protective equipment, and providing training. This is for compliance to the arc flash requirements in the electrical code. The Arc Flash Study was initially completed in 2011 and must be updated every five years.

The expected life of the assets is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

This program is for the condition assessment, rehabilitation and/or replacement of the sewer river crossings, and for the installation of leak detection equipment on the existing waterway crossings.

The department has completed a risk assessment of all river crossings in order to determine a prioritization plan for ongoing condition assessment as well as to upgrade and replace any at-risk crossings as required by Environment Licences issued by the Province of Manitoba for the wastewater collection system in the City of Winnipeg.

These funds will also be used to install continuous leak detection monitoring equipment at river crossings as required by the Provincial Environmental Licence.

A class 3 estimate will be obtained prior to construction or inspection work.

*N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Class Estimate: Not applicable, as this is a program

The Combined Sewer Overflow (CSO) and Basement Flood Management Strategy projects will be driven by the CSO Master Plan, which was approved by the Province on November 13, 2019, developed to meet the requirements of Environment Act Licence No. 3042. The objectives of this multi-year program are to comply with the regulations to mitigate the impact of CSO's on the local water courses and improve basement flooding protection.

Funds budgeted are for the development and implementation of a CSO Master Plan as well as for sewer relief works associated with basement flooding and CSO mitigation including sewers, chambers, weirs, and other related works. Funds are also budgeted for monitoring and reporting programs as well as systems, pilot studies, land acquisition, and integration with other major sewer programs.

As part of the 2022 capital budget process, funding was adjusted to reflect the Council Notice of Motion on April 29, 2021, which increased the CSO program budget by 50% annually in 2024-2027 to expedite the work.

This program may include a maximum of 3 temporary capital funded full-time equivalents.

All projects within the program will be updated to a class 3 estimate through preliminary and detailed design prior to any construction work.

The expected life of the sewers is 50 years, mechanical components is 25 years and Supervisory Control and Data Acquisition system is 10 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Authorization (\$000's)						
Detailed Design & Construction	1,000	4,000	35,000	20,000	35,000	

Currently, all sewage from the land in Winnipeg south of Bishop Grandin Boulevard and west of the Red River plus the communities of Lindenwoods and Whyte Ridge flow to the South End Sewage Treatment Plant (SEWPCC). This flow crosses the Red River between the Fort Garry bridges; at this location the D'Arcy lift station raises the sewage to a sufficient height to allow it to flow by gravity under the Red River.

This crossing represents a single point of failure. If there is a failure of the lift station or the siphon, there is a substantial risk of basement flooding and/or overflows to the Red River. System redundancy is required to convey flows to the treatment plant in the event of a failure of either D'Arcy lift station or the associated siphons. Also, due to the high wet weather flows experienced at the D'Arcy lift station, the additional system capacity will reduce the risk of basement flooding and overflows to the river.

The Southwest Interceptor will provide an additional river crossing of the Red River. A conceptual study will be undertaken to review options and sizing. The project will be broken up into phases; the total cost of the project is estimated at \$96.3 million.

The budget in 2023 may be utilized for land acquisition as required.

The class estimate will be refined to a class 3 prior to construction.

WATER AND WASTE - SEWAGE DISPOSAL SYSTEM FUND

Southwest Interceptor (continued):

The major benefits of constructing this project include enabling growth in south-west Winnipeg and maintaining essential level of service.

Significant risks associated with constructing this project include unknown ground conditions and construction of a river crossing.

Significant risks of not constructing the project or deferring the project include inability to accommodate future growth and inability to maintain essential level of service.

The expected life of this asset is 75 years.

Environmental Standards Division operates a Canadian Association for Laboratory Accreditation (CALA) accredited laboratory for testing, monitoring, and compliance reporting on behalf of the Water and Waste Department. To ensure the laboratory can continue to stay up-to-date with CALA accreditation standards, meet future regulatory monitoring and reporting requirements, and accommodate the increasing demands of the laboratory's internal clients, a new facility plan is required. The plan will also investigate options to bring additional testing in-house with further accreditation requirements.

Additional funds will be required in future years to implement the recommendations of this plan.

The Supervisory Control and Data Acquisition System (SCADA) provides operational information for the City's sewer collection system (pumps, valves, gates etc.). This work will upgrade the communication system so that it can provide real-time information for sewer system operation and monitoring.

Operating costs are for wireless service communications fees. These amounts have not yet been reviewed by Council and are subject to change during future budget processes.

The expected life of this asset is 10 years.

Class Estimate: 3

Currently all of the land in Winnipeg south of Bishop Grandin Boulevard and west of the Red River plus the communities of Lindenwoods and Whyte Ridge are serviced by the D'Arcy Wastewater Lift Station located at the Red River and the Fort Garry Bridge.

During high water events on the Red River, if pump capacity is lost at the South End Sewage Treatment Plant (SEWPCC) the risk to basement flooding is substantial. To mitigate this risk, the D'Arcy Wastewater Lift Station needs to be reconfigured to allow the use of lift pumps to pump flows to the Red River during emergency situations.

The estimated life of this asset is 50 years.

Vacuum trucks are specifically designed trucks that periodically assist in cleaning underground sewers and catch basins. These vehicles then transport the solids/trash/debris material that has built up in sewers to Brady Road Resource Management Facility for disposal. In order to meet the liquid waste definition from the licence for Brady Road Resource Management Facility, Licence No 3081 R, the vacuum truck materials must meet specific criteria for disposal. This project includes a feasibility study (2023), interim solution (2024), and design and construction of a dedicated facility (2028) to dewater material from vacuum trucks prior to disposal.

All projects will be updated to a class 3 estimate through preliminary and detailed design prior to any construction work.

This project will result in operation and maintenance costs that have yet to be defined through preliminary design.

The estimated life of this asset will be determined during the feasibility study.

Class Estimate: 3

This project includes the detailed design and construction of a water feeder main extension, a new sewer lift station and force main connection to the Inkster Interceptor, as well as land acquisition and administrative costs.

Work will be separated into phases to provide servicing for the area as development occurs. Included in this project is a temporary full-time equivalent (FTE) Senior Project Manager position for the duration of the project. The position will be funded through capital, 75% from the Sewage Disposal System Fund, 25% from the Waterworks System Fund.

Total funding in 2023 includes \$20.0 million funded by the Manitoba Strategic Infrastructure Funding and an additional \$20.0 million related to the Federal Government's share of the project. The Province of Manitoba has committed to pay this funding if the Federal Government does not confirm their share. This project is conditional on the approval of the Provincial budget in 2023.

All funding for this project is split 25% to Waterworks System Fund and 75% to Sewage Disposal System Fund.

Forecasted operating costs include general inspections, equipment removal and overhaul, minor repairs to electrical/process mechanical/mechanical/structural. These amounts have not yet been reviewed by Council and are subject to change during future budget processes.

The expected life of these assets is 75 years.

Class Estimate: Not applicable, as this is a program

This is a program to replace and/or rehabilitate combined, wastewater, and land drainage sewer infrastructure that are no longer meeting level of service objectives. A portion of the funding will be used for condition assessment of sewer assets; sewers will be replaced or rehabilitated using appropriate technologies on a risk-based level of service basis. Funds will also be utilized to update the sewer asset register, and ongoing operating costs associated with software licensing and maintenance have been included in the operating budget.

Funding will also be utilized for the assessment, repair and/or replacement, under certain conditions, of private wastewater sewer services within the public right-of-way under the Sewer By-Law, and for the development of wastewater and land drainage design standards.

The expected remaining life of each rehabilitated sewer ranges from 20 to 100 years, depending on the rehabilitation technology and the asset condition. The expected life of the asset register is 10 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Customer Care and Billing (CCB) is used to manage customer accounts and collections for Water, Wastewater, and Solid Waste services. Work Order and Asset Management (WAM) is used in the delivery of Water and Wastewater services for work planning, management, infrastructure preventative maintenance and renewal programs. Both CCB and WAM require ongoing product updates to ensure these systems can support the day-to-day operations within the Water and Waste Department.

This program will maintain the CCB and WAM systems to meet current and future business requirements resulting from functional, technical, and business continuity changes.

This project may include a maximum of 2 temporary capital funded full-time equivalents (FTEs) shared between the Waterworks System and Sewage Disposal funds.

Funding in 2023 includes \$1.5 million rebudgeted from capital budget authorized in 2018, 2019 and 2020 - see Appendix 4.

The estimated life of the assets is 10 years.

Funding and FTE's for this program are split between the Waterworks System Fund and the Sewage Disposal System Fund.

*N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Solid waste must be disposed of in engineered landfill cells under the conditions of the Environment Act Licence No. 3081 R. As the capacity of existing landfill cells is consumed, new cells and their supporting infrastructure must be designed and constructed. The funding identified provides for design, excavation, liners, leachate collection, associated surface and ground water management, access roads, and associated engineering work.

The expected life of the assets is 50 years.

On January 26, 2023, Council authorized a first charge of up to \$1.8 million prior to the adoption of the 2023 capital budget to allow for the award of contracts to ensure timely delivery of projects in this program.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The Closed Landfill Site Improvement program was initiated in 2016 as a response to the Landfill Disposition Study that prioritized projects to improve and upgrade closed landfill components, including the protective cap, leachate and landfill gas collection systems, and monitoring equipment.

The expected life of the assets is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

This is a program for all-season fabrication of soil to supplement city topsoil requirements. The soil fabrication process uses city residuals, such as biosolids, street sweepings from winter road operations (sand and grit), and woodchips to fabricate topsoil. This is then spread and seeded with native prairie species at the City landfills. Operations include ongoing environmental and vegetative monitoring.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Class Estimate: Not applicable, as this is a program

There is an obligation under the Province of Manitoba Environment Act Licence No. 3081 R for the Brady Road Resource Management Facility (BRRMF) to control odours leaving the landfill site. If the gas is not collected, objectionable odours may be experienced by the nearby neighbourhoods from the active filling area. Additionally, flammable gases will be released uncontrolled from the decomposing waste which may pose public health and safety risks. The Climate Change and Emissions Reductions Act requires the City to collect and destroy methane gas generated by the BRRMF, consistent with Provincial directives on greenhouse gas reduction and odour control.

The estimated life of the assets is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

WATER AND WASTE - SOLID WASTE DISPOSAL FUND

On October 19, 2011, Council adopted the Comprehensive Integrated Waste Management Strategy for implementation starting in 2012. The strategy includes a recommendation for Solid Waste Services to undertake a review, analysis and development of a roadmap of the City's solid waste systems every five years. The next review will take place in 2023.

WATER AND WASTE - SOLID WASTE DISPOSAL FUND

The work of this project includes an update to the Winnipeg Climate Action Plan to align with Net Zero Emission goals defined in OurWinnipeg 2045. Included in the update will be a Climate Resiliency Strategy and an update to the Green Building Policy. It is recommended that the plan be updated every 5 years. The previous plan was approved on September 20, 2018.

The scope of this project will address Solid Waste business needs through the design, development and implementation of technology solutions through the introduction of new systems and/or enhancement of existing Collections Management systems. Examples include integrating City systems with contractor systems, and developing tools to generate compliance, operational and financial reports and dashboards.

Funding in 2023 includes \$200,000 rebudgeted from the capital budget authorized in 2018 - see Appendix 4.

The expected life of this asset is 10 years.

WATER AND WASTE - LAND DRAINAGE UTILITY FUND

A 2007 report on the adequacy and operation of the City's regional flood pumping stations identified station upgrades required in the near and long term. These upgrades improve overall station reliability during high river levels and rainfall events and may include changes to ventilation, electrical, mechanical, structural, or architectural components of the stations and associated structures, chambers, weirs, outfall pipes, and gates. A program to address high priority reliability items has been developed for implementation. All stations will be upgraded for remote monitoring which is critical during flood and rainfall events.

The program includes the condition assessment of all flood pumping stations to establish rehabilitation priority and future funding requirements.

Class estimates for individual projects within this program will be revised to class 3 through preliminary engineering prior to construction.

The expected life of the assets is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

There are over 100 stormwater retention basins (SRBs) that the City maintains as part of the land drainage system. This program is utilized to replace aging and deteriorated infrastructure along the public shorelines and infrastructure associated with the SRBs of the City's lake system. Funding will also be utilized for the development of design standards for Naturalized SRBs.

Class estimates for individual projects within this program will be revised to class 3 through preliminary engineering prior to construction.

Funding in 2023 includes \$100,000 rebudgeted from capital budget authorized in 2018 - see Appendix 4.

The estimated life of the assets range from 15 to 50 years, depending on asset type, condition, and rehabilitation method used.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

An Outfall Condition Assessment was completed in 2019. This assessment prioritizes Winnipeg's outfall sites that require renewal/rehabilitation, identifies potential renewal/rehabilitation techniques for each outfall, and provides high level cost estimates for this work. The City will program and undertake risk-based work on a yearly basis to maximize use of funding for the rehabilitation of sewer outfalls, repairs to piping and related appurtenances, and to improve riverbank stability issues. Funds are also included for condition assessments and re-inspections, as required.

The expected life of the assets is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

All land drainage gate chambers have been upgraded to a protection level of 24.5 feet James Avenue. The current focus of this program is to upgrade existing gate chambers to meet minimum levels of service and install new gate chambers for flood control on both combined and separated sewer districts during high river level conditions. Under high river level (flood) conditions, the river water backs up into the land drainage and combined sewer systems. An engineering study has been undertaken to develop conceptual designs and cost estimates for adding flap gates and permanent pumping as required for some of the identified sites, and will be undertaken for remaining sites in future years.

Funds are also provisioned for the rehabilitation of sewer flap gates and associated structures to ensure that all systems are adequately protected from river water intrusion.

Class estimates for individual projects within this program will be revised to class 3 through preliminary engineering prior to construction.

The expected life of the assets is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The provision for development agreement paybacks is an allowance for the City to repay developers who bridge finance the installation of oversized underground infrastructure at the request of the City at a time when City capital funding is not provided. The policy framework for bridge financing the oversized services was defined in the Development Agreement Parameters, adopted by Council on July 17, 2002.

The expected life of the installed assets is over 50 years.

The Primary Dikes along the Primary Line of Defense (PLD) are a major component of the City of Winnipeg's flood protection system. The Primary Dikes were originally constructed as part of the flood fighting efforts in the 1950 flood and have been relied upon in subsequent years to provide comprehensive flood protection to large portions of the City. A risk assessment of the Primary Diking system within the PLD will be conducted to assess its current condition and ability to act as a base for temporary raises. The study will also provide recommendations on how to address any areas identified that may pose a risk to the City's flood protection.

Additional funds may be required in future years to implement the recommendations of this plan.

The expected life of this asset is 50 years.

This program funds fleet asset acquisitions which are based on the Winnipeg Fleet Management Agency (WFMA) 2023 to 2026 fleet replacement plan, and are subject to future revision due to WFMA and City department decisions and vendor availability. Fleet acquisitions in 2023 are estimated by fleet category as follows (in thousands of dollars):

- Construction Equipment \$1,366
- Light Duty Fleet \$5,956
- Specialty Equipment \$5,907
- Heavy Duty Fleet \$2,441

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The Winnipeg Fleet Management Agency (WFMA) offers three types of fuel at below market prices - unleaded gasoline, clear diesel, and marked diesel available at five fully automated 24/7 locations strategically located throughout the city. Fuel is managed using a charge-back system based on fuel consumption for each individual fleet vehicle. This program funds capital improvement expenditures to infrastructure at WFMA fuel sites.

This program supports the delivery of on-street and off-street enforcement of parking related by-laws, as well as enforcement related to the Vehicles For Hire by-law, by investing in technologies that allow for effective enforcement practices and increased compliance with by-laws. Capital funding is used to replace existing ALPR units that have reached end of life and the purchase of new inventory. The program also includes procurement of information technology hardware and software that supports ALPR systems, such as laptops.

Planned investments for 2023 include replacement /evergreening of two ALPR units and evergreening of laptops.

* N/A - No amounts have been included in the "Previous Budget" due to this program's ongoing nature.

The listing of grants/payments includes grants in the operating, capital, and reserves budgets. The operating grants/payments are separated into four categories (annual, long-term agreements, other programs and value in kind). The City can enter into one-year grant agreement with grant recipients.

Notes:

1. Service Purchase Agreements - see Glossary in appendices section of Volume 2 for definition.
2. Long Term Agreements/Obligations - see Glossary in appendices section of Volume 2 for definition.
3. Grant is recorded as an offset to the Property Tax and Business Tax Revenue.
4. Grant is recorded as an offset to the Refundable Entertainment Funding Tax Revenue.
5. 2022 budget restated to move 24-hour mobile outreach services and the public washroom program - peer support from Other Programs to Annual Grants.
6. The recipient(s) are unknown at this time.
7. 2023 Local Grants (Per Capital Grants) allocated based on the most recent population from 2021 Statistics Canada Census.

Total Indigenous Youth Strategy		1,125,000	1,125,000	1,375,000	1,375,000

* Infrastructure training/apprenticeship program (cash and in-kind services) – the City of Winnipeg 1/3 share of up to \$175,000 in the program is subject to 1/3 funding from the Province and 1/3 funding from the private sector.

Major Capital Projects

On October 28, 2015 Council concurred in the recommendation of the Executive Policy Committee and adopted the following:

- That an adjustment to the dollar value for the definition of a Major Capital Project for reporting to the Standing Policy Committee on Finance be approved from \$10 million to \$20 million to reflect construction inflation since Council originally adopted the policy in 1999.
- That the threshold for Major Capital Project reporting to the Standing Policy Committee on Finance be automatically revised annually for construction inflation and disclosed in the Annual Capital Budget put forward to Council for adoption.
- That the adjusted dollar value for reporting to Standing Policy Committee on Finance be applied on a prospective basis. Projects currently reporting that are under the revised threshold will continue reporting until the project is completed.

Year	Threshold (in millions)	Construction Inflation*	Revised Threshold after Inflation (in millions)
2020	\$24.1	3%	\$24.8
2021	\$24.8	3%	\$25.5
2022	\$25.5	3%	\$26.3

*Forecasted construction inflation is used to prepare the threshold for the following year.

For 2023 the Public Service has included a recommendation for Council to maintain the current Major Capital Projects threshold of \$25 million for the 2023 Budget and as an ongoing process direct the Public Service to provide for Council consideration, at the start of each new multi-year budget cycle, a revised threshold, if required, to be utilized for that entire multi-year budget cycle. Projects currently reporting that are under the threshold will continue reporting until the project is completed.

Projects \$25 million or greater are required to form a Major Capital Projects Advisory Committee within 180 calendar days of project authorization and begin reporting financial status to the Standing Policy Committee on Finance and Economic Development (SPC FED). Reporting is to be done on a quarterly basis, unless otherwise directed by SPC FED, until the project is complete. The SPC FED Committee may, at its discretion, request projects below this threshold to report to the Committee.

Listing of Major Capital Projects previously approved and active for 2023:

- 1) North End Sewage Treatment Plant (NEWPCC) Upgrade Projects: Power Supply and Headworks Facilities
- 2) South End Sewage Treatment Plant (SEWPCC) Upgrading and Expansion
- 3) Water Supervisory Control and Data Acquisition (SCADA) Upgrade and Expansion
- 4) North District Police Station (NDPS) & Archival and Exhibit Building
- 5) South Winnipeg Recreation Campus Phase One – Recreation Centre
- 6) St. Vital Bridge Rehabilitation
- 7) Transition to Zero Emission Buses
- 8) Transit North Garage Replacement
- 9) North End Sewage Treatment Plant (NEWPCC) Upgrade Projects: Biosolids Facilities

City of Winnipeg Cost Estimate Classification*

Cost Estimate Class	Project Definition	Project Definition/ Design % Complete	Accuracy of Cost Estimate
Class 5	Concept Screening, Rough Order of Magnitude Estimate	~1%	-50% to +100%
Class 4	Feasibility	~10%	-30% to +50%
Class 3	Preliminary Design (for Budget Authorization)	~30%	-20% to +30%
Class 2	Detailed Design in progress	~60%	-15% to +20%
Class 1	Detailed Design Documentation Complete, Pre-Tender Estimate	~99%	-10% to +15%

Class of Estimate Descriptions

- Class 5 Rough estimate prepared based on very limited information. Used to make an assessment of initial viability and for long range capital planning.
- Class 4 Estimates prepared based on limited information with some engineering work completed and preliminary scope determination.
- Class 3 Estimates based on completed preliminary design documentation. This Class 3 estimate will form the basis for budget authorization and set initial control estimate against which project deliverables will be measured (i.e. on budget).**
- Class 2 Estimates prepared in progressive detail from a Class 3 and are used to establish a contract value against which decisions can be made to revise the scope of the project and manage risk at a specific milestone in the design development.
- Class 1 Pre-tender estimates prepared based on completed detailed design documentation (i.e. drawings, plans, specifications, etc.) as well as complete project delivery plans.

* Determined using AACE International, Recommended Practices 17R-97, 18R-97, 56R-08, 97R-18 & 98R-18

Financing Sources:							
1 Cash to Capital	\$ 3,079	\$ 6,419	\$ 23,900	\$ 22,900	\$ 24,520	\$ 23,836	\$ 27,553
2 Canada Community-Building Fund	86,751	51,599	57,930	48,420	48,432	48,432	48,432
Total Financing Sources	\$ 89,830	\$ 58,018	\$ 81,830	\$ 71,320	\$ 72,952	\$ 72,268	\$ 75,985
Payments as a Percentage of Cash to Capital and Canada Community-Building Fund	25.76%	40.20%	30.16%	30.95%	30.41%	30.86%	29.54%

Notes:

- Public Private Partnership Payments include annual service/financing payments and debt servicing payments.
- On December 15, 2009, Council directed that the annual lease/service payments and debt servicing costs for tax supported public private partnerships be funded annually up to a maximum of 30% of the cash to capital contribution and the federal gas tax (Canada Community-Building Fund).
- On December 16, 2020, Council amended the P3 Policy to: If the funding of annual lease/service payments and debt servicing costs for tax supported public private partnerships exceeds 30% of cash to capital contribution and federal gas tax (Canada Community-Building Fund), no additional tax supported public private partnerships can be entered into until funding of annual lease/service payments and debt servicing costs for tax supported public private partnerships is reduced to a level below 30% of cash to capital contribution and Canada Community-Building Fund.
- The "Southwest Rapid Transitway (Stage 2) and Pembina Highway Underpass" capital project was approved by Council on June 25, 2014. As this is a Utility and Other project, it does not impact this Public Private Partnership Payments calculation.

42	Transit Plus In House Service ³	6,442					
43	Winnipeg Transit Master Plan (WTMP) Implementation Planning & Design	1,700					
Total Projects Financed by the Canada Community-Building Fund		51,599	57,930	48,420	48,432	48,432	48,432

1. 2024 includes \$1.232 million of surplus from the Canada Community-Building Fund Reserve. This funding is included in the Facilities Optimization - Waverley West Station project.

2. Funding of \$6.758 million for the Facility Optimization - Waverley West project was deferred from 2023 to 2024 due to changes in timing with the project.

3. The Federal Government provided a one-time top up in 2022 of \$44.396 million. \$37.954 million was allocated to various projects in the 2022 Adopted Budget. \$6.442 was allocated to Transit Plus In-House Service in the 2023 Budget.

Active Transportation Projects

(in thousands of \$)	2023	2024	2025	2026	2027	2028
Pedestrian and Cycling Program	1,890	1,651	1,683	2,321	2,899	3,000
Regional and Local Street Renewal						
Regional Street Renewal Program	3,410					
Active Transportation Infrastructure ⁴	4,000					
Local Street Renewal Program ⁵	3,900	3,600	3,600	3,600	5,000	5,000
Osborne Street Underpass			1,100			1,500
St. Vital Bridge Rehabilitation	4,370					
Elm Park Bridge Repairs						2,088
Primary Transit Network Infrastructure			2,400			
TOTAL	\$ 17,570	\$ 5,251	\$ 8,783	\$ 5,921	\$ 7,899	\$ 11,588

Notes:

1. On May 14, 2008, Council concurred in the recommendation that a policy be adopted to incorporate Active Transportation (AT) facilities into any reconstruction or rehabilitation required on any infrastructure identified as an AT facility in the Proposed Active Transportation Network.
2. The six-year AT investments in the 2023 Preliminary Budget and 2024 - 2028 Forecast total **\$57.0 million**. (2022 total = \$9.6 million / 6-year total = \$25 million)
3. The amounts above identify the budget dollars dedicated to AT facilities within the 2023 capital budget. Funding for the AT work is included within the total funding for the projects/programs noted.
4. Funding is for Keewatin Street - Burrows Avenue to Gallagher Avenue West.
5. Includes \$3 million funded by Frontage Levy.
6. There may be other AT projects included in the 2023 Capital Budget and 2024 - 2028 Five-year Forecast that could not be estimated at time of printing.

1	Regional and Local Street Renewal ³	29,100	9,800		
2	Urban Forest Renewal Program	2,717	5,819		
Community Services					
3	Library Facility Redevelopment - West Kildonan	1,471			
4	Recreation & Library Facility Investment Strategy	16,700	16,600		
5	Assiniboine Park Conservancy (APC) - Infrastructure and Sustainability	3,400	3,400		
Municipal Accommodations					
6	Health/Life Safety/Emergency Systems Refurbishment/City-wide Accessibility ⁴		93		
City Clerks					
7	City of Winnipeg Archives - The Winnipeg 150 Legacy Project		543		
Innovation and Technology					
8	Intake Program ⁵		145		
Transit⁶					
9	Transit Roof Replacement and Ventilation Upgrade		1,545		
10	Transition to Zero Emission Buses	16,257	7,155	12,665	13,639
11	Radios and Intelligent Transportation Systems (ITS) Replacement			4,493	
12	North Garage Replacement	10,665	28,798	20,711	672
13	Primary Transit Network Infrastructure			2,114	3,990
14	Rapid Transit (Downtown Corridors) Preliminary			376	1,840
15	Wheelchair Securements Retro-fit			2,687	1,151
Water and Waste					
16	CentrePort South (formerly Airport Area West) Water and Sewer Servicing ²		40,000		
Total Infrastructure Financed by the Province of Manitoba					
		80,310	113,898	37,869	19,488
					40,932

Capital Projects Funded by the Province of Manitoba Infrastructure Funding

1. The above listing identifies the funding in the 2022 Adopted Budget, the 2023 Preliminary Budget and the 2024 - 2028 Forecast. The table below provides a summary by funding sources included in the budget. There are no funding amounts included for 2027 and 2028.

Funding Sources (in thousands \$):	2022	2023	2024	2025	2026
Investing in Canada Infrastructure Program	21,110	35,953	37,869	19,488	40,932
Strategic Infrastructure Fund	30,100	48,145			
Accelerated Regional Roads	29,100	9,800			
Federal/Provincial		20,000			
	80,310	113,898	37,869	19,488	40,932

2. The variance is due to the inclusion of \$5.3 million in funding, previously unallocated and \$40.0 million for the Provinces/Federal share of funding for the CentrePort South (formerly Airport Area West) Water and Sewer Servicing project. \$20.0 million of City share was included in the 2022 Adopted Budget for Phase 1A work, conditional on funding of \$20.0 million from each of the Province and the Federal Government. \$40 million includes Provincial share of \$20 million and another \$20 million if the Federal Government does not provide approval. Provincial Funding is subject to approval of their 2023 Budget. The project is split 25% to Waterworks System and 75% to Sewage Disposal System.

3. To cover previous \$100.0 million commitment under the accelerated regional street renewal program.

4. Funding will be used for the purchase and installation of a pool accessibility lift and custom design and fabrication of a bariatric ladder at Elmwood-Kildonan pool.

5. Funding will be used to fund a capital investment planning solution.

6. Funding for Transit supports projects applied for through the tri-patriate Investing in Canada Infrastructure Program. Funding for projects in this program are shared by the City of Winnipeg, the Province of Manitoba and the Federal Government.

7. Shared Health Capital Grant information is not included.
